LITERATURE

The Life of David Roberts, R.A. Compiled from his Journals and other Sources, by James Ballantine. With Etchings and Facsimiles of Pen-and-Ink Sketches by the Artist. (Edinburgh, Black.)

"It is better to be born lucky than rich," is an old proverb, and it applies to me! These words form a portion of the entry which the late David Roberts made in his Journal, on Good Friday, 1839, as he sat at his quarters in the house of a Greek Christian, in Jerusalem, after visiting, in solemn spirit, but with artist's eye, the shrine to which every Christian heart in the world turns with affection, reverence and awe. When the above words were written Roberts had won the battle of life, and had conquered fortune. His name was a name of power in art. In his absence the Academy did itself the honour of making him an Associate, and his numberless admirers were speculating on the amount of pictorial wealth he would bring back with him out of the "splendour and havoc" of the East.

The old proverb, however, was not applicable to Roberts. He was born rich in two of the best gifts that Heaven can confer on man. He was endowed with natural talent and an insatiable appetite for work. But great ability and great industry cannot command success without opportunity. Of the latter, nothing ever presented itself to Roberts in the time of his hard fight for bread; but what did not present itself he made; or rather, and yet it is the same thing,—he recognized opportunity where less energetic spirits would have failed to discern it. His industry, too, had qualified him to turn opportunity to profitable purpose, where men as naturally gifted, but with less application, let golden opportunity slip. "Born lucky"? Roberts was the son of a poor, honest, Scottish shoemaker, who had no little difficulty in keeping the souls and bodies of his family together. There was, seemingly at least, no great "luck" in such a starting-point towards honour and fortune. But the Scottish lad started from the point as from a "coign of vantage,"—had always a heart for work, however laborious,—lived to see his work crowned, and died with the reputation of having been a soldier in the noble army of workers.

Just seventy years ago the artist was born, in the village of Stockbridge, near Edinburgh, of parents "very industrious," and "very poor," and amid neighbours who, being as poor as the Roberts family, and not standing much upon shoes, were not likely to give very profitable employment to the Stockbridge shoemaker. A training, or a no-training, at a poor dame's school, and a barbarous course of cruelty, and no instruction, under a ferocious Scottish schoolmaster, in whose "academy" Roberts often got the skin flayed off his legs and fingers without any compensating amount of learning being imparted to his brain, were all the education he acquired in his unsunny youth. Yet not altogether unsunny. The coarse woodcuts of the cheapest chap-books lit up a new enjoyment and created an eager desire in his mind. On the so-called resemblances of beasts painted on the canvas of a travelling menagerie he gazed with ecstasy, and then sketched the brutes from memory on the whitewashed walls of the maternal kitchen. "What are you going to do with the boy?" was a question put by a well-to-do patron of the shoemaker, who inspected this boyish work. "I fancy," said Mrs. Roberts, "he'll just need to sit down on

the stool aside his father there, and learn to make and mend shoon." This was the very crisis of David Roberts's destiny; but it turned in his favour, and, we may add, in that of the world. "Nature has made him an artist, and he must be a painter!" said the patron in question; and as a means to an end, the young fellow was apprenticed to a house-painter, and thus launched forth in the course that was to culminate in his being an artist. There was, perhaps, some "luck" in this course after all. It was "lucky" for David that there was no "drawing-master" at his school to spoil him; and it was at least a sensible arrangement to put the aspiring lad to learn a trade, by which he might win honest bread in case the promise of his boyhood should not expand into performance. To achieve the latter he studied closely at home, after doing apprentice house-painting drudgery for fifteen or sixteen hours daily. On a chest, by the light of the father's lamp, son and sire worked stoutly, the latter at his vocation, the former at making himself worthy of one. The 'prentice-lad says: "Here was I to be found at work, night after night; and my father's customers, when they came in, were wont to examine my drawings, and exclaim, 'How has the callant learnt it?' I cannot say that my father ever encouraged me much, but my mother did, and was very proud of her 'Davie.'"

The mothers help most to make the men; but a young fellow's companions have much to do with the making (or the marring) of him too. The maternal encouragement was much; but the circumstance that young Roberts had fellow-apprentices of the same house or neighbourhood, who also had a turn or a vocation for art, was even of more importance. Some of these became of greater or less note; meanwhile, their sympathies united the lads in love and labour. They studied together. They opened a Life Academy by hiring a cellar, and obtaining a donkey to stand to them,—a beast who roused the disgust of the neighbourhood by his discordant, perhaps remonstrant, braying. The lads took turn with the donkey in standing as models to each other, to the immense advantage and profit of the biped students. When Roberts actually finished a picture which one of the apprentice's brothers framed for half-a-crown, paid by weekly instalments of sixpence, the future R.A. thought all the ends of life were accomplished, and the sum of all human felicity consisted for a time in gazing at his own work, in a gilt frame! "It was a glory," he says, "of which I had scarcely dared to dream"; and it was a happy time. Those ambitious young 'prentice house-painters, Kidd, Mitchell, and Roberts, went on till they had the audacity to open an exhibition of their own works! Roberts produced a large picture of the 'Battle of Trafalgar,' and Kidd and Mitchell hailed him joyously as "the young Vanderfelde!" They had their festival days, too, on which they went out sketching. On one of these occasions, they returned with such queer drawings, that these were long known in the respective families of the artists as "*the drunken landscapes!*"

Roberts's apprenticeship over, he worked as a journeyman painter, but looked abroad for labour more worthy of his ambition. From the shilling gallery of the Edinburgh Theatre he had seen Bagdad and the Palace of Aladdin; had studied them too, with an attentive and admiring eye. Yet he was so modest that when it was proposed to him to become scenic artist to a strolling company of equestrians and actors he nearly lost his breath through mingled joy and nervousness. Trembling and faint, Roberts

went to wait on Bannister, the proprietor, with his drawings. These were approved; and forthwith canvas was laid down on the dining-room floor, and Roberts having ground his colours, completed a set of wings to an imaginary palace. This first attempt resulted in the artist being engaged at a permanent salary of 25s. a week to paint scenes, stroll with the company, and play in the pantomime. At Newcastle, he tells us, "My part was a barber who was to have shaved, but who was shaven by, the clown. I liked the fun, and on the whole, I believe, gave general satisfaction, rather overdoing than underdoing that and similar parts with which I was intrusted." With the memory of the manly face of the artist upon us, it is impossible to suppress a smile at the idea of his nose having ever been taken hold of by a clown in a circus pantomime; but remembering, too, the glad, humorous expression which sometimes, as it were, rippled over it, one can fancy that in those early days he did not dislike the fun of it.

Roberts became a painter of architectural drop-scenes at a time when he "was entirely ignorant of perspective, and did not know what was meant by the point of vision." For hours he would stand in frost and snow copying bits of the exteriors of English cathedrals. He was a little proud, he says, of drawing well in outline till Mr. Wilson, the master of the Trustees Academy, in Edinburgh, where Roberts studied for a week, remarked that "in nature there are no outlines." This was a remark which Roberts never forgot. Roberts says, that if he had any style at all it was founded on the grand scenic productions of the elder Nasmyth in the old, superb Glasgow Theatre. "Style," however, was what Nasmyth despised when a "peculiar" one was meant. Stanfield showed his sketch-book to that veteran artist in Edinburgh, and "told him that he wished to form a style of his own." "My young friend," exclaimed the experienced artist, "there is but one style an artist should endeavour to obtain, and that is the style of Nature. The nearer you get to her the better."

Some time was passed in this gipsy life of strolling painter and player. Occasionally, for want of such poor vocation as that, Roberts worked at decorative house-painting; and more than one noble mansion in Scotland owes its counterfeit oak and its simulated marble to his effective brushes. The wandering life, however, seems to have had a wonderful charm for him. Lack of money or lack of food scarcely affected the spirits of himself or companions. A breakfast lasted him, when on the tramp, for a whole day; and the toil of some of those days was of a nature to demand rather an increase than a decrease of ordinary meals. He once walked from Dumfries to Edinburgh, "seventy odd miles, in a day and a half." The painter-player had sometimes, however, an advantage not possessed by the mere actor. He would have a few shillings when the latter had none; but those few were at the service of those who more urgently needed them. Thus, on one occasion, he went from Newcastle to Hull, "to which," he says, "I sailed in a collier along with a poor player who had been discharged, and who had a wife and child to provide for. I paid their passage-money, gave up my berth to the mother and child, stood godfather to the baby, which was only three days old, and interceded successfully with the manager, who again gave the poor fellow employment."

At the rival theatres in Edinburgh, in 1821, Stanfield (the son of an actor) and Roberts became rival artists and attached friends. The latter remarks, that Stanfield's scenery astonished and delighted him, as it did everybody else. It was at Stanfield's suggestion that

Roberts sent an oil picture for the Edinburgh Exhibition of 1821. It "was rejected," says Roberts, "while those of my companion were the talk of the town." Roberts was never faint-hearted. "I went on painting," he says, "on a small scale, which I found of immense advantage to me as a scene-painter, in teaching me composition, light and shadow, and, above all, aerial perspective. I sent three pictures to the Exhibition of the following year, and, on the opening of the rooms, was astonished to find that they were all hung, and that two of them were sold at 50s. each—one to Baron Clerk Rattray, and the other to Mr. James Stewart."

Such was the modest beginning; but it helped him towards London, where he first obtained employment as a scene-painter, at the Coburg Theatre, in 1822, and subsequently, under Elliston, at Drury Lane. The first scenes he painted in the former theatre were for 'Guy Fawkes,' and the new and master-hand was so striking, particularly in the Vaults under the old House of Lords, and a Gothic Screen, that the attention of the audience was diverted from Huntley, Chapman, O. Smith (*Fawkes*), Howell, Mrs. Fearman and Mrs. Stanley, and even from Sloman and Henry Beverley, to dwell upon not merely the scenes named above, but King James's Study, Percy's Mansion, with Lambeth Palace and the Gate of Montague House, with London Bridge and the Thames by moonlight. "The scenery was delightful," says the *Drama*; but it so dazzled the unaccustomed eyes of the monthly critic, that he could not help rubbing them, and remarking that, he "must be allowed to say, we consider the colouring too warm."

In 1824 we find Roberts exhibiting, for the first time in London, 'Dryburgh Abbey,' at the British Institution, and the 'East Front' and the 'South Transept of Melrose Cathedral' at the opening of the Suffolk Gallery. The Society of British Artists, who opened the Gallery, Roberts helped to found, but he subsequently withdrew from it. The two views of Melrose were purchased by Sir Felix Booth, at 25 guineas each—"a large sum of money to me at that time." He did not abandon scene-painting. Roberts's labour in this way was almost beyond belief, even taking into account the breadth and rapidity of his work. He worked six hours a day at Covent Garden for 10l. a week, and for pictures he exhibited received from twelve to a couple of hundred guineas. Sometimes a dealer cheated him; at others, Lord Northwick added a score of pounds or so to the price asked by the artist. His employment was incessant; in the stage-painting room, as in his own studio, his hand was for ever creating fresh and marvellous beauty. Commissions poured in upon him; his name became a popular and affectionate word; he was solicited to honour clubs and societies by entering into membership with them; and, unlike those who are least honoured in their own country or own family circles, Edinburgh was proud of her son. When his 'Departure of the Israelites' was exhibited in the Scottish Academy, it commanded general admiration; "and who," writes a friend to him (A.D. 1830), "should be sitting in the room, listening with heartfelt delight to that admiration, but your little daughter, who, I can assure you, seemed to exult in the general satisfaction it gave, as much as any one." Happy Christine! she enjoyed one of the greatest of serious delights that can move a child's heart,—the conviction that the father is above the common stamp of men, and is honoured for some fine quality which others are not so happy as to possess.

With regard to these early pictures by

Roberts,—the streets, churches, towers, temples, exteriors, interiors,—fame and fortune grew with their increase. It is certain that the artist looked back to them himself with a gentle, fond pride, which he perhaps felt in less degree for his later productions. We have heard it said of him that, on looking at one of these achievements of his young, brilliant time, he exclaimed, "Ah! that was done when I was a good boy, and painted truly." In this, however, there may have been something of that modesty, not unallied to vanity perhaps, which leads an artist to affect disparagement of that for which the world is disposed to award him greater honour.

With the narrative of the struggles of Roberts in earlier life, the interest of this book would almost cease, were it not for the touches of character which turn up. In his Spanish tour, and in that which he subsequently made in parts of Africa and Asia, if his eye was charmed by the wonders before him, his heart was ever fondly, or merrily, turning towards home. When he expects to reach Seville, and meet Lewis there, his cry is, "And a precious blether we will ha'e thegither anent Lucky Linton and the artists o' Auld Reekie." His enthusiasm in his art never left him; he considered it the criterion of genius. Under temperatures at which some men would faint, in localities where artists had never stood, he laboured without a moment's lack of heart; he transferred sketches of grandeur and desolation to his portfolio by hundreds, and learned at least one thing abroad, as he pleasantly writes, the conviction that "there is nothing like having a good conceit of ourselves." His own was not "overweening." In one of his true, fatherly letters to his daughter, he replies to her announcement of his having been named A.R.A., that he rejoices in it, because it is a source of joy to her. And so he goes on manfully with his sketches; laughing, in Spain, at bishops who think he has come there for the purpose of taking away pictures of saints that shall help to convert the King of England, and turning up the sly eye of astonishment at clerics who mistake a classical sculpture for the expulsion of Adam and Eve from Paradise. His boldness is manifested in his lavish but successful expenditure of laudanum on his attendant, prostrate with cholera, but cured by "Quack Doctor Roberts"; and there is a vein of comedy in his description of himself, shaven, and be-robbed and be-turbaned in Mohammedan guise, in which his own mother would not know him. He gazes at picturesque groups of beings, and clusters of ruins, as he progresses, "like an Eastern monarch; but thirty miles a day, sitting on a camel, rather unfits me for sketching them."

One of the most eventful years of Roberts's life was 1840, in which the "ance 'prentice laddie" became an R.A., his only child was married to Mr. Henry Bicknell, and his father died, at the age of eighty-six; at which age his mother died, two years later. He had now attained the highest honours that life could bring to a man of such talent and industry. The record of all that followed is only a chronicle of a happy career, labour, love, honour, to the sudden end in 1864, which at least saved him (well prepared as he was, let the end come as it might) from the painful watching of a decay of health and power. Scarcely a cloud had cast a shadow over his course. His parents lived to see him great, and he recorded his obligations to them above their grave. He himself lived to share in the happiness of his only child, and to see grandchildren old enough to be proud of their descent. His native country was proud of him too, and he of it. In one of his last visits to Stockbridge, with Stanfield, he pointed out to his friend a sign-board which

he had painted when a boy. If he had a cross in his own artist life at all, it was when he received a command to paint the 'Opening of the Crystal Palace.' He had already painted a 'Bridge at Toledo' for the Queen, for which he received fifty guineas; and he had received half that sum for two drawings for Her Majesty's album. This was in his way; but it is amusing to see how he politely struggled to evade the command to paint what was not at all in his way. He pleaded his probably long absence in Italy; but his royal patroness could graciously wait till he returned. His heart was sorely vexed as he thought of the gaudy, garish work he had to execute; and it was hardly relieved by his serio-comic exclamation in one of his letters, "Finding the work *must* be undertaken, I resolved to do my best with it." He acquired in return 600l. and the sympathy of his friends. The picture was unsatisfactory; the subject was unpaintable; but Roberts made amends for it by many a contribution to art, ere the pencil dropped, as it were, from his cunning hand.

We refrain from criticizing the great painter in his works. The columns of the *Athenæum* have said all that is necessary on that point. Our readers may have known less of the incidents of his life than of the works by which it was rendered happy and illustrious. We have, therefore, preferred to treat of some of the outlines of that life. It is partly told by himself in a simple diary in this volume; and young artists will find much to enlighten and to cheer them in the details. The book, however, does not "hang well together." Whole letters are pitched in, where a few lines of extract would have sufficed, and would have left room for matters of much more interest which will be looked for in vain. But the work has been a labour of love on the part of Roberts's old "colour-boy," and Mr. Ballantine deserves a good word at parting. If he has partially failed, it is not for lack of excellent intention.

A Hunter's Experiences in the Southern States of America: being an Account of the Natural History of the various Quadrupeds and Birds which are the Objects of Chase in those Countries. By Capt. Flack ("The Ranger"). (Longmans & Co.)

Capt. Flack—more widely known as "The Ranger," under which title he has contributed to the columns of a sporting newspaper—will not look in vain for readers amongst the class of persons who care for the pursuits of hunters. His book is entertaining, and admirably put together,—full of picturesque touches, though free from ambitious attempts at word-painting,—and bristling with anecdotes of adventure that will delight sportsmen who have faced the perils of the field no less than school-boys longing for freedom and opportunity to signalize themselves by hazardous exploits. An experienced hunter of a large proportion of those creatures that provoke in man his strong and not ignoble passion for the chase, Capt. Flack carries his readers to the prairies and forests of the Southern States, and teaches them how to pursue and capture every species of game, from the bison to the bee, from the wild horse to the alligator, from the crafty gobbler to such small fry as teal, pintails and shovellers. In a capital chapter the author describes with humorous minuteness the moral and intellectual characteristics of the American black bear, representing him as a far less formidable creature than timid fancy paints him. A still better chapter renders justice to the cunning of the wild turkey, and in an intensely ludicrous drama sets forth the means by which the superior craft of the

hunter, provided with rifle and call, outwits the wary bird. To illustrate the pertinacity with which the turkey-caller follows his prey, as well as to exhibit the quality of the humour which flavours the gossip of a hunting party in Transatlantic wilds, Capt. Flack gives the following story:—

"Only a veteran in the art has any chance of success. It is recorded of an old hunter that he once chased a turkey regularly for three years, only catching sight of the bird twice, although he used the 'call' with which they imitate the cry of the female, and so allure the cock within range of the rifle. But let him relate his adventures himself. 'I always hunted that ar' gobbler in the same range till I know'd his track and his "yelp" as well as I do my old dogs. But the critter were so knowin' that when I "called" he would run from me, taking the opposite direction to my footmarks. The old scaly varmint kept pretty much about a ridge, at the end of which, where it lost itself in the swamp, was a hollow cypress tree. Now, I were determined to have that gobbler, boys; so what do I do but put on my shoes heels foremost, walk down the hill very quietly, and get into the hollow tree. Well then I gave a call; and, boys, it would have done your hearts good to see that turkey come trotting down the ridge towards me, looking at my tracks, and thinking I had gone the other way.'"

Of a singular lawsuit that arose out of the strong dislike which a young lady of New Orleans conceived for a tame alligator, the author takes the following notice:—

"In many parts of the Southern States men have so far conquered their antipathy towards these reptiles as to tame them, and keep them in confinement. In this semi-domestic state, the beast is said to exhibit more intelligence than would be expected from its appearance. An alligator was once the cause of a very curious case being tried in New Orleans. A young lady brought an action against a neighbour for keeping an alligator in his yard, asserting that the beast was of extraordinary size and ferocity, that she had frequently occasion to enter his premises, and that, whenever compelled to do so, she was in fear of her life. The defendant, who had been arrested, being required to plead, stated that he kept the animal as a kind of house-dog, or night watchman, and that, unless provoked, it was a quiet, peaceable reptile; furthermore, that the plaintiff had been in the habit of teasing the alligator, and exciting his anger by tickling him in the ribs with a long pole, throwing brickbats at him, and on one occasion going so far as to sear his back with a red-hot iron. Upon this, the defendant was discharged, while the lady was bound over to keep the peace towards the alligator and its owner. The reporters of the New Orleans press do not inform us whether the alligator wept when its back was seared with hot iron; but we are able to assert, that, although Shakspeare informs us that the 'tears of it are wet,' their lachrymal fountains have been sought in vain by cruel, though somewhat scientific, planters, who have actually squirted the juice and blown the smoke of tobacco into their eyes in order to test the truth of the old fable."

Capt. Flack is also of opinion that Shakspeare was no less at fault in endowing deer with the faculty of shedding tears, than in attributing the same signs of tenderness to the unlovely alligator. "The poets," says the author, "Shakspeare in particular, have expressed much sorrow for the sufferings of wounded deer, asserting that the animal sheds tears when injured or distressed. This idea was most probably suggested by a superficial examination of the deer's face; for there is in fact an indentation under the corner of the eye peculiar to this animal, and this, being of a dark colour, as if caused by continual drops of water, no doubt gave rise to the idea. I do not think there is any reasonable authority for saying that the deer shed tears; but from the fact that, upon dissection, these depressions are

found to extend up into the jaw-bones, it is not improbable that they may be vents to aid and aid to respiration." It is to be presumed that a writer, so nice about the literal accuracy of poets, has not without proper inquiry accepted as historically true the following story about rattlesnakes, which has been often told to the disadvantage of negroes, and has imparted horror to more than one novel:—

"During the summer months they generally go about in pairs; so that if one is killed the hunter had best look out for the other. This habit is not confined to the rattlesnake. Most venomous species observe the same rule. A negro slave in St. Domingo once took advantage of it to perpetrate a foul crime. The negro had joined a conspiracy to revolt, but being suspected of lukewarmness in the cause, was commanded to destroy his master's only daughter as a proof of his zeal, or suffer death himself. The rascal accomplished the deed without attracting the least suspicion towards himself. He discovered the haunt of a pair of deadly snakes, and by means of those arts peculiar to his half-savage race, enticed them to the neighbourhood of the house. He then informed his master that he had reason to believe that there was a venomous reptile in the neighbourhood. A reward was offered for its destruction, which was gained by the negro himself, who killed the female snake the following morning. His courage and devotion were highly complimented by the master, and an additional reward given by the daughter of the planter. The moment the negro was unobserved, he set to work to complete his plans. He dragged the body of the dead snake along the ground, through the house into the young lady's bedroom, and allowed it to remain for some minutes between the sheets on the bed. This done, he concealed the snake about his body, and carried it to a distance. Night came, and the surviving snake began to seek its mate. The scent was still on the ground, and the reptile followed it up to the door, and then glided across the hall to the chamber of the planter's daughter. The trail was quite warm; the snake worked its way beneath the coverlet to the place where the other had been; and when the unfortunate girl moved her hand in her sleep to brush it from her neck, the fangs of the enraged reptile were instantly buried in her throat. The deep sleep produced by a sultry heat was upon her, and she awoke no more. When the parents visited their child in the morning, an offensive, putrid mass of corruption, in which they could hardly recognize the loved countenance, was all that met their sight."

Let us add, that though this volume is especially written for the amusement and guidance of sportsmen; it contains matter that will interest the physiologist.

Scenes in French Monasteries. By Algernon Taylor. (Skeet.)

How singular are the contrasts presented by the unfettered literature of the present age! Every reflective mind must have made this observation; but it is to the reviewer especially that it offers itself with all its force. One day he has to deal with a book which announces the approach of the world's dissolution,—the next, he is called upon to notice a treatise which sketches out the destinies of humanity for ages to come. In social and religious matters the difference of opinion and feeling is no less remarkable. A few weeks ago we reviewed a book which displayed, not with passion, but with a calm statement of facts, a harrowing record of the superstitions and cruelties of the Middle Ages; now we have before us a peaceful and almost pleasing picture of those who renounce the allurements of modern civilization, and keep alive within their secluded dwellings the spirit of mediæval austerity. We should do injustice to Mr. Taylor, however, unless we explained that the words "almost pleasing" must be taken to apply to the sub-

ject, and not to his book, which, in spite of the melancholy nature of the topic, may be fairly said, in a certain quiet way, to be pleasing altogether. Without, apparently, having any partiality for Romish tenets, or any bias in favour of monasticism, he has surveyed cloisters as others might survey the streets of an old town, with an eye to the picturesque rather than with the view of detecting that which is mean, or squalid, or ruinous. Yet this is an honest book withal, and there is no attempt at concealment. Consequently, we see clearly, that although a man with an inquisitive and somewhat pensive turn of mind may take pleasure in residing at St. Michel de Frigolet or at the Grande Chartreuse as a guest, it would scarcely suit either the author or any of his active-minded countrymen to be a permanent inmate of either of those establishments. Mr. Taylor's sketches are drawn with a friendly hand,—his anecdotes are simple and natural, by no means sensational, and certainly not designed to work up the reader's feelings against his various entertainers; but what must be the position of a disciplined monk, when even a little chorister is gently rebuked for running about in the spontaneous lightness of his heart! Can we sympathize heartily with the "self-conquest" of the Premonstratensian Canons, when we find that it leads to this result, that a highly-educated priest may be ordered to change plates and hand dishes—in fact, to wait at the Prior's table—an hour before electrifying a vast congregation with a thrilling sermon? We cannot help feeling that such things savour of pride as well as of humility; and that the monk's "self-conquest" may be misapplied for the purpose of gratifying the vanity of the superior. However this may be, it is difficult to perceive what advantage can come from placing an accomplished scholar in the position of a waiter or footman. Nor does it appear desirable that a monk who comes in to dinner a few minutes after the appointed hour should be expected to fall on his knees, and remain in that position till the Prior allows him to get up. These and similar extravagances seem inseparable from sincere monasticism, and must form a powerful argument against the system, even if its general revival could under any circumstances be considered desirable.

NEW NOVELS.

Rachel's Secret. By the Author of 'The Master of Marton.' 3 vols. (Hurst & Blackett.)

'Rachel's Secret' is a well-imagined story; but the author lacks the force needed to make a tale effective. The reader's patience is fatigued, and his interest trifled away by the author who dawdles amongst trivial details as minute as in a Dutch picture, but without those touches of humour by which alone secondary characters can be made interesting. Mrs. Doyle, with her kitchen, and her cooking, and her pleasant words and looks, damps the briskness of the story, and does not compensate by her individuality for the delay. The same may be said, with even more reason, of Mrs. Kennedy and the Doctor; they are carefully-drawn people; their talk might have been written down from the life, but they grow wearisome in their amplification. The story itself might have been made powerful; even as it is, with judicious skipping, the reader will be thoroughly interested in the fortunes of the two heroines who cross each other's path so innocently. The hero, Dunstan Dane, is a good enough young man as heroes go,—most readers will have some acquaintance who resembles him; but the most noticeable point about him is the perverse ingenuity with

which he contrives to get up a quarrel, and mar the happiness of the sweet, loving little creature who had elected him for her hero. He makes himself miserable as well, which the sympathetic reader will consider only serves him right, for the jealous ill-temper which has neither an excuse nor common sense to justify it. The character of Winifred, or, as she is called, "Winny," is gracefully sketched, and contrasts well with that of Rachel Dallas, who is her unconscious rival. Winny is the daughter of the squire of Rooklands. Years ago, when Winifred was an infant, a woman had been found sitting at the door of the squire's house one bitter winter's morning. She was quite dead, but she held a living child in her arms,—that child was Rachel. Who or what the dead woman was, no one ever knew; she was buried in a desolate spot in the churchyard; the baby was adopted by a stern old Scotch Calvinist, and brought up as his own. From that day the Master of Rooklands was never seen to smile, but became a moody, taciturn, dark-tempered man,—caring nothing for his daughter, but wrapped up in his son, and living only to save money to clear his estate from debt. He gives Dunstan Dane his permission to address his daughter, but tells him she will have no fortune, which the young man, to do him justice, does not care about. His feeling for the young girl is delicately touched, and nothing but his own ill-temper and restless self-consciousness could have raised or kept up the cloud between them. As it is, he becomes entangled in an engagement with Rachel Dallas, who, like Winifred, cares for him a great deal more than he deserves. Winifred comes back, and Dunstan recognizes his own mistake and folly; but he is bound in honour to another woman. Rachel discovers the state of the case, and discovers another secret also about her mother, and the reason why she had sought the door of the Master of Rooklands,—a secret which the sagacious reader will have anticipated. The description of Rachel's desolate sorrow is touchingly drawn; of course she resolves on an act of self-sacrifice,—to set Dunstan free. How she carries this into effect, and what is the end of the story, the reader must learn for himself. If the author would have condensed the work into one volume, instead of diluting it into three, both the story and the reader would have been gainers.

Dacia Singleton. By the Author of 'Altogether Wrong,' &c. 3 vols. (Tinsley Brothers.)

'Dacia Singleton' contains the ingredients of a sensational novel, but, like damp fireworks, it declines to explode. The style is flat, the story is flat, and the time spent in the perusal of it is felt to have been wasted. There is no vitality in the book, and a cloying sickliness is left as the only result. Dacia Singleton, the heroine, falls in love with a young man at a dinner-party, and again, within a short time, with another young man, because he is the first man's friend. She has a mother, who is an ill-humoured, selfish fool,—and a married sister, who is a junior type of the mother; and Dacia Singleton is the angel of the family. The second lover is a married man, whose wife has left him, and of whom he has lost sight; and for her sake he is a misanthrope and suspects all women, until he sees Miss Singleton and falls in love with her, though his conscience tells him he is wrong, not only because he is married, but because his friend has commissioned him to use his interest on his behalf. The friend is in a deep decline. Hugh Mostyn, the man Dacia has elected to love, tells his tale, and begs her pardon, and then they separate; and Dacia, worn out with her mother's foolishness,

turns Roman Catholic, enters a convent and becomes a black-veiled nun all at once; and there is a wicked Catholic priest who has very recently been a wicked Protestant chaplain. He had insulted Dacia in his Protestant period, and as Dacia will not confess to him she is nearly starved to death to break her spirit of disobedience. The wicked wife of Hugh Mostyn has married a Secretary of Legation in London, and is a fine lady and the bosom friend of Dacia's sister. Hugh Mostyn discovers her track and has an interview with her, and threatens to tell Count Langen, the husband whom she has married, unless she will tell him the truth herself: upon which she begs for twenty-four hours to make up her mind; this he grants to her, and on reflection she decides on poisoning herself. The only touch of originality in the book is the natural aversion of the lady to do anything so disagreeable, and her dislike to the laudanum as very nasty stuff. Hugh Mostyn being left free does not tell any tales of his wife, but indulges himself in remorse for having driven her to suicide; the husband who has lost her laments her, and thinks she died in consequence of having mistaken her medicine. Dacia, in the last stage of inanition, is rescued from the convent by her aunt, Mrs. Ewart, the sensible woman who scolds everybody and puts sense into nobody, and who is tiresome because she talks with so little effect. Dacia, heartily glad to have done with Popery, returns to the Protestant faith, marries Hugh Mostyn, who inherits a large fortune from his friend who had been in love with Dacia first.

Sir Julian's Wife. By Emma Jane Worboise. (Virtue Brothers & Co.)

THIS is a story about a rich young baronet who, losing his way one night, when rambling through the streets of a manufacturing town where he is staying, comes upon a chapel called "Little Bethel," where a "Town Mission Tract Society" is being held. He is attracted by the singing, and goes in to rest himself, and there sees, "under a coarse straw bonnet, plainly trimmed with the smallest quantity of dark ribbon, a face, the features of which were perfect as painter or sculptor could have desired." "So fair and lovely a creature Sir Julian thought he had never seen; she was the embodiment of a poet's dream," &c. He determines to know who she is,—not with any bad intentions, but with a curiosity that was not to be resisted by a young man accustomed to please himself. He accordingly goes into the vestry after the meeting, and finds himself "in the presence of a grey-haired, heavenly-countenanced old man; in seedy black," who "smiled encouragingly, and placed a chair for him as gracefully and courteously as if he had been the denizen of courts and palaces from his youth upwards." The Baronet there and then gives twenty pounds to the Society, observing, "I am sure I had no idea that tracts could do so much good." But when he mentions the beautiful young woman, the minister sternly reproves him, and refuses to have a word to say to him, even offering the money back. So Sir Julian persuades an old but still charming aunt to come to his assistance. Ethel, the young woman in question, is an angel at home, to a cross step-father and still crosser step-mother. Ethel is adopted by Sir Julian's aunt, and goes up as a lady, to be the wife of Sir Julian's due season. But of course something particular happens to prevent it. If the reader stories of this pattern, the fortunes of Ethel. The story is told in the sense as can possibly be gathered from the with such an evident

the part of the author, that the reader feels good-natured in spite of his better judgment.

Love and Duty. By the Author of 'Basil St. John.' (Edinburgh, Edmonston & Douglas.)

THERE is no harm in this novel. Briefly, it may be classed among tales of "conversion," setting forth how a young lady, who had been conscious of a void in her life, perhaps because she had allowed herself to be betrothed to a muscular and handsome young soldier, who could do little by his intellect or principle to ennoble her nature, or to regulate the wanderings of her imagination, during a visit to an excellent brother and sister a good deal older than herself, was started in the paths of peace, self-sacrifice and benevolence. To a certain degree "the situation" resembles that of the Mentor, Roger Hamley, and Molly Gibson, the Doctor's daughter, in Mrs. Gaskell's admirable tale, 'Wives and Daughters.' But these coincidences are unconscious; possibly ascribable to some prevailing tone of opinion and philosophy of the hour. No one was more of a borrower than Mrs. Gaskell, and that which was not reckoned against her strong self, must not be reckoned against her weaker successor. The novel, we repeat, is harmless, and not without a certain sprightliness of dialogue; but it is no tale to set either town or Thames on fire.

Violet Vaughan; or, the Shadows of Warneford Grange. By Emma Jane Worboise. (Clarke & Co.)

ANOTHER well-intentioned story of "conversion," more strongly spiced with theology than the one with which it is here bound up. Violet Vaughan is a religious orphan, who, as a ward, enters a family having a skeleton closet; a family, to boot, without religion. The son and heir has been a black sheep of the blackest dye. His father has cursed him. His mother and sisters have clung to him. The miscreant has regenerated himself; but is only allowed to appear furtively at the house, without his father's knowledge. Violet succeeds in making the whole family religious, beginning with its eldest daughter, a sceptical cripple. By aid of her faith, purity and presence of mind she sets everything to rights, and ends in marrying the regenerated heir of Warneford Grange; though, ere she does so, the house, a moated one, crumbles to pieces in a flood, which catastrophe enables the returned prodigal to save the life of his inexorable father, stricken with paralysis by the anxieties of a law trial. There is no grace in the style, there is no humour among the characters to atone for the forced commonplace of a plot such as the one here sketched. Only among readers of what are called religious tales can 'Violet Vaughan' find acceptance.

Hetty Gouldworth: a Novel. By George Macaulay. 2 vols. (Newby.)

'Hetty Gouldworth' is a foolish, incoherent book, written in very bad taste, and English more curious than correct. A father is represented as speaking to his daughter with "his face livid, and in a snaky, sneering tone." As to the daughter, "she rose, she flew to him; her hot breath fanned his cheek, her white teeth glittered, and every expression left her eyes, but her passion to grow to his height, and to be his wife, was undiminished." The young lady has a clandestine correspondence with a man whose real name she does not know. The father wants his daughter to marry a baronet, who has promised her a fortune,—hence the scene. As to the young lady, she has got into an entanglement with a young man in former years,

who owns to having loved him so recklessly that she "threw down peace, happiness, honour and innocence at his feet." There are complications of epithets, quarrels, despair, deceit, and a death-bed which seems to set things right; but then there is a last scene, in a churchyard, which seems as though all was wrong. But utter nonsense, bad taste, and bad feeling are the characteristics of this story.

The Alps of Hannibal. By William John Law, M.A. 2 vols. (Macmillan & Co.)

PERHAPS no one of the incidental geographical problems of ancient history has so deeply and so lastingly excited the interest of critics and geographers as the famous march of Hannibal across the Rhone and over the Alps into Italy. Indeed, this interest appears to deepen in proportion to the perplexity of the problem, the prolixity of the disputants, and the diversity of their conclusions. Commencing with De Luc's treatise, published at Geneva in 1818, the present work of Mr. Law is, if we include some papers in journals, at the least the fifteenth or sixteenth publication on this controversy. The book before us, however, is the most elaborate treatise of all. Its author fully discusses every point in dispute, and separating Hannibal's entire march into convenient component portions, sustains his views upon each with discrimination and ability. Although he bespeaks indulgence as "an old man, returning to Greek after long absence," and although, when he attempted to cross the Little St. Bernard, and return by the Col de La Seigne and the Valley of Beaufort, for the purpose of personal observation, the result was calamitous, and he made his first and last descent into Italy in a state of serious illness, yet he has wrought out his self-imposed task as a labour of love, and has produced an almost exhaustive treatise on this geographical puzzle, which is still a puzzle after the labours of so many and so erudite investigators.

The case may be thus briefly stated, from Mr. Law's pages, for the benefit of such as have forgotten it. In the 536th year of Rome, that is, in the year 218 before Christ, and in the month of May, Hannibal marched from Carthage, crossed the Rhone towards the end of September, and, having surmounted the Alps, trod the Italian plains about the end of October. All writers, except Mr. Whitaker, are agreed that the march from the Pyrenees to the Rhone proceeded through Nîmes (Nemausus). As to the part where the passage of the Rhone was effected by Hannibal, after he came from Nîmes, and before he marched up to the Isère, there is some difference of opinion, and this question has an important bearing on the ulterior inquiry. Observations of the Rhone, and the country about it, in connexion with the narrative of Polybius, lead to the inference that the passage was effected either at the nearest convenient part above the influx of the Durance, or at some convenient part below that point. They who incline to the former opinion fix upon the course of the river between the villages of Rochemaure and Montfaucon, being about five miles from the town of Orange; and here the stream is suitable for the transportation of an army. Dr. Law places the crossing at Tarascon, and Mr. Law fully discusses this supposition, though he refers the previous locality.

How and whither Hannibal marched immediately after crossing the Rhone can only be conjectured from the discussions of Polybius. Mr. Henry II. Law has made a particular study of this part of the march in his

entitled, 'The March of Hannibal from the Rhone to the Alps,' yet he does not quote the few words of Polybius which describe that section of the journey on which he writes. According, however, to Mr. Long, after Hannibal had crossed the Rhone at Tarascon, he made a march of 800 stadia from thence to Valence in four days, and remained there six days. He gained the aid of a body of the Segalauni, who assisted him in his progress to invade the land of the Allobroges; with these allies he entered the island at Romans, and pursued the present line of route to Grenoble. But Mr. Law sees no difficulty in measuring the 800 stadia "along the river," so as to make the Alps then begin, and the Mont du Chat to fulfil all the requisites of the words of Polybius. The line of progress advocated by Mr. Law attends the Rhone to Vienne. Leaving the river there, it finds it again at St. Genix, and having followed its course for a time, encounters the first Alps in the Mont du Chat, at the northern part of the mountain barrier which ranges from the Isère to the Rhone, commonly called the chain of La Grande Chartreuse. There begin the Alps of this history, and from thence we have to commence the Alpine march till it brings us beyond the mountains to the plains of Italy. This arduous portion of the journey should extend to about 1,200 stadia, that is, about 150 miles.

It would be quite out of place to introduce here even an outline of the several routes across the Alps proposed for Hannibal, and maintained with more or less ability by various theorists. Nearly every known pass from Viso to the Simplon, together with almost every route to reach it, has found an advocate. As Arnold observed, the route of the Cenis in some respects suits the description of the march better than any other pass, and it has been advocated by so excellent a geographer as Dr. Ukert. Those who incline to the route over the Little Mont Cenis to Avigliana must refer to the treatise of Mr. Ellis; while those who wish to see it criticized may take up the first of these two volumes by Mr. Law. There also, having allotted its special task to each of the fifteen days assumed by Polybius for the duration of the passage of the Alps, he works out with evident affection the passage by the Little St. Bernard, and strenuously accommodates his views to the Greek historian's account. Any reader who will deliberately peruse Mr. Law's details and arguments, presuming that he is not previously wedded to an adverse theory, will, we think, agree to adopt the Little St. Bernard as the actual mountain course of the Carthaginian hero. Considerable care is likewise shown in this work in tracing the descent from the Little St. Bernard.

Though we do not think that Polybius and Livy can be reconciled, and though the interpretation of Polybius alone is beset with topographical difficulties, still it appears to us, as to several others, that the nearest practicable identification of Hannibal's march is that which we have concisely indicated, and which is in accordance with the views of Mr. Law. Moreover, any pedestrian who crosses the Little St. Bernard, and who is previously fortified with the history of Polybius, will discover numerous confirmations of this identification. But something still remains

unsettled. What is the not-very-remarkable white cliff, or, as Mr. Letronne thinks, simply one of those long cliffs which are so common in the Apennines? Which is the actual wherein Polybius conceived that the

enemy made preparations for overwhelming the invaders with missiles? "If," says Mr. Law, "some sensible man will make his abode for two or three days at Bourg St.-Maurice or Scez, and will investigate the ground through both ravines, he may throw conclusive light on these difficulties."

So, then, even after the publication of these two volumes, some topics of discussion and inquiry still remain. Here is a promising and scholarly occupation for any happily-endowed tourist next summer. Let him take Mr. Law's volumes and go over the whole route, and subsequently contribute his mite of information and confirmation. There are likewise interesting questions relating to the view from the summit, the snow-line, and the entire latter portions of the march, on which we cannot now even touch.

The History of the British Empire in India, from the Appointment of Lord Hardinge to the Political Extinction of the East India Company, 1844 to 1862. Forming a Sequel to Thornton's 'History of India.' By Lionel James Trotter. Vol. II. (Allen & Co.)

THE first volume of this work was noticed in the *Athenæum* of the 30th of December of last year. We then said, and we see no reason to depart from the opinion, that the title of the book should rather have been 'A Narrative of Events relating to India between 1844 and 1862,' than a 'History of the British Empire in India.' This remark was based on the evidence of insufficient research and want of completeness in dealing with various subjects, whence it appeared that the author was hardly justified in assuming the title of historian. Mr. Trotter now tells us, in the Preface to his second volume, that his "chief aim was neither exhaustiveness nor philosophic depth"; and that "his guiding principle was to give the reader a condensed yet readable summary of facts carefully culled and impartially stated." We are willing to admit that he has done this, but the admission will hardly invalidate our previous observations, for "a readable summary of facts" can scarcely be dignified with the name of History. Nor can we assent to Mr. Trotter's opinions about the value of research. "References," he says, "to private letters and records never before published will in very few cases help the historian much." Let this statement be compared with that which we find in the preface of another and almost contemporaneous work, 'The History of the Sepoy War.' The distinguished author of that book observes, "The historical materials which I have moulded into this narrative are rather of a private than of a public character. I have made but little use of recorded official documents. I do not mean that access to such documents has not been extremely serviceable to me; but that it has rather afforded the means of verifying or correcting statements received from other sources than it has supplied me with original materials." The fact is, there can hardly be, as Mr. Trotter would have us suppose, too great "a choice of documents" for one who would write a perfect history; and it is precisely in dealing with a mass of materials, which would embarrass a novice, that the judgment and ability of the true historian are most conspicuously shown. We are the more particular in dwelling on this point because we think that more full investigation would have led Mr. Trotter to write differently on some matters of great importance. Thus, it appears to us that he has done scant justice to the most conspicuous figure in the picture of worthies he has presented to us. The following is his description of Lord Canning:—

"In the darkest days of the mutiny Lord Canning never lost his head, never yielded to the councils of time-serving cowardice or panic-strung revenge. His cool courage won the respect of those who most keenly resented the slowness of his movements. Firm even to stubbornness in what he deemed the right course, he was sure to command the moral sympathies even of those who rated lowest his general powers. His strong sense of justice and his honest eagerness to do all his duty, to gain all knowledge needful to that end, went far to atone for the statesman's inherent drawbacks. Of administrative talent he had a middling, not a remarkable share. His subalterns might respect, they seldom if ever worshipped him, as Wellesley or Dalhousie had been worshipped by theirs. To inspire enthusiasm was neither his fate nor his forte. Brave, impartial, honest, he had little breadth of view. His very impartiality partook of the mere lawyer's rather than of the statesman's nature. Hence his gagging of the English as well as of the native press, the sweeping harshness of his first dealings with the beaten insurgents of Oudh, and his stubbornly ungenerous conduct towards the aggrieved regiments of the local European force. Slow to learn and to unlearn, he did few things thoroughly, not a few things too late. On the whole his Indian career might be called a succession of stumbles, relieved here and there by a happy recovery. In his last years the mistakes were certainly fewer, the successes more appreciable. Even at the last, however, his besetting weakness left others to carry out that settlement of the north-western provinces on which Lord Canning had set his heart. Still, after all deductions, his name will stand fair in English memories as that of a brave, true-hearted English gentleman, who encountered, on the whole with credit, the two-fold misfortune of a sudden rebellion and a predecessor unmatched in Indian history."

When the time arrives for the author of 'The Sepoy War' to draw his pendant to this picture, we much doubt whether Lord Canning's career will be described as "a succession of stumbles."

The volume before us commences with the day on which Lord Canning took his seat as Governor-General, the 29th of February, 1856. A dozen pages or so are allotted to the war with Persia, as to the origin of which a not quite happy conjecture is ventured, and the narrative, passing briefly through "the shadows of the coming rebellion," and its "predisposing causes," enters upon what continues to be its theme to the end of the book, the description of the great struggle itself.

We have said that Mr. Trotter has presented us with a very "readable summary of facts," and that he has shown care in selecting them, and at least striven to deal impartially with them, according to his lights. It may be added, that this second volume is a great improvement upon the first. There is certainly no period of Indian history so intensely interesting as that of the Great Rebellion, and Mr. Trotter's style rises with his subject. We are glad to find that he eschews those too colloquial expressions which somewhat marred the pages of his first volume. Now and then, however, symptoms of a slight relapse appear, as when he speaks of Lord Clyde's admirers "pointing with just pride to the butcher's bill," instead of simply saying that the General was praised for winning battles with little loss; or as where Zénat Mahall, the wife of Bahádar Sháh, is styled "the mother of his darling Benjamin," that is, of his youngest and favourite son. There are, too, some rather uncouth expressions occurring here and there, as "the dearest feelings of never so benighted millions," and "an issue that transfused the officers of never so great a private company into acknowledged servants of the Crown." We find also some slight slips as to fact. Thus, at page 44, Feroz is said to

have been "run to earth," whereas he escaped, and made good his retreat to Persia. Again, in the Appendix, the rupee is said to have been coined with "the likeness of Queen Victoria in 1834," whereas William the Fourth then ruled.

NEW POETRY.

Master and Scholar, &c. By E. H. Plumptre, M.A. (Strahan.)

Thecla: a Drama. By Henry Bliss. (Williams & Norgate.)

Shakspeare's Shrine: an Indian Story; Essays and Poems. By John Harris. (Hamilton, Adams & Co.)

Stray Leaves. By Eliza A. Leslie. (Edinburgh, Grant & Son.)

WE have here, first, a Middle Age dialogue between Roger Bacon and a pupil; secondly, a long-winded "classical" drama describing Rome in the days of Nero, with a chorus of Christians and a chorus of Pagans, strophe, antistrophe, and the rest—moral counsel, didactic reflections, declamation, and "poetry" to boot; thirdly, the musical voice of the "Cornish Poet," as he calls himself, who is also a miner, and author of the "Shakspearean Prize Poem" and several better verses, the merits of which we have already attested; fourthly, a lady's volume of nicely written and delicately felt verses, which, if they are occasionally "gushing" in character, are often simple and pathetic. Of verse there is no end; of poetry, a great scarcity. Of the four authors above named the miner has the best right to that one bay-leaf which, if called upon to decide about their claims, we should think sufficient prize for any. Mr. Plumptre is not a poet at all, but apparently a writer of very good sermons on historical and biographical texts. Scholarly, he makes his poetry on scientific principles. Better workmanship than his would not easily be found, or a cooler dealing with the most pathetic theme of self-sacrificing genius that is ripe before its time and struggles partly with its own defects, partly with the short-sighted race about it. Mr. Bliss shows more natural feeling, and his "rounded periods" are, if possible, not more tiresome than the ponderous reflections and elaborate word-painted landscapes of the Master of Arts. As to the last, they supply the place of what otherwise must have been filled with the results of thinking; we confess to a cordial hatred for that which should be called didactic landscape-painting in verse, which seems as if it were uttered on the soundest of principles by a man shut up in a comfortable study, and discoursing about nature with several sheets of stout plate-glass between himself and her. Mr. Bliss blusters a great deal—if he will permit the use of such a term in regard to himself. We may venture to say that he bawls occasionally; he certainly maunders withal, and shows unsteadiness in his metrical feet; of course we do not mean to aver that he absolutely trips in verse, yet it is undeniably true that his reader has to hold him up now and then. It would not be very incorrect to say that our author holds on at times by his reader's ears. Take a specimen of Mr. Bliss's present feelings with regard to his "Muse," from whom, as it appears, he is, after long cohabitation, about to part. Other charms of his existence have deserted him, or he left them. Thus:—

First, youth and love their pinions heavenward spread;
Then passed the flowers of theatre and feast;
Ambition faded next, and laughter ceased;
And now health threatens flight, and with it, worse!
The charm of beauty's power, and charm of verse.

This shows a lugubrious state of affairs in Mr. Bliss's mental and psychical establishment; but it is made worse by what follows about his hand-kissing to the Muse in question:—

Peace to the rest! But how from thee to part,
Spirit of song, whose shrine is in my heart?
Thou, who hast cheered a life's laborious years,
My joys ennobled, chased away my tears,
My passions purified, my tastes refined,
And raised my morals, and enlarged my mind.

Why this parting is to take place, or, rather, why Mr. Bliss should publish the impending fact, we cannot say. We dare not evoke the shade of the Sir Cresswell Cresswell of the British Parnassus to tell why so highly estimable a lady and a poet whose obligations to her are so handsomely acknowledged should meet no more. It cannot, however, be denied that Mr. Bliss gives the lady the best of characters. We trust to hear that she is happily and permanently re-married.

With the exordium that is above quoted, or the invocation which follows it, the Muse seems to have been dissatisfied; at any rate, she did not incline her ear to Mr. Bliss with sufficient interest to enable him to produce anything better than a considerable number of pages of the poorest balderdash we have read for years. There are in this book examples of bathos more curiously profound than is common. After forty pages so ridiculous on account of their stilted and unnatural contents that we were reminded of the fooleries of the conventional stage,—no desirable things in a book, however popular they may be behind the footlights,—we came to the following. The speaker is Nero; his subject the discourse of St. Paul in Rome; his listeners, Seneca, Helius, a courtier, and an entirely superfluous dwarf, who has the inestimable privilege of being a mute:—

What power has misled you, and outraged us?
Who is it, man or god, discourses thus?
Arraigns our morals, reprobates our creeds,
Explores our hearts, our reason supersedes,
Discomfits death, re-animates the tomb,
And threatens earth with fire, and man with doom?
And none of you could answer, none convict,
Or smite the mouth you dared not contradict!
All tongue-tied stood, with face and soul submissive,
To hear—what words! what manner of man is this?
Who, armed with more than empire's axe and rods,
Bids Rome renounce her faith, and heaven its gods!
Where am I? for he bared my breast, he clove;
He seemed to wrest the thunderbolt from Jove,
Regenerate heaven, and, why should I dissemble,
This hierophant, this reasoner made me tremble.
What counsel must I take? what vengeance wreak?
What do, what think? Speak Seneca! Helius, speak!

If it were not so utterly nonsensical, the reply of Helius to this stirring passage would not be without aptness to the situation in which the characters are placed and to the personages themselves; as it is, he spouts in the most comical vein. Although there are pages upon pages of such stuff as the above, greater trash is not to be found in the book than the following part of a dialogue of Nero with Thecla, a slave whom he woos thus. Statillia is the emperor's wife:—

NERO. Heaven's own example tempts us to the feast
Which nature celebrates, the gods provide
And fate exacts, for Cæsar and his bride.
THECLA. Your bride?
NERO. Had ever monarch bride so meet!
Rome's empire and the world's is at your feet.
THECLA. Another claims that rank, with more pretence.
Grant me one favour?
NERO. Name it!
THECLA. Let me hence.
NERO. Stay, stay! Statillia's doomed: this day we sever.
She's banished, she's divorced.
THECLA. For me? No, never.

How a man could print more than two hundred pages like this is almost as great a mystery to us as how he could write them.

Pursuing the comparison between Messrs. Bliss and Plumptre, let us now return to the work of the latter. This errs in its excess of word-painting as well as in the kind of such painting. This abundance is generally apt to the motive of the subject, and truthful, though cold and rather commonplace, in delineating nature; yet it overloads the purpose of the author without supplying brilliancy to his principal poem. This word-painting is,

nevertheless, carefully and tastefully executed, and, apart from its quantity, is rarely absolutely tedious to the reader; in fact, less would be by no means unacceptable. We take it to be rather a sign of weakness in the author than an absolute fault of his mind. Otherwise the style of these poems is good and sound. This is especially the case with regard to that work which gives name to the book before us. The following may be taken as a fair specimen of the whole; it refers to the previsions by Roger Bacon of Oxford and his own fate and fame. The wonders of science secured,—

Armed with these,
Each sense shall widen, sun and moon and stars
Shall yield their secrets, men shall know the laws
That guide them in their courses, watch each phase
Of all their circling movements, find at last
The secret of their dread, sweet influence
On us and on our fortunes. Or, perchance,
For so my thoughts have whispered, we shall see
God's order plainly. These bewildering mists,
Haze of hot fancies, giving form and hue
To merest dreams, shall pass away, and leave
The Wisdom which we see in earth and heaven
More bright than ever.

The poem in question begins with previsions of this order, thus carefully and coldly expressed; next is a dialogue of Roger Bacon with his follower John of London, an acolyte of science, who is fresh in life, and full of hope and confidence. To the latter is committed the charge of the precious manuscript, the famous 'Opus Majus' of the great mediæval philosopher, of which the poem before us contains versified passages. These to some extent justify the style of the present writer in dealing with his characters. The manuscript itself is to be conveyed to the Pope, Clement the Fourth, at Rome, an early friend of Bacon. The pupil accepts the charge, proceeds on his journey, and is unheard of for many years. Meanwhile, Bacon becomes the victim of ignorance and superstition, and is about to die, when, just in the nick of time, John of London returns, attends his master's deathbed, hears his last injunctions, and endeavours, from his own experience, to correct some of the errors of the dying philosopher. Such is the plot of this poem. Its chief interest is derived from the language and ideas expressed.

Compared with such a work as the 'Paracelsus' of Mr. Browning, which has a kindred though contrasted theme, this is mere prose of the dullest sort,—descriptive where the other is analytical, lightless, instead of being brilliant with due though fitful splendour—splendour which, if irregular, is not the less truthful and akin to the subject.

'Augustine' puts us in mind of 'In Memoriam' in its structure and sentiment. 'Evil-Merodach' gives the story of Coniah, and has more of force than either of the above. It is really vital, if not vigorous. Mr. Plumptre's minor poems often exhibit both taste and feeling—always good scholarship and careful finish. They are the better parts of the volume before us. Deficient in novelty of characters, they call for but general commendations.

We are very glad to welcome another pleasant, if not powerful or ardent, volume of poems by Mr. Harris. He writes well, with great freshness and simplicity, and with what is evidently a true love for nature. Take the opening lines of his most important poem as fair examples of what is characteristic here. The subject, music at morning:—

Music among the mountains! How it streams
Along the hollows where the fern-queen trills
Melodious matins by her door of moss,
Shakes the bright ivy shimmering on the rocks,
Treads through the thicket like a throbbing tramp,
And overflows the happy voiceful vale!
It is a queenly morning; the great globe
Is life with whispers from a world of wings,
Each bush and tree a temple. How the psalm
Of the greenwood soars in a sound of praise,
And every quiver from the brambled brake,

Dew-pearled and glittering in the rising sun,
Is like a priest conversing with the Lord.

Among the less ambitious efforts of this writer—whose former works, as we regret to hear, "have not yielded him any profit"—is a charming little linnet-song, called 'Song for a Little Boy.' 'The Cannon in the Lane' is another charming poem. For a prize-poem, the 'Ode on Shakspeare's Birthday' is not so low in merit as such works generally are. This book contains a score of pretty verses, all innocent and good enough to please the most rigid taste, often reverent in their simplicity, and generally having the look of "open-air" productions,—which is more than we could say for Mr. Bliss's magniloquence and bombast, or the placidity of Mr. Plumptre.

Miss Leslie's 'Stray Leaves' will displease nobody who is inclined to sentimentality. She is, nevertheless, not mawkish; she evidently feels what she writes, and writes about her feelings with simplicity and confidence in her own taste. 'Dead Violets' pleases us very much. There is nothing in it to give a "subject"; nevertheless, it is true to the theme. This is the greatest praise we have for such verses as these. 'Wild Sea, wild Sea!' has more spirit and force in it. There are one or two thoughts or images in the last-mentioned poem which we fancy to have read in Dana's 'Buccaneer.' Miss Leslie's simplicity becomes trivial in many places; she is often dull withal, but never cloy us with too much sweetness—never spoils her work with too much "colour" or over-abundance of metaphors.

Church Constitution of the Bohemian and Moravian Brethren. The Original Latin, with a Translation, Notes, and an Introduction. By B. Seiffert, Bishop of the Brethren's Church. (Mallalieu & Co.)

THE Brethren, or as they are also called, Brethren of the Law of Christ, Unity of the Brethren, represent the stricter and more spiritual followers of Huss, who suffered much after the death of the reformer, first as the Taborite party, and subsequently in their organized state. The Calixtines may be termed the more moderate Hussites, who were tolerably contented with certain concessions made to them by the Romish hierarchy, especially the use of the cup. But the so-called "compacts" of the Council of Basil, A.D. 1443, in which concessions were reluctantly made to the Calixtines by the Church of Rome, did not satisfy the more earnest of these reformers, who had still difficulty in maintaining themselves against the dominant hierarchy. The Calixtine archbishop, Rokyczana, violent enough against Rome, was reluctant to separate from it entirely and put himself at the head of a new Reformation, though a number of earnest men, chiefly in Prague, urged him to do so. This circle gathered strength and influence, the remnant of the Taborite party having gradually attached themselves to it, and Gregory, Rokyczana's nephew, exercising much influence over it. Still, Rokyczana wavered, because he was striving to obtain a reconciliation with Rome, and the recognition of his archiepiscopal dignity. Though it is uncertain whether he really wished the stricter party to separate from the rest, he facilitated their secession by his influence with Podiebrad the King, in procuring the district of Lititz, in the north-east of Bohemia, to which they retired in 1457. The priests of the Calixtine party who joined them were their spiritual pastors, and their adherents increased in numbers and importance, so that the allotted district became too narrow for their operations. The jealousy of Rokyczana was aroused. To him and the king the flourishing community seemed dangerous.

The Romish party urged repressive measures. Hence a persecution was set on foot against the Brethren, who were accused of preparing an insurrection like that of the Taborites before. Thus the newly-formed churches were dispersed: the Brethren were compelled to hide in the mountains and woods, and to dwell in caves; yet they held synods, and instituted a church constitution.

In 1467 they resolved, in an assembled synod, to seek episcopal ordination from a congregation of the Waldenses in Austria. The latter acceded to their request, and introduced the episcopal element among them. The bishops had seats in the governing council. The executive power was lodged in a Board, consisting of bishops and presbyters, while the ultimate authority lay in the Synods. The entire organization presented a combination of presbyterian and episcopal government.

The little book before us contains the authorized account of the ecclesiastical discipline and order which prevail among the Bohemian Brethren. The formulary in question was revised and completed in the General Synod held at Zerawich in Moravia, A.D. 1616. Having been approved by all, it was subscribed by the Seniors and Consensiers present from Bohemia, Moravia and Poland. In 1632, at a Synod held at Lissa, it was resolved that a Latin translation of it should be printed, which was done accordingly in 1633. In 1660, J. Amos Comenius, the last surviving bishop of the Bohemo-Moravian branch, reprinted it. A third edition appeared at Halle, 1702, edited by Budeus. Since that time it has not been reprinted till now. The present edition of the Latin original is followed by an English translation, literal and faithful; and by a few notes chiefly taken from Comenius. There is also a good English Introduction. The production relates solely to order and discipline, for which the Brethren appear to have taken the New Testament as their guide.

It would have been interesting to the reader had he been furnished with the means of comparing the doctrines of the United Brethren with those of other Protestants, especially their belief in the period anterior to the Reformation. But there are no documents that give a full and definite view of their creed at that early time. Their celebrated catechism is only to be found in the form it took under the influence of the Lutheran doctrines, A.D. 1523; for in the three Confessions which they presented to King Wladislaw in the years 1504-1508, printed in Lydius's 'Waldensia,' the Brethren are more desirous to defend themselves against accusations, and to show their agreement in faith with that of the Church generally, than to give the peculiar doctrines that distinguish them from others. It is pretty clear, however, that their creed harmonizes with the *Confessio Taboritarum* of A.D. 1431.

The Brethren had many excellent men among them, such as Michael Bradacz, Gregory Rzehorz, John Augusta, John Amos Comenius and others. In their flourishing period they possessed two hundred churches in Bohemia. They were sober, temperate, and simple in their habits. Adversity, however, scattered and thinned their ranks. They were persecuted by various monarchs and states, by Ferdinand the First and others; and were obliged to flee to Poland and Prussia at different times. But a secret remnant still lingered in Bohemia and Moravia, which appeared after 1722 in Zinzendorf's Herrnhuters, who may be called the latest representatives of the old United Brethren, but in a renewed form.

The following extract shows their order of preaching the word on the Lord's-day:—

"On Lord's days, as being entirely set apart for

divine worship, the people assemble four several times to hear the word of God; twice before noon and twice after. In the first meeting select passages from the *prophets* are explained; in the second (which we term the *great service*) passages from the *Gospels*; in the afternoon from the *apostolic writings*; and in the evening the *Holy Bible* is read in order, accompanied with instructive remarks. In the summer season also, beginning at Easter, there is added a fifth meeting at noon; when the youth are assembled, and for their benefit *catechetical instruction* is given in as popular a manner as possible, and they are also individually questioned. However, the parents and others likewise attend, both that they may return thanks to God after having taken refreshment, and that they may be present at the instruction of their children and domestics. The mode of conducting our sacred assemblies is this. When the people are met, a hymn or sacred song is sung (in the *great service*, and at that in the afternoon also a psalm); then the preacher (after having prayed in the pulpit, either with the people or only mentally) reads his text and explains it; reference being always made to the *common place* of that week. For all the chief points of religion are so distributed for explication on the Lord's-days, as that they may be gone through annually: as is shown by the published index of such common-places, and of texts serving to elucidate them, and of sacred songs. The object for which this was prepared was to preserve unanimity throughout the congregations, not that it should be like a law from which it is not allowed to deviate; for the faithful pastor is at liberty, as often as he sees necessary, either to choose for himself a text better suited to the place, time, persons, and occasions; or prudently to digress from the ordinary texts to other points of instruction, disquisition, or consolation. It is rather to be regarded as a law, that prolixity in preaching should be avoided, so as to avoid weariness in the hearers. Hence it is ordered that the morning meeting should not last above an hour, including the singing; so also as to that in the afternoon, and a meeting on a week-day. But in the *great service* an hour is allowed for unfolding the text from the *Gospels*. The meeting at noon and that in the evening are limited to half an hour each. Each sermon concludes with a prayer, followed by the blessing and singing. At the conclusion of the noon and afternoon service, the elder youths and girls remain, and are examined by the preacher (one of the elders assisting him with the former, and one of the matrons with the latter) to ascertain what attention they have paid that day in hearing the word of God, and how much each has retained. Moreover, during the Lent season, on Wednesday and Friday evening, meetings are held, termed *salva* (from the hymn *Salva nos, Jesu, rex cali*, 'Save us, Jesus, heavenly King,') in which the mystery of redemption is diligently inculcated, especially upon the young. The manner adopted by us of preaching the word of God is simple, without the colouring of human eloquence, and chiefly in the terms of Scripture, for the preserving of sound and unblamable doctrines that every man may be presented perfect in Christ Jesus, in those things which pertain to righteousness, thoroughly furnished unto all good works. Hence our ancestors held separate addresses to the different classes, the beginners, the proficient, the perfect; also to the single, and again to the married by themselves: which practice it is evident was not without its advantage."

This little book will interest the students of ecclesiastical history and all who desire to compare the peculiarities of religious sects and churches. The regulations are simple, bespeaking a people well versed in the Scriptures and adverse to ritualistic practices. Poor, quiet, peaceable as they commonly were, leading a life rigidly moral and pious, though in many respects contracted, they worshipped God without ostentation, in conformity, as they supposed, with the spirit and precepts of the New Testament. Neither their poverty nor their good conduct could save them from persecution, and they have now to look back

succession of worthy ancestors of whom they, nevertheless, have cause to be proud.

The Story of Kennett. By Bayard Taylor. (New York, Putnam.)

TOGETHER with the excitements of a love-story, the characters and incidents of which are in perfect harmony with the period and scenes selected for delineation, Mr. Bayard Taylor's new volume presents the reader with a carefully exact and in some places microscopic picture of the rural life of Pennsylvania at the close of the last century. Hence the book has claims upon the attention of persons who under ordinary circumstances care but little for the inventions of romantic art. It may not, however, be inferred that 'The Story of Kennett' is chiefly noticeable for its descriptions of an almost obsolete state of society. The tale is rich in interest, having a very unusual plot for its framework, and comprising amongst its details many delicate illustrations of character. There was small need for the author to intimate in his Preface that his pages were the record of local traditions and personal observations concerning men and places, familiar to the residents of a district, about which he observes, "The country life of our part of Pennsylvania retains more elements of its English origin than that of New England or Virginia. Until within a few years, the conservative influence of the Quakers was so powerful that it continued to shape the habits even of communities whose religious sentiment it failed to reach." Unaided by this confession, the tone and humour no less than the personages of the story indicate with sufficient clearness the sources from which the author drew his knowledge, as well as the circumstances under which it was obtained. Ample evidence of his conscientious adherence to facts is found in the homely bluntness of the farmers who are the principal male actors of the drama, the outspoken frankness of their women, and the sedate composure of the Quakers, whose sober costumes and quiet tastes contrast strongly with the passions and crimes from which the story derives the larger part of its action and dramatic force. In more than one place, indeed, the author has sacrificed effect to literal truth, and would have done better had he trusted more to his imagination and less to memory. On the other hand, there are passages where facts and fancy are combined with perfect judgment, and to admirable purpose,—of which especially felicitous parts none is better than the account of Martha Deane's wedding. At the *Quakerly* hilarious entertainment which followed that ceremony, Miss Lavender, one of the best creations of the story, "rocking her head to the peculiar lilt of the words," sang the following quaint ditty:—

"Well-met, well-met, my own true-love!
Well-met, well-met," cried he;
"For 'tis I have returned from the salt, salt sea,
And it's all for the love of thee!"
It's I might ha' married a king's daughter fair,
And fain would she ha' married me,
But it's I have refused those crowns of gold,
And it's all for the love of thee!"
"If you might ha' married a king's daughter fair,
I think you are for to blame:
For it's I have married a house-carpenter,
And I think he's a fine young man."
"If you'll forsake your house-carpenter
And go along with me,
I'll take you to where the grass grows green
On the banks of the sweet Will-lee!"
"If I forsake my house-carpenter,
And go along with thee,
It's what have you got for to maintain me upon,
And to keep me from slave-ree?"
"It's I have sixteen ships at sea,
All sailing for dry land,
And four-and-twenty sailors all on board
Shall be at your command!"

She then took up her lovely little babe,
And she gave it kisses three:
"Lie still, lie still, my lovely little babe,
And keep thy father counsellor-ree!"

She dressed herself in rich array,
And she walked in high degree,
And the four-and-twenty sailors took 'em on board,
And they sailed for the open sea!

They had not been at sea two weeks,
And I'm sure it was not three,
Before this maid she began for to weep,
And she wept most bitter-lee.

"It's do you weep for your gold?" cries he:
"Or do you weep for your store,
Or do you weep for your house-carpenter?
You never shall see any more!"

"I do not weep for my gold," cries she,
"Nor I do not weep for my store,
But it's I do weep for my lovely little babe,
I never shall see any more!"

They had not been at sea three weeks,
And I'm sure it was not four,
When the vessel it did spring a leak,
And it sank to rise no more!"

Oh, cruel be ye, sea-farin' men,
Oh, cruel be your lives,
A-robbing of the house-carpenter,
And a-taking of their wives!

"The shouts and laughter," runs the chronicle, "which greeted the conclusion of Miss Lavender's song brought Dr. Deane into the room. He was a little alarmed lest his standing in the Society might be damaged by so much and such unrestrained merriment under his roof." So the Doctor gives the signal for dispersion; and "the Friends" bid the bride good night in the last page of the story.

OUR LIBRARY TABLE.

A Christian View of Christian History, from Apostolic to Medieaval Times. By J. H. Blunt, M.A. (Rivingtons.)

THIS volume gives a popular and brief view of ecclesiastical history, from the birth of Christ to mediæval times, in eight chapters. The last two chapters are the best; the first two are the least satisfactory. The style is good; and the book, which is very readable, may serve as an introduction to the study of Church history. The author, however, should have read the best recent works on the subject, and profited by them, for his information is often incorrect, and his judgment at fault. Though a philosophical spirit is not wanted in the volume, nothing should be said that does violence to it. Our views differ very often from the author's. Some things, indeed, surprised us, such as "the confirmation of the baptized," which is specified as a third portion of the apostle's labours, and "illustrations of which," says our author, "may be found in the confirmation of the Samaritans by St. Peter and St. John." Surely he does not seriously believe that the modern rite of confirmation owes its origin to apostolic practice. The estimate of Mohammed is little better than that of Pridæux, long since exploded. On the whole, it could be wished that the writer had studied the pages of Neander, Hase, and Niedner before he put his materials into shape. Their view of events, rites, and doctrines is as Christian as his, though it is not so Church-of-England. He writes well; and, if his knowledge were commensurate with his power of expressing it, he could compose an excellent treatise.

The Average Clause.—Hints on the Settlement of Claims for Losses by Fire under Mercantile Policies. By Richard Atkins. (Layton.)

THIS book is addressed principally, if not solely, to persons who are connected with the management of our Fire Insurance Offices. Under "The Average Clause," it is necessary that the insured shall, in addition to a statement of his loss, furnish a valuation of the entire property under the protection of the policy at the time of the fire. If this value exceeds the amount of the insurance, the office pays only such a proportion of the loss as the sum insured bears to the whole value of the property. The principle is (as expressed in the form of this clause adopted by the French office) that the owner is to be considered as his own insurer for the excess of value, and must in that character bear a proportion of the loss. In the application of this principle, the most difficult and complicated

questions have arisen as to the proportions in which the different offices should contribute in cases where goods have been insured under different policies embracing property contained in wharfs, &c., within different areas. These questions have generally been settled by arrangement amongst the offices themselves, without troubling either the Courts of Law or Equity. The effect of these arrangements is best elucidated by a statement of the complicated claims that have been settled in accordance with them, and these settlements have become to the insuring world what the decided cases are to the lawyer. Mr. Atkins has had great experience as an officer of the Sun Fire Office, and he comes forward as one of the "old men" to enlighten the "new men" as to the practice which has been recognized in such cases. The necessity of enlightenment will not be denied by any one who peruses the statements of the puzzles that have arisen on this most difficult matter. The explanations of Mr. Atkins are generally clear and accurate, and the new men are much indebted to him for the present volume.

Memoir of Sir Patrick Dun (Ent.), M.D., M.P., Physician-General to the Army, and sometime President of the College of Physicians: including his Will, his Deed for constituting a Professor of Physic, and other Important Records concerning the Profession of Physic in Ireland, never before published. By J. W. Belcher, M.D. Printed and published by the authority of the College. (Dublin, Hodges, Smith & Co.)

Dr. Belcher may be thanked for the pains which he has taken to gather the requisite materials for a biographical sketch of Sir Patrick Dun, the eminent physician and promoter of medical science in Dublin, who died May 24, 1713, after winning such honours and distinctions as were within the reach of eminent Irish doctors in the days of the later Stuarts. But save as a conscientious and accurate collector, the author has no claim to our gratitude. Instead of fulfilling the promise of the title-page his book is merely an accumulation of ill-arranged facts which might have been manipulated into a memoir, but which in their present state give no satisfactory picture of the life, character and achievements of the man whom the treatise commemorates. Making no attempt to illustrate the society in which Sir Patrick spent his days, it is devoid of personal interest even beyond the wont of academic memoirs of the most frigid sort; and whilst it shows us so little of the man, it is burdened with extracts from parish registers, resolutions of boards, and other like materials, which a cunning writer would have abstained from publishing in full. Notwithstanding its shortcomings, however, it is a record which collectors of medical *ana* will like to peruse.

The Introduction to Fournier's 'Traité de Typographie,' translated by C. E. Keymer. (Gloucester, Bellows.)

THIS is a fair translation of the excellent essay by M. Fournier, corrected and augmented for the latest edition of the 'Traité de la Typographie,' and gives an account of his own craft, by one of the most competent and experienced modern practical printers. A second part describes the improvements that have been made in typography since its first productions appeared; this is very brief. A third part refers to typography in general, its modes of practice and mechanical processes.

Scotland Described: a Series of Topographic Sketches. By Alexander Murray. (Glasgow, Murray.)

THIS is a guide-book in the alphabetical manner of arrangement, that is, the user is required to seek in that order the name of any place about which he requires information; he does not find the knowledge sought disposed in the ordinary manner of such publications, i.e. in routes such as are suggested for the traveller. On this new plan the book is handier for reference in the study, but less so on the road. By means of an index, however, the common mode with these books is available for all services. On the other hand, by disposing his matter as in this book, the cost of making and printing an index is saved to the publisher, and the book is rendered a trifle lighter by the omission of so many leaves as the index may require. There is

an index to this book; but as it is not analytical, does not declare the subject of each reference beyond the name of the place concerned, it is of comparatively little use. The book is not a good one; in short, it is a very bad one. The text is loaded with marks of quotation to such an extent that the reader is bewildered by them. This is not the case, because the matter enclosed by those marks is such as, if borrowed, conscientious writers abstain from claiming as their own; on the contrary, as we thought at first, it is often such as no one cares about. Really, however, as the reader soon discovers, this method of bringing confusion to his pages is adopted by Mr. Murray for the sake of giving emphasis to his favourite passages. Here and there we come upon passages which should have been printed in the form of verse. Some of these are, probably, extracts from versified writings; few are poetical. This is but one of the writer's literary defects; others exist in his woful lack of terseness of style—so important in such a book as this,—no less than in his neglect of selection for his materials, by which the text is crammed with trivial facts. Thus, in an account of Iona, who cares to learn from such a book as this, where compactness is all in all, and every statement is supposed to be carried about the country in a man's knapsack, that the profits from the sale of "a well-written description of the district" are beneficial to a Free Church congregation in the island! Pages of poetical quotations from 'The Lady of the Lake' are not required in a guide-book, still less in a book of reference for the study. These are preferable to the author's prose gushings on the sentimental and romantic fashions. Even such shortcomings are made more objectionable by the literary defects of Mr. Alexander Murray, whose English is confused and muddled to a tiresome extent. Surely it is a poor consolation to the tourist who wishes to avoid the chatter as well as the cost of drivers and ciceroni in such a place as the Trossachs, to be told that "the drivers will be found well 'posted up' in the topographic incidents of the route"!

Nooks and Corners of English Life, Past and Present. By John Timbs. (Griffith & Farran.)

HERE is another of those agreeable parlour-window miscellanies devoted to the old times and customs of England, the number of which is already countless. Mr. Timbs, already known as a collector, does not ransack any very obscure nooks and corners to fill his wallet of miscellanies. Perhaps an abstract from the Table of Contents will best characterize and recommend his newest volume. The articles it contains are as follows:—Early English Life,—Britain before the Roman Colonization,—The Romans in England,—Domestic Life of the Saxons,—Meals: British, Anglo-Roman, and Saxon,—Castle Life,—Household Antiquities,—The Englishman's Fireside,—Private Life of Isabella, Queen of Edward the Second of England,—The English Housewife,—A Herefordshire Lady (Mrs. Joyce Jeffries) in the Time of the Civil War,—House-furnishing in the Middle Ages,—Dress: Personal Ornaments,—Pins and Pin-Money,—Provisions: Bread-Making, Grocery, and Confectionery,—Peasant Life,—Customs and Ceremonies,—Banbury Cakes, &c.,—Horselydown Fair in the Reign of Queen Elizabeth,—Wake-Festivals in the Black Country,—Keeping Birds in the Middle Ages,—The Story of Fair Rosamond,—Wolsey at Esher Place,—Traditions of Battle-fields,—Hatfield House,—The Grand Remonstrance,—Cavaliers and Roundheads,—Wotton and the Evelyns,—Lord Bolingbroke at Battersea,—The Last of Epping Forest. The above list, it will be seen, contains variety enough, if little novelty. The compilation is neatly executed.

How fresh and racy is the old matter thus brought together by Mr. Timbs cannot be better understood than by turning from it to such a faded masquerade-piece as *The Masque at Ludlow, and other Romanesques*, by the Author of 'Mary Powell' (Low & Co.).—The trick of these productions is worn out, save they be executed by a hand far stronger than our author's. It is only the unmistakable force of hand displayed by M. Lays that reconciles us to his grim, antiquarian,

Low Country pictures. The old costumes and buildings would tell for little were they presented in pale lead-pencil work, screen-wise, by some young lady alike intrepid and feeble. To bring forward Milton, Spenser, and Galileo—the heroes of these Romanesques (!)—is a piece of sorcery beyond our author's power. The author of 'Lady Willoughby's Diary,' of which all subsequent books have been merely so many washed-out imitations, modestly forbore to tamper thus directly with the mighty ones of the past; confining herself mainly to the influence which their rumoured and acted deeds and achievements had on the life of a loving and gentle lady living in retirement.

BOOKS FOR CHILDREN.

Lucy's Campaign: a Story of Adventure. By Mary and Catherine Lee. With Illustrations. (Griffith & Farran.)

WRITING with some of the grace and facility that distinguished the literary style of the two sisters, Sophia and Harriet Lee, who by their joint-labour made an honourable reputation in the days of our grandmothers, the authors of this book for children have produced a narrative that will entertain such little people as it is intended to amuse. The date of the story is in the heart of the last century; and Lucy's campaign is made in the wake of the Pretender's army, during the lamentable insurrection of '45. To throw a defenceless and very pretty damsel, of gentle birth and fair fortune, into the hands of a party of Jacobite troopers is a bold measure on the part of the story-tellers; but their daring is justified by the ease and strength with which they carry the young lady through a variety of surprising adventures, and ultimately restore her, safe and sound, to the care of her natural protectors.

The Early Start in Life. By Emilia Marryat Norris. With Illustrations. (Griffith & Farran.)

IN his nineteenth year Alexander Stirling, the hero of this readable story, is thrown upon the world, and required to provide for his young brothers and a sister as well as for himself. Bidding adieu to England, they start for Australia, where, after many troubles and disappointments, they win a sufficiency of bright fortune. Upon the whole, we are well pleased with this latest offering from the daughter of Capt. Marryat; but there is far too much of it. If it had been only half as long, the distinctiveness of the characters and the wholesome tone that qualifies the entire volume would have ensured it a considerable measure of success.

The Bible Opened for Children. By Mary Bradford. (Casell, Petter & Galpin.)

PORTIONS of the historical books are here narrated in a manner and style adapted to the capacities of children. The task attempted is a very difficult one; but the author has succeeded better than most. The volume is creditable to her judgment and taste.

Cassell's Story-Books for the Young.—*My First Cruise*, by W. H. Kingston: followed by *The Travelling Tinman*; *The Beautiful Gate*; and *The Chimera*. (Casell, Petter & Galpin.)

Mr. Kingston's contribution to this slight volume is a narrative of nautical experience, taken from the sea-log of Pringle Kushforth, a middy in Her Majesty's service, whose vessel captures a slaver soon after he has joined her. 'The Travelling Tinman' is, in like manner, directed against African slavery. The playful version of the classic story of 'The Chimera,' which closes the book, is from the pen of N. Hawthorne.

Donald Cameron; or, Trust Winneth Troth: a Tale. By Leonora. (Darton & Co.)

A story for the nursery, written in this style: "Oat-cake and porridge was the every-day food of which the whole family partook, and the scones, made of fine white flour, were baked fresh by Mrs. Cameron for her chance visitors from the Lodge, upon which occasions the children would come in for any pieces that might be left. When the novelty of the hot, soft cakes had a little worn off—by which time it is not improbable that a feeling of repulsion suggested itself to his senses—Gilbert looked up, and seeing Donald's eyes fixed upon him," &c.

Greedy boys and girls know what it is to feel that they have overeaten themselves; but they are not accustomed to speak of the discomfort as "a feeling of repletion suggesting itself to the senses." If Leonora would write for children, she must learn to think their thoughts and speak their speech.

Rosa Lindesay: the Light of Kilmain. By M. H. (Johnstone, Hunter & Co.)

HONOUR to whom honour is due: to the decorators, illustrators, and printers of this rapid little story, which the author of 'Labourers in the Vineyard' and 'The Red Velvet Bible' dedicates to a writer whose style and modes of thought accord with her own.

Newlyn House: the Home of the Davenports. By A. E. W. (Johnstone, Hunter & Co.)

GIRLS will thoroughly enjoy this story, even to the end of the death-bed scene, with which it closes somewhat too mournfully; and when they have read it once, they will read it again. A. E. W. must overcome two dangerous tendencies—a disposition to sermonize and a proneness to shed tears—and then she will write capital tales for the nursery and play-room. As it is, her book is about the best that has appeared in this "children's season." In her next story the hero, instead of dying of rapid consumption after he has carried off the highest honours of his university, must be endowed with sound lungs as well as a vigorous brain, and the will to do good in the world.

The Children's Hour Annual. (Johnstone, Hunter & Co.)

CONTAINING more than three hundred pages of prose fiction and poetry, calculated to please children, this volume is just the book for papas and mamas who want a collection of "short pieces" to be used in the hour which they daily devote to intellectual companionship with their children. The literary matter is quite good enough for its purpose; and though some of them are paltry things, the artistic embellishments of the work are, for the most part, of more than average merit.

Old Merry's Annual, 1867.—Merry and Wise. Edited by Old Merry. (Jackson, Walford & Hodder.)

"Old Merry" has become one of our literary institutions; and we are always glad to give him cordial greeting, as a worthy successor to Old Humphrey, Peter Parley, and other caterers of intellectual amusement for the children of a past generation. His present volume is abundant as to quantity, good as to quality, and magnificent with the crimson and gold which children like to see on the outside of their books. Amongst the many contributors to its contents, there is only one for whom we have a discouraging remark. Such literature as Miss Annie Harwood's 'The God Hidden and the God Revealed' is out of place in Old Merry's mirthful Annual.

The Children's Prize. Edited by J. Erskine Clarke, M.A. (Macintosh.)

A well-illustrated monthly serial of such literature as is calculated to please and benefit the younger boys and girls of our Sunday schools, 'The Children's Prize' is a meritorious and useful publication. It would be found acceptable to the members of those village clubs which have been established, here and there, by benevolent persons interested in the mental culture of the children of agricultural labourers. For its special purpose—the reward and encouragement of industry and intelligence in the classes of schools for poor children—no better work than Mr. Clarke's lies upon our table.

LIST OF NEW BOOKS.

Annals of Christ's Hospital, by "A Blue," illust. 6 photos. 10/6 cl.
Brilliantue's Shifting Winds, a Tough Yarn, cr. 8vo. 6 cl.
Brodie's Songs of the People, 12mo. 8 cl.

AFTER THE METEORS.

THOU steel-girt Earth, like amazon of old
That moved so late amid the burst of spears,
Where round thy path the hurl of battle rolled,
With all the battle music in thine ears
Of fiery arrows rushing through mid-air,
Now calm thou liest as a nun at rest;
And so shalt lie, as tranquil and as fair,
Thy snow-clasped hands above thy snow-bound
breast,
While round thy corse the priestess moons shall glide
One after other with a noiseless tread,
Binding the olive to thy swordless side,
Dropping the hollies on thy silent bed;
While one vast vault shall meet thine upturned face,
Where every light is burning in its place.

ELEANORA L. HERVEY.

STATIONERS' HALL AND ITS REGISTERS.

Nov. 28, 1866.

WHEN the important question of the consolidation and improvement of our copyright law—unfortunately now deprived of the able advocacy of Mr. Adam Black—shall come again before the Legislature, I trust that some attempt will be made, if not to abolish, at least to define clearly, the duties and powers of "Stationers' Hall." Few persons who have any acquaintance with the mode of keeping the registers there for the use of the public will, I think, deny that it falls very far short of the objects contemplated by the Copyright Act. That Act directs that a book shall be kept, wherein may be registered, on payment of a fee, the title of any work, time of first publication, name and abode of publisher and proprietor of copyright; it makes such registration a condition precedent of legal proceedings in case of piracy or alleged piracy, declares that it shall be *prima facie* proof of proprietorship or assignment of copyright, punishes with penalties a false entry, and gives to persons aggrieved by any entry power to apply to a Court of law to have it varied or expunged. This book of register is, moreover, to be open at all convenient times to the inspection of every person on payment of a specified fee "for every entry which shall be searched for or inspected." The utility of all this is obvious; but, unfortunately, a search in the books of Stationers' Hall is, in numerous instances, nothing but a snare. The public are permitted to search the indexes only, and this under such restrictions that no reliance whatever can be placed upon them. The names of proprietors of copyrights, although expressly referred to in the Act, are not, as such, entered in the index at all. On the other hand, authors' names, which are not referred to in the Act, are frequently the only heading under which books or other publications can be found, although the works they refer to are published anonymously; in which case a searcher not possessed of private information may look in vain; for any one who looks into one of these indexes for more than thirty seconds, "by the stop-watch," will, as I have experienced, be inevitably informed by the authorities that he must strictly confine himself to one, or at most two, initial letters. The motive of all this is avowedly a fear that fees may be lost by permitting any greater liberty; but the index only—and not the book of registry which the Act directs to be "kept open for inspection"—is placed in the searcher's hands, and, of course, the mere index word, without any of the particulars of the registration, could rarely be of any value.

To show conclusively the absurdity of the present system, I took only the other day to the registry-office a copy of a well-known work, and requested

both the clerk in charge and the chief officer there successively to point out how I was to search for an entry of it. Two index words were given to me and I was distinctly informed that I could not be permitted to search under any other heading. Neither myself nor the authorities, however, could find it by these clues, and I was finally assured that no such work was registered. Yet I happened to know, not only that the work referred to was registered, but that the fact must appear somewhere in the very index-book which we had examined and in which, assuming there has been no clerical omission, I am ready to undertake to find it, if an allowed liberty of search, in ten minutes—less than that time being sufficient to look through the whole book.

While this is a specimen of the system of registering at Stationers' Hall, it is not surprising that we hear of cases of two parties registering the same title, and afterwards wasting the time of Equit Judges by disputes about proprietorship. In the case I have alluded to I am absolutely debarred from inspecting the register, and could only possibly come at it by pretending to search for other books; and paying fees in each case, in the hope of accidentally stumbling upon this forbidden information. Whether a mandamus from the Court of Queen's Bench could compel these dragons who guard the Hesperian Gardens of Amen Corner to relax the system,—or whether an action would lie for damage sustained through placing reliance on their imperfect indexes or their misleading assurances,—not being a lawyer, I will not venture to say. The late Mr. Justice Talfourd, when introducing the Copyright Act, remarked that, "as the Stationers' Company had long enjoyed the control over the registration of books, he did not propose to take it from them, and their privileges were accordingly continued, but the public reverence for the vested rights of City Companies has considerably abated since that time. Reform is clearly needed; and I suspect it will not be complete until the registration, often so important in connexion with literary property shall be intrusted to some public officer responsible to Government, and having no direct interest in the fees of his office."

W. MOY THOMAS.

NATURAL SELECTION.

November 28, 1866.

AT the last meeting of the Entomological Society the subject of "Mimicry," or protective resemblances, was brought forward by Prof. Westwood and myself, and during the discussion that ensued some objections were made to the explanation of the phenomena first given by Mr. Bates, as adopted by me as the only sufficient one. Tim did not then permit of an answer being made to those objections, and as they are at first sight very plausible, and were brought forward not by one of Mr. Darwin's opponents, but by a gentleman who fully admits the great principles of evolution as development in organic nature, they may probably have weight with some persons. Believing, however, that they are entirely unsound, may I beg a little of your space to give my reasons for rejecting them.

Mr. Sharp stated that four different cases might be sufficient to produce the phenomena of "mimicry" more or less completely, viz., first, accidental resemblances; secondly, similar conditions of life; thirdly, heredity, or reversion to common ancestral type; and, fourthly, the preservation of useful variations.

To the first, or accidental resemblances, it was admitted that very few, if any, of the cases adduced by Mr. Bates or myself could be due. The last of the one we adopt. The second and third remain, and these, Mr. Sharp argued, would account for most, or perhaps all, of our cases without the agency of natural selection at all. Now, all I can admit is, that in some cases of very closely allied species of the same or of closely allied genera, a accurate external resemblance, such as we term "mimicry," might possibly be produced either by "heredity," or by the action of like conditions. But in all the cases in which the insects resembling each other belong to distinct orders, or distinct families, or to genera not intimately allied, or even to well marked sections of extensive genera, I entirely dis-

that either or both of these causes could have produced the whole series of phenomena presented by *mimicking* insects, and for the following reasons, which appear to me sufficiently conclusive:—

1. In all cases of mimicry, the resemblance of the one species to another in a different group is entirely superficial, and is always strictly confined to those characters which cause the one to *look like the other*. The structure, the habits, the form of inconspicuous parts, the colour of inconspicuous parts, the nature of the food, or the character of the larva and pupa, are not, as far as we know, ever modified in a similar manner. But if such general causes as "heredity" or "similar conditions" produced resemblances, these resemblances should affect various parts of the organization, not those conspicuous to the eye only. The effect being limited with strict reference to external resemblance, seems to me a fatal objection to referring it to any cause or causes of a general nature.

2. There are no grounds for believing that minute details of colouration and marking are due to climatal conditions at all, still less that they can be produced so identically alike in species of groups widely differing in organization; neither is there any evidence that such details are ever continued by heredity to one species only in each of two distinct family groups which contain hundreds of other variously-coloured species.

3. It is only a very few groups of insects which are the subjects of imitation by many other groups. But "heredity" should affect nearly all groups not too remotely allied; and "common conditions" should affect all species inhabiting the same forests with some approach to an average frequency. The fact that there is no such miscellaneous character in the resemblances (the group of Danaoid butterflies being the mimicked in the great majority of cases) tells us plainly that no causes affecting all insects alike can be at the bottom of this curious phenomenon.

4. Protective resemblance to a species of a distinct order sometimes occurs, as in the curious *Orthopterous* insect adduced by Prof. Westwood, which had been always taken for a *Coleopterous* insect that inhabits the same country (*Tricondyla* sp.). Neither "heredity" nor "like conditions" can be called in here; yet the phenomenon is so similar to that of the mimicking butterflies, that the idea of a similar cause in both instances is irresistibly forced upon us.

5. Resemblances of the most perfect kind occur between insects and inanimate objects. Phasmidæ imitate sticks, leaves, or moss most wonderfully. The larvæ of Geometræ also imitate sticks. Thousands of tropical Coleoptera imitate bark (and it is always those that cling to bark); others that sit motionless on leaves cannot be distinguished from the dung of birds dropped on a leaf. These are most clearly *protective imitations*, and they can none of them possibly be produced by "heredity" or "similarity of conditions," but, if produced at all by natural causes, seem clearly due to the continued preservation of useful variations. The mimicry of other insects is equally protective, and there is every probability that both were produced in a similar manner.

6. This is rendered still more certain by the fact that in both classes of resemblance it is the female only that is most frequently protected, for reasons which I have already explained, but cannot now enter into. It is only the female "leaf-insect" that is so wonderfully like a leaf; and in many species of Pieris and Diadema it is the females only that mimic Heliconias and Eupreas. This fact alone renders it in the highest degree improbable that the two groups of phenomena should have been due to distinct causes, even if the preceding arguments had not shown us how impossible it was to explain any of the main features of "mimicry" by such causes as "heredity" or "the action of like external conditions."

For these reasons it appears to me indisputable that "natural selection," or the continued survival of variations useful to the possessor, is the only theory yet before us which is capable of explaining the whole of the facts presented by "mimicking insects."

ALFRED R. WALLACE.

GAVARNI.

FROM a modest house at the corner of the Avenue Bugeaud and the Avenue de l'Impératrice, a thin-waisted man, with a very grave face, wrapped in a black velvet gown, would of late watch the crowds of happy Parisians driving and riding to and from the Bois de Boulogne. He had been among them many a year, and had shone in their midst. But now the fashionable man had withdrawn himself from the world. His beard was grey, and he had a cough that spoke of the grave. He had been a gallant, who could turn a compliment exquisitely; a wit, whose shafts were keen and polished. Not only with his pen, but also, and chiefly, with his pencil, he had observed the men and women of his day, their passions and prejudices and meannesses; and he had so embodied them that he had earned for himself, albeit not of the Academy nor conspicuous on the Line at the annual exhibitions, a fame that must be embodied in the history of his period.

Paul Chevalier was a working engineer at Tarbes. It will surprise many who have met him in society, and must therefore have admired his tact and grace and distinguished bearing, to hear that he was of the working class—a man born to live by the use of his strength; yet it was so. But early the light of his genius broke through his humble lot. He began his Art-work by furnishing drawings to the books of fashion. This working engineer had a taste for the elegant and the refined from the beginning. After a while Paul Chevalier was emboldened to send two water-colour drawings to the *Salon* in Paris. M. Germain was at the time the compiler of the *Catégorie*. The humble artist's drawings were remitted from Gavarni. M. Germain mistook the name of the place for the name of the artist, and Paul Chevalier's drawings appeared as the work of M. Gavarni. The pictures made a hit; and Paul Chevalier, with a laugh, stuck to the name of Gavarni. He in late years, when he was a fine gentleman, made a fair joke on the subject. A lady, who was wont to labour under the delusion that she was a wit, one day asked him whether he was cousin to the cascade of Gavarnie. "Yes, Madame," the artist answered, "I am cousin *à la* de Germain." Many are the jokes and polished sarcasms which travel still about French society as those of Gavarni. At the height of his renown he was *fêted* and admired; but neither the adulation nor the rapid pace of the life spoiled him. Light and sparkling as he could be, he kept always a serious and sober background to his mind. M. Jules Clarétie describes this phase of him by saying that he had the *entrain* of the Frenchman with the phlegm of an Englishman; that it was a drop of gin in a glass of champagne. So that champagne and gin express the relative values of the French and the English characters! We are obliged to M. Jules Clarétie.

Gavarni was in his prime and in his glory from about 1830 to 1848. He was a correct and graceful artist, a keen observer of character, a pictorial wit and satirist. The vices, the meannesses, of his time were illustrated and flagellated by his practised pencil. It is remarked of him, and to his honour, that there are few, if any, personalities in his works. His was that higher observation which, from a class, can embody an individual type, and punish a popular vice or weakness without making a scapegoat. Gavarni's "Masques et Visages," his "Lorettes Vieilles," and his terrible parents and children, will live not only as finely-conceived and executed works, but also as admirable and most authoritative material for the historian. Some of them, indeed many of them, present the naked truths of a dis-solute society so sharply that we shudder; and Gavarni meant that we should shudder. This was the lesson the serious man who stood ever upright behind his comic mask insisted upon teaching. It has been said of Gavarni that he was not a caricaturist, but a moralist. It is nearer the truth to say that he was both caricaturist and moralist. He did not, as we have observed, caricature individuals, but he enforced the salient characteristics of the type he wished to produce to the spectator's mind by exaggerating them. Ergo, he was a caricaturist. It will be remembered, to his honour, that his great qualities were always employed on the right side;

that if he painted vice, it was to show how hideous she was; that if he took learned observations in the byways and slums of Paris and of London, his mission was not merely to amuse the *badouins* of the Boulevards.

Gavarni delighted in the new world London opened upon him when he came among us in 1849. His pencil revelled in the picturesque miseries of St. Giles's and Whitechapel, as well as in the elegancies of the West End. He studied all the shifting phases of our social life with ardour. He made his countrymen acquainted with the multitude of our low games, and the dismal habits and predicaments of our uninformed and under-fed population. But he never caught the British type. His Englishmen are stage Englishmen. He got far beyond the stupidities of the old French caricaturists, and even the majority of French caricaturists of our own time, whose only idea of an Englishman is a man with a hook nose and two fangs protruding from his upper lip. Even Gustave Doré is satisfied with copying the ancient absurdity. Gavarni, we repeat, studied hard to catch our English faces; but we have only to compare his people of the London streets with those of Leech to see what little way he made.

But at home Gavarni was, at least, the equal of Leech. Gavarni was the accomplished artist. He had a grace which Leech never studied to reach. The exact position in the world of each of his figures is as plainly told by the magic strokes of his pencil as it could be in pages of description. Gavarni was, moreover, a facile and graceful writer. His letters on England, which are scattered hither and thither, are said to be full of point and just observation.

Gavarni called the sombre house from which, a shattered man, he watched the brilliant company of Paris pass to the Bois, his tomb; and in this tomb he would lift the green serge from before his window and still admire the grace over which his pencil had loved to linger. In this retreat he lost his son, and the sorrow hastened him on his own long journey. A little while ago he was persuaded to go to Auteuil for better air, and at Auteuil on the 23rd of November this better air received his last breath.

LEOPOLD RANKE.

WE have received from Berlin a printed circular, of which the following is a translation. We have not heard whether any further steps have been taken in the matter in question. Mr. Ranke sets a very high value on the reputation he enjoys in England, and would, doubtless, be gratified by any expression of respect from this country.—

"On the 20th of February, 1867, fifty years will have elapsed since Leopold Ranke took the degree of Doctor, at Leipzig. This academic act was the commencement of a scientific life, which, judging from the effects it has produced in teaching and in writing, we are now, after the lapse of half a century, justified in calling truly great. Ranke has opened a deeper insight into the foundations of historical science, a wider and more panoramic view from its heights. If, in recent times, no study, unless it be that of the natural sciences, has attained to so brilliant a development as history, it is, in great measure, his work. Who can be more desirous to give public expression to this conviction than those who have experienced his influence on their own minds, and have received from the words and works of the Teacher the fruitful germ of their own labours, the decisive direction for their whole lives? Whose duty can it more specially be to render the expression of this conviction an expression at the same time of gratitude, than that of the learners who had the good fortune to know the teacher at the period of his fullest scientific activity? This is more peculiarly the boast of those who took part in his historical exercises, which served as a model to many others, and in which the richest seed was scattered abroad.

"Under the influence of these sentiments, it was suggested that the 20th of February, 1867, should be kept as a day of general commemoration. The undersigned have held some preliminary consultations, and now address themselves to the wide

circle of those who during a whole generation have profited by these exercises. They are persuaded that in doing this they are only expressing the wishes of all Ranke's disciples, who now represent his science in every part of Germany, the wishes which unite the several generations, whatever differences time and the peculiar development of each may introduce amongst them, in one and the same sentiment.

"The undersigned likewise propose to present to the honoured Master some token of gratitude, and for that purpose they think it desirable that his scholars should once more assemble around him, on the day above mentioned, in as large a number as possible. They therefore request all who may be inclined to promote this work of piety to have the goodness to express their assent in writing to Dr. Theodore Toeche (Berlin, Kochstrasse, No. 69), inclosing their address. After which they will receive further communications on the subject."

"Halle, München, Berlin, Bonn, Göttingen.—E. DUMMLER, W. von GISEBRECHT, R. KÜPKE, H. von SYBEL, Th. TOECHE, G. WAITZ."

SUPPLEMENT TO THE BUDGET OF PARADOXES. (No. X.)

AND now for an episode on the things of the day. My account of Mr. Thom and his 666 appeared on October 27: on the 29th I received from the editor a copy of Mr. Thom's sermons published in 1863 (he died Feb. 27, 1862) with best wishes for my health and happiness. The editor does not name himself in the book; but he signed his name in my copy: and may my circumference never be more than $3\frac{1}{2}$ of my diameter if the signature, name and writing both, were not that of my $\odot\Box$ ing friend Mr. James Smith! And so I have come in contact with him on 666 as well as on π ! I should have nothing left to live for, had I not happened to hear that he has a perpetual motion on hand. I returned thanks and kind regards: and Miss Miggs's words—"Here's forgivenesses of injuries! here's amicablenesses!"—rang in my ears. But I was made slightly uncomfortable: how could the war go on after this armistice? Could I ever make it understood that the truce only extended to the double Vahu and things thereunto relating? It was once held by seafaring men that there was no peace with Spaniards beyond the line: I was determined that there must be no concord with J.S. inside the circle; that this must be a special exception, like Father Huddleston and old Grouse in the gun-room. I was not long in anxiety; twenty-four hours after the book of sermons there came a copy of the threatened exposure—"The British Association in Jeopardy, and Professor De Morgan in the Pillory without hope of escape. By James Smith, Esq." London and Liverpool, 8vo., 1866 (pp. 94). This exposure consists of reprints from the *Athenæum* and the *Correspondent*: of things new there is but one. In a short preface Mr. J. S. particularly recommends to "read to the end." At the end is an appendix of two pages, in type as large as the work; a very prominent peroration. It is an article from the *Athenæum*, left out of its place. In the last sentence Mr. J. Smith, who had asked whether his character as an honest Geometer and Mathematician was not at stake, is warned against the *fallacia plurimum interrogationum*. He is told that there is not a more honest what's-his-name in the world: but that as to the counter which he calls his character as a mathematician, he is assured that it had been staked years ago, and lost. And thus truth has the last word. There is no occasion to say much about reprints. One of them is a letter of August 25, 1865, written by Mr. J. S. to the *Correspondent*. It is one of his quadratures; and the joke is that I am made to be the writer: it appears as what Mr. J. S. hopes I shall have the sense to write in the *Athenæum* and forestall him. When I saw myself thus quoted—yes! quoted! double commas, first person—I felt as I suppose did Wm. Wilberforce when he set eyes on the affectionate benediction of the potato which waggish comrades had imposed on a raw Irish reporter as part of his speech. I felt as Martin, of Galway—kind friend of the poor dumb creatures!—when he was told that the new converts had put him in Italics. "I appeal to you," he said, "I appeal to the House! Did I?" Do

I ever speak in Italics?" I appeal to editor and readers whether I ever squared the circle until a week or two ago, when I gave my charitable mode of reconciling the discrepant cyclometers.

The absurdity of the imitation of symbolic reasoning is so ludicrously rich that I shall insert it when I make up my final book. Somebody mastered Spanish merely to read Don Quixote: it would be worth while to learn a little algebra merely to enjoy this *a-b*-istical attack on the windmills. The principle is, Prove something in as-roundabout a way as possible, mention the circle once or twice irrelevantly in the course of your proof, and then make an act of Q.E.D. in words at length. Let 360 be denoted by *c*, and 115 2 by *d*: by 100 uses of letter, and more than 20 equations, it is found out that $8c=25d$: this proves that 8 circumferences are 25 diameters! The following is hardly caricature:—

To prove that 2 and 2 make 5. Let $a=2$, $b=5$: let $c=658$, the number of the House; let $d=666$, the number of the Beast. Then $d=a+b+c+1$; so that 1 is a harmonious and logical quantification of the number of which we are to take care. Now, b , the middle of our digital system, is, by mathematical and geometrical combination, a mean between 5+1 and 2+2. Let 1 be removed to be taken care of, a thing no real mathematician can refuse without serious injury to his mathematical and geometrical reputation. It follows of necessity that $2+2=5$, *quod erat demonstrandum*. If Simpkin & Marshall have not, after my notice, to account for a gross of copies more than would have gone off without me, the world is not worthy of its James Smith!

I could forgive Mr. J. S. anything, properly headed. I would allow him to prove,—for himself—that the Quadrature of the Circle is the child of a private marriage between the Bull Unigenitus and the Pragmatic Sanction, claiming tithe of onions for repeal of the Mortmain Act, before the Bishops in Committee under the kitchen table: his mode of imitating reasoning would do this with ease. But when he puts his imitation into my mouth, to make me what he calls a "real mathematician," my soul rises in epigram against him. I say with the doll's dressmaker—such a job makes me feel like a puppet's tailor myself—4 He ought to have a little pepper! just a few grains? I think the young man's tricks and manners make a claim upon his friends for a little pepper!" De Fauré and Joseph Scaliger come into my head: my reader may look back for them.

A few Grains of Pepper.

Three circlesquarers to the manner born Switzerland, France, and England did adorn. De Fauré in equations did surpass, Joseph at contradictions was an ass. Groaned Folly, I'm used up! What shall I do To make James Smith? Grinned Momus, Join the two! As to my *locus penitentie*, the reader who is fit to enjoy the letter I have alluded to will see that I have a soft and easy position; that the thing is really a *pillowery*: and that I am, like Perrette's pot of milk,

Bien posé sur un coussinet.

Joanna Southcott never had a follower who believed in her with more humble piety than Mr. James Smith believes in himself. After all that has happened to him he asks me with high confidence to "favour the writer with a proof" that I still continue of opinion that "the best of the argument is in my jokes, and the best of the joke is in his arguments." I will not so favour him. At the very outset I told him in plain English that he has the whiphand of all the reasoners in the world, and in plain French that *il a perdu le droit d'être frappé de l'évidence*; I might have said *pendu*. To which I now add, in plain Latin, *Sapienti pauca, indocto nihil*. The law of Chancery says that he who will have equity must do equity: the law of reasoning says that he who will have proof must see proof.

My readers may expect a word on Mr. Thom's sermons, after my account of his queer doings about 666. He is evidently an honest and devout man, much wanting in discrimination. He has a sermon about private judgment, in which he halts between the logical and legal meanings of the word. He loathes those who apply their private judgment to the word of God: here he means those who decide

what it ought to be. He seems in other places aware that the theological phrase means taking right to determine what it is. He uses his own private judgment very freely, and is strong in the conclusion that others ought not to use theirs except as he tells them how; he leaves all the rest of mankind free to think with him. In this he is as original: his fame must rest on his sensory tripod.

A. DE MORGAN.

OUR WEEKLY GOSSIP.

OUR readers are aware that one of the works which the late Prince Consort engaged was that of making a collection of Raphael's works. It is so well known that he also contemplated making a collection of Michael Angelo's works, and that he made a considerable progress towards its completion. Mr. Woodward (Her Majesty's Librarian) is engaged, in conjunction with Mr. Ruland, in making a Catalogue of these works; hence, we suppose, the rumour, which is utterly without foundation, that he is writing a Life of Michael Angelo for the Queen. Mr. Woodward is proceeding with his chief task, the 'Life of Leonardo da Vinci.'

Messrs. Longmans & Co. are preparing for publication Mr. Disraeli's 'Speeches on Parliamentary Reform,'—Sir Henry M. Havelock's 'Three Main Military Questions of the Day,'—Mr. J. C. Marshman's 'History of India,'—Mr. C. R. Wall's 'Florence: the New Capital of Italy,'—and Prof. Tyndall's Lecture on 'Sound.'

Mr. Hepworth Dixon's work 'New America' is announced by Messrs. Hurst & Blackett for publication on New Year's Day.

At the Anniversary Meeting of the Royal Society, held yesterday (Friday), the President, General Sabine, delivered the customary address to the Fellows, and presented the medals which had been awarded by the Council. Prof. Julius Pflüger, of Bonn, a foreign member of the Society, whose researches in Analytical Geometry, Magnetism and Spectral Analysis, have gained him a high reputation among the savants of Europe, got the Copley Medal. The Rumford Medal (a biennial prize) goes to Armand Hippolyte Louis Fizeau, member of the Paris Academy of Sciences, for his optical investigations, especially for those on the effect of heat on the refractive power of transparent bodies. One of the Royal Medals was given to Mr. W. Huggins, F.R.S., who, within the past few years has done excellent work in spectral analysis, examining the chemical elements, and compelling stars and far remote nebulae to reveal their constituents, as may be seen in able papers published in the *Philosophical Transactions*. The other recipient of a Royal Medal is Mr. W. K. Parker, F.R.S., whose papers on comparative osteology, particularly on the anatomy of the skull, have been published in the *Transactions of the Royal and of the Zoological Society*. The two last-named gentlemen are of the recently elected Fellows of the Royal Society, and may be looked on as rising men, who, if favoured with health, will still work in their respective departments of science, and achieve yet greater results. It is, perhaps, the best use that can be made of medals to give them to young men whose love of science and skill and diligence in research have been recognised by the veterans who precede them.

The new Council of the Royal Society comprises the following:—President, General Sabine; Treasurer, Dr. W. A. Miller; Secretaries, Dr. Sharpey and Prof. Stokes; Foreign Secretary, Prof. W. H. Miller; Dr. Beale, Mr. Bowman, Commander Evans, Dr. Frankland, Dr. Gladstone, Mr. W. R. Grove, Mr. Huggins, Prof. Huxley, Mr. Lussell, Prof. A. C. Ramsay, Col. Smythe, Mr. Spottiswoode, Dr. T. Thomson, Mr. Tite, Vice-Chancellor Sir W. Page Wood, and Lord Wrottesley.

Dr. Reinhold Pauli, so well known in London literary circles, and whose expulsion from the Chair of History at the University of Tübingen, on account of the expression of his Prussian proclivities, we read of in the papers, is devoting his comparative leisure to printing a book long since prepared for the press, entitled 'Simon de Montfort, Earl of Leicester, the founder of the House of Commons.'

We understand that such persons as may wish to have a copy of Dr. Davidson's Preface to Fürst's Lexicon, can have it, free of cost, by writing to Thomas Scott, Esq., Ramsgate.

A few valuable additions have recently been made at the National Portrait Gallery in Great George Street, which re-opened to the public on Monday last. Two extremely well painted portraits of George the Third and his Queen, by Allan Ramsay, about 1767, have been placed in the Board-room, whilst in the smaller room at the back are now collected those pictures which contain portraits on a reduced scale, many of them being whole-length figures. Among these is the well-known picture of Lord Lovat, who was executed after the rebellion of '45. His burly figure, seated in a high cane-backed chair, is well known through the etching published by Hogarth. He is represented in the act of enumerating the rebel forces on his fingers, whilst his countenance expresses a grim and almost sottish degree of satisfaction. The picture has suffered much, but corresponds very closely with the engraving. 'Dr. Whitefield Preaching' hangs immediately over the crafty old rebel, and below is placed the interesting Grosvenor-Bedford picture of Sir Robert Walpole, seated in the studio of Frank Hayman, the historical painter. Portraits of Bartolozzi, the engraver, by Opie, and of Henry Pelham, the minister, by Hoare, of Bath, make their appearance on the principal staircase, whilst the delicate and low-toned portrait of Barry, by himself, has been brought into well deserved prominence. The fine portrait of Reynolds, by himself, has been placed for better protection under glass. Mr. Woolner's bust of Cobden stands, somewhat strangely, in front of Catherine of Arragon and eminent worthies of the sixteenth century; but the difficulties arising from the scarcity of good light, and the extreme narrowness of the temporary apartments, may sufficiently account for the inconsistency. One of the most important accessions made by the trustees for some time past is a portrait of Cardinal Pole, presented to the Gallery by Mr. W. Smith, F.S.A. It is smaller than life, seen to the waist, and of the usual type, in scarlet dress, cardinal's *baretta* and large cape, all of the same colour. The family arms, impaled with those of the see of Canterbury, and surmounted by the cardinal's hat, are in the right hand corner. It has a blue background. The picture is said to have been purchased by accident, and when found was coated over as usual by a mass of dirty paint. It was cleaned and repaired by the same clever hand which so recently operated upon the Richard the Second, and is now in all probability the best and most authentic portrait of Cardinal Pole as Archbishop of Canterbury in existence. The portrait exhibited at South Kensington from Lambeth Palace is only a mechanical copy from some better picture now no longer known to exist; whilst the smaller, well-known picture of the Cardinal, also at Lambeth, is in such a miserable condition of repair as to be at the present time entirely worthless. The delicate portrait of Sir William Butts, the physician to Henry the Eighth, painted, to say the least, in the school of Holbein, is well seen in immediate contrast with that of the Cardinal. The very excellent picture of old Hobbes of Malmesbury, which was so much admired at the South Kensington Portrait Exhibition, has been transferred by Sir Walter Trevelyan to this permanent institution. It is now satisfactorily ascertained that Joseph Michael Wright was the author of this effective performance; his signature, and the age of the philosopher (eighty-one) were discovered clearly written at the back of the canvas.

St. John's Gate, Clerkenwell, interesting to the antiquary and the man of letters, is now undergoing partial restoration. The present staircase is to be removed and will be replaced by a solid oak winding staircase; and the stone doorway, formerly the entrance to Cave's printing-office above, will be restored.

The helmets formerly suspended over the monuments of King Henry the Sixth and Edward the Fourth, at Windsor, have recently been brought back to their respective localities, and are now suspended as near as possible to the vaults of those

princes. This restoration has been accomplished by the good taste of the present Dean, after they had incurred more than one risk of being entirely lost. For some years they were in the garden or fore-court of the Deanery, converted, it is said, into flower-pots, and thence they found their way into the stock of Mr. Pratt, of Bond Street. Recovered by one of the more scrupulous Canons, they were again placed in the chapel; but one disappeared at the time of the marriage of H.R.H. the Prince of Wales, and the other, placed near the monument of Sir John Elley, has sometimes been mistaken for the casque worn by that gallant officer at Waterloo! Now that each is appropriated to its former owner, and associated in one view with his gravestone, they resume all their ancient interest. The helmet of Henry the Sixth is fitted in front with bars, such as are usually drawn by heralds for the helmets of sovereign princes. It is of the kind described by Hewitt ('Ancient Armour and Weapons in Europe,' Supplement, p. 573) as "the barred helm for tourneying, with rebated sword and mace." King Henry's helmet is identified by an old drawing of his monument and funeral trophies remaining in the Additional MSS. in the British Museum, and of which there is an engraving in Knight's 'Pictorial Shakspeare.' There is also a sketch of it in an article 'On the Heaume, or Tilting Helmet,' by Mr. Planché, in a volume of the *Journal of the Archaeological Association*, plate 23, fig. 7. The helmet of Edward the Fourth is sketched in the same plate, fig. 9, but will be found on examination to be more remarkable than would thence be imagined. On its right side is a longitudinal door or opening for the admission of air, after the fashion of the helmet in the Tower of London, fig. 8 of the same plate. A visor which shaded the ocularium is also still attached, but in an advanced stage of decay. Both these helmets retain vestiges of former painting and gilding, and each has a spike on the summit upon which the crest was fixed. Mr. Planché has remarked that the helmet of Edward the Fourth is nearly of the same form as that of Henry the Fifth, which is still preserved in Westminster Abbey. With that of Edward the Black Prince in Canterbury Cathedral, we may now congratulate ourselves on the preservation of four of these memorials of our ancient regal chivalry.

Mr. B. T. Williams has retired from the editorship of the *Law Magazine and Law Review*.

The next volume to be issued by the Palaeontographical Society will contain: 'The Crag Foraminifera, No. 1,' by Messrs. Rupert Jones, W. K. Parker and H. B. Brady, with four plates; 'Supplement to the Fossil Corals, Part I., (Tertiary),' by Dr. Duncan, with ten plates; 'The Fossil Merostomata, Part I., (Pterygotus),' by Mr. H. Woodward, with nine plates; and 'The Fossil Brachiopoda, Part VII., No. 1 (Silurian),' by Mr. Davidson, with twelve plates.

Prof. Van der Weyde, of Girard College, in America, has succeeded in obtaining a liquid from the condensation of gases from petroleum, which boils at the low temperature of 40°, and produces intense cold on evaporation. He has named this new substance Chimogene.

Death has taken away from the Parisian world M. de Barante, the Academician and author of the 'Histoire des Ducs de Bourgogne.'

M. Bazin, favourably known for his photographic researches, has contrived a very ingenious submarine photographic studio, by which he is enabled to take photographs of sunken ships, rocks, &c. The chamber is provided with lens-shaped watertight windows, and by means of the electric light the objects to be photographed are highly illuminated. M. Bazin is able to remain about ten minutes in his submarine chamber, and has produced several clear and well-defined photographic pictures of objects at the great depth of three hundred feet.

The Parisians have taken so kindly to horse-flesh as food, that it is stated no less than 43,000 lb. of this substance is sold weekly by the Paris butchers.

A remarkably fine photograph has been just

issued by M. Pierre Petit, the photographer to the Imperial Commissioners who have charge of the Exhibition of 1867. It reproduces the elaborate plan of the building and park, which the Committee of the Imperial Exhibition Club have prepared, with marvellous fidelity and clearness. Even the small descriptive print is legible. With this plan before him, the visitor will be able to master the scope of the design, to fix the important details in his mind, and to find his way from the Pont de l'Alma direct to any department of the Exhibition or grounds—from the Viceroy's Egyptian temple to the west, to the railway shed and bread-making machinery, on the eastern boundary of the park.

The Pagliano, the largest theatre in Florence, has been filled recently by large audiences, drawn by the excellent acting of Ernesto Rossi in the characters of Hamlet and Othello.

Padre Secchi, of Rome, has been making good use of his new spectroscope. In a recent communication made by him to the Academy of Sciences, he states that he has examined the spectra of various stars in the constellations of Hercules, Orion, Lyra, Cassiopeia, &c. He divides the spectra of these stars into three classes or types,—blue, yellow and red, and green. The result of his observations leads him to believe that each colour type predominates in one region of the heavens. Thus, the yellow and red type appears in the Whale, the blue in the Great Bear, Crown, Dolphin, &c., and the green in Orion. The type of our sun comprehends the Goat, Arcturus, Pollux, &c., and it is found that their spectrum is sprinkled throughout with fine rays.

The excavations at Nennig, near Treves, are carried on diligently, under the direction of the Prebendary, von Wilmowsky, and the sculptor, Herr Schöffner. In examining a spring south of the beautiful Roman villa which had been brought to light some years ago, coins and tiles of Roman origin were found. Investigating the spot closer, Herr Schöffner became convinced that the baths of the villa must lie in this direction. He requested the Society for Useful Inquiries, at Treves, to have diggings set on foot; and, indeed, on the first day the basins of the baths were hit upon. Measures were taken at once to examine, scientifically, these most curious and well-preserved bathing-places. But more discoveries were soon to follow. Searching for a broken aqueduct on the western part of the building, on ground which had not been touched before, the workmen came upon the walls of a round saloon, which were six feet high, and which were ornamented inside and outside with the finest Pompeian painting. In the presence of competent witnesses, the inscription under one of the paintings was laid open; it runs as follows:

CÆS. N. V. TRAIANVS
DOMINVS BRIT. ET SE.
CVRVINO SECVRO
PREF. TRIV. DON. RED.

On a closer inspection it was found that this round hall was covered inside with smaller pictures, and outside with three large paintings, of which the second, at the height of four or five feet, could be folded up. This picture represented a Hero, with shield and laurel-wreath, in a sitting posture. There was also an inscription underneath, but it had been broken to pieces previously, and only a few words could be gathered from the fragments picked up from among the rubbish at the bottom of the wall. The entrance into the saloon is from the north: it is 24 ft. in width. The pictures are about 8 ft. distant from each other, and they, as well as the inscriptions, are painted on crimson ground, *al fresco*, the ancient character of which has been proved so clearly, that any notion of additions at a later Roman period must be completely discarded. The round hall was connected with the principal building of the villa by a passage or corridor, 23 ft. wide and 600 feet long. The walls of this corridor, which has been laid open now almost entirely, show the finest paintings on black and crimson ground: gladiators and landscapes form the subject, for the greatest part. In the principal building of the villa, a wall was cleared lately, 56 ft. long, covered with paintings and genii. Under one of the pictures,

which was destroyed down to the legs, but which is supposed to have been a portrait, the words *CES TRAI* were found in a frame. All doubts are removed that a truly Imperial building has been brought to light.

INSTITUTE of PAINTERS in WATER COLOURS.—EXHIBITION of SKETCHES and STUDIES, OPEN from Ten to Six, at their Gallery, 33, Pall Mall (opposite Marlborough House).—Admission, 1s.; Catalogue, 6d. JAMES FAHEY, Secretary.

WINTER EXHIBITION.—THE FOURTEENTH ANNUAL WINTER EXHIBITION of PICTURES, the Contributions of British Artists, is NOW OPEN, at the French Gallery, 130, Pall Mall.—Admission, 1s.; Catalogue, 6d.

LEON LEFÈVRE, Secretary.

SOCIETY of PAINTERS in WATER COLOURS.—THE WINTER EXHIBITION of SKETCHES and STUDIES by the MEMBERS is NOW OPEN. 5, Pall Mall East.—Admission, 1s. Ten till Six. Lighted by gas on dark days.

WILLIAM CALLOW, Secretary.

THE SECOND ANNUAL EXHIBITION of WATER-COLOUR DRAWINGS is NOW OPEN to the Public, at T. McLean's New Gallery, 7, Haymarket, next the Theatre.—Admission, 1s. R. CLOTHIER, Hon. Sec.

MR. ARTHUR TOOTH'S FIRST ANNUAL WINTER EXHIBITION of WATER-COLOUR DRAWINGS is NOW OPEN to the Public, at the Fine-Art Gallery, 5, Haymarket, from Ten till Six.—Admission, 1s., including Catalogue.

MR. MORRIS'S COLLECTION of MODERN HIGH-CLASS PICTURES is ON VIEW at the Royal Exchange Fine Arts Gallery, 34, Cornhill. This Collection contains examples of Leslie, R.A.—D. Roberts, R.A.—E. M. Ward, R.A.—Holman Hunt—J. Phillip, R.A.—T. Fead, R.A.—Egg, R.A.—Frith, R.A.—Rosa Bonheur—Henriette Browne—Goodall, R.A.—Cook, R.A.—Crawford, R.A.—Pickersgill, R.A.—Calderson, A.R.A.—Sant, A.R.A.—Le Jeune, A.R.A.—Ansell, A.R.A.—Frost, A.R.A.—Pettie, A.R.A.—Yeames, A.R.A.—P. Nasmyth—Linnell, sen.—Dobson, A.R.A.—Cooper, A.R.A.—Gale—Marks—F. Hardy—John Fead—Frère—Rulpiers—Liddendale—George Smith—Duvetier—Peter Graham, &c.—Admission on presentation of address card.

MADAME STODARE (Widow of the late Colonel Stodare) begs to announce that the THEATRE of MYSTERY, Egyptian Hall, is OPEN for the SEASON. Madame Stodare will present the Sphinx, Marvel of Mecca, and Basket Trick, assisted by Mr. Firbank Burman, Pupils of Colonel Stodare, in Colonel Stodare's Royal Entertainment of Magic. Doors open at 7.30 and 7.50.—Admission, 1s. and 2s.; Stalls, 3s.; which may be secured at the Box-office from 11 till 6; and at Mitchell's, 23, Old Bond Street. Mr. JAMES WEAVER, Manager.

ARTEMUS WARD.—EGYPTIAN HALL.—EVERY EVENING at Eight. Doors open at half past seven. Saturday afternoon at Three P.M. In consequence of the great success of ARTEMUS WARD AMONG THE MORMONS, Stall Seats should be engaged some days beforehand. They may be secured at Mitchell's Royal Library, 23, Old Bond Street; Austin's Ticket Office, St. James's Hall; and at the Egyptian Hall. Stalls, 3s.; Floor, 2s.; Gallery, 1s.

SCIENCE

SOCIETIES.

ROYAL.—Nov. 22.—General Sabine, President, in the chair.—The list of the new Council proposed for election, and the following papers were read:—'On the Laws of Connexion between the Conditions of a Chemical Change and its Amount, No. II,' by Mr. A. Vernon Harcourt and Mr. W. Eason,—'On the Stability of Domes, Part II,' by Mr. E. W. Tarn,—'A Supplementary Memoir on Caustics,' by Mr. A. Cayley.

GEOGRAPHICAL.—Nov. 26.—Sir R. I. Murchison, Bart., President, in the chair.—Twenty-five new Fellows were elected.—A letter from Dr. Livingstone was read by the Secretary, dated from Ngomano, on the Rovuma River, 18th May. The traveller had penetrated 30 miles beyond his furthest point of 1861, and was preparing for his advance to the unknown northern extremity of Lake Nyassa. On the arrival of his party at the mouth of the Rovuma, it was found impossible to discover a path for the camels through the mangrove-swamps; the vessel, consequently, proceeded 25 miles further to the north, and a good harbour and starting-point was then found in Mikindany Bay. The harbour within the bay is land-locked, and has good anchorage in 10 to 14 fathoms. From this place they marched overland to the south-west; and, on arriving on the banks of the Rovuma, followed its course to the junction of the Loendi, a river coming from the south-west, and considered by Dr. Livingstone to be a continuation of the main stream. The chief of Ngomano, at the junction, proved most friendly, and the Doctor intended to make this his head-quarters until he had felt his way round Lake Nyassa. The Rovuma is flanked on both sides by a chain of hills, from 400 to 600 feet high, covered with dense entangled jungle. The natives—the Makwa—were found to be willing workers, and

a path for the men and animals. Traces of coal were found on the banks of the river. Col. Playfair (H.M. Consul at Zanzibar) stated that the harbour at which Dr. Livingstone's expedition disembarked had only recently been discovered. He had no doubt that other harbours existed on the eastern coast, as it had never yet been thoroughly surveyed. Opposite the island of Zanzibar a new harbour had recently been found, and a port established there by the Sultan.—The paper read was, 'On the Physical Geography of Natal,' by Dr. R. J. Mann.

GEOLOGICAL.—Nov. 21.—W. W. Smyth, Esq., President, in the chair.—The following communications were read:—'On Marine Fossiliferous Deposits of Secondary Age in New South Wales,' by the Rev. W. B. Clarke,—'On the Madreporaria of the Infra-lia of South Wales,' by Mr. P. M. Duncan,—'On some Points in the Structure of the Xiphosura, having reference to their relationship with the Eurypterida,' by Mr. H. Woodward.

STATISTICAL.—Nov. 20.—Col. W. H. Sykes, V.P., in the chair.—Mr. W. G. Larkins was elected a Fellow.—Mr. Newmarch read a review of Prof. Rogers's 'History of Prices.'—Mr. Baxter read a paper 'On Railway Extension, and its Results.' After going into many statistical details upon the origin of railways in this country, and their introduction and extension throughout the civilized world, the author submitted a scheme for the application of the duty upon railways to the extinction of our National Debt; he observed that the advantages of such a sinking fund over a sinking fund invested in consols, are threefold:—1. It would be invested annually in railway capital at a higher interest, and thus accumulate more rapidly. 2. It would have a different primary object, viz., the purchase of a State interest in railways, and would, therefore, be more likely to enlist popular feeling in favour of its maintenance. 3. It would be distinct and separate from the National Debt, and not under the same control, and would, therefore, be less liable to be diverted to the financial necessities of the hour.—Perhaps it will be said that a railway sinking fund is unsuited to the character and habits of the English people. But surely it is our character to be prudent, and to pay off incumbrances, and to adopt the best means of accomplishing that object; surely it is not right in a great and wealthy and enlightened nation like England to incur the reproach of being spendthrift of her resources and reckless of her debts.

LINNEAN.—Nov. 15.—G. Bentham, Esq., President, in the chair.—Mr. E. Atkinson and the Rev. C. H. Middleton, B.A., were elected Fellows.—Capt. Bulger exhibited, on the part of Capt. Annesley, drawings of the two sexes of a large moth (*Phalena Atlas*, L.), taken in the neighbourhood of Cloasputt, Mysore, where the species appears to be very rare.—Mr. Stainton exhibited two living specimens of a small moth (*Strathmopoda Guerinii*) not previously seen alive in this country. Dr. Standeger, of Dresden, had lately visited Celles-les-Bains, in the Department of Ardèche, and had there found the larvæ of this little moth, in long, pod-like galls, formed by aphides, of which they generally contained many hundreds, at the ends of the twigs of *Pistacia terebinthus*; some of the galls, on which the lepidopterous larva feeds, being a foot in length. The usual posture of the little moth was very peculiar; the hind legs being brought forward and stuck out sideways, and considerably raised. With the hind legs in this position, the moth would walk for some distance on the other two pair of legs. Mr. Stainton also exhibited a drawing of the *Strathmopoda pedella*.—Mr. J. Couch exhibited specimens of *Halysia polyptoides*, found attached to a stone brought up by a Cornish fisherman from the depth of 15 fathoms, in September, 1865.—Mr. J. Hogg exhibited a young cone and male flowers of Wellingtonia, produced in his garden, at Stockton-on-Tees, upon a tree six years old, and 3 ft. 11 in. high.—The following papers were read, viz.:—'Monograph of Bambuseæ, with descriptions of all the Genera and Species,' by Col. Munro, C.B.,—'Monograph of the Genus Lemnias, with descrip-

tions of New Species in the Collection of the British Museum, including other Forms sometimes placed in that Genus,' by Mr. A. G. Butler,—'On some New Fungi from Mexico,' by the Rev. M. J. Berkeley, M.A.,—'Gum Copal from Old Calabar,' by Mr. A. Murray,—A Letter addressed to Dr. Moore, of Glasnevin, by Miss Hamilton, of Great Town, Nicaragua, 'On the so-called Gum Copal, or Locust-tree Gum, of that Country.'

CHEMICAL.—Nov. 15.—Dr. W. A. Miller, President, in the chair.—Messrs. W. H. Gossage, R. Biggs and D. Page were elected Fellows, and Mr. W. C. Roberts was admitted.—Dr. Daubeny read a paper 'On Ozone,' which embodied the results of an extensive series of chemical experiments and meteorological observations made at Torquay and Oxford. In the first-named locality the prevalence of a south-west wind coincided with the indication of the greatest amount of ozone; whilst at Oxford the easterly winds were most highly charged, and the variations were less pronounced. The author asserts that growing plants purify the air, not only by the restitution of oxygen, but also by the generation of ozone.—Mr. W. N. Hartley described a new sulphur derivative, to which he gave the name 'Chlor-Sulphoform.'—The next paper, by Messrs. Chapman and Thorp, was a continuation of that read at the previous meeting, and entitled, 'The Relation between the Products of Gradual Oxidation and the Molecular Constitution of the Bodies Oxidized.'—Mr. Chapman read a short notice of 'The Synthesis of Butylene.'

INSTITUTE of ACTUARIES.—Nov. 26.—C. Jellicoe, Esq., President, in the chair.—The following gentlemen were elected Associates:—Messrs. W. Braid, A. G. Brown, H. F. W. Cowley, and F. J. Hallows.—The following gentlemen were nominated for ballot at the next ordinary meeting:—Fellow, Mr. H. G. Hobart; Associates, Messrs. A. H. Browne, N. Haubart, L. H. Greaves, and B. Woods.—The Rev. T. B. Sprague, M.A., read a paper 'On the Value of Annuities payable Half-Yearly and Quarterly, &c.'

MATHEMATICAL.—Nov. 22.—Prof. Sylvester, President, in the chair.—R. Wormell, Esq., was elected a Member of the Society.—The papers read were:—'On Harmonics in Space,' by Mr. W. K. Clifford,—and 'Analogues in Space to the Theorem of Moments,' by Mr. J. J. Walker.—Prof. Sylvester communicated a new theorem by which any integer power of a logarithm may be developed, and gave some consequences of this theorem.

MEETINGS FOR THE ENSUING WEEK.

- | | |
|-------|---|
| Mon. | Royal Institution, 2.—General Monthly Meeting. |
| — | Entomological, 7. |
| — | Royal Academy, 8.—'Anatomy,' Mr. Partridge. |
| — | Architects, 8. |
| Tues. | Horticultural, 3.—General Meeting and Lecture. |
| — | Engineers, 8.—'Light Railways'—Communication between Passengers and Guards on Railways, Mr. Preece. |
| Wed. | Literature, 4.—Meeting of Council. |
| — | Geological, 8.—'First Cataract, Upper Egypt,' Mr. Harb. |
| — | shaw; 'Echinodermata, from Sicily,' Dr. Duncan; 'Insects of the North of England,' Mr. Curry. |
| — | Society of Arts, 8.—'Trade in Furry Cattle,' Mr. Irvine. |
| Tues. | Linnean, 8.—'Diastoma clavatum, from Sicily,' Dr. Tuckwell; 'Morphology of Malva,' Dr. Masters; 'Pauropus, a new Type of Centipedes,' Sir J. Lubbock. |
| — | Chemical, 8.—'Synthesis of Formic Acid,' Mr. Chapman. |
| — | 'Alloys of Magnesium,' Mr. Parkinson. |
| — | Royal, 8. |
| — | Antiquaries, 8. |
| Fri. | Philological, 8.—'Palmotype: Representation of Scotch by Ancient Types'—The Diphthong <i>Op</i> , Mr. Ellis. |
| — | Botanic, 31. |

FINE ARTS

WINTER EXHIBITION of the SOCIETY of PAINTERS in WATER COLOURS.

Of studies from the figure the most interesting, and probably the most beautiful in this Exhibition, are two drawings, about life-size, of female heads by Mr. F. W. Burton, Nos. 212 and 395. The former is truly what the author modestly styles it, *A Study*; and, withal, one of the finest exhibitions of power in drawing and modelling by an English artist with which we are acquainted. The student who appreciates the higher qualities of executive Art, the amateur who can, with apt appreciation, read the meaning of a painter, will equally, if not alike, enjoy this noble example. No. 395 is also

in *A Study*, but, except in artistic merit and differs in all respects from its compeer. æsthetic expression it surpasses the latter, and wonderful rendering of sadness in its heavily-lidded eyelids and almost tremulous lips. A face, seen nearly in profile and slightly raised, eyelids of which droop, and are tinged with the red of sorrow; the lips loosened, rather than closed, from each other. See the modelling of the nose and cheeks of both these works, that largeness in drawing which is so obvious in the eyes of a first-named. A contrast may be obtained by comparing the works of Messrs. J. Gilbert and J. Burton in comparison with each other. cannot be done more perfectly than with reference to the above-named drawings of the artist and the thoroughly characteristic *Standard-bearer* (36) of the former. The poles are not removed than these painters in their choice of design, drawing and colour. It is almost incredible that the same age should see them both.

The influences which respectively produced the two are in question are antithetical to the heart; not the feelings which prefer either to its sister. Mr. Gilbert exhibits most of his power in handling, also that somewhat "smoky" dash and dash of conception and glowing, though restrained and fallacious, method of colouring which have won for him so large a name with the public, and so much enthusiastic, though qualified, use from his own profession. The "painting" on a breast-plate here, its feeling for the qualities of colour and due rendering of form, are, apart from considerations of truth in lighting, extraordinary. This is a standard-bearer after Mr. Gilbert's own heart, with a little less splendid than all with him. We are almost tired of applauding the bravura of the artist in the last-named as at other work of his—*The Siege of Calais*, where this peculiar quality is carried to an almost excess.

Another contrast that is not less wealthy in intention than the above may be made between Gilbert's work and that of Mr. E. K. Johnson: *Four Studies of Women's Heads* (67), dashing effective sketches as they are; also the very richly wrought and pretty *Two Studies of Women*—*A Nun* (104), by Mr. W. Goodall, bears genuine feeling expressed in the face and which nothing gives so happily as studying life.—Mr. F. Tayler's excellent sketches in frame No. 115 are, especially the *Girl Cutting*, full of spirit, and entirely in keeping with the titles. *A Lady, Woodland Hunting*, (221)—a dress in green and silver suit—has much felicity of attitude, and, as a sketch, is most acceptable; as much so, in fact, as most of the painter's work, except as regards the quantity of their merits: the difference between Mr. F. Tayler's work and sketches is hard to find. The same may be said for No. 293, particularly as respects *Slipping up Otter Hounds*, and others by the latter here.—Mr. E. Lundgren's *Dante and Beatrice* (123), before a picture, the well-known incident, lacks all the higher qualities of Art except in intention of aim, and is a very stagey design. Other objections by this gentleman are not less sketches, but, to say, not studies or pictures, than his conceptions have lately been to the summer Exhibition of the Society; thus incomplete, they lack that freshness, and occasionally charming spirit, which have enjoyed from his hands.—Mr. F. Shields wins his high reputation, as well as studies do so, with four capital contributions. Nos. 44, 317 and 337; the last, *Studies of Heads*, exhibiting pleasant thought and able draughtsmanship.

—Mr. F. Walker's exquisitely-lighted and beautiful drawing is without a name (No. 385). 352, which is also without a name, represents a child entering an apartment, at the door of which is a servant; it is a little picture thorough in all respects, charmingly lighted, drawn, spirited to the highest degree, and singularly full of story. No picture here surpasses, in its artistic value, that quaintly styled and revived *The Street, Cookham*, (360)—a rural street, with white geese in it; the birds toddling along in a flock, shouldering and driving against each other: a study in colour and chiaroscuro. A third

picture without a name is numbered here 413, and represents a lady, with children, in a garden, in spring; the effect light, suffusing, tender mist, an almond-tree in full bloom; the last, by the way, is introduced with needless ungracefulness, and, despite its brilliant softness in modelling and fine toning, mars the whole. The exquisitely-tender treatment of the subject, the subtle rendering of tone and colour, the delicate atmosphere, and—as proper to design—the charming grace and sweetness of the figures, are such that we feel sure of long remembering this gem of a sketch, and of, as now, believing it to be the painter's most promising study. Nothing but the ever-present evidences of a lack of feeling for grace in Mr. Walker's mind can deprive him of a higher place in Art: see the placing of the almond-tree, and the arrangement of the house in the background; also that which mars *The Wayfarer*, now in the Winter Exhibition at the French Gallery. Even as these are, knowing what he has done, recognizing the warmth and depth of his love for Nature, his boldness in following her, and his obvious keenness in searching her beauties, there is more than enough in his works to mark him among the most able of the younger artists of the day. His evident faith in truth, his well-defined resolution to do what he sees is right, contrast honourably with the recklessness of many able and popular juniors.—Reference to Mr. B. Foster's *Cottagers* (375)—sketches of girls, which are executed with great vivacity, and cleverly treated as regards lighting and texture—may conclude our notice of the figure-pictures proper in this Exhibition. *Skies* (417), by the same, displays much knowledge of Nature and extraordinary dexterity in reproduction.

Mr. J. D. Watson's *Kitchen, Cookham, Berkshire*, (393) is a charming picture of an interior, that has been made interesting by admirable skill in modelling and power in dealing with light and colour. The title of this excellent little work belies its merits. The same is the case with two other studies by Mr. Watson, *Six Studies for Book Illustrations* (82)—which we place here only because they cannot be considered perfectly novel or the more important of the painter's contributions—and *Blacksmith's Shop, Sedburgh, Yorkshire*, (356), a singularly interesting study.—Mr. W. Collingwood's picture of a fine interior in the house at Cothele, which he styles *The Father's Blessing* (340), can hardly be called a figure-subject because it has figures introduced to its furniture and accessories: it is very effectively painted.—Of architectural subjects, one of the most dextrously painted here is Mr. J. Nash's *Monastic Buildings at Canterbury* (2): see also *The South Doorway, Barfreston Church, Kent*, (299) which is wrought with singular crispness and not a little blackness in its colouring. *The Maypole* (414) is one of the most characteristic of Mr. Nash's productions, with very little of a picture in it.—Mr. E. Lundgren sends an effective architectural picture, *The Old Baptistery at Ravenna* (190).—Mr. J. Burgess has found a highly attractive subject in the *Gigantic Effigy of Roland at Bremen* (242); this is weakly painted.

In landscape-painting, as exhibited here, Mr. G. P. Boyce displays the greatest variety of subjects, and that very extraordinary love of Nature which gives to all his studies and sketches an interest of their own, above that which often pertains to more pretending examples by less faithful artists. He finds the secret beauty of a dingy place, such as the Churchyard of St. Anne's, Soho, where a flash of smoky sunlight on a soot-grimed wall, a line of grimy, old red houses and the struggles of town foliage into verdure, are, with a gas-lamp and a mural gravestone, made by his feeling and skill into a poem and a picture. This speaks to the wise. See *Backs of some Old Houses in Soho* (70): see, to the same effect and to the artist's honour, *Bank End Cove, Isle of Wight*, (91)—the sweep of a ruddy beach at evening and its scattered rocks; *Cornfield, Goring*, (135) ripe corn that glistens with silver reflexions upon it, and is shaded by travelling clouds; a broken line of house-tops and trees against the sky, and seen over the edge of the mass of standing grain: an admirable study of veiled, greyish daylight. Also *Even-*

ing Sketch from the Fondamenta Nuova, Venice, (186)—a work of the simplest sort, by no means beautiful in its temporary subject—a peculiar effect over the famous lagoon; a flat sea, a row of houses set edgewise, and, further off, an irregular line of the same upon an island; materials of the plainest sort for Art, and, to most eyes, sufficiently uninteresting, but, by Mr. Boyce's exquisite feeling for colour and tone in Nature, made far more attractive than is the case with its neighbour, *The Old Baptistery at Ravenna*, by Mr. Lundgren,—although upon the subject of the latter the ablest architects lavished all their skill to produce splendour with mosaic-work and colour and gilding; and "force of effect" was not only at command, but absolutely predicated by the confined and controllable light of the domed interior, its lofty vault and arched base; nevertheless, in the one picture, all is tenderness and simplicity, the rarest Art; in the other no more than great dexterity can render of a noble theme. *Rough Cloudy Study in the Lledr Valley* (227) is really a study to be thought over and enjoyed. Note, likewise, by this artist, *The Swan Inn at Pangbourne, Morning*, (370), a lovely example of delicate colouring; *Cornfield, at Goring*, *Showery Weather* (384); *At Pangbourne* (373).

Mr. W. Callow's *At Plymouth* and *At Amsterdam* (12) are two solid, rather blackish, but well-toned city views.—Compare Mr. S. T. G. Evans's *Evening on Lake Hallstatt* (7)—a capital, greyish, solid, low-toned picture, showing a ridge of mountains coming to the water—with *Llyn Idwal* (15), that has an allied, but less favourable subject, and is remarkable for its boldness and entirety of conception, breadth and vigour of style, as displayed in the great, loose, square rock in front, no less than in the keen, much-weathered edge of Snowdon, that seems as if it would for ever cleave the waters of the dark tarn: a real picture, by Mr. J. Holland. See *Batalha* (124), and others, by the same.

Mr. G. Dodgson is happy in his *Larpool Beck, Whitby*, (119)—a babbling streamlet among trees that seem sleeping in sunlight. *The King Beech, Knole*, (209) is a fine representation of a tree in sunlight, but without expression beyond that of the artist's skill and sense of nature.—Mr. S. P. Jackson's *Heavy Weather, Tintagel*, (23) shows unusual softness in painting by the artist, and, with much force, the aspect of the weather-beaten north Cornish coast: see other pictures here by this hand, among them No. 409.—Mr. G. A. Fripp's four studies, in frame No. 28, show contrasted subjects and admirable treatment. *The Keep of Penessey Castle* (294) is, in its way, a grand work.—It is almost needless to praise such beautiful Art as that which Mr. A. W. Hunt exhibits in many almost perfect pictures. Let the student enjoy, as we did, his *Framwellgate Bridge, Durham*, (32) and *Elvet Bridge, Durham*, (41)—contrasted effects; also *Tynemouth* (276), *Dolwyddelan Tower* (377), and others here.—Mr. J. J. Jenkins is more than usually happy in his river scenes, *A Yorkshire Beck* (49), and *Eashing Bridge, Surrey* (218); the latter tells with great clearness and brilliancy, and is one of the painter's most complete landscapes.—Mr. Brittan Willis's exquisite studies of cattle deserve the amplest study, and most liberal applause. His *Sketches of Cows, Calves, and Oxen* (46) may compare with any works of this class in colour, softness, and sense of breadth: see No. 1 in this frame, a couchant cow in evening light, and No. 8, another cow,—a perfect piece of silvery-greyish tinting. See several landscapes here by this artist.—Nothing here exceeds in artistic interest the *Study at Tintern, drawn on the spot*, (60) by Mr. S. Palmer, and representing a garden, with long-forgotten flowers, hollyhocks, and roses of lost summers,—a masterly but unobtrusive study of Nature. See also Nos. 194, 237, and 353, the last being *Arthur's Gate, Tintagel*,—a grand subject, grandly conceived from the grim coast fortress of North Cornwall.—Mr. A. D. Fripp's Roman study, *Ruined Tower on the Campagna* (170) is not only remarkable for its vigorous pictorial effect, but, above all, for the extraordinary felicity of its drawing in the building, and the expressiveness of the figures it contains. The precision of the architectural work, its ineffable skilfulness of touch, approaches the marvellous.—Mr. D. Cox's *Arenig*

(33) is a noble study. See also Mr. Naftel's *Bolton Abbey* (113) and others.—Mr. Newton's *Arrival of the Evening Boat* (285), moonlight.

FINE-ART GOSSIP.

THE long-complained-of neglect of the Life School of the Royal Academy, through which, as it has been alleged, that important section of the institution has fallen into disrepute, is to be remedied by the new plan, which provides for the appointment of a Curator who is to superintend the students of that school and, under the charge of the Visitor, direct their studies. The former will, in future, as has been the practice for some years past in the Antique School and School of Painting, remain with the students while the model sits, that is, six evenings in each week. The Visitor, or Academician whose turn it may be to direct the students, will, after the Curator is appointed, not be expected to attend oftener than thrice a week, or to remain during the whole sittings by the models, as is now the case. The Curatorship will be given to some one of the gold medal students. The "remuneration" to the Visitor will remain as hitherto.

We have with much regret noticed for some time past the dingy condition of several pictures in the National Gallery, British School, and, on inquiry, found that they are lent by the Trustees of the British Museum, who refuse to allow the application of so innocuous a liquid as common water to the surfaces of the works in question. Surely some misapprehension as to the effect of carefully cleansing the faces of pictures and the evil of neglecting the same must be present to the Trustees' minds. The state of these examples is discreditable.

Mr. E. M. Ward has just completed a picture, of moderate size, for the Royal Academy Exhibition, the subject of which recalls some of his earlier designs. It represents the Friar's visit to the cell of Juliet. He holds the mysterious vial in his hand, and addresses her; she, who sits before him with disarranged hair and dress, leans on one hand, that holds a dagger with its point uppermost.

We understand that Mr. Cope has received the promised retrospective and increased remuneration for his pictures in the Houses of Parliament, Peers' Corridor. This increased payment may have been given in accordance with the recommendation of Mr. Gladstone's Committee of the Commons, and has been, we trust, bestowed without reference to the somewhat tradesmanlike limitations of that Committee's report, to the effect that the painters should not be paid in addition until the whole of their works were done. Considering that one only of the artists materially, if at all, failed in his contract with regard to the time for completing the frescoes, and that that artist was, we are informed, the first to receive the enlarged payment, with cash over for sketches not yet wrought out, while Mr. Maclise, who surpassed not only the extent, but the value, of his bond to work, has obtained nothing of the retrospective sort, nor a single farthing for sketches made for pictures to have been painted in the Royal Gallery, there is, we think, ample cause for wondering upon what principle these apparently ridiculously unfair arrangements have been effected. No one begrudges Mr. Herbert his money; but, if only to mark the knowledge in Art of our officials, some discrimination as to his compeer should have been attempted. It is stated, and, while believing it, we grieve for the nation's sake, while rejoicing for that of the painter, that Mr. Maclise has resolved to work no more at Westminster. It is enough what he has done; his true patriotism will be honourable to him as Art-knowledge advances. As it is, students—who appreciate the fact—are glad to see how the people, the true commons of England, look long at the noble pictures in the Royal Gallery.

Messrs. Day & Son (Limited) have published a chromo-lithographic fac-simile of a drawing by Madame Bodichon, representing Algiers from Kubah. The view is taken from the hills overlooking the beautiful bay of the city, and is rich in all that local truth and artistic felicity of treatment which distinguish so many of Madame Bodichon's landscapes. The chromo-lithograph is remarkably

successful as a transcript, and renders nearly all the qualities of the original; among these will be observed the atmospheric softness, the tender grey and silver tinting of the sea, the admirable drawing of those gigantic reeds which occupy the left of the picture, and the colouring in general. In respect to tone, the work before us is hardly less fortunate than is the case with regard to colour and rendering of atmosphere. The mid-distance seems to us to lack something of solidity; being, in fact, rather flimsy. We fancy an error in the excessive hotness of some shadows in the nearer vegetation.

Some discoveries of the greatest interest and importance have just been made at Westminster Abbey. These have resulted in the finding of some of the original stained-glass *in situ*, at the foot of that window in the Chapel of St. Nicholas which abuts upon the south side of the ante-chapel of Henry the Seventh, and was, doubtless, darkened, or, so to say, built upon, when the latter structure was erected in close proximity to the older part of the church, and on the site of the original Lady-Chapel of the Abbey, which had been erected by Henry the Third in 1220. At the foot of the window in question stands the monument of Sir George and Lady Fane, who together kneel before a praying-table that is placed between them. He has one hand upon a skull, the other on his breast; her hands are raised in prayer. Over these effigies is a large bow-fronted canopy, standing on pillars which are entwined by curtains, veritably carved in stone, with hanging fringes, tassels and the like. Over the entablature of this canopy is a further construction of a shield of arms (*Fane*), and two naked boys bearing helmets. Other work of the same elaborate and unarchitectural sort appears on the wings of this monument, the erection of which, by guarding it in front, may have done much for the preservation of the extraordinary treasure which has just come to light, which comprises about five feet of stained glass, in its original leading, and apparently in very good condition. The pattern of the glass is geometrical, but cannot be fairly described until the process of removing it from the window is complete. The sill of the window itself has come to light, which, being hidden by the Fane monument, is considerably—some six feet—lower than is apparent from below; thus showing the woful extent of the injury which has been inflicted on the Abbey by these monstrous intrusions. Behind this monument also passes the lower wall-passage, which goes round the whole Abbey. Here also were found many fragments of architectural carvings, some of which retain brilliant traces of colour, red and yellow, with distinct gilding on several places; among these is the band, or annulet, of a shaft, mouldings and pieces of ribs and diapers,—all so sharp that they must have been protected from the air ever since the day they were wrought, and so fresh and clear in the colour of their surfaces that it is certain they were saved from weather.

MUSIC AND THE DRAMA

HER MAJESTY'S THEATRE.—Manager, Mr. Edmund Falconer.—Dramatic Season. DONAGH; or, The Lovers of Lisnammora, every Evening.—Dress Circle, 5s.; Second Circle, 2s.; Pit, 2s.; Gallery, 1s. Doors open at Half-past Six; commence at Seven, and conclude about Eleven. Box Office open from Ten to Five.

CONCERTS.—The *Sacred Harmonic Society's* first performance took place duly on Friday last, as promised. At the eleventh hour, it should be told, Mr. Lyall had to replace Mr. Sims Reeves, and in no music less trying (as all familiar with our great tenor's success in it must admit) than that of Mendelssohn's 'Lobgesang.' Another example of the incapacity of our English singers, adverted to (out of deference to continental wisecracks) when we spoke of the helpful readiness at Norwich of Mr. Cummings, in a juncture of shipwreck! The next performance, we read, is to consist of Mozart's 'Requiem,' and the 'Dettingen Te Deum.' This, of course, the Christmas 'Messiah' performances will follow. After these, Mr. Benedict's 'St. Cecilia' will be produced.

Saturday's *Crystal Palace Concert* was memorable, among other matters, for an exquisite performance of Beethoven's Seventh Symphony. Mendelssohn's

Overture to 'Son and Stranger' (a pleasant one) but how much more essentially vigorous was Schumann's Overture to 'Genoveva,' also as was played. Mr. Santley sang (with the accompaniment of the orchestra) a capital and pretty song, by Herr Manns; and Signor Piatti appeared in a new *Concerto*, written expressly for his violoncello by Mr. Sullivan. This marked a step forward in a true and earnest career. The music is elegant, full of contrast and effect, the solo instrument excellently set off by the orchestra, which, in the case of this peculiar instrument, is an easy task. No offence to the names of Rossini, to M. Servais, to M. Franchomme, to all the great and living masters of "the base-viol" (not "the awakening viol" of Collins's Ode), there is no dullness in the tone of the instrument which can be gainsaid, neither wholly conquered. It is the business of a solo instrument to dominate, not to be lifted up. So much the more credit, then, to the judgment, the due of Mr. Sullivan for the business and character thrown into his latest work, but then he owes no common debt to his interpreters. Herr Manns is always admirable when conducting instrumental (not vocal) music; and the playing of Signor Piatti was marvellous—the playing of one who obviously enjoyed his occupation.

At Monday's *Popular Concert* the violin player of Herr Wilhelm, who led Mendelssohn's Overture and the same composer's second Piano-forte Concerto, produced a real impression, making it clear to high honours as a performer of classical music within his reach. Mr. Halle made his first appearance this season as pianist. Among other pieces which he took in hand were some of the 'Fugitive Thoughts' of Ernst and M. Halle. In these he was assisted by Signor Piatti.

At the second *Chamber Concert* of the party of Messrs. Skedlock and Betjemann, Mr. Prout's prize Piano-forte Quartet was very creditably played. Of the work we shall speak on some early coming, having gone through it with great interest. The scherzo and finale are the best movements in the latter especially. A good 'trot for the arena' is one of the hardest musical things to find. The composers and audiences wearily know. There is a vigour in Mr. Prout's finale; there is in it, besides science legitimately used, and as such effective.

For Mr. Halle's Manchester concert of the night before last, 'Judas Maccabeus' was announced. At his next Mr. Sullivan's Symphony is to be performed.

MISS GLYN'S READINGS AT ST. JAMES'S PALACE.—The re-appearance of Miss Glyn (Mrs. E. S. Dallas), though only as a reader of Shakespeare, is an event in things dramatic. That it was felt to be so was proved not more by the largeness than by the character of the audience which met to greet her on the 23rd of November, and which included many representatives of letters and the arts. The play chosen was 'Macbeth,' in which, when on the stage, Miss Glyn achieved one of her chief successes. She had uttered but a few lines the other evening, before it was evident that she had lost none of her old power, and that the audience had before them a mistress in her art. The voice, deep and melodious, the face capable of the most vivid and varied expression, were as riveting as ever, because they were instruments of the passion fitted not only to sound the depths of the passion but endowed with that highest gift in a stage actress—poetic imagination. Thus, if we were asked to name what on the whole was most striking in the reading, we should point to those portions of the tragedy in which supernatural influence predominates. In her treatment of the apparitions that rise to Macbeth, in the fourth act, Miss Glyn infused her tone and look an ominous and wicked significance, which made what was suggested far more awful than what was directly conveyed. Especially was this the case when the phantom of the crowned babe rises, the combination of sinister meaning with infantile sweetness of enunciation, intimating with a force as terrible as it was quiet, the nature of evil and supernatural powers. Nor, in dealing with the human agents of the drama, was Miss Glyn ever more successful than when delineating those

ms of mind which border on the realm of and terror. Nothing could be more im- than her rendering of the soliloquy in Macbeth sees the "air-drawn dagger," of se in which he is confronted by the ghost uo, and above all of the scene in which the guilty wife walks in her memory-haunted Here the look assumed by Miss Glyn was e whose evil nature had anticipated even in the dread hereafter,—a look of remorse refined by its own intensity into spirituality asion. It was like a thought of Dante made

In striking contrast to these subtle expo- we may note the scene in which Macduff the slaughter of his wife and children. The feeling and passion of the character, the s of the mind by grief, and its sudden towards vengeance, were given with such nd energy as to call forth a storm of ap-

We must not close, however, without tak- exception to Miss Glyn's interpretation of h. She makes him, from the beginning, id remorseless, and, by her mode of deliver- tain passages, deprives him of those human- ouches which Shakspeare has given him. ss a reader who has so thoroughly studied t could say much in favour of her own a this point. But we have no space to argue ation, and for the present must be content rd our difference of opinion. We have no xception to take to a reading which was a and deserved success. Those present who bared Miss Glyn at Drury Lane, have d a delight for which, in such parts as that y *Macbeth*, they have not since had a substi- those who never saw her in the theatre have ly gained an enlarged notion of tragic acting highest phases, and will wonder why such stable genius as hers should be lost to our es. The next reading—that of 'Antony and tra,' announced for the 7th of December— see to be of unusual interest, Miss Glyn's tra having been, perhaps, her greatest imper- on.

YMARKET.—A burlesque has been contributed n stage by Mr. Burnand, under the title n Eccentric View of the well-known Tale of y and Cleopatra'; being 'Her-story and y related in a Modern Nilo-Metre.' This ge enough production, which was not very xful with the audience, was illustrated by xcellent scenes, painted by Messrs. O'Connor Morris. Mrs. Charles Mathews appears as tra, and her husband as Antony, who varies performance with a song, written by himself, h was *encored*. As a spectacle, the piece has merits; but the writer has not been so happy c complete as usual.

MYRIC.—A burlesque on 'Faust' was pro- d on Saturday. It is a modification of Mr. J. ord's travestie, in which, at the Strand Theatre, author, in the year 1845, caricatured Mr. les Kean. Mr. G. Vincent now does the service for Mr. Phelps, and exaggerates the of his *Mephistopheles*. Miss Farren plays t, and Mr. Dominick Murray *Marguerite*. s Sheridan looks admirably as *Valentine*, and . Stephens makes *Martha* sufficiently eccentric. entine is slain in the street; but, on Marguerite ng on him to his tea and muffins, revives. The y was well supported by scenic accessories, d, diligently carried out by all who were con- ed in its performance.

ADLPHI.—A new drama has taken the place Ethel, which promises to be more successful, gh not free from grave defects, whether con- dered ethically or æsthetically. It is entitled *Sister's Penance*, and claims a double author- p; Mr. Tom Taylor and Mr. A. W. Dubourg ding as sponsors to the work, and vouching for being not only "new," but "original." There x perhaps a sense—a theatrical sense—in which it y be said to be original; but we have seen many h incidents, particularly those in India, more nce before on the boards; and as to the er's sin and penitence, both of them have been ge properties time out of mind. After all, how-

ever, the artistic rendering is the chief point; and, granting the story, the question is, has it been treated with dramatic skill; and is that skill proper to the higher or lower order of drama? That the heroine was from the first intended for Miss Kate Terry was evident, and that she should be invested with a fitting character was certainly desirable. She properly occupies the central position in the action; but the position is not altogether an enviable one, for the conduct attributed to her is not likely to attract the sympathies of the audience. It is what is technically called an up-hill part; no triumph being possible in it until the last scene. The erring sister is named *Alice Vernon*, who finds herself the rival of *Marion Vernon* in the affections of *Mr. Markham*, a young engineer (Mr. Hermann Vezin). This gentleman possesses such an evenly balanced mind that he has bestowed his attentions equally on both young ladies, each of whom thinks herself the favourite. At length he declares for one—poor *Marion*—who is doomed to suffer the greatest disappointment; but before his pledges can be redeemed, a change comes over his prospects. *Markham* has received an appointment as engineer to a new railway about to be opened in India. This fact he imparts to *Marion*, stating that it makes his immediate marriage impossible, and therefore he sets her free from any promise to himself. But the affections are not thus to be subordinated to interest—at least, not always, and *Marion* insists, we think properly enough, that both shall be bound or both be free. The prudent youth gives the lady time to consider, and thus occurs an interval of which the lovelorn *Alice* takes undue advantage. She not only prevents *Markham's* letter, in which he consents to a marriage preceding their voyage, from reaching *Marion's* hand, but she shows a letter written by *Marion* to another lover, *Mr. Drayton* (who does not appear at all in the piece), and who has sought by acts of great generosity to win her hand, leading *Markham* to believe that it was intended for himself, and which in terms negatives his proposal. Thus *Markham* leaves for India alone; but is speedily followed by *Alice*, in the train of her uncle, *Colonel Leslie* (Mr. C. H. Stephenson), with a determination to make a conquest of him. Here, and previously, she is haunted by a Mohammedan admirer, *Ammedoolah*, agent to the Rajah of Hazareepore (Mr. Billington), whom, at first, she patronizes, contrary to usual European custom, but at length rejects with indignation. Soon after the Sepoys revolt, but are for the time subdued by English energy. *Markham* shows great courage in the emergency; but both he and *Alice* are in great and imminent danger. *Alice*, having failed to win his love, feels the pressure of her guilt so intolerable that, fearing immediate death, she reveals her misconduct to him. Wild with the sense of wrong, *Markham* insists on her writing her confession, that it may have a chance of reaching *Marion*, who has, of course, married *Drayton*. In the third act all parties are in England, including *Ammedoolah*, who, in the disguise of a slave, awaits his revenge. *Markham* still insists on *Alice* setting him right with *Marion*, thinking that she is happy in her marriage; but when he finds that she is deserted by her husband, positively forbids the disclosure. For the rest, *Ammedoolah* seeks to poison both *Alice* and *Markham*, by means of a phial of prussic acid in the medicine-chest of the regimental surgeon, *Mr. Handyside*, who is in love with *Alice*; but a suspicious maid-servant has fortunately emptied the bottle, and refilled it with water. Nevertheless, *Alice* thinks herself poisoned, and reveals her secret; *Ammedoolah*, too, thinks that she is, and commits suicide. Moreover, news has just arrived that *Drayton* is dead; so that when the repentant *Alice* becomes assured of her safety, she has a chance of happiness with the well-intentioned surgeon, and *Marion*, of course, finds a second husband in her first lover. But for the happy turn of events brought about by the servant girl, the play would inevitably have had a tragic *dénouement*; and, as it is, allows an opportunity for tragic acting, of which Miss Terry admirably avails herself. But all the terror and sorrow thus excited are at once rendered absurd by the sudden and accidental change of fortune contrived

for the purpose of bringing about a more popular conclusion. A drama, in which such a transparent trick is used, forfeits the title of high-class, and sinks at once to the level of a mere theatrical composition. Mr. Taylor, perhaps, prefers the name of playwright to that of dramatist, and probably finds it more profitable. There are other points in the plot, affecting our political relations in India and the Mohammedan character in particular, to which decided objection might be taken; nor should we place too much trust in the natural goodness of *Alice*, who so readily yielded to self-temptation, and whose penitence scarcely excuses her previous perfidy. *Marion Vernon*, however, is a perfectly unexceptionable part, and was decidedly well filled by Miss Hughes, who carried with her our sympathies. On the fall of the curtain the applause was great, and Miss Kate Terry, Mr. Vezin, Miss Hughes and Mr. Billington were summoned to receive the congratulations of a well-filled house.

MUSICAL AND DRAMATIC GOSSIP.

GREAT are the preparations on foot at St. Andrew's, Wells Street, for the celebration of their Saint's day. The list of the music selected for the 30th of November, and for the 1st of December, includes the names of Attwood, Cherubini, M. Gounod, Mendelssohn, Mr. Benedict, (whose new *Cecilian Cantata* has been laid under contribution), Mozart, Beethoven, Purcell, Mr. Best, Mr. Garrett, Mr. Hopkins, Arnold, Mr. Sullivan, Mr. Leslie, Gibbons, Mr. Goss, Boyce, Mr. Barnby (who writes always delicately, yet with knowledge), and Handel. Think what any one may of a church being made attractive, inasmuch as it is recommended for musical resort, the enterprise and variety of the above list of compositions speak volumes for those who have care of the musical rite in the act of Christian worship.

It may be recollected that at the last Norwich Festival but one, mention was here made of Mr. Thoulless as a local composer, who was credited with a real chance, as one having more than ordinary talent, and, as such, having a real future before him. We have since accidentally heard that during his studies in our Royal Academy Mr. Thoulless has written a pianoforte *Concerto*, which more than sustains—strengthens—the promise of his earlier efforts; a work which possibly may be brought to a public hearing ere long.

We were in error last week when we counted up the London performances of 'Alexander's Feast.' Two were given—within the last few years, a contemporary reminds us—by the short-lived Choral Society which Mr. Benedict conducted.

Mr. John Thomas's new Welsh Cantata, 'The Bride of the Neath Valley,' will shortly be performed at Liverpool.

'The book of 'Mignon' (writes a trusty Correspondent, regarding the new opera of M. Ambroise Thomas), at the Opéra Comique, "is very attractive, some length in certain places allowed for; only *Mignon* does not die, but marries, by way of close to the story. The music is of the real French opera comic style, not in the small sense of the word, but on the scale of the music of M.M. Hérold, Adam, Auber,—not as it has been enlarged by M. Gounod,—but always melodious, full of life, of poetic colour, and not wanting a certain depth. It is as far on the one side from the music of M. Offenbach as it is on the other from that of Herr Wagner; but it has its own reality. As to its success—well, you know what Parisian successes can be, and what Parisian journalists can do. The score contains admirable melodies for the two ladies, Madame Galli Marie (*Mignon*, who has pleased without measure) and Madame Marie Cabel (the *Philine*, who has recovered her old triumphs as a brilliant vocalist). M. Achard is less favourably to be heard; but his part is an up-hill one. M. Bataille (not the great old Bataille) did better, and pleased more legitimately. In brief, I believe this to be a success, apart from the successes made by Parisian journalists for Parisian operas; one that may last as long as that of its composer's 'Songe d'une Nuit d'Été.'"

The *Gazette Musicale* announces that M. Pasdeloup has secured the valuable aid of Herr Joachim for six months. He is now playing in Paris. Among other works which M. Pasdeloup has lately been

bringing forward at his Popular Concerts have been Schumann's Overture to 'Genoveva,' and that by Wallace to 'Loreley.'

We have received the following note:

"17, Edwards Street, Portman Square, Nov. 28, 1866.

"You have given currency to a report that no concerts will be given by the Musical Society of London this season, and many members of the Society inquire of me if there exists any foundation for such a supposition. I trust, therefore, you will allow me to inform them, and you, that I have already received several hundred pounds in payment of subscriptions, &c., for the ninth season, 1867; that there is a balance of some 60*l.* in the hands of the Treasurer; and that the report you printed in your last issue was altogether premature.—Yours, &c. C. A. VERRINDER."

—Our statement was simply this—as reference will show: "It is rumoured that the concerts of the Musical Society may, possibly, not be resumed next year;" and here, as it seems to us, Mr. Verrinder leaves the matter.

There is to be a music school at Heidelberg. Where are the teachers to spring from?—especially the teachers of singing, if singing is to be taught there? Year by year the exaggeration, the exactions, and the incompleteness of operatic artists seem to swell and blossom, and (not) bear fruit in Germany.—Mdlle. Lucca, in Berlin, has the pretensions, and (the reception) which only befit a legitimate queen of song; and now we read that that strange lady, Mdlle. de Murska, at Vienna, is "striking" for an advance of pay, with pretensions laughable so far as her powers are concerned, but lugubrious as having to be considered by a management (as all Austrian managements must be just now) bent on economizing, not flinging about gold in sport.

Italian journals state that Signora Antonietta Ronconi has appeared at Philadelphia, U.S., with such a success as her father's daughter ought to have. Dramatic genius does not always run in families, and we have been told that her voice is a small one; every one, however, may well hope that the news is true. But Italian journals are given to exaggerate. Fancy Madame Vilda (all but new to the stage) having been heralded, before her arrival at Venice (*Il Trovatore* assures us), by a "colossal reputation"! Where did this grow? Not in London, where she was, nevertheless, duly credited with remarkable vocal gifts. No wonder that the lively Venetians, habituated to strained dramatic stage passion, found the worthy and substantial lady, in *Norma*, "a mediocre artist."

Titles of new operas crowd the columns of Italian journals. 'I Tre Mascheretti,' by Signor Sinico, is mentioned as in preparation at Naples.—'Il Rapimento' as having been played with success at Perugia. At Palma, in Majorca (not a very promising home for opera, as all who recollect Madame Dudevant's charming chronicle of her winter there must fancy), Signor Peri's 'Vittore Pisani' has opened the season.

The pianoforte score of Herr Abert's 'Astorga' has been just published at Leipzig, by MM. Breitkopf & Härtel. We shall ere long examine the music in detail.

'Les Chevaliers de la Table Ronde,' a comic opera in three acts, the music by M. Hervé, has just been given at the Théâtre des Bouffes Parisiens, with Madame Ugalde as the *prima donna*.

On trustworthy authority, we are bidden to expect a bass voice, remarkable even among German bass voices, in Herr Krillopf, by birth, we believe, a Hungarian, he who is singing at Cologne.

At the *Gewandhaus* Concerts at Leipzig, on the anniversary of the death-day of the Teutonic Pigmy Gluck, they have performed his stately, though somewhat antiquated, Overture to 'Iphigenia in Aulis.' At the same concert was given the second orchestral *suite* by Herr Franz Lachner, and some harpsichord pieces by Rameau and Couperin. These brave old Frenchmen are making their way into the heart of Europe at last, even though "there be Wagners in the town."

The Baron Alfred von Wolzogen, known to the readers of this journal as an accomplished man of letters, a sincere student of Art, and one of the leading musical amateurs not given over to "idols" whom Germany yet retains, has long, as we have

stated ere this, entertained the project of purifying the verbal text of 'Don Juan' (originally written, be it recollected, with spoken, not sung, dialogue) and of re-arranging in its original form the score, into which every conceivable disorder and licence had been allowed to creep. His experimental version was the other day produced at Breslau, of which performance a few particulars will be acceptable to all lovers of Mozart's imperishable opera:—

"'Don Juan,' under its new conditions, has been at last produced at Breslau, but of course very moderately, and even shabbily, as there is still only a provisional theatre there, the new house not being finished yet. The original spoken recitatives were all sung, with his text and abbreviations too, necessary for German singers who cannot chatter musically. The first *finale* was sung entirely as Mozart wrote it, that is, *without a chorus*, and the effect of 'Viva la Liberté' and the closing verses, 'Odi il tuon della vendetta,' &c., only sung by the principal solo singers, proved to be overwhelming. There was a burst of applause after this scene which could not be misunderstood. The ball ends as soon as Zerlina screams out her 'O Nuni, son tradita!' The servants of Don Giovanni turn out the 'contadini e contadine'; the noblemen, if there be any present, give their arms to their ladies, to get them clear of the coming brawl; and old Da Ponte was quite right in 'I suonatori e gli altri partono confusi.' This is said expressly in the original text of 'Il Dissoluto Punito, o sia il Don Giovanni; da rappresentarsi nel teatro di Praga, l'anno 1787,' page 44, and to this libretto Mozart wrote his music *without chorus*. The great air of Donna Elvira, 'Mi tradi' was sung for the first time after the air in B of Ottavio, 'Il mio tesoro intanto,' where Mozart placed it in 1788, at the first representation of his opera in Vienna, and not after 'Madamina.' The duet between Leporello and Zerlina, 'In queste tue manine,' which ought to be sung between Ottavio's and Elvira's air, was left out; but Ottavio's first air found its place *before* the quartet. The second air of Elvira, 'Ah, fuggi il traditor,' was sung at its proper place, *i.e.* after 'Là ci darem.'"

A new ballet, 'The Golden Fish,' by M. St. Léon and Minkous, produced at St. Petersburg on the occasion of the late royal nuptials, is spoken of as something unusually spirited and original.

Madame Viardot has been helping her neighbours, the artists of Strasburg, by singing at the first winter concert of the Conservatoire there.

Mr. Sothorn's appearance as *Claude Melnotte*, in 'The Lady of Lyons,' at Edinburgh, has been described in the journals of the Scottish capital as having been thoroughly successful, and with a humour of its own. Like every other real part, this one can be played in half a score of different ways, every one of which shall be the truth, though it may not be the whole truth.

The name of Mrs. Chatterley, one of a bygone group of such careful and intelligent actresses as our stage knoweth no more, must be added to the obituary of 1866.

M. d'Ortigue, who succeeded M. Berlioz as musical critic in the *Journal des Débats*, and whose writings, especially on church music (his speciality) were sensible and temperate, if neither profound nor startling by their brilliancy, died in Paris a few days ago, and was buried with literary honours.

MISCELLANEA

Return of a Scientific Explorer.—Mr. R. Brown, who was despatched four years ago on a roving commission to the countries lying on the Pacific slopes of the Rocky Mountains, under the auspices of some of the Edinburgh Societies, has again returned in sound health, and with a great store of scientific lore in geography, geology, zoology, botany, and the languages and history of the Indian tribes among whom he has been wandering. Mr. Brown was selected in an early portion of his career commander and Government agent of an expedition for the exploration of Vancouver Island, then as little known as the interior of the Sahara Desert. A description of his explorations may be expected from his pen.

'Hell Opened.'—Permit me to thank Husebeth for confirming my statement that monti's 'Hell Opened' is very widely circulated. For a very few pence, such of your readers as an interest in the subject can enable them to determine whether they agree with me in estimating this work as blasphemous, or, with Correspondent, in believing it to be a fit book for a pastor to place in the hands of children. Dr. Husebeth thinks I do not understand the meaning of the word "blasphemy." I have been accustomed to consider that to blaspheme is "to assault (or) insult the name, the attributes, ordinances, the revelations, the will or government of God"; and I hold that the guilt of this is incurred by a person who adds his own interpretation to God's revelation, and teaches the said interpretation as if they were a part of that divine revelation. A more ancient and far higher authority, St. Augustin has assured us that whatever we conceive here of the spirit world, our image must fall far short of the reality; but that doubted truth does not justify those persons who invent or promulgate horrible stories, whose is in the most complete antagonism to what may learn from the Holy Scriptures, and from our own hearts, concerning the love, mercy, and with which the Father of all regards his creatures. I am, &c. EDWARD PRICCO

Bottesford Manor, Brigg, Nov. 24.

Battle of Königgrätz.—In relation to the Bohemian campaign, I would note a curious allusion as to the name of the great battle fought on 3rd of last July, that whilst the Austrians and Prussians in their official accounts of it call it the battle of Königgrätz, the English press invariably term it the battle of Sadowa. Surely the combatants whose battle it was, have the right of naming it. I fancy the English tongue and pen more easily pronounce and write Sadowa; but when, instead of Sadowa, it is termed Sadowa, as I lately heard a countryman fresh from home call it, people in Germany do not know what he is talking about. Whilst some of the English newspaper correspondents at the seat of war have made themselves famous by their masterly sketches and graphic descriptions, written sometimes amid the din of battle, others appeared to have arrived in Germany in a strange and unknown country, without any knowledge of the people or its language, or even an idea of its geography, as I found one gentleman writing home to his newspaper that the frontiers of Silesia and Bavaria were to be rectified! A mistake was common to nearly all the English writers, viz., in the Austrian army Lieut.-Generals are called Field-Marshal Lieutenants, and are constantly termed by English military correspondents Field Marshals. Thus, every Austrian Lieut.-General, such as Baron John or Baron Gabel, are called Marshal John and Marshal Gabel. All the while there was only one Austrian Field Marshal employed in the late campaign, namely the Archduke Albrecht, the victor of Custozza. I. R. H. C.

Shakespeare Readings.—'The Tempest,' act 2:—

FERDINAND.

But these sweet thoughts do even refresh my labours. Most busy least when I do it.

Entirely concurring in Mr. Nichols's suggestion to the rejection of the base and counterfeit in that Theobald coined—"busyless"—and the restoration of the original text, I venture to differ from him as to its meaning. I think the passage should be printed—

Most busy, least when I do it.

(Is it not *lest* in the first folio? But that would be the same as *least*.) That *most* and *least* are antithetical, and that the single meaning is "my thoughts are most busy, when least I do my labours," are least occupied with work, as most people's. Whether *labours* should be substituted for *labors* or *it* omitted, or taken as a plural, as in the writers, is not very material. I. J. ARNOLD

The Ornamental Title-page and Borders designed by Henry Shaw, F.S.A., and engraved by R. B. Utting.

"Solidly bound in green and gold cloth, which looks so like morocco as not to disfigure the metal clasp which holds the covers together. Mr. Walter Thornbury's 'Two Centuries of Song,' or, Lyrics, Madrigals, Sonnets, and other Occasional Verse of the English Poets of the Last Two Hundred Years,' recommends itself as a volume pleasant in its contents, and charming in its illustrations. Most of the designs are very beautiful; the figure pieces are generally good; the tinted borders to the pages are extremely graceful; and the arabesque on the half-title is one of the most dainty and fascinating things of the kind we have ever seen."—*Daily News*.

BISHOP HEBER'S HYMNS. An Illustrated Edition, with upwards of One Hundred Designs, engraved in the first style of art, under the superintendence of J. D. Cooper. Small 4to. handsomely bound, price Half a Guinea.

"Heber's Hymns," published by Messrs. Low & Co., is another book which will content everybody who looks upon it. Every hymn is begun and ended with an illustrative picture, or some religious device, or it is set in a border which is in every case drawn and engraved with great delicacy. The large pictures are often copies from the great religious painters. The 'Madonna and Child,' on page 36, is almost as fine as a steel engraving, and quite as fine as a steel engraving ought to be. The same criticism holds with greater force to the head of Christ on page 41; which, for minute and delicate finish to which there is no sacrifice of breadth or force, is one of the most remarkable bits of wood-engraving we have seen. The book abounds with examples of the same delicate skill. Such engravings can only be produced at enormous expense. Some of these—little things of two or three square inches—must have cost weeks of constant patient labour; but the result is creditable to the artist, and should be profitable to the publishers."—*Full Mail Gazette*.

MILTON'S PARADISE LOST. With the Original Steel Engravings of John Martin. Printed on large paper, royal 4to. handsomely bound, price Three Guineas and Half.

VARIA: Rare Readings from Scarce Books. By the Author of 'The Gentle Life.' Reprinted by permission from the *Saturday Review*, *Spectator*, &c. Crown 8vo. price 6s.

Mr. SWINBURNE'S 'NOTES' on his POEMS, and on the 'REVIEWS' which have appeared upon them, is now ready, price 1s.

ATALANTA in CALYDON. By Algernon Charles Swinburne. 6s.

CHASTELARD: a Tragedy. By A. C. Swinburne. 7s.

ROSSETTI'S CRITICISM ON SWINBURNE.

SWINBURNE'S POEMS and BALLADS: a Criticism. By W. M. Rossetti. This day, fcap. 8vo. cloth, 3s. 6d.

*. A little volume which may assist in showing the absurdity and injustice of those violent so-called 'reviews' which greeted Mr. Swinburne's latest production.

"THE ENGLISH GUSTAVE DORÉ"

COMPANION TO 'THE HATCHET THROWERS.'

NOTICE.—**LEGENDS of SAVAGE LIFE**, the New Work by James Green (the "Amateur Casual"), with numerous inimitably Droll Illustrations by Ernest Griset, coloured after the Original Drawings, is ready this day, price 7s. 6d. coloured; 5s. plain.

"THE 'TOM BROWN' OF WINCHESTER SCHOOL."

SCHOOL LIFE at WINCHESTER COLLEGE; or, the Reminiscences of a Winchester Junior. By the Author of 'The Log of the Water Lily.' Numerous Illustrations, exquisitely coloured after the Original Drawings. Ready this day, 8vo. 7s. 6d.

"AN AWFULLY JOLLY BOOK FOR PARTIES."

NOTICE.—**PUNIANA; or, Thoughts Wise and Other-wise**, the best book of Riddles and Puns ever formed, Collected and Edited by the Hon. Hugh Rowley, with nearly 100 exquisitely fanciful Drawings, is ready this day, in beautiful cloth binding, gilt edges, with Picture by Gustave Doré, printed in colours and ink in cover, 7s. 6d.

"It contains nearly 3,000 of the best Riddles, and about twice that number of the most outrageous Puns," and is believed will prove to be "the most popular of all the Christmas books issued this year."

COMPANION VOLUME TO LEECH'S PICTURES.

SEYMOUR'S SKETCHES: the Book of Cockney Sports, Whims, and Oddities. Complete Set of the 180 highly amusing Illustrations, in oblong 4to. a handsome volume, half morocco, 12s.

*. A re-issue of the famous pictorial comicalities which were so popular thirty years ago. The volume is admirably adapted for a table-book, and the pictures will doubtless again meet with that popularity which was extended to them when the artist projected with Mr. Dickens the famous 'Pickwick Papers.'

"AN APPROPRIATE BOOK TO ILLUMINATE"

NOTICE.—The **PRESENTATION BOOK of COMMON PRAYER**, exquisitely ornamented with Outline Illuminations from Old Missals, may now be obtained at all Booksellers' for 8s. 6d. in antique, crimson edges; or in blue, with gold crowns. 7s. 6d. The full price is 18s.

THE MOST APPROPRIATE CHRISTIAN GIFT-BOOK.

*. Mr. Hotten would especially direct attention to an exquisitely printed Volume, entitled—

SONGS of the NATIVITY; being Christmas Carols, Ancient and Modern, including several never before given in any Collection. With the Music of the more popular. Edited by W. H. Husk, Librarian to the Sacred Harmonic Society. Handsomely printed by Whittingham, with beautiful floriated borders, in the Renaissance style. Cloth, elegant, 12s. 6d.

"A book which will delight all."—SPECTATOR.

NOTICE.—The **THIRD EDITION of The HISTORY of SIGN-BOARDS** ready this day at all Booksellers'.

London: SIMPKIN, MARSHALL & Co. Sold by all Booksellers.

THE CHRISTMAS GIFT BOOK, 1866.

"This will probably be the most superb volume ever published."—ATHENÆUM, Sept. 22, 1866.

"It has about it all the essential elements for success in precisely this very kind of enterprise—viz., adventurous illustrators, skilled engravers, a gifted artist, and a poet whose verses are suggestive of what we doubt not they will give from Gustave Doré's facile hand, superbly imaginative embellishments."—SUN, Sept. 21.

December 1st, 1866, will be published, in imperial 4to. with paper and type made expressly for the Work, and in elegant cloth, price 21s.

E L A I N E.

By ALFRED TENNYSON.

ILLUSTRATED BY GUSTAVE DORÉ.

With Nine exquisite full-page Drawings on Steel, in the first style of art, by HOLL, BAKER, JENKS, ROBINSON, and others.

MONSIEUR DORÉ'S OWN OPINION OF THE ENGRAVINGS.—"Paris, October 24, 1866.—Nous aurons fait un très grand livre, un livre unique. Veuillez donc complimenter de ma part les artistes qui m'interprètent si bien."

The designs of this Artist have never yet been engraved on steel, and consequently have never been interpreted in its fullest sense. M. Doré has made these Drawings with special reference to this mode of Engraving, and it was at earnest request that the Publishers determined to incur the great outlay necessary to produce this book. It is too first time that M. Doré has illustrated the works of a contemporary author, and, to use his own words, he desires work

'To be a Monument to Mr. Tennyson and to his own powers.'

"Mon frère a fait cette fois-ci le grand succès qui fera descendre son nom à la postérité."—ERNEST DORÉ.

A few impressions of the Plates, Proofs before Letters, will be published, price Five Guineas, cloth; and to insure it is necessary at once to apply to the Publishers or to the local Agent. The Work may also be had, with Photographs from the Original Drawings in lieu of Engravings, price Two Guineas, h. These are printed by a special process by Wm. Jeffrey.

London: EDWARD MOXON & Co. Dover-street. New York: CASSELL, PETER & GALPIN.

THE CHRISTMAS BOOK.

Order of your Chemist, Grocer, or Chandler.

THE OCEAN ST. LEGER of 1866.—What
Lord Lyon was to his Owner was the Taping to her Captain,
z. winner of the race, having distanced all Competitors, as the
ANT INDIA TEA COMPANY have invariably done in their
race and sale of fine new season's teas, now selling at importer's
prices.—Warehouses, 9, Great St. Helen's Churchyard.

BREAKFAST. — EPPS'S COCOA
(more commonly called Epps's Homoeopathic Cocoa, as being
prepared and introduced by James Epps, the Homoeopathic Chem-
ist first established in England). The very agreeable character
this preparation has rendered it a general favourite. For
breakfast no other beverage is equally invigorating and sustain-
ing. This Cocoa is used by thousands who never used Cocoa
before. "Cocoa stands far higher than tea or coffee," Dr. Hassall
says.—Sold in 1 lb., 4 lb., and 1 lb. packets.

WILLIAM SMEE & SONS respectfully
caution intending Purchasers of the "SMEE'S SPRING
MATTRESS, TUCKER'S PATENT," or "SOMMER TUCK-
ER," against various imitations and infringements, preserving
more the appearance of the Original, but wanting all its
essential advantages.
Each Genuine Mattress bears the Label "TUCKER'S PATENT,"
id a Number.
The "Smee's Spring Mattress, Tucker's Patent," received the
1st PRIZE MEDAL, or Honourable Mention, given to Bedding of
any description, at the INTERNATIONAL EXHIBITION, 1862, and
by be obtained (price from 25s.) of most respectable Bedding
architects and Upholsterers, and Wholesale of the Manu-
facturers, WILLIAM SMEE & SONS, Finsbury, Moorgate
Highway Terminus, London, E.C.

SAUCE.—LEA & PERRINS'
WORCESTERSHIRE SAUCE.
This delicious omelette, pronounced by Connoisseurs
"THE ONLY GOOD SAUCE."
Is prepared solely by LEA & PERRINS.

The Public are respectfully cautioned against worthless imita-
tions, and I should see that Lea & Perrins' Names are on Wrapper,
label, Bottle and Stopper.

ASK FOR "LEA & PERRINS'" SAUCE.

* * * Sold Wholesale and for Export, by the Proprietors, Wor-
stershire: Messrs. CROSBY & BLACKWELL, Messrs. BARCLAY
SONS, London, &c.; and by Grocers and Oilmen universally.

VALVIANISM, the great RESTORATIVE
of deficient vitality and muscular power.—Invalids should
ad. 2 stamps to Mr. HALSE, Warwick Lodge, 40, Addison-
ad. Kensington, London, for his PAMPHLET on MEDICAL
VALVIANISM. The extraordinary cures made by his appa-
ratus, after all Medicines and other Galvanic Machines have
failed, have been very remarkable, particularly on Paralysis,
Loss of Muscular Power in any part, Spinal Complaints, Indiges-
tion, Liver Complaints, Tic-doloureux, Asthma, Loss of Sleep,
rheumatism, Rheumatism, Sciatica, and in various com-
plaints, which it would not be right to mention, except by private
letter. Terms and price of apparatus in Pamphlet.

THE POPE'S HEALTH RESTORED BY DU BARRY'S FOOD.
—Cure No. 68,413.—"Rome, July 31st, 1866." The health of
the Holy Father is excellent, especially since abandoning all
other remedies he has confined himself entirely to Du Barry's
Revalenta Arabica Food, which has produced a surprisingly
beneficial effect on his health, and his Holiness has pronounced
this excellent food too highly.—From the *Gazette du Midi*,
July 25th.

**DU BARRY'S delicious, health-restoring REVA-
LENTA ARABICA FOOD** restores good appetite, perfect
digestion, strong nerves, sound lungs and liver, refreshing sleep,
functional regularity and energy to the most enfeebled or disor-
dered, without medicine, inconvenience, or expense, as it saves fifty
times its cost in other remedies, curing dyspepsia (indigestion),
constipation, phlegm, debility, consumption, nervous
bilious, liver and stomach complaints, low spirits, as proved by
60,000 cases which have been considered hopeless.—In tin, at
1s. 1d.; 1lb. 2s. 6d.; 2lb. 4s. 6d.; 12lb. 22s.—DU BARRY & Co. 77,
REGENT-STREET, London; all Grocers and Chemists.

**COUGHS, ASTHMA, and INCIPENT
CONSUMPTION ARE EFFECTUALLY CURED BY
KEATING'S COUGH LOZENGES,**

BICKERS & SON'S CHRISTMAS BOOK LIST.

NOTE.—Book-buyers will find in this List many Interesting and Valuable REMAINDERS of STANDARD and ILLUSTRATED WORKS, offered for the first time at greatly reduced prices. As the limit of a single page Advertisement renders it impossible to give sufficient information respecting Bickers & Son's extensive and varied Stock, their NEW PRICED CATALOGUE will be forwarded by post for one stamp.

ILLUSTRATED GIFT-BOOKS AT REDUCED PRICES.

BICKERS & SON, the originators of the system of Free Trade in Books, continue to supply every New Book as issued at a very liberal discount from the published price. Their new cloth Catalogue will be ready next month, post free for three stamps.

ROYAL INSTITUTION OF GREAT BRITAIN.

ALBEMARLE-STREET, W.

LECTURE ARRANGEMENTS, 1866-67.

Hour Before and After Easter, Three o'clock.

CHRISTMAS LECTURES (adapted to a Juvenile Auditor).
Prof. FRANKLAND, F.R.S.—Six Lectures 'On the Chemistry of Gases.' On December 27th, 29th, 1866; January 1st, 3rd, 5th, 8th, 1867.
Before **EASTER**, 1867.

Rev. C. KINGSLEY.—Three Lectures 'On the Atoned Régime, as it existed on the Continent before the French Revolution.' On Tuesday, Thursday, and Saturday, January 15th, 17th, 19th, 1867.
Prof. TYNDALL, F.R.S.—Twelve Lectures 'On Vibratory Motion, with Special Reference to Sound.' On Tuesdays and Thursdays, January 22nd to February 28th.

G. A. MACFARREN, Esq.—Six Lectures 'On Harmony.' On Saturdays, January 26th to March 2nd.
Rev. G. HENSLOW.—Six Lectures 'On Botany.' On Tuesdays, March 5th to April 8th.

Prof. FRANKLAND, F.R.S.—Six Lectures 'On Coal Gas.' On Thursdays and Saturdays, March 7th to 23rd.
W. PENGLLEY, Esq., F.R.S.—Six Lectures 'On Geological Evidences in Devonshire of the Antiquity of Man.' On Thursdays and Saturdays, March 23rd to April 13th.

THE FRIDAY EVENING MEETINGS will commence on January 18th. The Discourses before Easter will probably be delivered by Prof. Tyndall, Max Müller, and Odling, the Rev. W. Farr, Mr. D. Conway, Capt. V. D. Majendie, Rev. W. Greenwell, Mr. E. B. Tylor, Dr. James Bell Pettigrew, Mr. Balfour Stewart, and Prof. Frankland.
To the Friday Evening Meetings Members and their Friends only are admitted.

After **EASTER**.

Prof. BLACKIE.—Two Lectures 'On Plato.' On Mondays, April 29th and May 6th.
W. HUGGINS, Esq., F.R.S.—Six Lectures 'On the Methods of Studying the Heavenly Bodies, with some of the Results of Recent Observation.' On Tuesdays, April 30th to June 4th.

Prof. HUXLEY, F.R.S.—Twelve Lectures 'On Ethnology.' On Thursdays and Saturdays, May 2nd to June 8th.

On the FRIDAY EVENINGS AFTER EASTER Discourses will probably be given by Prof. Blackie and A. Bain, Sir James Macaita and Mr. Alexander Herschel.
To Non-Members the admission to all these Courses of Lectures is Two Guineas; to a Single Course of Lectures, One Guinea or Half-a-Guinea, according to the length of the Course.

Gentlemen desirous of becoming Members are requested to apply to the Secretary.
New Members can be proposed at any Monthly Meeting. When proposed, they are admitted to all the Lectures, to the Friday Evening Meetings, and to the Library and Reading Rooms; and their Families are admitted to the Lectures at a reduced charge. Payment:—First year, Ten Guineas; afterwards, Five Guineas a year; or a composition of Sixty Guineas.
Prospectuses (when prepared) may be had in the Hall, December, 1866.
H. BENICE JONES, Hon. Sec.

ROYAL AGRICULTURAL SOCIETY OF ENGLAND.

The GENERAL MEETING OF MEMBERS will be held at the Society's House, 15, Hanover-square, on WEDNESDAY, December the 13th, at 12 o'clock.

By order of the Council,

H. HALL DARE, Secretary.

London, December 1st, 1866.

THE COMMITTEE OF THE KENT ASSOCIATION OF INSTITUTES have much pleasure in offering PRIZES OF TEN POUNDS for the Best, and FIVE POUNDS for the Second-best TALE, the object of which shall be to induce Young Men, and Especially Working Men, to avail themselves of the advantages offered by Literary and Mechanical Institutes.
For particulars, send a stamped and directed Envelope to the Secretary, Kent Association of Institutes, Faversham.

SOCIETY OF FEMALE ARTISTS.—AN ACADEMY for the STUDY from the LIVING MODEL in COSTUME, in connexion with the above Society, will open in the beginning of January, at 9, BEDFORD-STREET, Regent-street, conducted by Mrs. LEE BIDDLE.

Visitor.—Mr. CAVE THOMAS. Hours from Four to Six, lighted.
Applications to be made to the Hon. Sec., Miss M. ATKINSON, 2, York-place, Portman-square.
All works intended for the ensuing Exhibition must be sent in on the 1st and 2nd day of January.

RUSSELL LITERARY AND SCIENTIFIC INSTITUTION.

Great Cornam-street, Russell-square. Established 1868.
The ANNUAL COURSE OF LECTURES will commence on WEDNESDAY EVENING, the 12th inst., when a Lecture will be delivered 'On the National Melodies of Ireland, Wales, Scotland, and England,' illustrated upon the Harp by Mr. T. H. Wright.
Vocalists, Mr. Harriette Lee and Miss Abbott.
Tickets for the Lectures may be had at the Institution. Price to the entire Course, 10s. 6d.; to a Single Lecture, 2s. 6d.
Members have Free Admission to the Lectures, Reading Rooms, and Library of 17,000 Volumes. Member's Annual Subscriptions, 1 and 2 guineas.

EDWARD A. M'DERMOT, Secretary and Librarian.

EDUCATION FOR THE SEA.—Parents intending to send their Sons to SEA are invited to secure the best possible TRAINING for them, Classical and Nautical, by applying for a Prospectus to Capt. H. M., 50, Camden-square, W.—Highest references given.

EDUCATION.—BRIGHTON.—There are THREE VACANCIES in a long-established School for the DAUGHTERS OF GENTLEMEN, situated in the healthiest part of the West Cliff. French and German Governesses are resident, and the best Masters attend. This Advertisement is addressed to Parents who desire REALLY SOUND INSTRUCTION and a LADY-LIKE WORK for THEIR DAUGHTERS, and do not object to pay fairly remunerative terms in return for these advantages.—For Prospectus, with References, address E. E. D., Messrs. Treacher's, 1, North-street, Brighton.

JUNIOR ATHENÆUM.—Members are hereby informed that, by virtue of the Resolution passed at the Extraordinary General Meeting in February last, all Subscriptions become payable on the 1st of January next, either to the Bankers of the Club, or to the Secretary, at the temporary Club House, 20, King-street, St. James's.
By order of the Committee.
GEORGE R. WRIGHT, F.R.A., Secretary.
December, 1866.

DAILY OR OCCASIONAL ENGAGEMENT

WANTED by an Experienced INSTRUCTOR, who teaches English thoroughly, including Letter-writing and Composition, French, Italian, German, Drawing, Rudiments of Latin, Spanish, and Portuguese. Translations done on Moderate Terms.—ZETA, 97, Warwick-street, Belgrave-road, S.W.

AN M.A., who obtained first place at every College and University Examination in which he competed for Classical Honours, and who has very high Testimonials from eminent scholars, is desirous of obtaining a PROFESSORSHIP, or a MASTERSHIP in a SCHOOL where there is no (or very light) extra duty.—Address M.A., Adams & Francis, 50, Fleet-street, E.C.

THE LATE HEAD MASTER of a Grammar

School would receive ONE Gentleman as a PRIVATE PUPIL and COMPANION. Terms 100l. per annum. Healthy situation; four large gardens, &c.—Address J. N., Wigton Hall, Cumberland.

BELMONT HOUSE, TWICKENHAM, S.W.

MRS. JOHN WILKIE receives a limited number of YOUNG LADIES, to whom she offers a Superior Education, with home comforts, on moderate terms. Mrs. Wilkie is assisted by efficient resident Foreign and English Governesses, and by the best London masters, for the accomplishments. The house is situated in a most salubrious locality, about a mile from the Railway Station.—References and Terms forwarded on application.

MUSIC.—A Lady, Pupil of Madame Arabella

Goddard, and certificated by Prof. Sterndale Bennett, wishes to meet with a few more PUPILS to INSTRUCT in Piano, or would be happy to arrange to teach at a School.—Address A. Z., Marshall's Library, 81, Edgeware-road, W.

WEST CLIFF SCHOOL, RAMSGATE.—

PRINCIPAL, A. P. SOUTHER, M.C.P., assisted by Resident and Visiting Masters. The progress of the Pupils is tested by the College of Preceptors' Examinations; and the subjects necessary for the University, Naval, Military, and Civil Service Examinations secure special attention. The Spring Term commences on the 27th of January.—Prospectuses forwarded on application to the Principal.

RESIDENT TUITION.—A Young Gentleman, a Graduate of the University of Dublin, Medalist in History, English Literature and Political Science, Classical Education, who has obtained Prizes in Classics, English Literature, French and Italian, and Honours in Mathematics, desires to OBTAIN a RESIDENT TUITION in a Nobleman or Gentleman's Family. The highest references can be given.—Address H.A.B., care of W. E. Ormsby, Esq., 13, Trinity College, Dublin.

A RESIDENT MASTER required, after the

Christmas Vacation, at QUEENSWOOD COLLEGE, near STOCK BRIDGE, HANTS, to take Lower Latin and French, and the ordinary English branches, with Playground Duty on alternate weeks.
N.B. No one need apply who cannot feel thoroughly at home with boys, or who wishes to use the post as a mere stop-gap, or who would make the interests of the School secondary to his own private study.
Applications, stating full particulars, with references, to C. WILLMORE, Principal.

PUBLIC SCHOOLS.—A Cambridge Graduate

in Classical Honours, experienced in Tuition, who prepares a few Pupils for the above, has TWO VACANCIES at CHRISTMAS.—Terms, 70l. per annum under twelve, 80l. above that age. References to John Evans, Esq., F.R.S., 2, St. James's Place, Hampstead, and other Parents of Pupils.—Address RROZEXISX, Salcombe-hill House, Sidmouth.

DR. V. NATALI teaches ITALIAN LANGUAGE and LITERATURE. References given.—Address, 32, Oakley-crescent, Chelsea, S.W.

THE WIDOW of a MEDICAL MAN, of high

standing, who has a beautiful Country Residence, with large Gardens and Pleasure-grounds attached, wishes to receive into her Family an INVALID CHILD, who will receive at her hands every attention of a Home. The highest References will be given and expected.—H. H. H., Courier Office, Leamington.

A WRANGLER and CLASSICAL

SCHOLAR, Graduate of Cambridge University, experienced in Tuition, PREPARES EVENING PUPILS for University and other Public Examinations.—Address E. R., 9, Regent's Park-terrace, N.W.

EDUCATION IN GERMANY.—The Rev.

PROFESSOR HIRSCH, of Cannstatt, near Stuttgart, whose Establishment is highly recommended by the Rev. Drs. James Hamilton, of London, Norman Macleod (one of Her Majesty's Chaplains), and Robert Buchanan, of Glasgow, and by all the Parents of former and present Pupils, will have a FEW VACANCIES at Christmas. An opportunity will occur about the MIDDLE of JANUARY for escorting Young Gentlemen to Cannstatt. The Quarter begins from the Day of Entrance.—For Interviews or Prospectuses, apply to Rev. Prof. Hirsch, or Mr. C. Young, 8, High-street, Islington, London, N.

MISS REBECCA ELLIOT'S CLASSES for

DRAWING and PAINTING (on the Method of the Department of Arts). RESUMED for the Season 1866-67, on Tuesday and Thursday Mornings, from 10 to 12 o'clock, at the Educational Institute for Ladies, 24, Cleveland-gardens, Hyde Park, W.—For Prospectuses of Classes, and Terms for Private Lessons, apply to Miss REBECCA ELLIOT, 9, Oakley-crescent North, Oakley-street, King's-road, Chelsea, S.W.

DORÉ'S ELAINE.—ARTIST'S PROOFS, price FIVE GUINEAS, now ready; plain Proofs, One Guinea, next week.—Edward Moxon & Co., Dover-street, W.

NOTICE.—NOTES AND QUERIES.—

CHRISTMAS NUMBER, on SATURDAY NEXT, December the 16th. Price 4d.; stamped, 6d.—W. G. SMITH, 23, Wellington-street, Strand, W.C.; and all Booksellers and Newsmen.

* ADVERTISEMENTS must be sent in by NOON of THURSDAY the 13th.

LAMBETH LIBRARY.—The ARCHBISHOPICAL LIBRARY at LAMBETH PALACE is

CLOSED from the 4th of December until after the Christmas Holidays.
W. STUBBS, Librarian.

MATRÓN, &c.—A LADY of Middle Age is

desirous of obtaining a RE-ENGAGEMENT as above, in a First-Class School for Young Gentlemen. She is thoroughly and practically experienced, and competent to undertake the Supervision of a large Household. Highest Testimonials.—Address E. A., Messrs. Relife Brothers, School Booksellers, 150, Aldersgate-street, E.C.

THE LONDON COLLEGE of the INTERNATIONAL EDUCATION SOCIETY (Limited).

Head Master.—L. SCHMITZ, Esq., Ph.D. LL.D. F.R.S.E., late Rector of the High School of Edinburgh.

The aim of this College is to afford an education of the highest order, harmonising with the wants and spirit of the age. A prominent place is assigned to Modern Languages, the Natural Sciences, and Mathematics. Neither Latin nor Greek is begun until the Pupils are familiar with the Grammar of the Mother-tongue, whereby more rapid progress in the Ancient Languages is insured than is otherwise attainable.

The Next Term will begin on the 18th of January, 1867.
For Prospectuses, and any further information, apply to Dr. Schmitz, at the College, Spring-grove, Middlesex, W., or to the Secretary, at the Society's Office, 34, Old Bond-street, W.

BOROUGH OF LIVERPOOL. SEPTON PARK COMPETITION.

TO LANDSCAPE GARDENERS AND OTHERS.
The Council of the Borough of Liverpool offer Two Premiums for the BEST PLANS for LAYING OUT THE SEPTON PARK, viz.:—A First Premium of 300 Guineas. A Second Premium of 150 Guineas.

On and after the 24th of November the Conditions of the Competition, together with a Lithographed Contour Plan of the Site, will be sent to any address on receipt of Post-office Order for One Guinea, which latter will be returned if Plans are received according to the Conditions.

Application to be made to Mr. E. R. Rosson, Architect and Surveyor, Town Hall, Liverpool.

TO AUTHORS, EDITORS, &c.—WANTED.

A WEEKLY ARTICLE on a POLITICAL SOCIAL SUBJECT. A powerful Writer, of advanced Liberal Opinions, who has contributed Leaders to the Times, Daily News, Spectator, or Daily Telegraph, would probably have the preference.—Address, including a Specimen Article, which will be returned, with a final answer, on or before January the 1st, to OLEN, Adams & Francis, 50, Fleet-street, E.C.

TO PUBLISHERS.—A GENTLEMAN, for

Twelve Years Literary Manager of a well-known Publishing Establishment, desires a RE-ENGAGEMENT in a like capacity. Thoroughly experienced in all branches of Periodical and Book Publishing, including Editing, seeing Books through the Press, Correspondence, Advertising, Printing, Engraving, and Paper, and in every way qualified for the post of Publisher or Manager.—Z., 7, Cornwall-street, Fulham, S.W.

EDITOR—WANTED, an EDITOR for a

CONSERVATIVE JOURNAL.—He will require to be an able Writer, and acquainted with the working of the Literary Department of a Newspaper.—Apply by letter with Testimonials addressed "EDITOR," care of R. F. White, Esq., 33, Fleet-street, London.

WANTED, a First-class SHORTHAND-

REPORTER for a DAILY CONSERVATIVE PAPER.—He must be of strictly steady habits.—Applications to be forwarded, under cover, to Mr. White, Fleet-street, London, addressed "REPORTER."

LONDON LETTER or ARTICLES.—

A practised and successful Writer is now at liberty to contribute, upon Moderate Terms, a LONDON LETTER or LEADING ARTICLE to a good Provincial Paper. The best sources of information are open to him.—Address TATLER, Warren's Library, Edwards-terrace, Kensington, W.

TO NEWSPAPER PROPRIETORS.—

A Young Man, respectably connected and fully qualified, offers his services as MANAGER, PUBLISHER, or ASSISTANT-PUBLISHER. First-class references and security, if desired.—Address ERTA, Messrs. Adams & Francis, 50, Fleet-street, E.C.

THE PRESS.—A Gentleman accustomed to

Writing for the Press will be glad to SUPPLY ARTICLES WEEKLY, written in a popular, genial tone, to a Conservative Journal.—Address "D. & D.," care of Wm. Winkley, Esq., Harrow Press, Harrow-on-the-Hill, N.W.

REPORTER.—WANTED, a REPORTER

for a Weekly Newspaper in the Country; must have a good practical knowledge of the Printing Business.—Address EDITOR of the Guardian, Cardiff.

CONFIDENTIAL SERVICES.—A

Gentleman of responsible position undertakes the REVIVAL and SALE of MSS., making interim advances when required, the Preparation or Scrutiny of Trustees' Accounts, and other similar employment Terms moderate.—SILEX, Post-Office, Devereux-court.

WANTED, a PRIVATE SECRETARY,

with a thorough knowledge of German and French, and some aptitude for literary work. A young man would be preferred.—Address X. P., Post-Office, St. James's-street, London.

REPORTER.—WANTED, by a Young Man, who has been six years on the Reporting Staff of a leading Daily Paper, a RE-ENGAGEMENT in a similar capacity. Satisfactory references as to ability and character.—Address RROOARIN, care of Mr. Franklin, Advertising Agent, Newcastle.

D. DRESSER, Architect, Consulting Ornamentist, and Practical Designer, has AN OPENING in his Office for one or two articled Pupils.—North End, Fulham, S.W.

PRIZE OF ONE HUNDRED AND FIFTY GUINEAS—viz., One Hundred Guineas given by A. J. Johns, Esq., and Fifty Guineas by the Council of the Eisteddfod, for the best Essay "On the Origin of the English Nation with reference to the Question how far that Nation is descended from the Ancient Briton."

The Essay to be written in English, Welsh, French or German. To be sent by the first day of May, 1867, to J. P. Williams, Esq., Secretary of the Eisteddfod Rhyf, North Wales, England (Angleterre). The Judge will withhold it should none of the Essays in their opinion deserve the Prize.

Each Essay to be signed with the name of the Author, or with a fictitious name, the real name to be enclosed in a sealed paper.

The postages to be prepaid. Candidates who were Competitors for this Prize at the Eisteddfod in 1865, or in 1866, are requested to make use of different mottoes or nouns de plume from those by which they distinguished their Essays on those occasions.

J. P. WILLIAMS, Gen. Secretary, Rhyf.

FOR SALE, a first-class ASTRONOMICAL TELESCOPE, 4½ inches aperture, 7½ inches focus, with finder, dew cap, and five eye-pieces. Powers, from 50 to 300. Polished brass-tube. In case, and quite new.—Apply to WILLIAM OLFIELD, Optician, Skipton.

RARE and CURIOUS BOOKS, with many that are Unique and Specially Interesting, will be found in HENRY SUGG'S NEW ANNOTATED CATALOGUE, inserted in the December Number of the *Gentleman's Magazine*, and which will be posted by sending stamp to 33, Henrietta-street, Covent-garden, London.

THE CHRISTMAS BOOK LIST OF BICKERS & SON IS NOW READY, including all the new Gift Books for the present Season at the reduced prices; also an extensive variety of the past season's illustrated Books at less than half price. By post for one stamp. 1, Leicester-square, W.C.

THE NEW CHILDREN'S GIFT BOOKS.—See BICKERS & SON'S NEW CHRISTMAS BOOK LIST.—No. 1, Leicester-square, W.C.

TO MUSEUMS.—FOR SALE, at less than

their Cost, a number of well-finished GLASS CASES, with polished Oak Frames, made for a Museum.—Apply to Mr. Dawson, Weymouth.

SCOTT RUSSELL'S NAVAL ARCHITECTURE.

SUBSCRIBERS to this WORK who feel themselves aggrieved by the depreciation of its value, consequent upon the Publishers selling a large number of Copies by Auction at less than a Fourth of the Subscription Price, are requested to APPLY immediately to D. KEAN, Esq., 13, South-square, Gray's Inn. In the Prospectus of this WORK, and in other Indemnities held out to Subscribers, it was promised that "should any copies remain in the Publishers' hands at the time of Publication, the price of the unsold Copies will be increased to Forty Guineas."

GEOLOGY.—ELEMENTARY COLLECTIONS.

CTIONS, to illustrate the New Edition of Lyell's *Elements of Geology*, and facilitate the important study of Mineralogy and Geology, can be had at £1.10.0, 5s. to 5s. 6d. each; the single Specimens of Minerals, Rocks, Fossils, and Recent Geological Maps, Hammers, all the recent Publications, &c. J. TOWNLEY, Mineralogist to Her Majesty, 146, Strand, London. Private Instruction is given in Mineralogy and Geology by Mr. TOWNLEY, F.G.S., 146, Strand, W.C.

AUTOGRAPHS.—TO BE SOLD, a small

COLLECTION of interesting BRITISH AUTOGRAPHS, including those of William and Mary, Queen Anne, George II. and III., Sarah, Duchess of Marlborough, Lord Burleigh, Prime Minister to Queen Elizabeth, and about 50 others of the sixteenth and seventeenth centuries. Also characteristic letters of Lord Nelson, &c.—Address A.B., 106, Stephen's Green, Dublin.

RELIC OF CROMWELL.—TO BE SOLD.

A HANDSOME CABINET, once the Property of Cromwell, having been purchased with the Mansion of Upwood, Huntingdonshire, by the Ancestor of the late Admiral Sir Richard Belcham, &c.—For further particulars apply to P.H.C., Belcham, &c.

THE LONDON SCHOOL OF PHOTO-

GRAPHY IS NOT REMOVED from the Pantheon, but the Business will be transferred to the BOHO BAZAAR in the course of a few weeks, when due notice will be given. Portraits of Ladies and Children taken daily, as usual.

PORTRAITS OF LADIES AND CHILDREN

taken daily at the PANTHEON Branch of the LONDON SCHOOL OF PHOTOGRAPHY (in the Picture Gallery of the Pantheon, Oxford-street); also at 103, Newgate-street; M. Gage, side, &c. Prices: one portrait for 2s. 6d.; twelve for 15s.

SHORTHAND.—PITMAN'S PHONO-

GRAPHY.—Phonography is taught in Class, at 7s. 6d.; Private Instruction given, personally or by post, for 12s. 6d. Perfect Course of Lessons.

SPECTACLES SCIENTIFICALLY

ADAPTED, by W. ACKLAND, Surgeon, daily, at How Thoroughly's, Opticians to the Queen, 123 and 124, Newgate-street, London.—Send Seven Stamps for his "Hints on Spectacles, When to Wear, and How to Select Them."

DEBENTURES.—The WEST LONDON

EXTENSION RAILWAY COMPANY jointly held by the London and North-Western, the Great Western, the London and South-Western, and the London, Brighton, and South Coast Railway Companies are prepared to receive APPLICATIONS for a limited amount of DEBENTURES, bearing interest at 5 per cent. per annum and repayable at three, five, or seven years. Applications to be made to me, at the Office, 7, Westminster Chambers, Victoria-street, S.W.

No. 7, Westminster Chambers, Victoria-street, Westminster, S.W., 20th November, 1866.

THE GALANTY SHOWMAN.—How to

Make a Galanty Show, and Act the Broken Bridge, Billy Button, and the Enraged Cobbler, 150 Engravings, with Dialogue complete, post free for 14 stamps.—H. G. CLARK & Co., 22, Strand.

THE MAGIC DONKEYS.—Roars of

Laughter.—These wonderful Animals go through the extraordinary Evolutions, daily, at 252, Strand, from Ten till Six. The pair sent post free for 14 stamps.—H. G. CLARK & Co., 22, Strand.

THE CHADBURN LANTERN, for projecting

enlarged Images upon a Screen (similar to the Magic Lantern) from opaque objects. This instrument requires no gas, want in scientific and amusing Illustrations; by it Great Works, Moving Mechanisms, and other objects of interest, can be shown in their colour and detail, thus rendering paintings on glass needless.—To be had direct from C. H. CHADBURN & Son, Optical and Instrument-Makers to H.R.H. the late Prince Consort, Liverpool.

ELEVATOR GUN.—Specially intended for

Persons going Abroad, and in this Country for Rabbit and Woodcock Shooting. The Banditti and Sporting Experiences of the Palatine, among the Mountains of Mexico, led him to construct this Firearm with a special view to the requirements of a Traveller. Persons who may wish to confer with him respecting its use, peculiar advantages, &c., may do so by application at the Whittington Club, Arundel-street, W.C.

THE ELECTRIC TELEGRAPH: was it

INVENTED BY PROF. WHEATSTONE?

By WILLIAM FOTHERGILL COOKE, Esq.

Abstract from "AWARD," page 14.

"Mr. Cooke is entitled to stand alone, as the gentleman to whom this country is indebted for having practically introduced and carried out the Electric Telegraph as a useful undertaking." (Signed) "MR. B. BRILL."

"J. F. DANIELL."

Subjoined Letter from the Parties.

"London, 27th April, 1866."

"Gentlemen.—We cordially acknowledge the correctness of the facts stated in the above document, and beg to express our grateful sense of the very friendly and gratifying manner in which you have recorded your opinion of our joint labours, and of the value of our invention. (Signed) "WILLIAM F. COOKE."

"C. WHEATSTONE."

"Sir M. Isambard Brunel, and J. F. Daniell, Esq., Professors, &c."

Cooke's Letter to Wheatstone.

"The Reader," November 10, 1866.

"The Award cannot be both true and false: IF IT IS TRUE, I have you not acted in accordance with it? If it is false, I did you put your name to a cordial and grateful acknowledgment of the correctness of the facts stated in it?"

Fourth Edition, price 5s. 6d.

Sold by W. H. Smith & Son, Strand.

BOOKBINDING—in the MONASTIC, GOTHIC,

MATTOIL and ILLUMINATED styles—in the most superior manner, by English and Foreign workmen.

JOSEPH ZAHNEDORF,

BOOKBINDER TO THE KING OF HANNOVER.

English and Foreign Bookbinding.

30, BRYDGES-STREET, COVENT-GARDEN, W.C.

KEBLE MEMORIAL COLLEGE,
at OXFORD, in memory of the Author of 'The Christian Year.'

President—His Grace the ARCHBISHOP of OXFORD.
Hon. Treasurer—J. A. SHAW STUART, Esq., 13, Queen's-gate, W.

Hon. Secretary—HENRY E. PELLEW, Esq., 23, Belton, S.W.
Organist—J. WATERLOO-PLADE, S.W., London.

A few months only have passed since the above proposal was placed before the Clergy and Laity of the Kingdom; and in that time the sum of 30,000 has been contributed by more than 1,500 Subscribers.

Although much remains to be done, the Committee encouraged by the response their appeal has met with, have decided that no time should be lost in building and endowing the proposed College or Hall at Oxford, as a public and permanent expression of the love and reverence entertained for the Author of 'The Christian Year.'

Here young men, whom want of means would otherwise deprive of a University education, may at a very small cost, be trained as Christian gentlemen; while the Institution itself will supply a want long felt by those who have the interests of the Church of England most at heart.

Clergymen and Laymen in any part of the United Kingdom, in the Colonies, or in foreign countries, who are willing to aid in carrying out the objects of the Keble Memorial, are invited to communicate with the Hon. Sec., to arrange plans for collecting and remitting contributions to the fund.

Subscriptions may be spread over five years, and should be paid to the Hon. Treasurer, or to the account of the Trustees, at Messrs. Herries, Parry & Co., 18, St. James's Street, S.W., London; the Bank of England (Western Branch), Burlington Gardens, W.; Messrs. Parsons & Co., Oxford; or Messrs. Mortlock & Co., Cambridge.

N.B.—Cheques sent to the Hon. Sec. should be crossed "Herries & Co.," and Post-Office Orders made payable in St. James's Street.

THE TREASURY of BIBLE KNOWLEDGE; being a Dictionary of the Books, Persons, Places, Events, and other Matters of which mention is made in Holy Scripture. By the Rev. JOHN AYRE, M.A. of Gonville and Caius College, Cambridge.

"These 960 pages of closely-printed type contain an accumulated mass of information on Bible subjects truly wonderful. In a thoroughly orthodox spirit, and with a diffidence beyond our praise, Mr. Ayre has compiled a book alike honourable to him and sure of large acceptance with others. He has carefully eschewed the rashness of criticism, and adopted a style and spirit which cannot be too strongly commended. His large acquaintance with all questions of Biblical literature and interpretation has enabled him to consult with profit the best authorities. Few authors or compilers possess either his extensive knowledge or his talent of adapting it to the requirements of the multitude; but Mr. Ayre has generally succeeded in this, without descending from the dignity of his position. His work may be commended to ordinary readers of the Bible as not only intended, but fitted, to establish its authority and illustrate its contents. The type although small is very clear, and the maps and illustrations are numerous and of a superior class. Among the popular Bible dictionaries which have multiplied among us of late, the one before us will perhaps be as acceptable as any." *Journal of Sacred Literature.*

London: Longmans, Green, and Co. Paternoster-row.

THE BOY'S FRIEND for DECEMBER. An Illustrated Magazine of Adventure, Instruction and Amusement. Price 4d.—A Specimen Copy, with List of Prizes, sent post free for five stamps.

St. Olave's.
Sam Slick's American Humour.

The New Volume, just published, comprises

CHRISTIAN'S MISTAKE.

By the Author of

'JOHN HALIFAX, GENTLEMAN.'

Illustrated by SANDYS.

"A more charming story, to our taste, has rarely been written. Within the compass of a single volume the writer has hit off a circle of varied characters all true to nature—some true to the highest nature; and she has entwined them in a story which keeps us in suspense till its knot is happily and gracefully resolved while, at the same time, a pathetic interest is sustained by an art of which it would be difficult to analyze the secret. And if tried by the standard of the Archbishop of York, we should expect that even we would pronounce 'Christian's Mistake' a novel without a fault."—*Times*.

HURST & BLACKETT, 13, Great Marlborough-street.

USEFUL IN EVERY TRADE AND PROFESSION.

Leath & Ross, 5, St. Paul's Churchyard, and 9, Vere-street, Oxford-street.

SELECTION FROM

CASSELL'S ILLUSTRATED

VOLUMES

For CHRISTMAS and NEW YEAR
GIFT-BOOKS.

DORE'S ILLUSTRATED MILTON. 5l.

"The book of the year."—*Saturday Review*.
"One of the finest monuments that typography and the art of book decoration have ever furnished to the honour of one of the greatest—perhaps the greatest but one—of our English poets."—*Illustrated London News*.

DORE'S ILLUSTRATED DANTE. 2l. 10s.

"The most Danteque work on Dante that ever was produced, from the Pontificate of Leo X. to that of Pius IX. M. Dore's sketches have for a considerable time obtained a European celebrity, and any words that may be suggested to us by the splendid English edition now before us can scarcely add to or detract from it."—*Times*.
"Messrs. Cassell & Co. have published a noble volume of Cary's text and Dore's illustrations. . . The publication is a sumptuous one, and reflects the highest credit on the enterprising publishers."—*Saturday Review*.

DORE'S ILLUSTRATED DON

QUIXOTE. 1l. 10s.

"The contrast of fact and fancy is inevitable, yet ever fresh."—*Pall Mall Gazette*.
"Rare qualities of inventive fancy, humorous expression, and powerful artistic execution."—*Illustrated London News*.

DORE'S ILLUSTRATED BIBLE. Vol. I.

1l. 1s.

"Dore's Bible will be a monument—the summing up and vastest work of his life as a work of illustration. Many of Dore's Bible illustrations are conceptions of the most daring and astonishing originality, in perfect harmony with the Oriental largeness of the narrative."—*Pine Arts Quarterly*.
"The grandeur, the tenderness, the awe of the inspired volume are unapproached by clever conceits, by brilliant trickery, or sombre nightmare fancies."—*Daily Telegraph*.
"No commentary ever written has the imaginative value of these illustrations."—*Builder*.

DORE'S ILLUSTRATED CROQUEMI-

TAIN. 1l. 1s.

"The 'Croquemitaine' is a perfect treasure of humorous art."—*Saturday Review*.
"Deserves a place by the more dignified 'History of Don Quixote.'"—*Pall Mall Gazette*.

DORE'S ILLUSTRATED BARON MUN-

CHAUSEN. 1l. 1s.

"A true livre de luxe."—*Saturday Review*.

DORE'S ILLUSTRATED WANDERING

JEW. 1l. 1s.

The *Saturday Review* says, "Messrs. Cassell have devoted themselves to the work of giving the English book-buyer Gustave Dore, in all the perfection of his prodigious pencil. This year, at any rate, may be pronounced to be the Dore year. We resist the too obvious solicitations of a sorry joke, but we hope it will be a golden year to those enterprising publishers, who send us the Bible with Dore's illustrations, Dante with Dore's illustrations, Paradise Lost, Don Quixote, 'Munchausen,' The Wandering Jew—all from the same dashing and vigorous artist. Here are seven most sumptuous volumes, all handsomely printed, and with paper and type 'de luxe,' and all from the same artist and entrepreneur. They may be proud of each other."

FOXES'S BOOK of MARTYRS. With

about 200 Illustrations. 12s.

The Rev. C. H. Spurgeon, referring, in *The Sword and the Trowel*, to this edition of 'Foxe's Book of Martyrs,' says, "This magnificent volume should be the Christmas present to his children of every father who can afford it. In these days of the threatened revival of Popery, the lover of his country, the lover of liberty, the lover of Gospel truth, can scarcely do a wiser thing than aid the circulation of this precious volume. The edition before us is worthy of any drawing-room table; it is profusely illustrated, beautifully printed, elegantly bound, and exceedingly cheap; and deserves to be, as we have already said, the Christmas gift-book of the year."

The BEGGAR'S BENISON: a Clydes-

dale Story. Illustrated by upwards of 200 Amateur Pen-and-Ink Sketches. In 2 vols. post 8vo. cloth, 21s.

"The author has managed to throw into his story an amount of plain verisimilitude, after the manner of Defoe, which makes it a thousand times more readable than the mass of high-flavoured romances. Plain print cannot do justice to the intimately grotesque little scenes with which this funny story is so familiarly illustrated. Altogether, the book is one of the quaintest and most diverting we have read for a very long time."—*Saturday Review*.

Notice.—CASSELL'S CHRIST-

MAS ANNUAL, MY PALE COM-

PANION. A Second Edition is now

ready. Sold by all Booksellers, and at

all Railway Stations. Price 1s.

CASSELL, PETTER & GALPIN, Ludgate-hill,

Country of Scripture.'

In One magnificent volume, imperial 4to.

The IMPERIAL FAMILY BIBLE.

Containing many thousand Critical, Explanatory, and Prac-
tical Notes; also References, Readings, Chronological Table,
and Indexes. Illustrated by 74 choice Engravings on Steel.
Best morocco flexible, plain, 6s. 15s.; ditto, richly gilt, 7s. 7s."A noble and beautiful edition of the Sacred Volume. No copy
has ever been placed before us distinguished by so many excel-
lences."—*Art-Journal*.

Imperial 4 half morocco, gilt edges, 6s. 5s.

The IMPERIAL ATLAS of MODERN

GEOGRAPHY. A Series of above One Hundred carefully
Coloured Maps, embracing the most Recent Discoveries and
the Latest Political Divisions of Territory in all Parts of the
World. Edited by W. G. BLACKIE, Ph.D. F.R.G.S. With
an Index to nearly 120,000 Places."This excellent Atlas."—*Saturday Review*.
"Beyond comparison the best collection of maps which has yet
been made."—*Morning Herald*.

In 2 vols. imperial 8vo. cloth, 4s. 6s.

The IMPERIAL GAZETTEER: &

General Dictionary of Geography, Physical, Political, Stat-
istical, and Descriptive. Edited by W. G. BLACKIE,
Ph.D. F.R.G.S. With nearly 750 Wood Engravings."This excellent book of reference. . . . All the articles we have
examined, whether long or short, exhibit a greater degree of cor-
rectness in minute detail than we should have thought prac-
ticable in so comprehensive a work."—*Athenæum*.

In 2 vols. imperial 8vo. cloth, 4s.

The IMPERIAL DICTIONARY:

ENGLISH, TECHNOLOGICAL, and SCIENTIFIC. Adapted
to the present state of Literature, Science, and Art. By
JOHN OGILVIE, LL.D. Illustrated by above 1,500 En-
gravings on Wood."Dr. Ogilvie has not only produced the best English Dictionary
that exists, but, so far as the actual state of knowledge permitted,
has made some approach towards perfection."
British Quarterly Review.

In 1 large vol. super-royal 8vo. cloth, 25s.

The COMPREHENSIVE ENGLISH

DICTIONARY, EXPLANATORY, PRONOUNCING, and
ETYMOLOGICAL. By JOHN OGILVIE, LL.D. The Fon-
dation by RICHARD CULL, F.S.A. Above Eight
Hundred Engravings on Wood."We do not hesitate to recommend this Dictionary as, next to
the more costly and cumbersome 'Imperial,' the very best that has
yet been compiled."—*London Review*.

Imperial 16mo. cloth, red edges, 10s. 6d.; half morocco, 12s.

The STUDENT'S ENGLISH DIC-

TIONARY. Etymological, Pronouncing, and Explanatory.
Prepared especially for the Use of Colleges and Advanced
Schools. By JOHN OGILVIE, LL.D. With about 25
Engravings on Wood."The best etymological dictionary we have yet seen at all
within moderate compass."—*Spectator*.

Parts I. to X. now ready.

TURE. Select Examples of Country and Suburban Res-
idences recently erected from the Designs of various Architects
of acknowledged position and ability; with Descriptive
Notices. To be completed in about 18 Monthly Parts, imp.
4to. price 2s. 6d. each."Such a publication as this cannot but be most suggestive to all
who are directly or indirectly connected with domestic architec-
ture."—*Art-Journal*.

2 vols. large 8vo. cloth extra, 30s.

The WORKS of the ETTRICK

SHEPHERD, in POETRY and PROSE. New Edition.
With Memoir by the Rev. THOMAS THOMSON. 25 Steel
Engravings, from Drawings by D. O. Hill, R.S.A., and Kerby
Halsewell, A.R.S.A. The Volumes may be had separately—

TALES, 15s.; POEMS, 14s.

"He was ambitious to become Burns's successor; and certainly
we may now recognise him as the only one of Burns's followers
who deserve to be named in the same breath."—*Press*.

3 vols. large 8vo. cloth extra, 36s.

The WORKS of ROBERT BURNS.

COMPLETE ILLUSTRATED EDITION. Literary and
Historical. With numerous Notes and Annotations; Professor
WILSON'S Essay 'On the Genius and Character of Burns';
and Dr. CURRIE'S Memoir of the Poet. 32 Landscapes and
Portrait Illustrations on Steel."This is certainly the most elegant edition of Burns ever pub-
lished."—*Scotsman*."Orthodox in tone, reverent in spirit, and showing in every page the marks of independent and industrious
research."—*Churchman*."We feel sure that it may be relied upon as a thoroughly trustworthy guide; not indeed answering every petty
objection, or entering into minute criticism; but setting forth, in a positive form, all that need be known with regard
to the general history, authenticity, natural history, and doctrine contained in the Scriptures."

Christian Advocate and Review.

London: BLACKIE & SON, 44, Paternoster-row.

THE
CHRISTMAS GIFT-BOOKS,
1866-7,

NOW READY AT ALL THE BOOKSELLERS.

TWO CENTURIES of SONG; comprising Lyrics,

Madrigals, Sonnets, and other Occasional Verse of the English Poets of the last Two Hundred Years. With Critical and Biographical Notes. By WALTER THORNBURY. Illustrated by Original Pictures of Eminent Artists. Drawn and Engraved especially for this Work. Printed on toned paper, with coloured borders. Very handsomely bound, with clasp, price 11. 1s.

LIST OF ILLUSTRATIONS.

| Written by | Engraved by |
|----------------------------------|---------------------|
| the Stolen Kibe | I. Lamont |
| the Sleeping Labourers | H. S. Marks |
| the Old Man's Home | E. K. Johnson |

| Philip's Farm | W. P. Burton |
| Buffed | J. Wolf |
| The Impending Check-Mate | T. Morten |

The Ornamental Title-Page and Borders designed by HENRY SHAW, F.S.A., and engraved by R. B. URRING. "Solidly bound in green and gold cloth, which looks so like Morocco as not to disgrace the metal clasp which holds the covers together. Mr. Walter Thornbury's 'Two Centuries of Song; or, Lyrics, Madrigals, Sonnets, and other Occasional Verse of the English Poets of the Last Two Hundred Years,' recommends itself as a volume pleasant in its contents, and charming in its

illustrations. Many of the landscapes are very beautiful; the figure-places are generally good; the tinted borders to the pages are extremely graceful; and the arabesque on the half-title is one of the most dainty and fascinating things of the kind we have ever seen."—*Daily News*.

An ILLUSTRATED EDITION of BISHOP

HEBER'S HYMNS, with upwards of One Hundred Designs. Engraved in the first style of Art, under the superintendence of J. D. Cooper. Small 4to. handsomely bound, price 10s. 6d.

"Heber's Hymns," published by Messrs. Low & Co., is another book which will content everybody who looks upon it. Every hymn is beautiful and ended with an illustrative picture, or some religious device, or it is set in a border which is in every case drawn and engraved with great delicacy. The large pictures are often copies from the great religious painters. The 'Madonna and Child,' on page 34, is almost as fine as a steel engraving, and quite as fine as a steel engraving ought to be. The same criticism holds with greater force to the head of Christ on page 41; which,

for minute and delicate finish (to which there is no sacrifice of breadth or force), is one of the most remarkable bits of wood-engraving we have ever seen. The book abounds with examples of the same delicate skill. Such engravings can only be produced at enormous expense. Some of these—little things of two or three square inches—must have cost weeks of constant patient labour; but the result is creditable to the artist, and should be profitable to the publishers."—*Pall Mall Gazette*.

MILTON'S PARADISE LOST, with the original

CATS' and FABLES' EMBLEMS.

Second Edition, in imp. 8vo. with Frontispiece, 60 large circular Plates, and 80 Tail-pieces on Wood, printed within Ornamental Frames, price 31s. 6d. in Grollier covers, or price 32s. 6d. in morocco by Rivière.

MORAL EMBLEMS, with Aphorisms, Adages and Proverbs of all Ages and Nations, from JACOB CARS and ROBERT FABLES. The Illustrations composed from Designs found in their Works by J. LEIGHTON, F.S.A. The Text translated and edited with Additions by R. PIGOT.

"The richness and breadth of colour which we have indicated as characterizing the verse of JACOB CARS, have corresponding qualities in the pictorial features of the volume. As a gift-book it is especially to be commended. Its axiomatic form is most suitable to the beginning of a new year, when the wisdom of the past should be held of some account in plans for our guidance in the future; and its abundance and diversity of subject will give it an enduring value."
Daily News.

London: Longmans, Green, and Co. Paternoster-row.

PEOPLE'S EDITION OF GLEIG'S LIFE of WELLINGTON.

In One Volume, crown 8vo. of 312 pages, with Portrait, price 5s. cloth, or 10s. 6d. well bound in calf, half extra.

LIFE of the DUKE of WELLINGTON.

By the Rev. G. R. GLEIG, M.A. F.R.S. Chaplain-General to the Forces, and Prebendary of St. Paul's. Popular Edition, carefully revised and Corrected, with copious Additions from Authentic Sources.

"Mr. Gleig has written the life of our greatest hero as it has not been written yet. He has made good use of materials which, for completeness and accurate detail, have perhaps no parallel. French and English authors alike have contributed to his resources, and he has filled in the outline of the hero's portrait with a minuteness of drawing and a vivid colouring which are entirely satisfactory."
Saturday Review.

London: Longmans, Green, and Co. Paternoster-row.

ILLUSTRATED WORKS SUITABLE FOR PRESENTATION.

POEMS. By Jean Ingelow. With 97 Illustrations from Original Drawings by Eminent Artists, engraved on Wood by the BROTHERS DALZIEL, and bound in cloth boards, elaborately ornamented in gold and enamel. Fcap. 4to. price 21s. cloth, gilt edges; or 42s. bound in morocco by Rivière.

LAYS of ANCIENT ROME. By Lord Macaulay. With 90 Illustrations, Original and from the Antique, drawn on Wood by G. SCHARF. Miniature Edition, the Letter-press and Illustrations reproduced in Lithography. Imperial 16mo. price 10s. 6d. cloth, gilt edges; or 21s. bound in morocco by Rivière.

TENNIEL'S EDITION of MOORE'S LALLA ROOKH, with 68 Wood Engravings from Original Drawings and other Illustrations. Fcap. 4to. price 21s. cloth; or 42s. bound in morocco by Rivière.

HOMES WITHOUT HANDS: A Description of the Habitations of Animals, classed according to their Principle of Construction. By Rev. J. G. WOOD, M.A. F.L.S. With about 140 Vignettes on Wood (30 full size of page). 8vo. price 21s. cloth; or 27s. half bound in morocco by Rivière.

THE NEW TESTAMENT. Illustrated with Wood Engravings after the Early Masters. Chiefly of the Italian School. Crown 4to. price 63s. cloth, gilt top; or 54. 5s. bound in morocco by Rivière.

THE LIFE and EPISTLES of ST. PAUL. By W. J. Conybeare, M.A., late Fellow of Trin. Coll. Cantab., and J. S. HOWSON, D.D., late Principal of Liverpool College.

LIBRARY EDITION, with all the Original Illustrations, Maps, Landscapes on Steel, Woodcuts, &c. 2 vols. 4to. 48s. cloth; or 47. 16s. bound in calf antique.

INTERMEDIATE EDITION, with a Selection of Maps, Plates, and Woodcuts. 2 vols. square crown 8vo. 31s. 6d. cloth; or 27. 10s. bound in calf by Rivière.

PEOPLE'S EDITION, Revised and Condensed, with 46 Illustrations and Maps. 2 vols. crown 8vo. 12s. cloth; or (two vols. in one) price 20s. in tree calf or calf antique by Rivière.

THE LIFE of MAN SYMBOLISED by the MONTHS of the YEAR in their SEASONS and PHASES. Text selected by R. PIGOT. Illustrations, Marginal Devices, Decorative Initial Letters, and Tail-pieces, engraved on Wood from Original Designs by JOHN LEIGHTON, F.S.A. 4to. price 42s. cloth, gilt edges; or 34. 6s. bound in morocco by Rivière.

MRS. JAMESON'S LEGENDS of the SAINTS and MARTYRS. Fourth Edition, with 19 Etchings and 187 Woodcuts. 2 vols. square crown 8vo. price 31s. 6d. cloth.

MRS. JAMESON'S LEGENDS of the MONASTIC ORDERS. Third Edition, with 11 Etchings and 88 Woodcuts. 1 vol. square crown 8vo. price 21s. cloth.

MRS. JAMESON'S LEGENDS of the MADONNA. Third Edition, with 27 Etchings and 165 Woodcuts. 1 vol. square crown 8vo. price 21s. cloth.

THE HISTORY of OUR LORD, as exemplified in Works of Art. By Mrs. JAMESON and LADY EASTLAKE. Second Edition, with 13 Etchings and 251 Woodcuts. 2 vols. square crown 8vo. price 42s. cloth; or 84s. bound in morocco by Rivière.

* * Mrs. JAMESON'S SACRED and LEGENDARY ART, completed by LADY EASTLAKE, may be had in sets only, complete in 6 vols. as above, price 127. 12s. handsomely bound in morocco by Rivière.

LYRA GERMANICA: Hymns for the Sundays and Chief Festivals of the Christian Year. Translated by CATHERINE WINKWORTH. With 125 Illustrations on Wood, drawn by J. LEIGHTON, F.S.A. Fcap. 4to. price 21s. cloth, gilt edges; 36s. bound in morocco antique; or 42s. bound in morocco elegant by Rivière.

SACRED MUSIC for FAMILY USE. A Selection of Pieces for One, Two, or more Voices, from the best Composers, Foreign and English. Edited by JOHN HULLAH, Professor of Vocal Music in King's College and in Queen's College, London. 1 vol. large music folio, price 21s. half bound.

London: LONGMANS, GREEN, READER, and DYER, Paternoster-row.

MR. BENTLEY'S LIST.

IMMEDIATELY.

IMPRESSIONS OF SPAIN. By the Right Hon. LADY HERBERT OF LEA. Royal 8vo. with 16 Full-page Illustrations, 21s. [Next week.]

OLD TRINITY: a Story of Real Life. By T. MASON JONES. In 3 vols. post 8vo.

NODDE PARSONAGE. From the Original Danish. By the Translator of 'The Guardian,' &c. 3 vols. post 8vo.

GLUM-GLUM: a Fairy Romance for Children, Good and Bad, their Pretty Aunties and their Sensible Papas. By HERACLITUS GREY. In small 4to.

The CURIOSITIES of CLOCKS and WATCHES, from the Earliest Time. By EDWARD J. WOOD, Esq. Crown 8vo. 10s. 6d. [Next week.]

NOW READY.

COMPLETION of the LIFE of CHARLES JAMES FOX. By the Right Hon. EARL RUSSELL, K.G. Vol. III. Crown 8vo. 12s.

THREE PHASES of CHRISTIAN LOVE. By the Right Hon. LADY HERBERT OF LEA. 8vo. 12s.

The THIRD and CONCLUDING VOLUME of the HISTORY of the AMERICAN WAR. By Lieut.-Col. FLETCHER, Scots Fusilier Guards. Demy 8vo. 18s.

ENGLISH ECCENTRICS and ECCENTRICITIES. By JOHN TIMMS, Esq. F.R.S., Author of 'A Century of Anecdotes,' 'Club Life of London,' &c. 3 vols. crown 8vo. 21s.

CHARLES TOWNSHEND, Wit and Statesman. By PERCY FITZGERALD, Esq. M.A., Author of 'The Life of Laurence Sterne.' Large post 8vo. 10s. 6d.

COMPLETION of the HISTORY of ROME to the FALL of the REPUBLIC. By Dr. THEODOR MOMMSEN. Translated by Professor DICKSON. Vol. IV. In Two Parts. Crown 8vo. 16s.

LEGENDS of a STATE PRISON; or, Visions of the Tower. By PATRICK SCOTT, Esq. Fcap. 8vo. 6s.

LETTERS from HELL. By a Danish Pastor. In 2 vols. post 8vo. 21s.

"The author's conception of hell includes a very strong resemblance to our own world. This is, in fact, the main principle of the book; and the ghastly mimicry of human occupations and passions is described with some literary force."—*Saturday Review*.

The INGOLDSBY LEGENDS. A New Illustrated Edition, containing all the Illustrations of LEACH, CRUKSHANK, and TENNIEL, with New Illustrations by Dr. MAURER. Crown 8vo. 21s.

"From the Times:—There could not be found a more pleasant book than 'The Ingoldsby Legends.' Illustrated by three such men as Leach, Cruikshank, and Tenniel, what can be more tempting?"

A NEW EDITION of The HEAVENS: an Illustrated Handbook of Astronomy. By M. AMÉDÉE GUILLEMIN. Edited by J. NORMAN LOCKYER, Esq. F.R.A.S. Royal 8vo. 200 Illustrations, 21s.

"If anything can make the study of astronomy easy and engaging to ordinary minds, it will assuredly be a work of the attractive style and handsome—we may almost say sumptuous—aspect of M. Guillemin's treatise on the Heavens. It deserves to be spoken of with all praise as one towards which author, editor, illustrator, and publisher have equally done their best. Of the translation itself we cannot speak too highly. It has all the force and freshness of original writing."—*Saturday Review*.

The TREASURY of FRENCH COOKERY. A Collection of French Receipts arranged and adapted for English Households. By Mrs. TONGOOD. Crown 8vo. 3s.

London: RICHARD BENTLEY, 1, New Burlington-

Publisher in the Strand.

13, Great Marlborough-street.

HURST & BLACKETT'S
NEW WORKS.

NEW AMERICA. By William Hepworth DIXON. 2 vols. 8vo. With Illustrations. [In the press.]

A BOOK ABOUT LAWYERS. By J. C. JEAFFRESON, Barrister-at-Law, Author of 'A Book about Doctors.' 2 vols. 8vo. 37s. 6d.

From the Times, Dec. 8.—"A Book about Lawyers" deserves to be very popular. Mr. Jeaffreson has accomplished his work in a very creditable manner. He has taken pains to collect information from persons as well as from books, and he writes with a sense of keen enjoyment, which greatly enhances the reader's pleasure. He introduces us to lawlessness under a variety of phases. We have lawyers in arms, lawyers on horseback, lawyers in love, and lawyers in Parliament. We are told of their salaries and fees, their wigs and gowns, their jokes and gaieties. We meet them at home and abroad, in Court, in chambers, and in company. In the chapter headed 'Mirth' the author has gathered together a choice shew of anecdotes from the days of More down to Erskine and Eldon."

"These volumes will afford pleasure and instruction to all who read them, and they will increase the reputation which Mr. Jeaffreson has already earned by his large industry and by his great ability."—*Athenæum*.

"The success of his 'Book about Doctors' has induced Mr. Jeaffreson to write another book—about Lawyers. The subject is attractive. It is a bright string of anecdotes, skillfully put together, on legal topics of all sorts, but especially in illustration of the lives of famous lawyers. Mr. Jeaffreson has not only collected a large number of good stories, but he has grouped them pleasantly, and tells them well. We need say little to recommend a book that can speak for itself so pleasantly. No livelier reading is to be found among the new books of the season."—*Advertiser*.

THE LIFE of JOSIAH WEDGWOOD.

From his Private Correspondence and Family Papers. By ELIZA METEYARD. Dedicated to the Right Hon. W. E. Gladstone. Complete in 2 vols. 8vo. 37s. 6d. With Portraits and above 300 beautiful Illustrations. 42s. bound.

"The author has achieved a work not less creditable to herself than it is indispensable to all who wish to know anything about English ceramic art and its great inventor. The volumes are marvels of decorative and typographical skill. More beautifully printed pages, more elegant paper, and more dainty woodcuts have seldom met our eyes."—*Saturday Review*.

A WINTER with the SWALLOWS. By MATILDA BETHAM EDWARDS. 8vo. with Illustrations, 15s.

MY PILGRIMAGE to EASTERN SHRINES. By ELIZA C. BUSH. 8vo. with Illustrations, 15s. [Dec. 14.]

LIGHTS and SHADOWS of LONDON LIFE. By the Author of 'MIRK ABBEY,' &c. 3 vols.

"The reader follows the author with equal pleasure, whether through the glowing fancies of fiction, or the bright and humorous, the grave and realistic interpretations of things as they are in this world of London."—*Morning Post*.

THE NEW NOVELS.

MADONNA MARY. By Mrs. OLIPHANT, Author of 'Agnes,' &c. 3 vols.

"'Madonna Mary' is written with evenness and vigour, and overflows with the best qualities of its writer's fancy and humour. The story is thoroughly original, as far as its plot and leading incidents are concerned; and the strength of the narrative is such that we question if any reader will lay it aside, notwithstanding the fullness in his throat and the constriction of his heart, until he has shared in the happiness which is liberally assigned to the actors of the drama before the falling of the great curtain. But the principal charm of the work are the subtle humour, finesse of touch, and seeming ease with which Mrs. Oliphant delineates and contrasts her numerous characters."—*Athenæum*.

"'Madonna Mary' is a book of great power and beauty—a perfect work of its kind."—*Morning Post*.

CHRISTIE'S FAITH. By the Author of 'No Church,' 'Owen,' 'Mattie,' &c. 3 vols.

"Very heartily may we congratulate the author upon the production of this new work, which does equal honour to the skill and ability of the novel-writer, and to the earnest feeling of the philanthropist. The interest of the story is so enthralling throughout, that it holds the reader enchained during its perusal, and the purpose of the story is so admirable, that the wisest and the best among us may justly consider the time well bestowed that is occupied by its perusal."—*Sun*.

LEYTON HALL, and other Tales. By MARK LEMON. 8 vols.

ANNALS of a QUIET NEIGHBOURHOOD. By GEORGE MAC DONALD, M.A. 3 vols.

"The charm and value of Mr. Mac Donald's work need not be sought. They present themselves unasked for in the tender beauty of his descriptions, whether of nature or of life and character; in his almost serene insight into the workings of the human heart; and in his unceasing fertility of thought and happy exactitude of illustration. Whoever reads the book once will read it many times."—*Poll Mall Gazette*.

KINGSFORD. By the Author of 'SON and HEIR,' 2 vols. 21s.

"A very good novel, written with great spirit. The plot is of such ingenuity as to maintain the interest of the reader to the end. The descriptions of scenery are capital, and there is great skill shown in the drawing of character."—*Star*.

RACHEL'S SECRET. By the Author of 'THE MASTER of MARTON,' 3 vols.

A WOMAN'S CONFESSION. By LADY CAMPBELL. 3 vols. [Just ready.]

GIFT BOOKS,

ILLUSTRATED by PHOTOGRAPHY.

This day, New Edition, price One Guinea.

Mr. and Mrs. S. O. HALL'S BOOK of the THAMES, with many Woodcuts and Fifteen Photographic Illustrations by F. Frith.

Just published, price Two Guineas, demy 4to. cloth gilt, printed on toned paper; or in handsome morocco, Three Guineas.

The OBERLAND and its GLACIERS.

Explored and Illustrated with Ice-axe and Camera. By H. R. GEORGE, M.A. F.R.G.S., Fellow of New College, Oxford, Editor of the *Alpine Journal*. With Twenty-eight Photographs, illustrative of the various Glacial Phenomena, and of the scenery described, by Ernest Edwards, B.A., and a Map of the Oberland.

"In this volume Mr. George has presented an agreeable and handsomely-embellished drawing-room book. The photographs are excellent. Glacier scenery is peculiarly suited for photographic representation, as it displays no great variety of colours, and the contrasts of light and shade are strong on tolerably fine days."—*Athenæum*.

"The interest of Mr. George's lucid exposition is greatly enhanced by the illustrations of Mr. Edwards. They are always beautiful, and often exceedingly instructive."—*Saturday Review*.

FLEMISH RELICS: ARCHITECTURAL, LEGENDARY, and PICTORIAL, as connected with Public Buildings in Belgium. By FREDERICK G. ST. PHENS, Author of 'Normandy: a Sketch,' &c. Fifteen Photographs, 6½ in. by 4½ in., by Cundall and Fleming. Crown 4to. cloth elegant, 21s.; morocco, 31s. 6d.

MARMION: a TALE of FLODDEN FIELD. By Sir WALTER SCOTT, Bart. Fifteen Photographs. Small 4to. cloth elegant, 18s.; morocco, 25s.

RUINED ABBEYS and CASTLES of GREAT BRITAIN. By WILLIAM and MARY HOWITT. First Series—Twenty-seven Photographs by Bedford, Sedgfield, Wilson, and Fenton. Fcap. 4to. cloth elegant, 21s.; morocco, 31s. 6d.

RUINED ABBEYS and CASTLES of GREAT BRITAIN and IRELAND. By W.M. HOWITT. Second Series—Twenty-six Photographs by Thompson, Sedgfield, Ogle, and Hemphill. Fcap. 4to. cloth elegant, 21s.; morocco, 31s. 6d.

A WALKING TOUR THROUGH BRITAIN. By Rev. J. M. JEPHSON, B.A. F.R.S. Ninety Photographs and Map. Cloth, 31s. 6d.

NORMANDY: its GOTHIC ARCHITECTURE and HISTORY. By FREDERICK G. ST. PHENS. Twenty-five Photographs by Cundall and Downes. Demy 8vo. cloth gilt, 21s.

LONGFELLOW'S HYPERION. Twenty-four Photographs, 7 in. by 5, by Francis Frith, taken expressly to illustrate the scenery of the Story. Cloth elegant, 42s.; morocco, 55s.

"Many of the views make excellent pictures, and are better than the best engravings."—*Times*.

SHAKESPEARE: his BIRTHPLACE, HOME, and GRAVE. A Pilgrimage to Stratford-on-Avon in the Autumn of 1883. By Rev. J. M. JEPHSON, B.A. F.R.S. Fifteen Photographs by E. Edwards, B.A. Cloth elegant, 18s.

The LADY of the LAKE. By Sir Walter SCOTT, Bart. Thirteen Photographs by G. Wilson and T. Ogle. New Edition, small 4to. cloth elegant, 18s.; morocco, 25s.

OUR ENGLISH LAKES, MOUNTAINS, and WATERFALLS. As seen by WILLIAM WORTH. New Edition. Fifteen Photographs. Small 4to. cloth elegant, 18s.; morocco, 25s.

PHOTOGRAPHIC PORTRAITS of MEN of EMINENCE in Literature, Science, and Art, with Biographical Memoirs. Portraits from Life by Ernest Edwards, B.A. Vol. I. 8vo. 1. 8s. 7, each containing Twenty-four Portraits of Men of the Day. Cloth neat, 21s. each.

The GOLDEN RIFLE, or, the Leaflets of Life. An Allegorical Poem. By R. ST. JOHN CORBET. With Six Photographic Illustrations. Imp. 16mo. cloth, 1s.

SNOW-BOUND. By J. G. Whittier. Reprinted from the 24th American Edition. With Portrait and Five Photographic Illustrations. Imp. 16mo. cloth, 5s.

LONDON, SATURDAY, DECEMBER 8, 1886.

LITERATURE

The Gay Science. By E. S. Dallas. Vols. I. and II. (Chapman & Hall.)

As critics, we should be grateful to a gentleman who can say so many pleasant things of our profession as Mr. Dallas. *The Gay Science!* Why, there are people wicked enough to go about the world calling us ugly names, and whispering that we are actuated by the basest motives; while here is a gentleman, of rank in letters, who has actually found (from the Provençal) that we are jolly fellows, devoting our talents to the service of truth and beauty, and to the multiplication of innocent pleasures. Mr. Dallas selected the title, he tells us, because under the words, "the Gay Science," he found the shortest description of the aim and contents of his work. It is a title which has been misunderstood. One of our social benefactors, who had never heard of the Provençal poets, nor knew anything of the science of criticism, hailed the publication of a book on the Gay Science as something tending to prevent virtue from falling, or to rehabilitate it after its fall!

In adopting the name, the author readily confesses that he has "ventured to wrest the term a little from its old Provençal meaning." The name was applied by the Troubadours to their art of poetry. "The light-hearted minstrels of Provence insisted on the joyfulness of their art." According to them, the immediate aim of art is the cultivation of pleasure,—a doctrine which Mr. Dallas thinks is utterly, and undeservedly, out of fashion in the present time. "Pleasure, no doubt, is an ugly word, and, as representing the end of art, a feeble one; but there is no better to be found;" and, of the doctrine of pleasure, the author holds that it has a vast significance which is not suspected by "the high-fliers." It is a doctrine neither shallow nor commonplace; or, if it be the latter, the doctrine of pleasure being the object of art, is commonplace "only in the sense in which sun, air, earth, water and all the elements of life are commonplace." Finally, for the choice of the pleasant title requires some explanation and defence, the author says, "Neither need any one be repelled if this doctrine of pleasure strike the key-note and suggest the title of the present work, in which an attempt will be made to show that a science of criticism is possible, and that it must of necessity be the science of the laws of pleasure, the joy science, the gay science." This explains the meaning of the title and the purpose of the author. The reader may not yet comprehend why criticism, being taken to be a science, must of necessity be the science of the laws of pleasure; but this is just what the argument is to demonstrate; and it must be remembered, in all fairness, that the author has proceeded only half way through his elaborate demonstration in the two volumes to which we are now drawing attention.

Having shown the significance of the title, the object of the argument, and the extent to which the argument is developed, we proceed to note the heads under which this thesis, that criticism is a science, is arranged. The first heading is a *résumé* of the whole matter,—*'The Science of Criticism.'* In the chapter thus entitled, we are informed that if criticism is not yet a science, the dignity of science is beyond its reach. It is only from complete criticism that we can expect science. The hitherto criticism has been very much a details; and has attempted only to do on the large scale what it has done on the small. A comparison of the possibility

begins to dawn." Under the head, 'The Despair of a Science,' a summary of the argument contains the assertion that all criticism which does not achieve or reach towards science is a delusion. "There are men like Iago," says the author, "who think they are nothing if not critical; but the critic is nothing if not scientific." Six separate schools of criticism in Europe are described in a chapter entitled 'The Agreement of the Critics,' which agreement extends only, or should extend only, to one doctrine as the end of Art,—Pleasure. The relations of Pleasure to Imagination lead to a chapter on Imagination itself, which Mr. Dallas defines as "another name for the automatic action of the mind or any of its faculties,"—for, in fact, the 'Hidden Soul,' which is the next subject, dealt with at great length, to this end, that we have a conscious and voluntary, and an unconscious and involuntary life; and the author's argument is, that the "unknown, automatic power which, in common parlance, we call imagination, is but another name for one of these lives—the unknown and automatic life of the mind with all its powers." We will not pause to consider how far this argument, as applied to Imagination, which in the healthy brain of a poet or romancer, is so perfectly under control, is open to objection, but rather proceed to describe the course of our author's argument. And this argument, appropriately, next addresses itself to 'The Play of Thought,' where the spontaneousness of imagination is asserted, and a compulsory imagination described as a contradiction. The argument here Mr. Dallas himself designates as "lengthy," and he betrays some suspicion that it will fail to altogether convince his readers. The argument, of course, is very carefully, closely, worked step by step to the conclusion.

Mr. Dallas will carry readers with him through his chapter on 'The Secrecy of Art,' which (that is, Art) he defines as the opposite of Science, its peculiar field being "the Unknown and the Unknowable," the appeal which it makes being addressed to the Hidden Soul; a definition from which he partially exempts painting and sculpture, but which is strictly applied to music first, the most spiritual of arts, and secondly to poetry. The subject of 'Pleasure' occupies the greater part of the second volume. It is treated in various ways, as Pleasure, mixed Pleasure, pure Pleasure, hidden Pleasure, and the pursuit of Pleasure; indeed, the only other subjects discussed in this volume are: 'The Ethics of Art,' 'The World of Fiction' and 'The Ethical Current.' Mr. Dallas understands by pleasure "every form of enjoyment, not one in particular," and then examines how far it is possible or necessary to define it:—

"When the question is raised, What is pleasure? a moment's thought will convince us that the thing in itself is indefinable. Analyze it as we may, we very quickly come to something which defies analysis. What can we say more about the sense of pleasure than that it is the sense of pleasure? If you ask me, said Augustine, what is time? I do not know; but I know quite well if you do not ask me. And so of pleasure; we have all felt it—we know it when it comes; but we cannot describe it, save in terms that go on vainly repeating each other. What, then, it may be asked, is the object of an inquiry into the nature of pleasure? * * * The best reply is a host of other questions. What is life? what is electricity? what is heat? what is motion? and what is meant by a science of things which are not to be defined? An electric spark is an electric spark: we cannot define it, any more than we can define the thrill of pleasure. It is in our power only to define what are the laws and conditions under which the spark is produced, what are its ante-

cedents, and what are its consequences. So of heat, so of life itself, and so of pleasure. We know them not in themselves but in their relations. It is the utmost of our science to trace their evolutions."

It is in referring to Sir William Hamilton's definition of Pleasure that Mr. Dallas encounters Mr. Stuart Mill, who has attacked the philosophy of Sir William, and therewith European philosophy generally. Mr. Dallas looks upon Mr. Stuart Mill as a reproducer of Hume's philosophy of Nihilism, against which European philosophy is a standing protest. Our author renders full justice to Mr. Mill's political philosophy and to his elucidations of the logic of science, by which Mr. Mill "has been acquiring an influence which the school" (the school of philosophy—if isolated thinkers can be called a school—which began with Hobbes) "has never before enjoyed, and which its conception of human nature will long keep it from enjoying"; and, in allusion to Mr. Mill's chief conclusions being a new rendering of Hume's, the author says—

"They are not, however, put forward as such, but as the product of a different school of thinking. In this disguise they may not all at once be recognized as old acquaintances; and a few sentences may be devoted to showing what Mr. Mill's doctrines are, and how he has arrived at them. As Hume's line of ancestry is traced back to Locke, Mr. Mill's line of ancestry recedes to Hobbes. From Locke came the idealists, such as Berkeley; and from their idealism sprung, by natural succession, what is called the Nihilism of Hume. The idealists said there is no such thing as matter; there is but one substance—mind; all is mind. Then came Hume, and worked their arguments to the disproof of mind also. There is no substance at all, he said; there is no such substance as we call mind, any more than there is a substance which we call matter. All that we know to exist are ideas and impressions.

David Hume ate a mighty big dinner,
Grew every day fatter and fatter,
And yet the huge hulk of a sinner
Denied there was spirit or matter.

Now, parallel with the line of thinkers who very brilliantly worked their way through idealism to what, for want of a better term, one must continue to call the Nihilism of Hume, there was a more obscure line of thinkers among us, who, starting from materialism, have at last worked their way through Hobbes, Hartley, and James Mill, to the Nihilism of Mr. Stuart Mill. They began by denying the existence of mind, and resolving all the movements of thought into vibrations of matter, which was the one substance they allowed. And now at length they have worked their way to the disproof also of that one substance. They have reached Nihilism—the denial of substance altogether. Mr. Mill says that 'matter may be defined a Permanent Possibility of Sensation. If I am asked whether I believe in matter, I ask whether the question accepts this definition of it? If he does, I believe in matter; and so do all Berkeleyans.' But what if the questioner does not accept his definition? The common belief of mankind is that there are things and substances which produce in us sensations, and to these things and substances we give the general name of matter. Mr. Mill says, in effect, 'No, you cannot prove the existence of these things and substances which you call matter,—all you can prove is your belief in the Permanent Possibilities of Sensation.' Or, to quote his exact words:—"The belief in such permanent possibilities seems to me to include all that is essential or characteristic in the belief in substance. I believe that Calcutta exists, though I do not perceive it, and that it would still exist, if every perceptive inhabitant was suddenly to leave the place or be struck dead. But when I analyze the belief, all I find in it is that, were these events to take place, the Permanent Possibility of Sensation, which I call Calcutta, would still remain." Thus Westminster, which Mr. Mill represents in Parliament, is, in his phraseology, but 'the Perma-

nent Possibility of Sensation, which I call Westminster."

In the chapters on the various kinds of Pleasure, and particularly in the illustrations from life and literature, thought and action, which support the argument, will be found some of the most readable pages in Mr. Dallas's book. It is one, indeed, not for what is called the "general reader," but for profound thinkers, men who will not object to go over a page again and again in order to grasp the argument evolved in it. Not that the style is too weighty or the argument too subtle. Here is a passage on a subject, indeed, which has frequently been illustrated in the same manner, but which is pleasant reading, although, perhaps, it tells a little against Mr. Dallas's own theory touching the nature of imagination:—

"In the free play of thought the mind may commit many errors; but there is one error of which we always absolve it, that of inconsistency, or a disregard of wholeness. We who know what ill names have been heaped on imagination, how it is represented often as the great source of illusion, may be perplexed sometimes to find that many an error, many a lapse from truth, is explained by the absence of imagination. How constantly do we hear it said, when a poet or an artist fails of truth, that he has no imagination, or a feeble one. In these cases it will be found that the want of truth, and therefore the want of imagination, shows itself in a want of consistency or of construction. When in one of the beautiful windows of the Sainte Chapelle, in Paris, Isaiah is pictured reproving Mohammed; there may be want of truth, but not of imagination. If the history be wrong, the thought is right. When Goethe in the play presents Egmont as a bachelor, though at the time of the story he had a wife and children, there is a want of truth, but we do not call it a want of imagination. When the Greek sculptor gives us Laocoon naked, though as the priest of Apollo he must have been in his sacerdotal robes at the time of the serpent seizing him, there again is want of truth, but we do not complain of want of imagination. But when, in one of the mysteries enacted in Germany towards the end of last century, the Creator of the world was represented as an old gentleman in a wig, who groped about in the dark, and after running his head against posts, exclaimed in utter peevishness, 'Let there be light,' and there was light—the light of a candle; there was not only the absence of truth, but also that of imagination. When Domenichino, in a picture of Creation, put into the garden of Eden trees decaying with age and pollarded trees, there again was a defect of imagination as well as of truth. And, lastly, when Dryden made Eve in the garden a modern coquette, who, on Adam first offering her love, expressed a doubt as to his fidelity, whether he would always be true to her, and whether he would not be running after others; there once more was a lack of truth, and with it a lack of imagination."

How can this be if, as Mr. Dallas has frequently said, "Imagination is only a name for the free, unconscious play of thought"? Surely there is the utmost freedom and the most absurd unconsciousness of thought in those last illustrations!

There are some generalizations to which we would ask Mr. Dallas's attention. Is it true that a child makes such mistakes of generalization as these: "It calls every man it sees, Papa; it calls every bird, Polly; it calls the dog, Puss; it runs to eat the snow for sugar"? Is it correct to speak of the popularity of the legitimate drama, and of heavy pieces like 'Ion,' in Shoreditch, Sadler's Wells, in suburban and transpontine theatres generally, "because the audience are not so habituated to intellectual pursuits as to consider intellectual amusement a weariness"? Is it true that men of the West End will not sit out "four speeches and fine sentiments"? No picture might more money to Drury Lane, of

fred, which is nearly all "talk," of interminable length. 'Cymbeline' was more attractive at Drury Lane than at Sadler's Wells. The most intellectual of West-Enders were not so worn out by intellectual pursuits as not to hurry in great numbers to enjoy the intellectual delight of listening to and seeing Ristori's *Medea*. The five-act conversational comedies of the last century have become stock pieces at St. James's Theatre, and serried ranks of the intellectual class now sit and listen to every word dropping from the lips of an accomplished lady, as she reads 'Macbeth,' makes every personage live and move as if they were present and visible, and with her book-spell evokes those weird and shadowy sisters with such art that they are not only heard, but are seen, felt, and almost feared by the enthralled audience. Finally, when Mr. Dallas asserts that a taste for the grand and heroic in Art no longer exists, and that a battle-piece, for instance, would hardly attract the notice of the public, we would remind him that, at the very last Exhibition of the Royal Academy, the picture which daily drew before it the greatest crowd was 'The Battle of Trafalgar and Death of Nelson,' by Daniel Maclise.

When Mr. Dallas's third and fourth volumes appear, we shall have more to say of the success with which he may have raised criticism to the dignity of a science, or demonstrated the capability of such elevation. Meanwhile, the whole secret of the science to which Mr. Dallas is devoting four volumes of terse argument and vivid illustration, seems to us to be locked up in the pithy saying of Favart, to the effect that Criticism is a torch which should always enlighten and never consume.

A Winter with the Swallows. By Matilda Betham Edwards. (Hurst & Blackett.)

In spite of its affected title, this is a genuine, graphic record of a time of thorough enjoyment; theatrically tinted, it may be said, but not for that the less rich in colour. What person with a rightly-constructed mind does not enjoy the impossible gorgeousness of a stage landscape, or delight in those Arcadias which Danby painted so riotously, with roses overtopping the tallest poplar-spires, and magnolias "as big as tay-kettles" (as dear Mrs. O'Dowd put it)? We have a secret and deep-rooted admiration of the manchineel-tree at the Grand Opéra of Paris, fitted out for Meyerbeer's 'L'Africaine.' And, to be serious, there are blessed spots on this woe-begone earth which no language, be it ever so florid and picturesque, can overcolour:—witness, as an example, the valley of Partenico in Sicily, after visiting which, the Bay of Naples, nay, even the superb view from the gardens of the Camaldoli monastery there, absolutely look pale. Thus we sympathize with the cheerful lady on trial (especially in the midst of a fog, by "a sea-coal fire") when she launches out as follows:—

"It is Christmas-Day—and what a day! The warm blue sea hardly makes a murmur as it flows inwards; the sky has not a cloud; the air is scented with violets; all the windows stand wide open. The temperature is, in fact, that of a sunny, old-fashioned May-day, and we join the stream of happy holiday-makers bound to the country. Carriages and omnibuses are rattling in every direction, filled with French ladies in pretty toilettes; officers in their uniforms; and poor workmen with their families, all trim and in tune for a day's pleasure. Who could help putting on one's best gown, pinning a flower to one's girdle, and feeling as glad as any child? Nothing can be more perfect than the drive from Algiers to the suburban heights of Mustapha Supérieure, whither we are bound. The carriage winds amid verdant hills all the way. On the one

hand, you see the dome of a Moorish palace glittering among the olive-trees, or the white walls of a French villa peeping from orange and lemon gardens; on the other, you look straight across a line of cypress-trees to the blue bay, sprinkled with a thousand sails, and the bluer mountains beyond. One longed to copy the picture with jewels as some skilful mosaicist has copied Da Vinci's 'Last Supper' in Vienna. The hills are clothed with foliage on all sides. There is the ever-graceful olive, the brilliant banana, the glossy palmar-christi, the arrowy cypress, black and green like a duck's wing, the silvery green aloe, the wild cactus, the fan like palmetto, the caroubier with its grateful shade, and, lastly, though that is rare, the palm. The palm is the king of trees; and only to look at it is to breathe a wholly new atmosphere. I don't know whether it is most beautiful when standing alone against a bright blue sky, or when planted in a stately alley, as in the Jardin d'Acclimation in Algiers. One can never forget the grace and glory of its feathery branches, spread like wings that love the light. Only the leafless fig-trees remind you that it is winter now here; but what is winter with a warm sun overhead and wild flowers growing everywhere? Mignonette, rosemary, large golden marigolds, beautiful, tall asphodels sprinkle the turf, which every one tells me will be a glory of blossoms in two or three months. An hour's drive brings us to our destination, a spacious white villa looking on Algiers and the sea. We wander with our friends through airy apartments, furnished after the Moorish style, and gather violets and roses in gardens having glorious views on either side, and then we eat an early English dinner, served by a picturesque Arab boy, dressed in white cotton trousers and violet cloth vest."

The above is a fair specimen of its painter's style. Take another bit of landscape from her excursion into Kabylia:—

"Soon after leaving Tiziouzen, we crossed a broad river-bed, and then entered a wholly new and beautiful region. The road,—such a road as only French military roads can be,—wound corkscrew fashion about the hills, which were verdant from base to summit. Now we passed under a natural arch of olive boughs; now we came upon a sunny plateau with fields of corn and orchards of the fig-tree, the wild plum and the almond on either side. Everywhere smiled a happy Nature; everywhere was the evidence of peace and plenty. As we advanced more and more into the country, traces of French civilization disappeared, and instead of the straight little houses with their rows of carob-trees, new church, and handsome drinking-fountain, we saw on every crest and mountain-top a Kabyle village, looking, I dare say, precisely as a Kabyle village looked a thousand years ago. Anything more picturesque and poetic than the scenery of Grand Kabylia cannot be conceived. The lovely hills, purple or green or golden as the light made them, each crowned with a compact mass of tiny stone houses, the deep valleys of tender green, the lofty rocks bristling with wild cactus, the groves of majestic olives, the distant panorama of blue snow-tipped mountains—all these features made a picture not easy to forget. * * The journey from the Medtidja and ascent of Fort Napoleon reminds one of the long ride across the Campagna to Tivoli. The road wound round the mountains like a thread twisted about a sugar-loaf. We looked up, and said, 'Oh! it is impossible that we can get there.' We looked down, and said, 'Have we really climbed so high?' And still we climbed higher and higher. Everywhere were signs of cultivation; and it was quite touching to see how laborious, and often ineffectual, was the system of it."

At Fort Napoleon Miss Edwards paid a happy visit, thanks to the charming French officers and their excellent wives whom she found there. It is to these functionaries that those who venture a few miles beyond the outskirts of Algiers must largely owe not only their society, but their creature comforts also; and our author, warmly, and we believe justifiably, does her best to assure her country-folk who know less of the matter than herself, that the

French woman, as a colonist, need not be, and is not, the helpless, shiftless, frivolous creature, dependent on shops and boulevards and theatres and *cafés*, whom we have been apt in our too contemptuous appreciation to consider her. On the other hand, Miss Edwards seems to belong to the number of those among Englishwomen who court rather than avoid sensations; otherwise, we submit, she would hardly have allowed herself to have been taken to see so fiendish a spectacle as an *Aïssoua* festival. The disgusting sights of fanaticism and torture (only equalled by similar exhibitions among the lowest section of the population in New Orleans) to be witnessed there, are matters of the utmost notoriety to every visitor to Algiers, and, even though a harrowing chapter was to be thereby gained, we cannot fancy that an English gentlewoman has any more business in such a scene than at a bull-fight, or in a window overlooking the drop at Newgate.

Pleasant chapters are devoted to visits to the Cedar Forest and to Cherrhell. From the latter we shall take one more landscape, and, with it, take our leave of a pleasant volume.—

"Near Cherrhell the scenery became magnificent. Now we dipped into the heart of a smiling gold green valley: now we traversed the edge of a gloomy ravine; now we crossed a dry river-bed, overhung by the tasselled tamarisk and the glossy Aleppo pine; or we threaded an olive-grove through which the sun could but sparsely penetrate. A cry of admiration escaped our lips as a turn of the road brought us in sight of a wide-spreading valley, crossed at the base by a superb Roman aqueduct. Perfect, but for one arch, and standing in the midst of fertile fields, this structure impresses one with an unspeakable feeling of pleasurable surprise. One thinks so much of the Arabs and Kabyles in Algeria, that one forgets what a part the Romans first played there till reminded of it in this way. Nothing can be prettier or more poetic than the view of Cherrhell, as approached from the land side. Its white walls form an amphitheatre, above which rise green hills and fragrant gardens, whilst below, the bright blue sea extends as far as the eye can reach. At this time of the year the almond-tree was in full flower; and I cannot describe the effect of the pure pink blossoms that flushed the hills like a rosy cloud. These brilliant colours, the enamel of the turf, the pale yellow of the sea-shore, the soft, deep turquoise of the waves, the rosy hue of the almond-tree, the glistening white of the mosques and roofs, seemed so near the eyes that one rubbed them, feeling but just awaked from the blindness of partial sleep. I can still shut my eyes and revel in the night picture of Cherrhell as it looked on that summer day. For though we were only in March the weather was that of summer-time."

It is fair, however, to point out that other experiences of Algiers which turn up from time to time are less florid in their beauty than those here recorded. Only a few days ago we received, and from no witness unworthy of belief, a serious warning against any thought of "wintering with the swallows" there. The shield of the adage had two sides; and it is clear that the lady, whom we shall be glad to meet under any other sunny sky where migratory birds consort, in fear of "winter and rough weather," as, in this case, seen but the golden one.

Meditations on the Actual State of Christianity, and on the Attacks which are now being made upon it. By M. Guizot. (Murray.)

HIS work is of a very different character from that which M. Guizot published three or four years ago, on 'The Christian Church and Society.' That work was as much political as religious. It was French ultra-doctrinaire, from title-page to colophon. It was a denunciation of progress. On the writer of that work, the men who were then founding the kingdom of Italy were guilty of sin.

These 'Meditations' are altogether religious in spirit and purpose. The author is struck by the condition of religion itself. Believers, searchers, sceptics, are daily becoming more numerous, earnest and fixed in their conclusions. Development is making wide strides in every direction. The lookers-on and the hesitating begin to fling themselves into the struggle after truth. There is a general disturbance, nowhere repose; and even conclusions leave many who arrive at them in a state of unrest and anxiety. Daily the importance and gravity of the struggle increases, and perplexity therewith. Into this field of battle, which is, after all, a field wherein earnest men contend to arrive first at the goal where truth, peace and repose begin, M. Guizot betakes himself; and he describes to us the nature of the contest, the prize for which men contend, the quality of the opponents, the temper of their weapons, and the triumph which can fall to the lot of those alone who fight under the banner of present faith as held by Christians.

M. Guizot sees in men's opinions and in society a chaotic mass of sublime truths, perverse ideas, noble development, hideous destruction, a floating of humanity, as humanity never floated before, "between Heaven and the abyss." An old instructor of youth, he naturally feels for the youth of the present day at once sympathy and concern, as he hears of their longings and affirmations. He recognizes their good sense, generosity, love of justice, and submission to the law of their consciences; but good tendencies and evil instincts are mixed up in them, and the little ray of the light of truth which reaches them cannot dissipate the darkness of the error which envelopes them. This error is indicated under the heads, "Rationalism, Positivism, Pantheism, Materialism and Scepticism," the radical vice of each of which, in turn, the writer exposes, without scientifically discussing the subjects themselves. His summary of those systems is expressed in his conviction that "they are no more in a condition to support any profound examination of severe reason than to stand the first regard of common sense." He sets conscience against so-called knowledge, and invokes the distrust of the former for systems "which, in the name of a pretended scientific truth, would, between the intellectual order and the moral order, between the thought and the life of man, destroy the harmony established by the law of God."

We have done enough by indicating the character and object of this work. We will only add, that it is not without some contradictions, nor free from some advocacy of the temporal power; but it is written in excellent spirit. The Abbé Gaume, who wanted the classics to be suppressed in education, is only gently rapped on the knuckles. M. Renan, says M. Guizot, "in his attempt to dethrone Jesus, has, at least, treated Him with admiration and respect; not from calculation, I feel assured, but from the natural tone of his mind." When treating of Pantheism, he renders honour to the mind that aspires higher than it can attain, and which uses the privilege granted it by God, the ardent desire of knowing Him fully; but belief is demanded before fullness of knowledge can be obtained; there must be faith before philosophers agree upon the matter in which we are to have this faith. "Meanwhile," says the writer, "let us never be tired of repeating, this is the mystery of man's mixed nature, an indication of a destiny in store for him superior to his actual condition." No wonder, then, that from the visible his eyes strive to pierce the invisible world. Philosophers and simple Christians, if we may make

this distinction without offence, will be helped to a clearer insight into that on which their gaze is directed, by a study of this solemn,ucid and eloquent volume.

NEW NOVELS.

Sir Brook Fosbrooke. By Charles Lever. 3 vols. (Blackwood & Sons.)

SEVERAL years have passed since Mr. Charles Lever gave us so good a novel as 'Sir Brook Fosbrooke,' in which we encounter much of the pungent humour and mad frolic of his earlier tales, combined with certain higher qualities that are looked for in vain in his two most popular stories, 'Charles O'Malley' and 'Harry Lorrequer.' The drama opens in the mess-room of a regiment quartered at Dublin, with a scene which introduces us to a party of military men, who are chatting about the dissipations and scandals of the Irish capital with that caustic sprightliness which, according to novelists of Mr. Lever's school, characterizes the ordinary conversation of Her Majesty's officers; and from this lively introduction, written in the author's happiest style, readers glide without effort into the body of the vivacious and vigorous narrative. That the moral atmosphere of the book is invigorating, or that its delineations are strictly realistic, we cannot say; for, like all the author's more successful romances, 'Sir Brook Fosbrooke' is written without any higher purpose than the mere amusement of its reader, and its events, no less than its personages, are such as a good-natured man of the world likes to assign to the society in which he takes his pleasure, rather than such as any truthful observer of human affairs would describe as being in the ordinary course of things. The heroes play whist and ride thoroughbred horses after the wont of Mr. Lever's heroes; at times their pleasant indiscretions are not clearly distinguishable from unpleasant faults; and when the young sons and dashing adventurers have squandered their fortunes, and reduced themselves to an interesting state of impoverishment, they suddenly rise to affluence through the death of an elder brother or a lucky speculation in mines. The women, alike good and bad, are of conventional types, their graces and deformities being set forth in accordance with the familiar traditions of romantic art. But two of the principal male characters are perfectly novel creations; and if the volumes contained nothing else to place them high above ordinary fiction, these two worthies would by themselves make a stir amongst the supporters of circulating libraries.

Both of them are very old men; and each in his own peculiar way makes a brave battle with Time, doing his best to persuade an incredulous world that the endurance of fourscore years is not necessarily attended with any important diminution of intellectual and physical vigour. Sir Brook Fosbrooke, an octogenarian who was a notoriously gay man about town when the Prince Regent thought his flatterers were right in calling him the finest gentleman in Europe, is made to play the part of a youngster, or rather such a part as few youngsters could play with impunity for ten consecutive years. Having outlived all the Carlton House set, made away with fortune upon fortune, and exposed himself to every variety of climate, he enters the mess-room at Dublin with an elastic step, quick brain, jovial voice, and spirits which poverty is unable to depress. "I don't smoke," he frankly admits to the colonel of the —th regiment, "so many cigars as formerly, and I am a little more choice about my tobacco. I avoid mulled port, and take weak brandy-and-water;" but he adds, "I believe in all other

respects I'm pretty much where I was when we last met—I think it was at Ceylon." His costume and personal decorations are of an antiquated style, the swallow-tails of his dress-coat and his ring, "a small smoothing-iron, with a coat of arms upon it," astonishing the lads who make his acquaintance; but, so far as his daily habits are concerned, he might be a beardless ensign, instead of a man who fought his first duel before the end of the last century. Young men find him a congenial companion at the whist-table or in the saddle, over a bottle, or in a club smoking-room; and certainly his philosophy is not calculated to put any irksome restraint on jovial subalterns. "There is great promise in a fellow," he observes sententially, "when he can be a scamp and a man of honour. When dissipations do not degrade and excesses do not corrupt a man, there is a grand nature ever beneath." At another time he remarks, with his habitual good humour, to a youthful friend, "My dear Tom, when you have lived to one half my age, you will discover that the world is not so much cursed with ill nature as with levity, and that when men talk disparagingly of their neighbours, they do so rather to seem witty than to be just." Of the influence which this brisk, happy, indestructible baronet exercises upon the course of the narrative, we will reveal nothing which Mr. Lever would rather have us leave consumers of prose fiction to find out by personal inspection of his pages; but it will not lessen any reader's interest in the story to learn before he takes the book in hand that at the close of the third volume Sir Brook is as young and blithe as ever, and, having by a singular turn of luck tumbled into splendid affluence, is fully bent on enjoying himself for many a year to come.

But even more remarkable than Sir Brook as an instance of rare vigour at an advanced age is Chief Baron Lendrick, who resolutely clings to his throne in the Irish Court of Exchequer, in spite of the expostulations of ministers who have political reasons for urging him to resign, and in spite of the galling fire of the public writers who assure the world that he is so stricken with the infirmities of many years that he is no longer able to discharge the functions of his office. Inexpressibly ludicrous are the measures to which his assailants have recourse—in parliament, in the organs of public discussion, and even within his domestic circle, so that they may drive the veteran from the stage; and even more laughable are the outbursts of indignation, querulous egotism, and clever spite with which he resists the attempts and exposes the stratagems of his enemies. Combining the vanity of Erskine and the waspish virulence of Loughborough with Eldon's devotion to office, and the nervous irritability that has animated more than one of our great historic lawyers, this delicious old Chief Baron triumphs over successive attacks of illness, to the keen disappointment of his assailants, who have no sooner come to the conclusion that his case is beyond the control of his physicians than they are startled by his unexpected re-appearance in Court, with the old dreaded sarcasm in his smile and on his tongue. Ultimately his courageous determination neither to die nor resign brings public opinion round to his side, and at the end of the story even the newspapers, which a short time before proclaimed him utterly senile and incompetent, are found extolling him for "his unquestionable powers of thought and expression."

Whether such old men as Sir Brook Frobroke and Chief Baron Lendrick are to be found in real life, and whether the adventures imputed to them by the novel are really of any concerning old age are questions which do not venture

to decide. There is, however, no doubt that as characters in a work of imagination they are highly entertaining acquaintances, and will delight those many readers who, in the middle period of life, are bent on making no unnecessary concessions to Time, and are doing their best to persuade themselves that old age is an evil that may be indefinitely deferred by men of sound digestions and cheery hearts. Moreover, we feel cordial sympathy with the writer who in this story of two old men's lives seems to intimate his intention to play the rôle of Charles O'Malley to the last line of his own bright chapter.

Victory Deane: a Novel. By Cecil Griffith. 3 vols. (Saunders, Otley & Co.)

OVERCOMING a series of obstacles that would have completely daunted and vanquished a less resolute will, we fought our way through the opening chapters of this work of fiction, and then found ourselves at dead of night in the miserable kitchen of a dilapidated farm-house, and face to face with a repulsive old man and a wretched, half-starved, cowering girl. The old man, a miser, was making ready to beat the child, his granddaughter, with a thick stick, and threatening to follow up the merciless castigation of the little creature by thrusting her into a dark cellar that swarmed with rats. "To the last day of her life," runs the story, "would Victory remember the agony with which she heard the bolts drawn in the trap-door, and then her grandfather's steps sounding away through the house, further and further, till they were too far off to be heard at all. Then it seemed to her that she passed hours, crouched upon the highest step of the stairs, where she could sit without letting her head touch the trap-door, which, as she knew, was covered over with cobwebs, the haunts of larger spiders than ever crawled about the house in daylight, while the rats coursed about the floor, or now and then, mounting to where she sat as still as the stone stairs themselves in her great terror, would pull at her dress, and then scamper away over her feet." To stimulate Victory Deane's imagination, and terrify her yet further, the old man talks to her thus: "Thee needn't be tryin' to look through thik there door, Victory," he said, "'t isn't that way thee be goin' to bed to-night. 'Tis in the cellar thee be goin', along with the rats and all they nasty things, for a bad, wasteful, thievin' maid. Sit down in thik there chair, and bide still till I say a word to yee; us have got a some'at to say to wicked, wasteful maids, this here old stick and me.' Victory knew that dreadful way he had of talking to and of his stick. It was a bad sign. She did as he told her, and sat down with the submission of despair." Even at this point we did not throw the book aside in disgust, but went on toiling manfully through page after page until we had satisfied ourselves that 'Victory Deane' was not a novel, but a nightmare. Those who like nightmares may read it; all other persons had better leave it alone.

The Story of Nelly Dillon. By the Author of 'Myself and my Relatives.' 2 vols. (Newby.)

THIS is a clever and interesting Irish story. The scene is laid in Tipperary. The characters are true to human nature in general, and to Irish nature especially. Nelly Dillon, the heroine, is the daughter of a well-to-do farmer, a spoilt child, but with fine qualities. The high principle which makes her prefer being miserable to breaking her promise, and the struggle to do right, though at the sacrifice of all her own feelings, secure the sympathy of the reader.

To obey her father and mother, she gives up a man whom she has loved from childhood, and consents to marry the man they have chosen for her. This principle of obedience to her parents is the leading feature in her character. She does her best to obey in spirit, as well as in word, and to care for Denis Ryan after she had given her promise to marry him. It is the genuine struggle of duty against inclination, of good principle against a deep passion, that gives the interest to the story of Nelly Dillon. The sympathy of the reader is awakened for all the people of the book; they are seen under their own peculiar point of view, and their temptations and actions are given just as they seemed to the personages themselves. There is a want of force in the tale, but never a want of truth. Peter Fogarty, the man whom Nelly loves, is the type of a promising young man gone to the bad for want of principle. His errors are peculiarly Irish—dislike to steady employment, inability to understand that he must pay his rent, indignation at being evicted in consequence, hatred to the agent, rage at losing Nelly, joining a Ribbon Lodge in desperation, and shooting the agent because the lot fell to him. He goes more and more down hill, threatening Nelly with vengeance upon her father and upon Ryan if she refuses to see him or speak to him, and poor Nelly falls into the snare. Bad as he is, she loves him; and the reader understands it. She is not weak, but she cannot defy him. His conduct becomes too bad even for Tipperary; he gets mixed up in a second murder, and a reward is offered for his capture. He waylays Nelly, and in a sudden impulse of jealousy and desperation carries her off to a mountain hiding-place. She escapes, but is found, lying to all appearance dead, by a farmer, who lives at a distance across the mountains, and he takes her home to his wife and his mother. Believing she has gone willingly, and disgraced them, her parents and brothers are bitter against Nelly; her father declares she shall never enter his door again alive. When Nelly recovers from her illness, she is sent home by her benefactors; but her father drives her from the door, her mother joins in shutting her out, and she is left in the cold and rain of a winter's night, not allowed to say a word in her own defence. A kind neighbour shelters her, but all believe her guilty, and not one person says a word to soften her disgrace and misery. At last the friend who has given her a home appeals to Peter Fogarty, who lies in gaol at Clonmel, condemned to be hanged. He makes a confession to the priest, and Nelly's good name is cleared, from the altar, on the very next Sunday after mass. There is then a tumultuous reaction in her favour, but Nelly refuses to be reconciled; she is dying of a proud, broken heart. It is a most painful scene. She dies in a delirium, with words of bitter reproach for her relatives, and wild regret for the love of the man whom she had cast off to please them.

A Naturalist's Ramble to the Orcades. By A. W. Crichton, B.A. (Van Voorst.)

WITH every wish to encourage one who is evidently a young traveller and a young author, we are compelled to say that there is not a great deal that is strikingly interesting in this little volume. The incidents are such as might occur to any one who took a similar journey with a similar object; the most trifling circumstances are recorded as if of importance, and in a style too pretentious and verbose, and at times not a little obscure. For instance, he has just missed a seal at which he had fired—"With a terrible consternation of

the element as it took its leave of the upper air, and a few moments of private remorse, all things resumed their usual serenity." Again—he is approaching Hoy Head (which, by the way, he calls, the rendezvous, although he does not expect to meet any one there)—"My skipper Dunn takes the helm; and on this squally and dangerous channel I gladly leave to his experienced hand the entire disposition and working of the boat. Seated well forward, I rest at my ease; my gun loaded with cartridge and shot, as the case may be, and ready to take instant advantage of any opportunity that the sea or the rocks may offer. Surely the language of the poet Gray must have been intended as a vaticination of this occasion—

Fair laughs the morn, and soft the zephyr blows,
While proudly riding o'er the azure realm,
In gallant trim the gilded vessel goes;
Youth at the prow, and Pleasure at the helm."

That Gray should, a century ago, have been favoured with a prophetic vision of our author as the poetical impersonation of Youth, and his skipper Joseph as that of Pleasure, is sufficiently amusing. We have selected these examples at random, to show that our criticism is not uncalled for. We gladly add, that there are some good stories and anecdotes interspersed; that the author has numerous apt quotations from the modern English and ancient Latin authors; and that any naturalist who wishes to obtain specimens for his ornithological collection from the same localities, and at the same time to enjoy a pleasant ramble amidst scenes not so often visited by Southerners as they deserve, this little work will prove a useful and, excepting the defects we have alluded to, an agreeable guide. The following incident is in itself sufficiently exciting to deserve quotation, although the style will, we think, further justify some of our former observations. The scene is "the ever-dreaded Black Craig":—"A few years ago, an ill-fated vessel, the *Star*, of Dundee, after being tossed uncontrollably by the raging sea, was hopelessly driven upon a dreadful-looking block of dark rock at the foot of the Craig. Of course, she quickly went to pieces, and the unfortunate crew perished. One young man, however, named Henry Johnstone, after struggling ineffectually with the waves, was washed into a hole in the Craig, which in the lapse of centuries has evidently been hollowed out by the action of the sea. The bottom part, or floor as it were, of this hollow slopes upwards into the interior of the rock, though its mouth or aperture is completely closed at high tide by every succeeding wave. In this situation he actually existed four days and nights, his sensations for four hours out of the six, when he expected every moment to suffocate, being simply indescribable. As a curious and providential circumstance, there floated to him from the wreck a barrel of herrings, a feather mattress and a small tin mug. By the first he obtained his sustenance. The mattress he cut open and stuffed the feathers into his boots for warmth, and with the mug he caught the water as it dripped from the roof of his cell. Driven to desperation he at last attempted and actually scaled the Craig at a point which it makes the blood run cold to survey. When he appeared in the town, where he was well known, upon a Sunday morning, and sparsely clothed, the inhabitants fled before him, supposing him a spectre from the dead. Thanksgivings were offered up in all the churches for his safe deliverance, and all testified by their universal sympathy their astonishment at his marvellous escape."

We shall be glad to meet Mr. Crichton on a future occasion, with the little defects, which

we have, in no unkindly spirit, alluded to, corrected; for there is much of lively style and excellent feeling in this little book.

Legendary Fictions of the Irish Celts. Collected and narrated by Patrick Kennedy. (Macmillan & Co.)

Among the attractions of Dublin to a certain small class of its visitors are undoubtedly its old-book shops. They are, perhaps, little more than covered stalls, but they often contain peculiar treasures of their own, which are fruitlessly sought for elsewhere. There was a time in the last century when Dublin was the great locality of literary piracy and violation of copyright. A book of any general interest could not be published in London without a pirated edition of it speedily appearing in Dublin. This circumstance was sometimes turned to profit again in London by publishers of books prohibited by law, which books bore on their title-page the words "published in Dublin"; and those words saved the knavish bibliopoli in London from pains and penalties to which he would have been otherwise subject. It is not, of course, for such works as these that the curious in rare literary treasures make progresses through the dusty but well-encumbered old-book shops of Dublin. There are many works published in London in the last century of which copies can no longer be found in our booksellers' stores. Time, private libraries, and American bibliophiles have cleared the market. It is otherwise in Dublin. Pirated editions of the works to which we allude are to be easily found among the vendors of second-hand books; and the title-pages serve to illustrate something of the literary history of the period. For example, 'Bubb Doddington's Diary' is not a common book on London stalls, but the Dublin edition meets you in old nooks and alleys at every turn. It was scarcely out in London when fourteen Dublin publishers, old Exshaw at the head of them, combined to produce the book in Ireland. Their names on the title-page indicate a liveliness of publishing that no longer exists; and the number of copies of this and similar works of the time, which American purchasers have not yet swept out of the market, are as the waifs and strays of the sea, which symbolize the rich argosies of which they once made a part.

Then, in most cases, the seller of old books in Dublin is as great a curiosity as the most curious of his wares. The hunters after such wares may, perhaps, remember a humble, modest dealer, not a hundred miles from Anglesea Street, of a pleasant, grave humour, a scholar as well as a tradesman, not catching an air of being learned from handling that in which he deals, but wearing the air by right of his knowledge. When he takes your small coin for a well-thumbed copy of the *Odes of Horace*, he is well aware what a sum of beauty, thought, and expression you have purchased for the coin in question; and he could probably quote as many passages from it as his purchaser could. He reads Montaigne and Boccaccio in the terse French of the first and the lazy, luxurious Italian of the second. He is the epitome of his own stores, carrying the essence of them comprehensively within himself, and ready to impart the flavour of it to all who have taste for learning or love for books. It would be a mistake to class such a man with the mere book-worms. Much as his life may have been spent in the narrow shop which holds his stock-in-trade, and many as the hours must have been which he has devoted to study, he has been abroad in the fields, gathering double armfuls of the flowers of tradition. He has been among

peasants, fishermen, the spinners in the sun, and the simple country-folk generally, and collected from their lips all the old legends that these, the last of the legend-tellers (so fast are they disappearing), have to narrate of stories which of yore have moved listeners to tears, laughter, awe, reverence, depression, or excitement, ever since there were tongues to tell and ears to listen, in the length and breadth of Ireland. To these tales our listener has given heed, as knowing whence they originally came and how wonderfully they have been varied in their passage through different countries, as well as through the memories and imaginations of the narrators of different periods. Some of those the most intensely Irish in character and expression are traced to Scandinavia; others to the fountain-head of nearly all our old romance, the bright and far-off East. The collector of these stories could not place upon the bookshelves of his well-stored shop the impalpable legends he carried in his memory. It were a pity, he thought, that they should be lost. There was something for philosophy to deal with in them, despite their wild extravagance, their rattling fun, their majestic nonsense, and their humorous purposelessness. To preserve them, once for all, for posterity there was nothing less for the old bookseller to do than to turn author. That he who sold other men's books should ever write one of his own seemed an incongruity; and, when written, that it should ever be published seemed an impossibility; but the modest author took courage, addressed himself to Mr. Le Fanu, the well-known novelist, and that gentleman, taking the applicant by the hand, has added to our literature the name of Patrick Kennedy, the learned son of a line of "yellow" Wexford farmers.

In five distinct parts, Mr. Kennedy narrates above a hundred legends, divided into Household Stories, Legends of the Fairies, Tales of Witchcraft and Fetches, Romances of the Ossianic period, and Narratives illustrative of the Lives of the Celtic Saints. We all know how the pleasant tale of *Amphitryon* was born on the Ganges, and that *Rhodope*, the lady of the Pyramid, tried on the Glass Slipper long before *Cinderella* was heard of; but Mr. Kennedy traces nearly all the supernatural stories of Ireland (and, for the matter of that, elsewhere) to an Eastern source. The Celt, the Teuton, and the Slave got them from fertile Asia; and a story first told to eager listeners on the shores of the Caspian, Mr. Kennedy relates as he heard it, everything changed but the leading incidents, "from Garrett Forestal, of Bantry, in Wexford." It is the same with the "Good People," or fairies, who only act the parts once played by *Aphrodite*, *Artemis*, and the like brilliant sisterhood. In the valley of the *Duffrey* lurk *Duine Sighe*, who can as easily carry off a young lad, in story, as ever the Nymphs did with *Narcissus*. In the illustrations of sorcery, which are derived from ancient times, the Christian element was gradually introduced into the legends that travelled westwards; but, as Mr. Kennedy remarks, the *Virgin Mary*, introduced two or three times into Norse collections, is not mentioned in the *Witch and Fetch* stories of one part, at least, of Ireland. He "cannot recollect a single instance of such a liberty being taken in our Leinster recitals." The greater part of the Ossianic legends are, probably, Irish, and were sung by the bards or told by the story-tellers to a large audience, from the head-king to the horse-boy; but there are traces of the old Eastern origin in many of them. The King of Cork, who is living so comfortably with all his household at the bottom of the Lough, had many a prototype in the potentates led by love or curiosity or ill-luck

to dwell in the coral palaces beneath the waves. Much of the merely legendary lore concerning the Saints Mr. Kennedy flings overboard as contraband,—being re-issues of old pagan tales, with the stamp of the Christian mint, substituting this or that saint as the hero, instead of the original demi-god or fairy-king. We hardly know, however, whether Mr. Kennedy is joking or not when he tells us that the anti-archæologists of the sixteenth century converted the rich shrines of St. Patrick, St. Bridget, and St. Columb Cillé into ordinary coin of the realm for their own profit. "The silver case," says Mr. Kennedy, "in which the right hand of St. Patrick was kept somehow escaped their sharp eyes. It is known to be in very safe keeping at this moment, but we are not at liberty to publish all we know on the subject." The staff that was once grasped by that hand was certainly dealt with in a way that is sufficient to excite the gravest censure of the Society of Anti-quaries. That famous *Bacal Iona* was said to have descended to Patrick from the Saviour, who confided it to guardians who were to enjoy eternal youth till they made it over to him. A staff of St. Patrick was buried with him at Armagh, but it was subsequently transferred to Christ Church Cathedral, Dublin. In the sixteenth century, the "Dublin authorities . . . broke and burned the *Bacal Iona* on the High Street, to testify their zeal against image-worship."

Among a hundred and odd stories there is an *embarras de choix*; but we may select the following, as having a Christmas-pantomime sort of exaggerated fun about it:—

"The great Irish *joiant*, Fann Mac Cuil, lived to be a middle-aged man, without ever meeting his match, and so he was as proud as a peacock. He had a great fort in the Bog of Allen, and there himself and his warriors would be playing soord and pot-lid, or shootin' bow-arraas, or pitchin' big stones twenty or thirty miles off, to make a quay for the harbour of Dublin. One day he was quite down in the mouth, for his men were scattered here and there, and he had no one to wrestle or hurl, or go hunt along with him. So he was walking about very lonesome, when he sees a foot-messenger he had, coming hot-foot across the bog. 'What's in the win' (wind)!' says he.—'It's the great Scotch giant, *Far Rua*, that's in it,' says the other. 'He's coming over the big stepping stones that lead from Ireland to Scotland, and you will have him here in less than no time. He heard of the great Fann Mac Cuil, and he wants to see which is the best man.'—'Oh, ho!' says Fann, 'I heard that the *Far Rua* is three foot taller nor me, and I'm three foot taller nor the tallest man in Ireland. I must speak to Grainne about it.' Well, it wasn't long till the terrible Scotch fellow was getting along the stony road that led across the bog, with a sword as big as three scythe blades, and a spear the *lenth* of the house. 'Is the great Irish giant at home?' says he.—'He is not,' says Fann's messenger: 'he is huntin' stags at Killylarny; but the vanithee is within, and will be glad to see you. Follow me, if you please.' In the hall they see a long *deal* (fir) tree, with an iron head on it, and a round block of wood, with an iron rim, as big as four cart wheels.—'Them is the shield and spear of Fann,' says the messenger.—'Ubbabow!' says the giant to himself.—'You're welcome, *Far Rua*,' says Grainne, as mild as the moon. 'Sit down, and take such fare as God sends.' So she put before him a great big griddle cake, with the griddle itself inside, that had a round piece cut out at one part of the rim; and for a beefsteak, she gave him a piece of a red deal plank, with a *skrimshin* of hard meat outside. The first bite the giant give at the cake, he broke three of his teeth; and when he tried the beef the other ones stuck so fast in the deal, he could not draw them out. 'By me soord, ma'am,' says he, 'this is hard diet you give your company.'—'Oh, Lord love you!' says she, 'the *deal* here think no thing of it. Let us see . . . would object.'

So she takes the cake over where Fann was lying in the cradle, and offers him the part where the piece was taken out of the griddle. Well, he bit off the bread with the greatest ease, chewed it, and swallowed it, and smacked his lips after it, and then he winked one eye at *Far Rua*.—'Be the laws!' says the Scotchman to himself, 'these is wonderful people.'"

The Scot had many more reasons for considering Fann Mac Cuil's household a wonderful people,—for which we refer the reader to the text. The following is an interesting contribution to Archaeology on the subject of the ancient militia whose name has been usurped by the Fenians:—

"As to the derivation of the word we are not so much embarrassed by the poverty as the abundance of the materials. *Fine* means tribe, family, kindred, nation, soldier, vineyard; *Finne*, whiteness, fairness; *Fion*, wine, truth, ancient; *Fionn*, a head, chief, troops, sincere, true, fine, fair, pleasant. The term *Fianna*, giants or soldiers, was applied to the warriors of Albanach (Scotland) and Britain, as well as to those of Ireland. This standing army, if the bardic chronicles are reliable, consisted of men of good birth, and what would in later times be called knightly rank. They were not distinguished by any name of the same signification as *Knight*, which in its parent language, the Teutonic, simply meant *Valet*. They were *Laochs*, heroes (the German *Helden*), and when associated to a military order they were *Curai*, companions. A postulant for admission among the Fians should be a free man in every respect, and so expert that, merely armed with a stick and shield, he could defend his otherwise unguarded body from half-a-dozen men darting spears at him from a distance of nine ridges. If he escaped unwounded, he was required to run through a tangled wood with his long hair hanging loose, and get out at the other side, uncaught by the same or another half-dozen warriors. If an ill-conditioned bough as low as his knee crossed his path, he should run under it; if it were no higher than his shoulder, he should bound over it. Having passed this bodily ordeal he was obliged to swear fealty to the *Ard Righ* (head king), to promise on his word as *Curadh* to be charitable to the poor and to respect women. His near relations were also engaged never to seek *eric* (blood-fine) for his death, but to leave that care and the defence of his honour to his brothers-in-arms. During the winter half-year, the Fians were entertained at the expense of the kings and chiefs. In the other they spent most of their time fishing and hunting, when not watching for invaders. They took their principal meal in the evening, and this was the programme of mealtime and bedtime:—Through the forest, and on the plains, and on the hill-sides, were small circular cavities, paved with stones, and surrounded with low stone walls. A party of hunters arriving here in the afternoon made a strong fire of brushwood in this pit, and disposed therein several loose stones, of which there was a large provision lying about. The fire having burned down, and the embers being cleared away, a layer of venison or wild boar's flesh, as it might be, wrapped in grass or rushes, was laid on the hot bottom, and a layer of the red-hot stones on this. Then succeeded another layer of meat similarly garnished, and crowned by hot stones. No. 2, the process being again repeated if necessary. Near these 'Ovens of the Feine,' as they are still called by the peasantry, was a bathing tank supplied by some neighbouring stream, and here, while the dinner was cooking, the warlike hunters bathed. A large bothy, built of sods, stones, scraws, and branches, served for dining-hall, and thither the savoury joints were conveyed, and consumed by the men just risen from their refreshing bath. The beds of the Fians were composed of withered grass and heath, with the flowered tops uppermost. The coverlets were the cloaks of the sleepers, or stag and wolf skins. Remains of these primitive ovens are still extant, the soil about them being distinguished by its dark colour. They are also met with in the Scottish Highlands. The institution was not long-lived. No records are left of it of longer extent than

three generations. Portions of the troops were always in the neighbourhood of harbours; and if the approaching foe was strong in men and barques, signals sped from hill to hill until a sufficient band of defenders was collected."

As an author combining archæological learning with a sly, grave humour, we commend Mr. Kennedy to the public, reminding the latter that (to the scholar and historian) the real value of the book lies in its archæology. In the latter department the author has rendered service; and if he has written his first book late in life, it is one that will keep his name young as an admirable Irish story-teller.

Memorials of the Early Lives and Doings of Great Lawyers. By C. L. Brightwell. (Nelson & Sons.)

TAKING most of her materials from Campbell's 'Chancellors' and 'Justices,' and by a frank acknowledgment of the sources of her information treating the Chancellor with fairness which he failed to exhibit towards Townsend, Roscoe, Welby, and the other legal biographers whose work he appropriated with scarcely so much as a hint of his obligations to them, Miss Brightwell has put together, for the benefit of schoolboys, a series of memoirs of the following thirteen Judges—Sir Thomas More, Sir Edward Coke, Sir Matthew Hale, Lord Keeper Guilford, Chief Justice Holt, Lord Mansfield, Sir J. Eardley Wilmot, Sir William Blackstone, Lord Erskine, Lord Ellenborough, Lord Eldon, Sir Samuel Romilly, and Lord Tenterden. Although the biographer of Mrs. Opie has not produced a volume that can claim a place by the side of Townsend's 'Twelve Judges,'—to which capital work, by the way, she is unconsciously indebted for two-thirds of her facts,—her book about these thirteen magnates of the law fully sustains the description which she gives of it in that passage of her Preface wherein she says, "This work, designed as a school-prize book, will, it is hoped, stir the mind of many a youth to emulate the worthy example and tread in the footsteps of the eminent men who have from age to age filled the highest places in our Courts of Judicature, and who are among the greatest benefactors and brightest ornaments of our nation." Constantly bearing in mind the requirements of the young, Miss Brightwell is at pains to give prominence to the industry and perseverance to which our eminent lawyers have been largely indebted for their professional success; and she misses no occasion to inculcate the wholesome doctrine that greatness cannot be achieved without strenuous exertion and heroic perseverance. When Peter King—the Lord Chancellor who in boyhood had worn the apron and sleeves of a shop-lad, and had stood behind the counter of his father's grocery shop in Exeter—was required to select a motto for the device assigned to him by the Herald's College, he chose the words, "Labor ipse voluptas." In like manner, the single word "Labore" was the motto adopted by Lord Tenterden after he had raised himself by labour from a barber's shop to the Chiefship of the King's Bench and a seat in the House of Lords. By showing the significance of such facts as these, Miss Brightwell is likely to prove no less useful than entertaining to young minds. But though we can speak with approval of the aim and general scope of her volume, it contains some inaccuracies, which should be removed before the appearance of a second edition. For instance, she has adopted from Harford's 'Recollections of Wilberforce' a very lame and erroneous version of an excellent story, thus:—

"I will add, as I think it may amuse the reader, a pleasing anecdote of Chief Justice Holt, related

in Mr. Harford's 'Recollections of Wilberforce.' Many persons, even of superior education, contract the habit of interlarding their conversation with one or two peculiar phrases without being aware of it. An example of this was this celebrated lawyer, whose perpetually recurring expression was, 'Lookie, d'ye see!' An admirer of the Chief Justice one day said to his nephew, 'Your uncle is a great man, but what a pity it is he can't talk any time together without bringing in "Lookie, d'ye see!"'—'I'll break him of it,' said the nephew; and the mode he adopted was the following:—Holt had often found fault with the youth for not giving his mind to legal studies. One day the young fellow surprised him not a little by saying, 'Well, uncle, I have thought much of your advice, and have been acting upon it so intently as to have versified parts of "Coke upon Lyttelton." Shall I give you a specimen?' Holt nodded assent, and he proceeded thus:—

He that is tenant in fee
Need neither quake nor quiver,
For he hath it, 'Lookie, d'ye see?'
To him and his heirs for ever.

'Ah, you rogue,' said the old Judge, 'I understand you.'

The real Judge of the laughable occurrence thus misreported was old Sir Lyttelton Powys; the wit was Philip Yorke, afterwards Lord Hardwicke, who was in no degree related either to Chief Justice Holt or the Judge actually ridiculed; and far from exclaiming, "Ah, you rogue, I understand you," Sir Lyttelton was so totally blind to the point of Yorke's *jeu d'esprit*,—which, by the way, was uttered at a Judges' dinner on the Western Circuit,—that on encountering the barrister a few days later in Westminster Hall, he inquired, "And pray, Mr. Yorke, how is your poetical translation of 'Coke upon Littleton' getting on?" An occasional slip of this kind, however, is of but small importance in a book which makes no pretensions to historical accuracy.

The History of France. By Eyre Evans Crowe.
Vol. IV. (Longmans & Co.)

IN this volume the author has the advantage and the disadvantage of proceeding over some of the best-trodden ground in the modern history of France—the *advantage*, because his task is easy, his sources of information are abundant, and his subjects intrinsically attractive,—the *disadvantage*, inasmuch as only a master's hand can repaint or give animation to a familiar scene, and genius alone can re-invest with high interest a thrice-told tale. Moreover, the writer of an entire history, and not of a mere monograph, cannot be disproportionate and discursive; the limitations are already drawn out, and his end is already in view. Having read a considerable portion of the volume before us, we cannot say that Mr. Crowe, as an historian, is for France what Macaulay is for England, or Motley for the Netherlands, or that he is, indeed, in any way a consummate historian. We may, perhaps, more confidently affirm that he is a faithful chronicler; that his moral instincts appear to guide him aright, and that occasionally a fair critical faculty is seen to be in operation.

In this fourth of his five volumes Mr. Crowe, at the beginning, draws up the curtain, and shows us the court and the career of Louis the Fourteenth. There is nothing new, striking, or stirring in his calm and correct narrative of well-known events.

In relation to the Regency and the period from 1721 to 1726, the narrative pursues the even tenor of its way, nor does this even tenor fail throughout Cardinal Fleury's administration to the Peace of Aix-la-Chapelle. Occasionally, however, in this historical register we are treated to some sound as well

as serious inferences,—as, for instance, that "the weak point of Louis the Fourteenth's age was its philosophy. Controversy was a crime; and though Louis the Fourteenth employed an atheist in preference to a Jansenist, a work of Spinoza would scarcely have met with his indulgence. Bishops and court-preachers were very eloquent; subduing, touching, pathetic. But it was the froth of religious zeal, not the learning or solidity of conviction. Louis and his court thought it perfection, and with the sublimity of Bossuet, and the inquisitorial tyranny of a Le Tellier, the King imagined he had for ever founded the faith. He sacrificed a million of Huguenots to this idea, with thousands of Jansenists,—both of them the most devout Christians of his empire, while a different kind of religion was thundering at the door of his monarchy."

In Mr. Crowe's pages there is nothing of the terse, epigrammatic, salient style of M. Michelet, whose volume on the history of part of the period we are now referring to was noticed recently by us (*Athen.* No. 2024). We shall entirely pass over Mr. Crowe's review of the reign of Louis the Fifteenth, first because we have so lately noticed the book of M. Michelet, and secondly because it really calls for no particular remark, except that the Englishman shows how plain and sensible a chronicle may be formed out of a reign which to the Frenchman affords the platform for a lively and dramatic exhibition, clouded here and there with the dark and the horrible.

As we read page after page we find no life till we come to the Constituent Assembly, 1789-1791, the establishment and conduct of which is described with some animation as well as clearness.

Along the whole of this well-worn line Mr. Crowe makes his easy way, giving a fair impression of the course of events and the character and motives of men. No writer could lose his path in such a highway of history, and none, perhaps, can effect much more in a mere general sketch than relate clearly and concisely, and apportion justly. Still, as we close this volume, which itself closes with the Convention, in October, 1795, we cannot but feel that it demands a much more graphic style than that of Mr. Crowe to render an historical volume of nearly 700 pages pleasant and beguiling.

The Sixth Centenary Festivals of Dante Alighieri in Florence and at Ravenna. By a Representative. (Williams & Norgate.)

WHEN, on the 17th of May of last year, at the banquet given by the Florentines to the strangers who had come from various parts of Europe to celebrate with them the Festival of Dante, the Count Mamiani, who presided, supported on his right by the German Dantophilist, Vogel von Vogelstein, and on his left by the English Dantophilist, Dr. Barlow, rose to return thanks for the friendly sentiments expressed by the visitors, he declared that his delight was only equalled by his surprise to hear from the lips of the Germans the wish on their part that Italy might be free from the Alps to the Adriatic. The eloquent Count thanked the German nation for their generous sentiments, and assured them that nothing was so much desired and looked forward to by the peoples of the Peninsula as to be able to grasp with affection the hand of the descendants of Arminius. "The Italians," he exclaimed, "only ask this—that the Germans, who are accustomed to acknowledge and adore God in all things, would adore Him also in the destiny of nations and in the working out of their inde-

pendence." These were remarkable words; but who, of all the guests seated at that sumptuous entertainment, ever dreamt that in little more than one short year the Italians and the Germans would have joined hand in hand and heart and soul to carry out the political purposes of each, and to create a national autonomy in Germany as well as in Italy!

One might now almost imagine that the Count Bismarck had sent to that great gathering in Florence some select few who had been privileged to participate in the secret designs he had formed for achieving a German unity, and thus sought to prompt the Italians to the part he desired they should take. We all know what followed soon after; how eagerly Italy rushed into the arms of her new friend, and how well she served the purpose of both by the sacrifices she made. There would obviously here seem to have been a foreshadowing of the events which were so soon to astonish Europe and to overawe the most wistful spectators.

There can be no doubt, at the same time, that the martial aspirations of the Italian people were excited and exalted by the fervid appeals to their patriotism made by the Padre Giuliani and others, but more especially by the few emphatic words uttered by Victor Emanuel himself at the uncovering of the statue of Dante in the Piazza di Santa Croce. On being complimented by Giuliani on the efforts he had made to accomplish the independence of Italy, the King replied, "I have done what I could, and am ready to do what remains to be done." These memorable words fell like sacred fire on the hearts of the Italians. Giuliani exclaimed, "Majesty, may God bless your sword!" The King rejoined, "I have pledged it in the cause of Italy and justice." This public announcement before the deputations from all parts of Italy might have been construed into a formal declaration of war, and was felt to be so by many who heard it. Germany, ere long, in union with Italy, followed the example which the latter had set her, though not in the same manner.

Mamiani had remarked in his speech at the banquet, that "it was once affirmed and believed, and all history seemed to demonstrate it, that the unification of peoples was effected only by the force of conquest and by the confiscations of property, and never in any other manner. Spain, England, France and Russia by these means became united into great nations; and never was there any instance in which even a single province spontaneously and cheerfully gave up its own self-government to mould itself into the national stamp." But in Italy this had not been so; here provinces and principalities joyfully renounced their independent existence to become amalgamated into a great kingdom; and the Count might well feel an emotion of pride in affirming "that Italy has been the first to give to the civilized world this new and most salutary example." Subsequent events have shown that Germany must be added to the list of countries which have achieved their greatness very much in the old-fashioned way.

The festival of Dante will ever be memorable in European history for the spirit in which it was held and for the important results that followed it. The work we are about to notice gives a very full and detailed account of the history of this festival; its origin, progress and consummation at Florence in the May of last year. It also contains a notice of the supplementary festival celebrated at Ravenna in consequence of the discovery of Dante's bones. The speeches delivered on these occasions are fully reported, and worked up with the scenes described. Particulars and persons and places and facts are recorded evidently with a loving desire

to do full justice to the interesting subject. Critical notices are given of the *Mostra Dantesca*, especially of the manuscripts and editions of the *Divina Commedia*, and the documents illustrative of the poet's history. There is a detailed account of Dante's reputed house, and a dissertation to prove that it does not deserve that name. Mixed up with these matters are many historical reflections; and the whole is seasoned with Dante erudition alone sufficient to show who the author is, though, from a motive of delicacy, he has thought fit to conceal his name. If the pen of the writer has occasionally run a little wild, the exciting circumstances of the occasion must be taken in excuse. Here is a sketch of Florence shortly before the festival:

"As the time for the Festival drew near, steamers and railways ran extra courses; excitement increased; preparations proceeded fast and furious; paper and printing rose to a premium; up, also, went all sorts of accommodation in Florence; the charges at hotels reached to a figure never before attained, and the terms of private lodgings mounted up in proportion. The arterial system was thrown into violent action, and the circulation much accelerated; nervous persons had their fears lest some catastrophe might follow, or a serious consequence happen. But Florence surmounted all her symptoms. There was a general disposition shown to make the very best of things, and turn the occasion to one of profit. Programmes of the festivities were published at all prices, from five centimes to a hundred. People who had anything to sell were proud to avail themselves of the Poet's patronage; placards bearing his name were seen stuck up everywhere; his medals and portraits filled the shop-windows, and his sacred head was made to recommend barrow-loads of brooches, pins, and buttons. Whatever was said, or sold, or done, had a reference to Dante. The knights of the whip, who rarely regard any other order than their own, drove a flourishing trade; for them the golden age had surely come again; nor were their friends and accomplices, the *fachini*, behind them in practice. The felicitous occasion afforded for fleecing *forestieri* will never be forgotten. And now fair Florence was filling fast, as the month sacred to Apollo and the Muses daily saw the god rising higher and higher in his luminous car. The Leghorn railway alone brought in upwards of 8,000 visitors on the 12th and 13th; by the 14th nearly a hundred thousand were calculated to have arrived, and the names of the more important were published in a daily supplement to the *Messagere dell' Arno*. Never did the evening promenade on the palatial border of the beautiful river, the *Lungo l'Arno*, present a more brilliant and animated scene; never were the walks and drives of the Cascine more crowded with pedestrians and elegant carriages. Other demonstrations were going on elsewhere. A chorus of carpenters' hammers rang out their exhilarating notes through all the streets, and squares, and public places of the city. Illustrious men of old were rising up in effigy in all the *cari luochi* to salute the coming day of Dante Allighieri, and where these did not answer to their names, inscriptions in their honour spoke their praises instead. Every historical house told its own tale, and in its own way; that of the Poet showed good intentions come rather too late, a demolished front hinted at future decorations, but there were none more substantial at present than flowers and festoons. But what is a house to him whose home is in the hearts of all his countrymen! He needs no temple made with hands to perpetuate his name, who, after six hundred years, is enshrined in every loyal living temple throughout the regenerated land. Men, however, are not immortals individually, and every generation, as it passes away, desires to leave to its successors some record of itself."

The work is well printed, and dedicated to all Dantophilists scattered throughout the world. We know of none other in which the whole subject is so fully treated of.

RECENT POETRY.

Earnest, and The Pilgrim Poet, &c. By A. Gordon Middleton. (Edinburgh, Nimmo; London, Simpkin, Marshall & Co.)

WHEN imagination really exists, it generally includes in itself the law of its own development. The development may be crude, but it will not contain anything at variance with the instincts of beauty and congruity. Mr. Middleton's volume is an exception to the rule; for while it roughly displays some amount of poetic power, it is singularly wanting in grace, music, and coherency. 'Earnest' is a theological poem, its object being to advocate the doctrine known in the religious world as "Universalism." Into the merits of the argument we cannot, of course, enter here. Our remarks must be confined to the writer's style, which has considerable intensity, and, at intervals, beauty of expression, but which often runs into the ludicrous, from ignorance, so to speak, of poetic perspective. 'The Pilgrim Poet,' which follows, is considerably longer than 'Earnest,' and oddly associates religious allegory with modern travel—the facts of geography with the yearnings of the soul. A curious instance of the writer's abrupt transition from things of sense to those of spirit will be found in the following:—

In day's golden stream, the cockatoo's scream
Resounds through the wooded glade.
The bright parrot, and the crow, black jet,
For covert, wing far to the shade.
Flocks of birds from lakes and reed-fringed brakes
Spring aloft, while piping full shrill.
The eagle-hawk slow floats o'er the swampy moats,
Where the water-hen nestles still.
Kangaroos, upright, gaze, as with affright,
To see a wanderer there.
The foresters all hear the alarm call,
And hie them to nest or lair.
The brilliant stars shone, each from its high zone,
And the fair moon streamed full bright.
To his heart all spoke, as if they would rock
His spirit to slumber light.
Each star its tale told, as it did unfold
Its eye from the ether's clear blue,
Of the land of light thus opening to sight,
Its marvels aye grand and new.
Fain would his soul sing, and fain his spirit wing
To the fair sky mansions above.
While dews of the night on him did alight,
His meek heart drank dews of love.
"Oh heart!" the winds said, "your body is shade,
But your soul is strong within.
Love springing from faith, the Word of God saith,
As a robe covereth sin."

Mr. Middleton can write better lines than those we have quoted; but his best passages, if they run to any length, betray a sad want of tunefulness, of congruity—in a word, of Art.

Kenilworth, and other Poems. By J. F. A. Collins. (Murray & Co.)

THERE can be no doubt that, as a rule, people do make greater similetons of themselves in verse than in prose. The fact is undeniable, and we assert it advisedly, not ignoring those wonderful effusions called love-letters which most persons of the "male persuasion" have at some time or other perpetrated. In spite of which we maintain that we do not get ignorance and foolishness so palpably in the lump when they are put into prose, as when we have them congested in verse. No one could possibly say in conversation, or write in a letter, the nonsense that many will sing in rhyme. Only in rhyme do we find the Absolute of witlessness, or taste the full flavour of concentrated stupidity. How is it that we continually meet with things in books of verse that make us look up and wonder if some asylum or other has not a patient missing? It is a great mystery. If we were to venture on a theory, we should suggest that whereas a man may write prose in such a state of mind that, as we say, his reason has left him, it is only in verse that men wilfully and deliberately

take leave of their reason. Surely such folly as we have to encounter now and then must be a result of the belief which possesses some people, who think that poetry is something apart from reality and human life and common sense. And so, being adrift, through mental helplessness, from all reality, knowing little or nothing of life, and having prepensely left their common sense behind, they turn to rhyming and get the very farthest from fact, and produce such vagaries of foolish fancy as the brain could scarcely equal in its wildest dreams of sleep or fever. It is not worth the space for us to act on the old Spartan principle and exhibit one of the worst offenders in this way, with the view of deterring others. With this remark, we throw 'Kenilworth' aside.

Amongst gift-books of verse for the season we can notice with approval *The Child's Garland of Little Poems*, by Matthias Barr, with Illustrative Borders by G. Giacomelli (Cassell, Petter & Galpin). If Mr. Barr's lays do not show much fancy—a quality which children quite appreciate—they, nevertheless, often present country scenes and occupations faithfully and tunefully. They are such as can easily be caught and remembered, and their tone is unexceptionable. Moreover, every page is enriched with a pictorial border charmingly illustrative of the text. Signor Giacomelli, indeed, may be congratulated upon the fertility of idea and the grace of treatment which he has shown. Here a country-house gleams through the trees, with the chequered light on its old front; here a book brawls among the stones; here the water-lily floats by the reedy bank. Bright little faces peer at us out of vine-trellised windows, and hardy boys trudge through the winter woods towards the shining panes of snow-roofed cottages. Now we are on the house-tops with the swallows; anon we nestle amidst the tall gold squadrons of wheat, with their banner-bearers, the poppies. Farm life, with all its cheery stir, lies open to us, or we may, if we like, whirl along to fairyland in a magic coach, with link-bearing elves for postillions and footmen. Many of the artist's designs, of course, flow necessarily from the poems which they illustrate; but we enumerate his subjects because he has brought them home to us by a manner as spirited as it is graceful. The book is altogether a delightful one for little ladies and gentlemen whose age can be told by a single numeral.

Idyllic Pictures (issued also by Messrs. Cassell, Petter & Galpin) consist, for the most part, of short poems, which describe a scene or an incident, and of appropriate illustrations. The latter, it seems, have already appeared in the pages of the *Quiver*, and their qualities will be sufficiently indicated by the names of the artists—Miss Ellen Edwards, Messrs. Barnes, Paul Gray, Houghton, R. P. Leitch, Pinwell, Sandys, Small, and G. Thomas. There is a good deal of character and dramatic force in some of the sketches; while the tastes of those who prefer landscape or representations of feminine beauty in repose have also been consulted. We may notice here with much regret that, amongst these illustrations, the merits of one young and promising artist (Paul Gray) are here displayed for the last time. Many in turning over the book will be arrested by the grief—touching, gentle, and free from conventionalism—of his mourner in the churchyard, and will find a sad interest in connecting the subject of the picture with the fate of the artist, who recently died in his twenty-fourth year. The poems which accompany the pictures are creditable, on the whole; some may claim even higher praise.

OUR LIBRARY TABLE.

The End of all Things; or, the Coming and Kingdom of Christ. Third and last Series. (Nisbet & Co.) At the close of a lengthened and careful examination of the question of the Millennium in every branch of the subject, Mr. Grant's conclusion is that the affirmatory opinion "has no scriptural foundation on which to rest." The scriptural passages on which such opinions are based are held by him to be interpreted fancifully, and contrary to all natural sense. In this writer's view the theory of the personal reign of Christ on earth is essentially Jewish, referring to a temporal Messiah, though a spiritual element enters into the Christian theory. Having determined that the doctrine of the millennium has no base whereon to set its foot, the author tells us that the doctrine is rapidly spreading, and that clergymen convinced of its baselessness are discontinuing to preach in its support. In one page he describes it as a fortress that must be attacked by the artillery of orthodoxy; in another, it is presented to us as a mass of ruins. Finally, Mr. Grant informs us that "the Word of God is so plain on all other points of importance, that he who runs may read." There is a good deal of sense and argument in this earnest little book.

Soups: How to Make them in more than a Hundred different Ways. By Georgiana Hill. (Routledge & Co.)

Miss Hill bids fair to be a public benefactress. There is nothing on which the English cook-mind goes more astray than this subject of soups; and when we compare our heavy and expensive compounds to the light, cheap soups placed on all continental tables, we blush for our country. Why is it necessary to have seven pounds of meat for one tureen of soup, when the Germans never exceed half-a-pound for each person, and eat the meat afterwards? Why are we limited to ox-tail, mock turtle, and gravy, when the Italians make at least twenty different kinds of soup with a little flour? It is all very well for "a regular John Bull, sir," to sneer at foreign soups as hot water, but we might surely emulate the art which achieves so much with so little, while we avoid the stinginess, or are saved from the poverty which restricts the foreigners to so little. Instead of squandering the finest materials in the world, we might make use of them for culinary triumphs. Because a German king would sell his birthright for a mess of real turtle, there is no reason why all our entertainers should be ready to act the part of Jacob. We commend Miss Hill's little manual to all who have large families and small means, to all who would be glad of some variety without being ruined by it, and who do not believe that the British Constitution would perish if there was a momentary departure from the roast beef of old England.

The Knights of the Frozen Sea. A Narrative of Arctic Discovery and Adventure. By the Author of 'Harry Lawton's Adventures.' (Seeley, Jackson & Halliday.)

THE idea of condensing into one volume the various records of Arctic discovery is good, but not new. There have been several compilations of the kind, and it is hardly worth while comparing them for the sake of deciding which is the best. This one is fairly written, though of course many of the characteristic features of Arctic voyages, much adventure, much anecdote, much humour, had to be left out, so as not to exceed the limits of one volume. However, there are forty-four illustrations, some of them funny enough, and all the more funny when the fun is not intentional. The book is written for small boys, and it will suit them.

True to the Core: a Story of the Armada. The T. P. Cooke Prize Drama. By A. R. Slous, Esq. (Tinsley Brothers.)

IN publishing his nautical drama, which we hear has proved a success at the Surrey Theatre, Mr. Slous has probably consulted the convenience of provincial managers. Apart from this consideration it would have been unadvisable to submit the piece to the judgment of the reading public. The dialogue, though it has passages of some force, is, as a whole, conventional to the last degree, resuscitating once more that worn-out phraseology of

the stage which had so well earned its repose. Moreover, in perusal, the extreme improbabilities of the story, and the superhuman virtues of the pilot-hero, are liable to keener scrutiny than the bustle of stage action admits of. In spite of all defects, however (including the serious one of an obscure and confused dénouement), 'True to the Core,' with its situations and tableaux, is not ill-adapted for the special object in view. In dialogue, and even in construction, it is by no means equal to Mr. Slous's 'Templar' or 'Light and Shadow.' But the agencies employed in these dramas were of a more refined kind, and appealed consequently, it seems, to a selecter public. There can be no doubt that the drama before us is by far the most popular work of its author. We hope the conclusion to be drawn from these facts is not that the secret of theatrical success is inferiority in dramatic art.

A Sabbath-Day Journey; or, Earth's Tired Travellers looking Homeward. (Houlston & Wright.) THIS little book contains eight chapters, which are of the nature of serious meditations. The incidents are very few, and awkwardly framed. Good sentiments are inculcated, though they are commonplace, for the author is evidently a feeble thinker. His style would be good, if it were less artificial. As it is, the monotony becomes tedious. The writer possesses good taste, and is imbued with a fine sentimentality tinged with sorrow; but his sentences are too elaborate, and the imagery often far-fetched. A serious and thoughtful reader will like the volume, which does credit to the heart of the author.

Scenes from the Life of St. Paul, and their Religious Lessons. By the Rev. J. S. Howson, D.D. With Illustrations. (Religious Tract Society.)

LIKE the large work on St. Paul by Conybeare and Howson, the present one arose out of drawings. These drawings being twelve in number, the author was asked to write twelve articles, containing reflections on the scenes which the drawings represent. Two purposes are stated by Dr. Howson to have been kept in view: the religious edification of the reader, and a constant reference to that unbelief, or half belief, characteristic of modern thought. Dr. Howson is familiar with the history and writings of St. Paul, having already devoted much time to their explanation. The contents of the volume, which is beautifully printed and well illustrated, are: Saul and Stephen—Jerusalem; the Conversion—Damascus; the Gospel and the Jews—Antioch in Pisidia; the Gospel and Heathenism—Lystra; the Roman Empire—Philippi; Greek Art and Greek Philosophy—Athens; the Companions of St. Paul—Corinth; Work in Great Cities—Ephesus; St. Paul before the Multitude—Jerusalem; St. Paul before Rulers—Cæsarea; the Voyage and Shipwreck—Melita; Toil and Suffering to the End—Rome. In describing these events and incidents, the author dwells on the spiritual lessons rather than the outward scenes, a fact that gives the chapters a sermonizing air. The book may be read with pleasure and advantage by all classes except critics who have studied the Pauline epistles with more insight than the writer, and have, therefore, arrived at conclusions often different from his. The views here are the same as those in the joint-production—views acceptable to the average mind of the English public. Of course, St. Paul's second imprisonment is pre-supposed, though unsupported by testimony; and all is literally accepted in the text of the New Testament by so conservative a divine. If we wanted a guide to the right understanding of St. Paul's epistles we should not go to the author before us, whose objectivity and timidity of mind are patent to all; but such as wish for moral reflections cannot do better than follow his meditations. He writes clearly and sensibly on common themes.

We have on our Table Dr. Smith's *Smaller Bible Dictionary* (Murray),—An Epitome of the Bible: being Compilations from the Old and New Testaments, accompanied by Notes from the most esteemed Writers, Part I., *Genesis to Second of Samuel* (Hatchard),—*The Passion Week*, by the Rev. William Hanna (Edinburgh, Edmonston & Douglas),—*The Eastern Liturgy of the Holy Catho-*

lic, Apostolic and Orthodox Church, simplified and adapted for Use in the West, containing Forms deemed Valid and Orthodox by all Churches for the Worship of God daily throughout the Year, and for the Administration of Public Ordinances including Ordination (Simpkin & Marshall),—*Credibilia; or, Discourses on Questions of Christian Faith*, by the Rev. James Cranbrook (Fullarton),—*The Law and the Prophets*: being the Calendar of Lessons as framed by the Ancient People of God; compiled, with an Appendix on the Calendar of the Christian Church, by A. L. Finch Falton (Binns & Goodwin),—*The Judges of Israel; or, Tales for Sunday Reading*, by the Rev. H. C. Adams, M.A. (Warne),—*The Monthly Paper of Sunday Teaching*, Vol. VI. (Mozley),—*The Imitation of Christ*, in Four Books, by Thomas à Kempis,—*A Treatise on Prayer*, by St. Liguori,—*An Explanation of the Commandments and Sacraments*, by St. Liguori,—*The Spiritual Combat* (Duffy),—*Short Stories to Explain Bible Texts*, by H. M. (Edinburgh, Johnstone & Hunter),—*Fecundity, Fertility, Sterility, and Allied Topics*, by J. Matthews Duncan, A.M., M.D. (Edinburgh, Black),—*The Voyage and Traile of Sir John Maundevile, Kt., which treateth of the Way to Hierusalem, and of Marvayles of Inde, and other Ilands and Countreys*, reprinted from the Edition of A.D. 1725, with an Introduction, Additional Notes, and Glossary, by J. O. Halliwell, Esq. (Ellis),—*The Imperial Gazetteer of England and Wales*; embracing Recent Changes in Counties, Dioceses, Parishes, and Boroughs, &c., and forming a complete Description of the Country, by John Marius Wilson, Vol. III. (Fullarton),—*Postage-Stamp Album and Catalogue of British and Foreign Postage-Stamp*; Revised, Corrected, and brought up to the Present Time by Dr. Viner (Stevens),—*Three Hundred Years of a Norman House; the Barons of Gournay, from the Tenth to the Thirteenth Century*; with Genealogical Miscellanies, by James Hannay (Tinsley),—*Penny Readings in Prose and Verse*, selected and edited by J. E. Carpenter (Warne),—*Every day Cookery for Families of Moderate Income*, containing One Thousand Original Receipts, Plain Directions for Carving, and Cookery for Invalids and Children (Warne),—*Rainbows in Springtide*: Tales by Sadie (Routledge),—*Little Experiments for Little Chemists*, by William Henry Walenn (Allman),—Book II. of *The Complete Reader*, by E. T. Stevens and Charles Hole (Longmans),—*"Aunt Friendly's Coloured Picture-Books," Cinderella—Poor Cock Robin—Nursery Tales—Old Mother Hubbard—Nursery Ditties—Red Riding-Hood—Little Polly—A, Apple Pie—Domestic Animals—Nursery Rhymes—The House that Jack Built—Royal Alphabet* (Warne).

BOOKS FOR CHILDREN.

Lessons from Women's Lives. By Sarah J. Hale. (Edinburgh, Nimmo.)

OF Joan of Arc, Anne Boleyn, Queen Elizabeth, Pocahontas, Lucy Hutchinson, Christina of Sweden, Lady Mary Wortley Montagu, Mrs. Barbauld, Hannah More, Madame de Staël, Miss Edgeworth, Charlotte Corday, Lady Jane Grey, Sarah Martin, and Grace Darling, this book tells us just about as much as most girls of thirteen years have learnt from manuals of biography. It is noteworthy that the author has altogether forgotten to point out the lessons of the lives which she either misrepresents or fails to represent adequately. In fact, she has given us a worthless book with a catchpenny title.

The Best Things. By the Rev. Richard Newton, D.D. (Edinburgh, Nimmo.)

THE nine chapters of this acceptable little volume are nine religious addresses that might almost be delivered from the pulpit, if they were relieved of their superabundance of anecdotes. Each chapter is headed by a text which it illustrates; and the writer's aim is to direct youthful readers to that field of Christian thought and labour where they may find the best fountain, the best workers, the best work, the best warfare, the best loan, the best lesson, the best flower, the best robe, the best help. Dr. Newton's book is meritorious; indeed it is almost the best volume of its somewhat fantastical kind that we have ever perused.

Lessons from Rose Hill; and Little Nannette. (Edinburgh, Nimmo.)

"Rose Hill" is a school for young ladies, but its lessons—instead of being such lessons as professors of music, dancing, or languages impart to their pupils—are the instructions which come from the social life of the seminary, and the influence which certain of the girls exercise over each other in after life. Evelyn Percival, the heroine, drops from a condition of fashionable affluence to a state of comparative indigence, and is compelled to work for her living as a governess; but at the end of the story becomes the wife of a prosperous gentleman, who is described as "the only man she had ever yet seen who fully realized her ideas of manly virtues and christian excellence." The story is not without cleverness; but English girls will be apt to exclaim against the author who places at a school where young ladies of wealth and fashion are educated "the daughter of a mechanic in moderate circumstances, a man of worth and intelligence who felt the value of knowledge, and was resolved, at any pecuniary sacrifice, to secure for his children the benefits of which he had been deprived." The surprise of our maidens, however, will be lessened by the announcement that 'Lessons from Rose Hill' describes the life of school-girls in the United States,—a country in which ambitious mechanics, earning the high wages that labour commands in America, often spend considerable sums on the education of their offspring; a country, moreover, where the managers of boarding-schools may receive girls of humble extraction without fear of giving offence to the parents of their more fortunate pupils. It is true that Laura Lynde, the mechanic's daughter, is despised and shunned by her school-fellows; but in England such a girl could not obtain admission on any terms to such an establishment as the school at Rose Hill.

Home Heroines: Tales for Girls. By T. S. Arthur. (Edinburgh, Nimmo.)

THE heroines Mr. Arthur delights to honour are scrubby maid-servants who do the greatest possible amount of hard work and endure every kind of ill-treatment without uttering a single complaint, meek-eyed wives who tamely submit to the harshness and neglect of brutal husbands, and patient seamstresses who work their fingers to the bone, because they cannot obtain more profitable employment, and eventually die with their needles in their hands. We cannot concur in the author's estimate of such unlucky and ill-used mortals. As the forlorn objects, the unoffending slaves, the miserable wretches of our social system, they have a claim upon our compassion and charity; but certainly heroism is not one of the fine qualities with which they can be credited. Moreover, some of Mr. Arthur's papers relate principally to persons whom even he would not venture to call heroic. For instance, in the sketch entitled 'My Father'—a sketch setting forth the selfishness of three daughters who, for the gratification of their love of fine clothes, extort large sums of money from an anxious and almost bankrupt father—there is not a single female character who does not in some way or other display a want of natural affection. Mr. Arthur sometimes writes smartly, but never with any indication of originality. He is perky, censorious, pugnacious, and not in any respect the instructor whom we should wish to introduce to our girls.

Bible Blessings. By the Rev. Richard Newton, D.D. (Edinburgh, Nimmo.)

PARENTS and guardians on the look-out for children's books that are "fit for Sunday reading" will do well to glance at Dr. Newton's brief homilies and tales about the blessings which flow from religious instruction and Christian effort.

Great and Good Women: Biographies for Girls. By Lydia H. Sigourney. (Edinburgh, Nimmo.)

THE pen of Lydia H. Sigourney here presents us with some slight and ridiculously inadequate sketches of Monica, Queen Catherine Parr, Jane Queen of Navarre, Lady Jane Grey, Ann Elliot, the Countess of Warwick, the Countess of Suffolk, Mrs. Mary Lloyd, Mrs. Ann Egede, Mrs. Mary Washington, Elizabeth Fry, Anne Hasseltine Judson, Margaret Mercer, and Anne Wilson. It is needless to remark that these are some good

women who were not especially remarkable for any other kind of greatness, some memorable women who were not singular specimens of goodness, and some who were neither great nor good. Lady Jane Grey was unfortunate and thoroughly feminine; but she was not great; neither was she good, beyond the natural goodness of true gentlewomen. But in the name of common sense what was there either eminently good or great in George Washington's commonplace mother, who neglected to give her only child a liberal education?

LIST OF NEW BOOKS.

Bayma's Elements of Molecular Mechanics, 8vo. 10/6 cl.
Beechenhurst, a Tale, by G. G. 2 vols. 12/6 cl.
Blunt's Annotated Prayer-Book, Pt. 2, imp. 8vo. 31/-; complete, 36/-
Bond's Child's Natural History, 18mo. 1/6 cl.
Bond's Leaves from a Christmas Bough, illuminated, 7/6 cl.
Brightwell's Lives and Doings of Great Lawyers, 12mo. 2/6 cl.
Cobb's A Tale of Two Brothers, 18mo. 1/6 cl.
Dallas's The Gay Science, 3 vols. 8vo. 25/- cl.
Dark Year (The) of Dundee, 12mo. 3/6 cl.
Donne's The Sandwich Islands and their People, 18mo. 3/- cl.
Elwes's Legend of the Mount, or Days of Chivalry, 8vo. 3/6 cl.
First Steps in the Radical, by George Eliot, new edit. 2 vols. 12/- cl.
First Steps in the Better Path, by author of 'Jane Hudson,' 4/6 cl.
Froembling's Graded Exercises for Translation into German, 4/6 cl.
Girdlestone's Arithmetic, Theoretical and Practical, cr. 8vo. 4/6 cl.
Hanky's Principles of Banking, 8vo. 5/- cl.
Harris's Shakespeare's Shrine, an Indian Story, &c., 8vo. 5/- cl.
Henderson's Notes on Folklore of Northern Counties, &c., 9/6 cl.
Hodder's Story of Jesus, in Verse, illust. 3/6 cl.
Holiday Chaplet of Stories, by A.L.O.E., 12mo. 2/6 cl.
Hugh Wynford, or Cousin's Revenge, 18mo. 2/- cl.
Jerrild's Story of a Feather, illust. by De Maecier, 15/- cl.
Leeke's History of the 33rd Light Infantry, 3 vols. 21/- cl.
Lemon's Leyton Hall, and other Tales, 3 vols. post 8vo. 31/6 cl.
Lushington's Manual of Naval Prize Law, imp. 8vo. 10/6 cl.
Mace's Little Kingdom, or Servants of the Stomach, 2 v. fo. 8vo. 9/-
Mackenzie's Ruth, an Historical Poem, 12mo. 4/6 cl.
Maiden (The) of the Iceberg, illust. small 4to. 7/6 cl.
More Original Double Acrostics, ed. by Bowman, 18mo. 1/6 cl.
Morris's Specimens of Early English, A.D. 1250-1400, 12mo. 7/6 cl.
Murray's Select Biography connected with European History, 16/-
Orme's Treasure Book of Devotions, 8vo. 3/6 cl.
Orri's Louis Belat, or the Captives of Lake Leman, 12mo. 3/6 cl.
Princess (The) Ilse, Fairy Tale, illust. sm. 4to. 7/6 cl.
Recollections of a Visit to British Kaffraria, 18mo. 3/- cl.
Reid's Off Land's End, Homeward Bound, illust. 5/- cl.
Routledge's Popular Natural History, by Wood, sm. 4to. 12/6 cl.
Rutland's Thoughts on the First Book of the Bible, 12mo. 2/- cl.
Sabbath-Day Journey, or Earth's Tired Travellers, &c., cr. 8vo. 3/6 cl.
Smith's Examination-Papers in Arithmetic, 18mo. 1/6 cl.
Stevens and Hole's Complete Reader, Book 2, 12mo. 2/- cl.
Sunday Chaplet of Stories, by A.L.O.E., 12mo. 2/6 cl.
Triumph (The) over Midian, by A.L.O.E., 12mo. 2/6 cl.
Tryck's The Miner of Perranzabuloe, 8vo. 3/- cl.
Vaughan's Children's Sermons, in Christ Church, Brighton, 12mo. 5/-
Winnie's Difficulties, by G. S. M., 18mo. 1/6 cl.
Wordsworth's Holy Bible, Vol. 3, imp. 8vo. 21/- cl.

THE ROYAL SOCIETY.

THE anniversary address, delivered by General Sabine, on St. Andrew's Day, with his usual clearness and precision of statement, embodied topics which will be interesting to many who are not Fellows of the Royal Society. The President opened with a few particulars concerning the Government project for dislodging the Royal Society from Burlington House to make room for the Royal Academy—Science giving place to Art; from which we gather that the Council of the Society have appointed a committee to confer with Messrs. Banks & Barry, architects of the new buildings which are to be erected on the site of the present wings of the house, and that the architects are now preparing their plans.

We are next informed, in a brief paragraph, that a considerable portion of the first volume of the great 'Catalogue of Scientific Papers,' on which the Royal Society have been so long engaged, is now printed in a handsome quarto form. The publication of that volume may therefore be looked for in the course of the coming year.

Many of our readers are aware that within the past ten years much correspondence has taken place between the Board of Trade and the Royal Society on the important subject of Meteorology, combined with a scheme of observations embracing land and sea. We are glad to learn from General Sabine that this correspondence, and the discussions consequent thereon, have not been fruitless. Acting on the advice and suggestions given by the Council of the Royal Society, the Meteorological Department of the Board of Trade are taking up the subject in earnest; the Observatory at Kew is proposed as the central station of a great system of observations to be carried on, with subordinate stations at a few well-selected localities within the United Kingdom, details of which may be found in the Blue Book, published a few months since by the Board of Trade, and in the *Proceedings* of the Royal Society, No. 82. This praiseworthy scheme is now before the Government, and if they sanction the cost, it will be carried into execution without further delay.

Concerning the sea-observations, or "ocean statistics," as they have been termed, General Sabine states that they were collected with much activity and success by the late Admiral FitzRoy, until his attention was diverted to the propagation of what are popularly known as "storm-warnings"; and he is of opinion that whenever a system of warnings shall become practically attainable with a fair measure of scientific certainty, it will assuredly both deserve and receive in the highest degree general favour and support. "Meanwhile," the President remarks (and here we prefer to quote his own words), "if the recommendations of the Royal Society and the intentions entertained by the Board of Trade shall now receive the hoped-for sanction of the general Government, the collection of ocean statistics and their systematic combination will be resumed with fresh vigour, and with all the aids which experience and matured scientific consideration can afford; and at the same time, if our hopes respecting the proposed system of Land-Meteorology are realized, and if its fruits correspond in a fair degree to the expectations which we venture to form respecting them, we shall gradually obtain such a more complete knowledge of the laws which govern the changes of weather in the British Islands and their vicinity, as may enable the predictions of approaching storms or 'storm-warnings,' if now suspended, to be resumed hereafter, and at no very distant period, with far greater confidence and more assured advantage."

In his last year's Address, General Sabine mentioned the vote of 5,000*l.* by the Legislature of Victoria for a large equatorial telescope for the Observatory at Melbourne. He now informs us, as in a report of progress, that the work of construction, by Mr. Grubb, of Dublin, is well advanced, and that the instrument will be ready for trial in the spring of 1867. To ensure strength and lightness, the tube is made of lattice-work, formed of tapering steel ribs; and the supports of the speculum are equilibrated systems of steel levers. In the casting of the specula some points of interest appeared, which will be appreciated by astronomers and opticians. The first speculum came out sound from the annealing furnace, but had two blemishes on its surface which would have required a month to grind out, and Mr. Grubb broke it up without hesitation for recasting; though, not many years ago, such a disk would have been almost inestimable. He was rewarded for his pains, for the second casting turned out a speculum of which the surface is faultless. In addition to the pains and thought he has bestowed on this subject, General Sabine, at the request of the Board of Visitors of the Melbourne Observatory, and with the sanction of the Committee who have superintended the construction of the telescope, has appointed Mr. Albert Le Sueur to the important post of Observer. This gentleman, who was a wrangler at Cambridge in 1863, is at present studying sidereal astronomy under Prof. Adams, at the Cambridge Observatory; and Mr. De La Rue has kindly promised to instruct him in the practice of celestial photography. So, as General Sabine says, there is reason to hope that this magnificent telescope will be used with full intelligence and zeal, and amply repay the munificent spirit that has guided the Legislature of the energetic and prosperous colony of Victoria.

Considering the important services he has himself rendered to the science of terrestrial magnetism, it must have been with much satisfaction that General Sabine spoke of the complete equipment of self-recording magnetical instruments on the model of those at the Kew Observatory, which have also been ordered for use at Melbourne; that a magnetic observatory is to be established at Mauritius, for which the instruments are now in course of verification at Kew, where Prof. Meldrum, Director of the Mauritius Observatory, is expected to arrive to make himself thoroughly acquainted with the uses and methods of observation; and that Mr. Chambers (late of Kew) has been temporarily appointed to superintend the Magnetical and Meteorological Observatory at Bombay, with authority to prepare a scheme for its re-organization in a manner corresponding to the improvements that have been made in the past twenty-five years in methods of observation and instruments. These improvements are so

important as to furnish occasion for congratulation at the prospect of a long series of observations at the stations referred to. That they will tend to elucidate yet further the phenomena of terrestrial magnetism cannot be doubted. The Roman Catholic College at Stonyhurst has also established a magnetic observatory, where daily observations will be made to promote the science specially in question, and with the express view, on the part of the college authorities, of fostering among the students a taste for scientific pursuits, which may remain with them in after-life.

One more interesting subject remains to be noticed. Forty years ago (in 1826), Schwabe began at Dessau the series of observations of sun-spots, which he has steadily carried on, year by year, ever since, with results which have been made known from time to time in these columns, and which are deservedly regarded as one of the most important contributions to cosmical science within the present century. Seeing the advantage that would accrue from continuing a series so valuable beyond the term of a single life, the Committee of the Kew Observatory have, in concert with Mr. Schwabe, commenced a series at Kew, which, running parallel with the Dessau series, until the identity of the two should be established, might then be continued indefinitely through future years.

From this brief summary it will be seen that General Sabine's Anniversary Address embraced some of the most fruitful topics in physical science, and such as may well provoke the activity of the Royal Society.

THE REGISTRATION OF COPYRIGHT.

The origin of Copyright in England has never been accurately traced. But we have the authority of Lord Mansfield, and several other of our most eminent Judges, for asserting that, by the common law, it existed for ages, although the prevailing doctrine now is that Copyright in England has been created by statute. Be this as it may, there seems reasonable ground for believing that the Copyright, which was formerly held to exist by the common law in this country, originated in a laudable custom amongst the printers and stationers, being members of the Stationers' Company in London, not to reprint any work which had been printed by a member of the Company, and entered as his "copy" in the Register of the Company kept at their Hall. When a copyright was assigned by deed, it appears in ancient times also to have been customary to enter the fact of such assignment in the Register at Stationers' Hall.

The very primitive mode in which such register was kept, down to the passing of the Copyright Amendment Act, in 1844, was perhaps sufficient when, compared with the present time, only a few books were published. The entries were made without the least attempt at arrangement or classification. The book was simply kept in the form of a journal, wherein the works were entered day by day as they came in. Books, music, prints, in short anything offered for registration was entered, and all were jumbled together in one confused mass. In those days, the register was always produced, without hesitation upon the part of the registrar, when a search was required.

Such was the state of the matter when the Copyright Amendment Act of 1844 was passed. It is notorious that the promoters of the measure had to make important concessions in order to carry it. This may to some extent account for the "vested rights" of the Stationers' Company not then being disturbed as to keeping the register. The Act directs "that a book of registry, wherein may be registered (in the form given in the Schedule) the proprietorship in the copyright of books, and assignments thereof, and in dramatic and musical pieces, whether in manuscript or otherwise, and licences affecting such copyright, shall be kept at the Hall of the Stationers' Company, by the officer appointed by the said company for the purposes of this Act, and shall at all convenient times be open to the inspection of any person on payment of one shilling for every entry which shall be searched for or inspected in the said book."

Ever since the Act of 1844 came into operation,

the form in which the register was to be kept has been adopted. But as the Act does not direct any classification of the entries, or any alphabetical arrangement of the names of the proprietors of copyright in the works entered, the primitive mode of keeping the register has remained unaltered, except as directed by the statute. Books, music, maps, prints, &c., are all huddled together without the slightest attempt at arrangement.

For his own convenience or protection, as the case may be, it seems that of late years the registrar has established Indexes to the register. But inasmuch as the Act is silent upon the subject of indexes, and gives the public the unquestionable right to search the register itself, it follows that the registrar is acting illegally if he refuses to allow the register to be searched, instead of the Indexes he has thought proper to compile.

We are induced to make these observations, in consequence of the complaint contained in the letter of our Correspondent, Mr. W. Moy Thomas. Copyright property in this country has increased so enormously since 1844, that the questions at issue between those interested in such property and the authorities at Stationers' Hall must be properly investigated. It is idle to suppose that the vast capital now embarked in copyrights is to have no better security than such a state of things as now exists at Stationers' Hall.

By the Act of 1844 it is provided that no proprietor of copyright in any book first published after the passing of that Act shall maintain any action or suit at law or in equity, or any summary proceeding in respect of any infringement of such copyright, unless he shall, before commencing such action, suit, or proceeding, have caused an entry to be made in the book of registry of the Stationers' Company of such book pursuant to that Act.

Besides this, as to works first published out of the British dominions, and which may be the subject of copyright here, no such copyright can be secured in England unless the work be entered at Stationers' Hall within the time stated in the Order in Council as to such works, and in strict accordance with the requirements of the International Copyright Act.

Again, by the Copyright Works of Art Act, 1862, no proprietor of the Copyright in any drawing, picture, or photograph, can maintain any action, &c., in respect of the infringement of his right therein unless he has registered the work at Stationers' Hall. Not a word is said about indexes in either of these Acts. And yet Mr. Moy Thomas in his letter to us, it will be seen, states that "the public are permitted to search the Indexes only, and this under such restrictions that no reliance whatever can be placed upon them." It is time that such conduct should be inquired into, and the registration placed upon a satisfactory basis. This is the more essential, as an eminent Judge not long since held that "the public cannot be bound if there be any neglect at Stationers' Hall as to the registration; and that if there be any neglect to register, the remedy of the publisher must be against the parties causing such neglect." That searching inquiry and reform are due not only to our own people, but also to those States with whom the Queen has entered into International Copyright Conventions, cannot, as we believe, be doubted by any unprejudiced person. Those who feel disposed to question this statement, we hope will first visit the registration-den at Stationers' Hall, insist upon their right to search the registers, and afterwards go to the Registration of Designs Office in Whitehall, and inspect the admirable system of registration carried on there. The contrast between the two systems is so great, that we trust, in the interests of all proprietors of copyright, the time is not far distant when the legislature will authorize some equitable arrangement to be made with the Stationers' Company for removing the registration now essential there to the Registration of Designs Office in Whitehall.

MIMICRY IN NATURE.

Oxford, Dec. 4, 1866.

In every division of animated nature, even of comparatively limited extent, are to be found species which, although agreeing in all their chief

structural characters with the types of such groups, exhibit in their general form and appearance so great a resemblance to the members of some other group, that by ordinary observers they are at once regarded as belonging to the latter, and not to their own legitimate group. Thus, an eel resembles a snake more than a fish, a cuckoo resembles a hawk, a humming-bird hawk-moth so nearly resembles a humming-bird that a person who had seen the Trochilidae in their American haunts could not be brought to believe that one of the moths which he happened to have noticed in Oxfordshire was an insect. This kind of external resemblance has been termed *Analogy*, and was greatly used by M'Leay and Swainson in the development of their respective "Systems of Nature." More recently this resemblance has been termed "Mimicry," and some very remarkable instances of it have been described and figured by Mr. Bates, occurring in certain species of butterflies which frequent the banks of the river Amazon and other parts of South America in vast numbers, both of species and individuals, forming a separate family, the Heliconiidae, distinguished by their very peculiar elongated wings, as well as by their distinct styles of colouring. These butterflies are, it appears, accompanied in their flight by certain other species of butterflies which so closely resemble them in general form and colour as to be scarcely distinguishable from them, although belonging to a totally different family, the Pieridae, of which our common white butterfly, *Pieris brassicae*, is the type. According to Mr. Bates, the Heliconians emit a disagreeable scent, which renders them distasteful to insectivorous birds, and so preserves them in the "battle of life," and he moreover assumes that their mimics, the Pieridans, have, by a long process of development from the old typical white, broad-winged form of their own family, attained that of the well-to-do Heliconians, and have thereby been enabled to improve their condition and maintain their existence in nature.

It may, I think, fairly be doubted whether this system of mimicry has been beneficial to these Pieridan butterflies, and that their evolution from white progenitors is in the highest degree problematical,—1st, Because the mimicking species barely exist, much less flourish, in the country where the Heliconiidae abound, "not more than one in a thousand" individuals having been found by Mr. Bates. 2nd, Because there still occur numerous species of white Pieridae in the country of the Heliconiidae in a flourishing condition. 3rd, Because there are numerous other groups and species of butterflies in Brazil, equally subject to the attacks of birds with the Pieridae, which have never attempted to assume the forms of the dominant group, Heliconiidae. 4th, Because there are numerous instances of mimicry between the different species of Heliconiidae themselves, which, therefore, needed not the inducement to mimicry attributed to the Pieridae. 5th, Because there are certain species of Pieridae of which only one sex mimics the Heliconiidae. It would require a wide stretch of imagination to suppose that natural selection could have led to the assumption of such mimicry by the individuals of only one of the sexes of a species. (*Papilio Ceneus* carries this mimicry still further, the male resembling *Danaüs Echeria*, and the female *Danaüs Chrysippus*.) 6th, Because the theory assumes that the Heliconiidae existed before the attempt at mimicry commenced on the part of the Pieridae, whereas Mr. Bates's statements would lead to the inference that the Heliconiidae are so unstable a group that the manufacture of species is still going on amongst them. 7th, Because, according to the doctrine of chances, it is in the highest degree improbable that a casual variation of any given species of Pieridae should by constant modification, assisted by hereditary descent, gradually assume the form, and colours, and markings of another species, especially of so remarkable a type as the Heliconiidae. But for an entire group to be simultaneously engaged in such a process, each species tending towards distinct and equally peculiar species, would, by a logician, be pronounced impossible. The admission that the God of Nature created these species in their present mimetic condition for

some wise, but hidden, purpose, disposes of all difficulty.
J. O. WESTWOOD.

HANNIBAL'S PASSAGE OF THE ALPS.

St. John's College, Cambridge, Dec. 4, 1866.

IN the review of Mr. Law's new work on Hannibal's passage of the Alps, you recommend that some traveller during the next summer should take his volumes and go over the whole route, especially the district near Bourg St.-Maurice, with a view to settling some of the questions which are still undecided. As I happen to be tolerably familiar with that region, and with the Hannibal controversy, perhaps you will allow me to make a few remarks upon the claims of the Little St. Bernard, in which I restrict myself to the topographical difficulties. I have no hesitation in saying that, if we are to place any confidence in the words of Polybius, we cannot, for the reasons following, accept that Pass as the route by which Hannibal crossed the Alps. (1.) I could find no place which would at all answer the description of the *Λευκόπετρον*, unless it were the "Rocher Blanche," at the foot of the ascent to St.-Germain. This is a mass of gypsum and tufa, which rises on the left bank of the stream descending from the Pass. The objection, however, to this is, that it is too near to the summit of the Pass, and could easily be avoided by following the line of the present mule-road on the right bank. (2.) The summit of the Little St. Bernard is indeed an undulating plateau of considerable size, not unsuited for the halting-place of an army; but there is no place near it which commands a view calculated to cheer the spirits of Hannibal's troops. There is indeed a fine view of the fertile Isère valley behind, with the magnificent pyramid of the Mont Pourri on the other side of it; but in front rises part of the range of Mont Blanc, all rock and snow; very grand, but not a consoling prospect for the Carthaginians. West of the Pass is the wild range dividing it from the Col de la Seigne; east, a craggy mass forming a sort of outlier of the glacier-clad Rutor. Ascending above the level of the Pass does but increase the view of peaks and glaciers; the lower part of the Val d'Aoste—I believe every part—is invisible. Everything in the surrounding scenery would suggest retreat, not advance. (3.) The descent from the Pass is easy, until the village of La Thuile is reached. Somewhat below this there is a narrow defile, which would be difficult without a road; but then this defile seems rather too distant from the summit (some 9 miles), and is too low down. La Thuile is about 4,700 feet above the sea; and the army might have rested without hardship in the grassy basin around it, while the road was being repaired; and unless the climate has changed greatly, the gorge between it and Pré St.-Didier could never have been in the condition described by Polybius in the month of October. (4.) The distance from the summit of the Pass to the plains by the Val d'Aoste seems too great (about 82 miles); and it is very strange that nothing is said of the difficult defile by Fort Bard. Did space allow, I could bring forward many other objections; but these are the principal difficulties which have led me to consider it hopeless to reconcile the Little St. Bernard with Polybius's description. I had not the advantage of good weather on the Cénis; but it certainly appeared to me to fulfil the topographical conditions much better than the Little St. Bernard. I may also mention that there is no "Viso" Pass; the proper name of the one intended is the Col de la Traversette.

T. G. BONNEY.

STARTING A PAPER.

Paris, December, 1866.

THE art of starting a journal is in its infancy in England. Just as we excel only in roast and boiled in our kitchen, we are great in the art of launching a newspaper only in the way of spending money. We break out into acres of posters; we take a page of the *Times*. We disburse many thousands before we go to press with the first number. We despatch correspondents to every corner of the earth. This is a princely manner of proceeding. There is no expenditure of ingenuity, but the money flows out copiously. The art is plain, simple, rudimentary. Money, we are told, has no master.

You may buy that which the ingenious man contrives for himself without untying his money-bag. Now the difference between the British speculative journalist and his French brother is, that the former buys that which the latter coins for himself out of his own busy mind.

I have been amused—shall I say dazzled?—by the recent exploits of the two mighty princes of all the departments of *La Réclame*: M. Alexandre Dumas has a redoubtable rival. The diplomatic resources of H. de Villemessant may not be so bountiful as those of the author of 'Monte Christo'; but then the editor of the late *Événement* and of the present daily *Figaro* has both money and brains. Dumas is never so much pleased as when he can show his pockets à l'envers, and cry to his readers: "Behold! it has come to this pass with the creator of 'Les Trois Mousquetaires'! Not a red liard has he, that brave Dumas, who has been your delight so long!" The brave Alexander, to his good credit be it said, never whines. You feel that he is mocking you, while he sets forth his unhandsome predicament.

Fate and the Imperial censorship have combined to start these two potentates of the *petite presse* together in a race for a "colossal circulation." Your readers will remember that the *Événement* was suppressed, and it died with all the honours a few days ago. *Les Nouvelles* had fallen on bad days, and was at the point of death. M. H. de Villemessant undertook to make a new paper take the wonted fire from the ashes of the old, and to keep the dead *Événement's* readers together under a new banner. M. Alexandre Dumas, having seen two little papers decline and fall under him, undertook a greater task than that of his rival. To make a third paper "he joined the other two"! We have now a daily *Figaro*, instead of the *Événement*, under M. de Villemessant; and *Le Mousquetaire* (representing the old dead *Mousquetaire* of years ago and the dying *Nouvelles*) under Dumas. The two princes are face to face. One is a scarred soldier, who has seen many a gallant fight, not Captain Pen, but Generalissimo Pen. He is a gay, companionable soldier, with a prodigal's store of anecdote, incident, wit, experience of all parts of the world and all degrees and varieties of men. He is of the country of Rabelais; highly charged with the power of enjoying everything; and, withal, a most moderate man, save in the work he will cast daily from his desk to the printer's devil. He is equal to the highest and the shabbiest fortune. He has been mounted like a potentate, and has had to count his balance of sous! I am not indiscreet in saying so, since I echo only that which it has pleased him to print. Our second doughty knight of the pen is fresh in the field. He is of this present time; a dealer rather than an artist. He may be described as Jean Paul described a pushing, practical man—"If I see him praying on a Mount of Olives, he is about to build an oil-mill up there; does he weep by the brook Kedron, he is about to fish for crabs, or to throw some one into it." The old battered knight hums on his way to battle; there is laughter bubbling at his lips. He is a poet, even in the country of Corneille. The fresh knight carries in broad letters L. S. D. upon his casque, and his war-cry is "Abonnez!" He is jovial, and can do execution with his pen. He can sing 'Abonnez-vous' to an infinite variety of airs. But he is no match for him who wears 'Monte Christo' upon his shield.

Dumas opens his campaign with a declaration that he and those associated with him in his new compound paper, have not got 50,000 francs to spend in the way of publicity; but he believes they have 50,000 friends, and he bids this army of readers follow their old leader, and comfort him with a little money. His candour is delightful; it comes upon one like the scent of wild thyme after the bartering of a dusty market. Dumas is a man who wears not only his heart but his balance-sheet upon his sleeve. He tells us how it was that he and the new proprietors of the *Nouvelles* came together, and how his funeral *feuilleton* on Roger de Beauvoir was interrupted. We are admitted not only to buy the new *Mousquetaire* over the office-counter: the empty cash-box is set before us. We are welcome in the editor's sanctum. The radiant face

of Dumas shines through every column. What he did years ago, what he is doing now, what he intends to do, his *grands dîners* and little suppers, his travels and his charities, his cook and his domestic animals, will furnish forth once more the daily fare of his readers. So intimate does the reader become with the life and the schemes of the light-hearted editor, that at last he seems to be conducting the journal himself, and seems to have a direct personal and pecuniary interest in its ups and downs. Dumas has never lost the power of establishing an immediate intimacy between himself and his readers. He keeps no secrets back. For instance, in the first number of his *Mousquetaire* he is good enough to draw a contrast between his manner of building up the interest of a story, and that of Sir Walter Scott. He describes Scott's manner boldly. Sir Walter, it seems, wearied his readers with masses of petty details and chapters of microscopic description. Sometimes he would write a volume, nay, a volume and a half, of tedious details about a number of characters; then the story would break upon the half-exhausted reader, and, as the dramatic incidents happen, the reader would say, "Dear me! that's the man in the green plaid," and "The hero is the gentleman in the pointed shoes," of a hundred solid pages back. This was Scott's manner. Dumas adopts the opposite principle of composition. He secures the attention of his readers at once by startling incidents, and vivid characterization and description.

At the skirts of Papa Dumas comes dutiful Alexandre Dumas fils, with a goodly series of maxims. The maxims are startling. Many of them are ill-natured, and most of them want the "wasp's edge" of the epigram. Take a sample of the startling ones: "Miracles are the *coups d'état* of God!" This is among the best:—"There are people who see no difference between a flag and a livery." I will add one more: "God fishes for souls with a rod; the devil with a net."

In return for these wicked proverbs or maxims, Papa Dumas, addressing M. Emile de Girardin as "My dear Girardin," and dwelling on their close intimacy, proceeds to belabour him, and to give up the columns of the new *Mousquetaire* to the dissection of the new *Supplée d'une Femme*. But the quarrels of authors are the salvation of *le petit journalisme*.

M. de Villemessant opens his campaign not with the least hint of poverty, but with a loud flourish of trumpets. He treats his readers to a long circumstantial account of the state of his great bureau on the appearance of the daily *Figaro*. We are admitted to pass in review the gorgeous carriages and the dainty victorias which make a dazzling line in the Rue Rossini. Princesses and countesses and celebrated actresses successively respond to the great De Villemessant's war-cry, *Abonnez!* Even the celebrated *comédienne* who had had some differences with the *Événement* enters the bureau, and seeks the director, and coquettes for a truce and a peace. It would seem that on a certain morning all the *beau monde* of Paris gave itself up to the delightful task of subscribing to the new daily *Figaro*. The delightful morning is duly and fully chronicled. Even the fruits of the morning's post, in the shape of *abonnements*, are exultingly laid before M. de Villemessant's readers. The daily *Figaro* is, moreover, inaugurated by a work of charity in favour of the victims of the late inundations: all the better for the inundated. I will not venture to pry into motives. Say our neighbours, at every turn, in their mocking way, "Oh la Vertu va t'elle se nicher!" It would seem that in her gentlest and sweetest form she has taken refuge in a bureau of *abonnements* in the Rue Rossini.

Let us confess that, beside Dumas and Villemessant, our newspaper speculators are clumsy hands!

B. J.

OUR WEEKLY GOSSIP.

Lord Stanley has done a very wise thing in referring to a strong judicial commission the delicate question of our rights and duties as a nation under the present loose interpretation of our neutrality laws, and we are glad to say that this reference of the matter is no idle form. The Government, we believe, intend to act on the reply

of their Commissioners, whether it be pleasant to certain parties or not; and in this resolution all honest men, anxious for peace and for the maintenance of our character for good faith, will be certain to sustain Lord Stanley.

The bust of Lord Romilly which Men of Letters are about to place in the new Search Room at the Record Office, is complete. Mr. Durham, the sculptor, is said to have given universal satisfaction by his labour. The likeness to Lord Romilly is admirable.

The Moon Committee of the British Association have issued a circular, calling attention to the fact that Herr Schmidt, of Athens, has observed, during the last two months, that the Lunar Crater "*Linné*" on the *Mare Serenitatis* (11° 32' 28" W. longitude, and 27° 47' 13" N. latitude), has been obscured. The importance of this observation comes out in its full force when we recollect that Schröter, in 1788 (November 5), recorded a dark spot in the place of "*Linné*," larger than the crater. Is it possible that in this observation we have an evidence of present activity?

William Tite, Esq., M.P., has been elected President of the Camden Society.

We hear that the Metric Committee of the British Association and the International Decimal Association, are to hold a meeting on Friday next, the 14th inst., at 7 o'clock, at the rooms of the Statistical Society, when a paper 'On International Coinage, in connexion with the Monetary Convention between France, Italy, Belgium and Switzerland,' will be read by Frederick Hendricks, Esq.

In 1846 the total number of the Royal Society was 839: this year it is 626, which shows a diminution of 213 since the change in the mode of election was made, in 1847. It was then foreseen that the effect of electing 15 new Fellows only each year would be to reduce the number, which, considering the quantity then predominant, was greatly to be desired. Whatever difference of opinion may formerly have prevailed as to the expediency of the change, there is now a general agreement that it has worked well. The character and position of the Royal Society are higher now than at any time within the present century; while, as appears by the balance-sheet distributed at the Anniversary Meeting on November 30, there is no lack of ways and means, the finances of the Society being in a flourishing state. The number of deaths in the year just ended was 31, among which are 1 king, 4 lords and 2 judges. Not more than five royal personages now remain on the list of the Society.

The Lambeth Library is closed until after the Christmas holidays.

Yesterday (Friday) the Board of Trade suspended the usual Cautionary Storm Warnings, which have from time to time been issued by the Meteorological Department for the use of our trading ports.

Among the Year-books which we have still to announce, are Mr. Punch's 'Pocket-book,' with an amusing frontispiece of the Matrimonial Register Association, and the usual comic and serious contents,—'The British Almanac and Companion,' the latter containing several articles on Commercial Panics, Exhibitions of National Portraits, the Continental War, and the Atlantic Cable,—'Gutch's Literary and Scientific Register,'—'Napoleon Price's' 'Perfumed Royal Almanac,'—'Old Moore's Almanac,'—'Morton's New Farmer's Almanac,'—'T. Frogland Comic Almanac,'—'The City Diary and Almanac, 1867,'—'Bow Bells Illustrated Almanac,'—also 'Mugby Junction,' Mr. Dickens's Christmas medley,—the 'Christmas Number of *Once a Week*,'—'Up and Down Mont Blanc,' the Christmas Number of *Chambers's Journal*,—Messrs. Cassell & Co.'s Christmas Annual, 'My Pale Companion,'—Routledge's 'Christmas Annual,' and Beeton's 'Christmas Annual.'

Mr. Tom Taylor will deliver the annual address to the members of the Lambeth School of Art on Tuesday evening, December 11.

Messrs. Moxon & Co. are about to exhibit the

original drawings made by M. Gustave Doré in illustration of Mr. Tennyson's 'Elaine.'

'Emanuel Swedenborg: His Life and Writings,' by Mr. William White, will be published in January next.

The announcement of the death of Mrs. Chatterley is, we believe, founded in error. That lady, formerly of Covent Garden Theatre and latterly of the Adelphi, is still among us, and is residing in Brompton Square. The mistake probably arose from a notice in the *Times* obituary of the death of Mrs. Chatterley, who was the wife of the brother of Mr. W. S. Chatterley, the husband of the above excellent actress.

New York papers state that the officers of the American whale-ship, *Antelope*, have brought home information of discoveries, made by C. F. Hall, respecting the Franklin Expedition. Mr. Hall possesses a gold watch, some silver spoons, and other relics supposed to have belonged to the Franklin party. He also learnt that the remains of some of Franklin's men were lying under a boat in Committee Bay, where they had been placed by the natives after death. Mr. Hall, according to the latest accounts, purposed endeavouring to make his way to where the remains are said to be situated.

One of the largest and most perfect mastodons known has recently been discovered in digging the foundation for a mill at Cohoes, near Troy, in the United States. It was found 83 feet below the surface of the ground, and in so perfect a condition that it is believed that the skeleton can be restored. The animal must have been at least 20 feet in length and 15 in height. The tusks measure 8 ft., and the jaw is 4 ft. 9 in. in length from the mouth to the cranium. The remains have been carefully collected, and it is stated that Prof. Agassiz will draw up a Report on them.

At last there is a prospect of deliverance for large towns from what is now the intolerable use of steam-whistles by locomotive engine-drivers. It is time something was done to check this practice, which has become a serious evil, the worst feature of which is, that no justification can be found for the abuse. Readers who live near stations know, to their cost, how often a locomotive is made to shriek and scream ten minutes together, either of the day or night, and without the slightest regard for the senses and repose of all who are not too deaf to escape the infliction. These persons know that the practice continues, notwithstanding entreaties to directors and secretaries. In London, property near railways is thus depreciated in value. In country-towns the same happens. As it is understood that the municipal authorities of several manufacturing centres are about to introduce a Bill to the House of Commons with a view to mitigate the infliction, and as the house-property-holding interest is even more powerful than the railway interest in that assembly, we trust the object may be obtained with less difficulty than appeared when the legislative wisdom was implored to permit men to deliver themselves from the organ-grinding nuisance. It might be worth while to extend the provisions of the proposed Bill so as to include all noisy nuisances in towns. The dustman's bell was silenced without a revolution, and peace given to many who sorely needed it. Still, however, a man may keep any number of howling dogs or crowing cocks, defy the remonstrances of his neighbours, rob them of rest, and ruin their health, because they have no means short of an indictment for checking the tyranny. An indictment is costly, tardy, and uncertain; swift redress should be obtainable from a magistrate.

Our Government has purchased the Blocas Collection of gems, coins, intaglios and sculptures. This collection is a museum of itself.

M. de Lamartine (melancholy sight!) has been appealing again to the public, asking them to subscribe to the first four volumes of his 'Mémoires,' which are finished and ready for press. In the event of his not living to complete the entire work, these will form, he states, a separate series.

Among the numerous transformations in Paris, few are more surprising than that of the locality

known as the Buttes-Chaumont, which two years ago was a wilderness of half-filled quarry pits. It is now about to be delivered over to the public in the form of a romantic park, in which there is a lake and water-works, which, it is said, will far eclipse those of Versailles and St.-Cloud. The view from the upper terrace of the Buttes-Chaumont is one of the finest in Paris.

The new edition of Montaigne, edited by M. Molland, contains new matter of great interest. Among others, the noble letter of Montaigne to Henri IV., and a note made by his hand in an old copy of Caesar's Commentaries. M. de Sacy illustrates the attractiveness of Montaigne by remarking that he reads the *Essays* twice a year, and that he has done so during the last thirty years at least.

The Staatsrath Maximilian von Heine continues his recollections of his brother Heinrich Heine, the poet, in the *Gartenlaube*. The incident which he relates in the last number of this periodical is ludicrous in the extreme, although it might have happened to any common mortal, and it did not cost Heine any expenditure of his ever-ready wit to put it into scene. The reader may judge for himself. During a prolonged stay at Lucca, where they had found particularly comfortable lodgings, Heine and his brother made the acquaintance of an English family, a gentleman, his lady, and two beautiful daughters, who lived in the same house, on the first floor. At one of their calls, the conversation took a very prosaic turn,—viz. on the cooking and living of Italy, on which subjects complaints became loud on all sides. Heine, however, who was a great friend of tea, praised his present landlord for the excellent tea he furnished them with, which was quite an exception to the general rule in Italy. The English family protested that no tea an Italian landlord could provide was at all fit to drink, and showed themselves altogether unbelieving on this point. A little controversy ensued, in which Heine, in his lively way, took the part of the landlord, and proposed at last, in order to sift the matter thoroughly, and to convince the family, that they should take tea in their bachelors' apartments, a proposal to which Sir James B—— and his family consented most amiably. At the time appointed, the family made their appearance in Heine's rooms accordingly. The conversation went on lively enough, in expectation of the good tea which had been promised. But no tea came; more conversation, more patient expectation; till at last Heine, in great embarrassment, in a whisper despatched his brother to inquire into the reason of this unaccountable delay. When this messenger entered the kitchen, the landlord received him with the despairing words, "You can get no tea, for the family on the first floor have not taken tea to-night." It appeared now that the much-lauded beverage of the brothers Heine had been nothing but the leavings of the teapot of the English family, who carried their own tea with them. This arrangement had succeeded so far, as it contributed to the satisfaction of both parties; Messrs. Heine being much pleased with their tea, which did not cost a farthing to the landlord, for which he charged, however, a good price. As no tea was to be had in the house but what came from the English family's tea-chest, the landlord having made no provision, not knowing that the expected guests were his first-floor lodgers, the whole conspiracy had to explode, much to the amusement of guests and hosts. The end of it was that the brothers were invited to the first floor, where a good cup of tea, first edition, was soon served by beautiful hands, and partaken of by the whole company, among much fun and merriment caused by the comical scene upstairs.

We regret extremely that the proposed Geological Survey of Roumelia has, like many other hopeful schemes of Turkish reform, fallen through. Apprehending, with great probability, that extensive coal-deposits exist in Central Roumelia, the Turkish Government decided that a geological survey of the district should be made, and, Mr. Arthur Lennox was appointed to execute the work. This gentleman accordingly left England; expecting, as a matter of course, to be able to make the neces-

sary arrangements for accomplishing the task confided to him. In place, however, of meeting with every assistance from Ali Pasha and subordinate government officials, innumerable impediments were thrown in his way, until at length, having exhausted four months in various efforts to organize the undertaking, he has been compelled to abandon the enterprise and return to England.

The Library of the late Rev. Dr. Wellesley, Principal of New Inn Hall, Oxford, has been sold by auction, by Messrs. Sotheby, Wilkinson & Hodge. It comprised an extraordinary collection of the works of Italian writers in verse and prose, scarce Italian novels and romances, various Testi di Lingua, and a nearly complete series of 'Rappresentazioni Sacre,' or Miracle Plays, and other works of interest and rarity. The following is a selection of the more important lots:—Ariosto, Orlando Furioso, Milano, 1524, 43l.; another edition, Venet., 1530, 10l. 15s.—Bartsch et Robert-Dumesnil, Le Peintre Graveur, 26 vols., 13l. 5s.—Belinzzone, Rime, Milano, 1493, 16l. 10s.—Berni, Orlando Innamorato, 1541, 12l.—Berruti Dialogues, 1517, 34l. 10s.—Boccaccio, Decamerone, 1516, and Masuccio, Novellino, 1522, 47l.—Boccaccio, Decamerone, 1522, 11l. 15s.—Claude, Liber Veritatis, 2 vols., 15l. 10s.—Collier's Dictionary, an illustrated copy, 13l.—Costume of the Seventeenth century, 15l. 5s.—Dante, Commedia, 1477-8, 24l.—Drawings of Views in Oxford, 23l.—Dallaway and Cartwright's History of the County of Sussex, 20l. 10s.—Engravings by Galle, Wierx, Collaert, &c., 26l. 10s.—Falconetto Hystoriato, 1520, 15l. 10s.—Epistole et Evangelii, with woodcuts by Marc Antonio, 1512, 32l.—Engravings of the Troubles in France, 1559-70, 11l. 5s.—Fior di Virtu Historiato, 1498, 22l.—Frottola d' Autori Fiorentini, 1600, 17l. 5s.—Gruner's Fresco Decorations, plates heightened with gold, 17l. 15s.—Giovanni Fiorentino, il Pecorone, 1559, 11l.—Laude a honore della Vergine, 1485, 17l.—Hoghenberg, Procession of Charles the Fifth, printed on vellum, 14l.—Litta, Famiglie celebri, wanting some numbers, 22l. 10s.—Canzone a Ballo, 1568, 12l. 10s.—Loggan's Oxford and Cambridge, 14l. 5s.—Prospects of Buildings in London, by Nicholls, 14l. 10s.—Opere Burlesche di Berni, &c., 3 vols., 14l. 15s.—Passione di Christo, in ottava rima, 18l. 5s.—Phileas Grammatica Figurata, 1509, 12l. 5s.—Mist's Weekly Journal, and other Old Newspapers, 26 vols., 13l.—Oxford Almanacks from 1674 to 1700, 14l.—Philobiblon Society's Publications, 11 vols., 16l. 5s.—Another set, 15l. 15s.—Rappresentazioni Sacre, a collection of 24, 1495-1500, 52l.—Another Collection of 129, in 2 vols., 145l.—Papillon, Œuvres, a collection of 4,500 pieces, 56l.—Petrarca, Vite de' Pontefici, 1478, 10l. 5s.—Poliphili Hypnerotomachia, 1499, 36l.—Poliphili, Songe, with autograph of A. Pope, 13l.—Pontificale Romanum, 1572, 16l.—Portraits of Kings, Plates of Mountebanks, &c., 2 vols., 27l. 10s.—Saxton's Maps of England and Wales, 1579, 16l. 15s.—Skelton's Antiquities of Oxfordshire, large paper, with 100 original drawings, 61l.—Titian's Opera, a collection of 167 engravings, 2 vols. 14l.—Noms et Armes des Chevaliers de la Toison d'Or, Louis XIVth's copy, 13l. 5s.—Van Dyck's Portraits, 10l. 2s. 6d.—Vaticano Illustrato, 8 vols., 10l. 17s. 6d.—Vasari, Vite de' Pittori, 4 vols., 18l. 18s.—Vorrage, Legende de Santi, with 52 drawings on the margins by Andrea Mantegna, 25l.—Woodcuts and title-pages from Rare Books, collected by Craven Ord, 10l. 2s. 6d.—Total, 4,426l. 19s.

INSTITUTE OF PAINTERS in WATER COLOURS.—EXHIBITION OF SKETCHES and STUDIES, OPEN from Ten to Six, at their Gallery, 33, Pall Mall (opposite Marlborough House).—Admission, 1s.; Catalogue, 6d.
JAMES FAHEY, Secretary.

WINTER EXHIBITION.—The FOURTEENTH ANNUAL WINTER EXHIBITION OF PICTURES and STUDIES, the Contributions of British Artists, is NOW OPEN, at the French Gallery, 130, Pall Mall.—Admission, 1s.; Catalogue, 6d.
LEON LEFEVRE, Secretary.

SOCIETY OF PAINTERS in WATER COLOURS.—The WINTER EXHIBITION OF SKETCHES and STUDIES, by the MEMBERS is NOW OPEN, at the French Gallery, 130, Pall Mall.—Admission, 1s.; Catalogue, 6d.
JAMES FAHEY, Secretary.

THE SECOND ANNUAL EXHIBITION OF WATER-COLOUR DRAWINGS is NOW OPEN to the Public, at T. M. Ward, R.A., New Gallery, 7, Haymarket, next the Theatre.—Admission, 1s.
R. CLOTHIER, Hon. Sec.

MR. ARTHUR TOOTH'S FIRST ANNUAL WINTER EXHIBITION OF WATER-COLOUR DRAWINGS is NOW OPEN to the Public, at the Fine Art Gallery, 8, Haymarket, from Ten till Six.—Admission, 1s., including Catalogue.

MR. MORREY'S COLLECTION OF MODERN HIGH-CLASS PICTURES is ON VIEW at the Royal Exchange Fine Arts Gallery, 34, Cornhill. This Collection contains examples of Leslie, R.A.—D. Roberts, R.A.—E. M. Ward, R.A.—Holman Hunt—Phillip, R.A.—T. Faed, R.A.—Egg, R.A.—Frith, R.A.—Rosa Bonheur—Henriette Browne—Goodall, R.A.—Cooke, R.A.—Creswell, R.A.—Pickersill, R.A.—Calderson, A.R.A.—Sant, A.R.A.—Le Jeune, A.R.A.—Ansdell, A.R.A.—Frost, A.R.A.—Pettie, A.R.A.—Yeames, A.R.A.—P. Nasmyth—Linnell, senr.—Dobson, R.A.—Cooper, A.R.A.—Gale—Marks—F. Hardy—John Faed—Frère—Ruiperez—Lidderdale—George Smith—Duverger—Peter Graham, &c.—Admission on presentation of address card.

ARTEMUS WARD—EGYPTIAN HALL—EVERY EVENING at Eight. Doors open at half-past Seven. Saturday afternoon at Three. In consequence of the great success of ARTEMUS WARD AMONG THE MORMONS, Stall Seats should be engaged some days beforehand. They may be secured at Mitchell's Royal Library, 33, Old Bond Street; Austin's Ticket Office, St. James's Hall; and at the Egyptian Hall. Stalls, 3s.; Floor, 2s.; Gallery, 1s.

ROYAL POLYTECHNIC.—THE DECAPITATED HEAD SPEAKING. This wondrous illusion is now added to the other Scientific Illustrations in Professor Pepper's Entertainment, which is given Daily at 3 and 5. N.B.—Caution.—Professor Pepper's Copyright and Patent rights will be strictly maintained.

MADAME STODARE (Widow of the late Colonel Stodare) begs to announce that the THEATRE OF MYSTERY, Egyptian Hall, is OPEN for the SEASON. Madame Stodare will present the Sphinx, the Jewel of Mecca, and Banket Trick, acted by Mr. Firkank Burman, Pupil of Colonel Stodare, in Colonel Stodare's Royal Entertainment of Magic. Doors open every Evening at 7.30 and Wednesday and Saturday Mornings at 3.30.—Admission, 1s. and 2s.; Stalls, 3s.; Schools and children half price. Seats may be secured at the Box-office from 11 till 6; and at Mitchell's, 33, Old Bond Street.

Mr. JAMES WEAVER, Manager.

SCIENCE

MEDICAL BOOKS.

Lectures on Animal Chemistry, delivered at the Royal College of Physicians. By William Odling, M.B. (Longmans & Co.)

To the cultivated chemist engaged in the practice of medicine, these lectures, as delivered at the Royal College of Physicians, and illustrated with experiments, must have been a treat. But we must confess that in their present form they appear to us too condensed to be of much practical value as reading. We should think that few medical men have kept up enough chemistry to read these lectures so as to profit by them as a treatise on animal chemistry. At the same time it must be acknowledged that Dr. Odling has put together a number of chemical facts, which lie at the very base of all those changes which constitute the phenomena of life. Difficult to comprehend as may be the problems here laid before the physiologist, it is vain to expect that any satisfactory explanation of the functions of an animal body can be apprehended or given without them. On the understanding of the technical formulæ and diagrams given in this volume depends the power to comprehend the vast variety of phenomena which take place in the animal system. Dr. Odling has not given himself space to explain all the practical results which must flow from a knowledge of the chemical compounds and changes which take place in the animal body; but he says enough to show to every intelligent physician that a practice of medicine founded on an absence of this knowledge is more likely to do harm than good. He also points to the way in which explanations of the action of medicines may be given according to the laws of chemical change. Dr. Odling repudiates the notion that a vital principle is in any way controlling or opposing the influence of chemical and physical laws in the animal system. He has driven the vitalists into a corner, and it will be their duty to reply to the remarks he makes in his fourth lecture. At the same time, we would remind our readers that there is a school of physiologists, at the head of which we must place Dr. Lionel Beale, who show themselves anxious to join issue with the chemical physiologists on this very question of the existence of a vital force; and it is in the discussion of the nice questions that occur between these two schools that interesting and valuable observations on the real nature of vital phenomena may be expected to be made. To all interested in these inquiries Dr. Odling's volume will be found to contain the last facts and reasonings to be taken notice of on his side the question.

On the Safe Abolition of Pain in Labour and Surgical Operations. By Robert Ellis. (Hardwicke.)

This book was written before Dr. Richardson's plan of producing local anaesthesia by the ether spray was fully made known. That process has diminished the necessity for general anaesthesia by at least half the number of cases. Still the process of producing general anaesthesia must be employed where the local process cannot be applied, and the result of Mr. Ellis's experience will be read with interest. He thinks that chloroform has been "toyed" with, and that even with the greatest care and forethought it is oftentimes too powerful for control when used alone. He has been, therefore, induced to recommend a compound with chloroform and ether vapours. In this volume he gives an account of his mixture, the apparatus for administering it, and some of the results of its administration. The subject is one of immense importance in relation to human suffering; and we are sure Mr. Ellis's plan will meet with every consideration at the hands of the enlightened members of his profession.

Diabetes, its various Forms and different Treatments. By George Harley, M.D. (Walton & Maberly.)

Of all diseases of the human body there is none on which modern chemical research has thrown more light than that of Diabetes. It was a mysterious discovery to the old practitioners of medicine that, in certain states of the body, it threw off sugar in larger quantities than that substance could possibly be taken. The human system was thus found to be a sugar-factory. It was then thought that this sugar-making process was entirely the result of disease; but modern physiologists have shown that not only is sugar-making a natural process, but, above all things, that it is manufactured by the organ that was supposed only to emit life by its gall-making functions. Dr. Harley now shows that diabetes may result from the liver making more sugar than the system can get rid of by respiration, or that the respiratory function fails to get rid of the sugar normally made by the liver. How the liver is affected by various causes, and how the respiratory function is affected by the nerves, and what is the way to treat various forms of diabetes, are all told in this volume in a very lucid way. It is certainly the most readable book on an obscure disease that we have had brought before us for many a day, and we recommend it to both general and professional readers as an interesting physiological and pathological study.

Clinical Lectures and Reports by the Medical and Surgical Staff of the London Hospital. (Churchill.)

We have before spoken favourably of the Reports published by the physicians and surgeons of the London Hospital. The subjects treated on arise out of cases that have been admitted into the wards of the London Hospital, and embrace almost every variety of medical and surgical disease. The Reports, however, which give to this volume special interest are those on the cholera patients during the recent outbreak of this disease in the East of London. Altogether, there were 509 cholera patients admitted into the hospital, and of these 281 died, thus making 54 per cent. of deaths. This is a large mortality; but it must be recollected that only the worst and most pressing forms of the disease were taken to the hospital. As bearing on the question of contagion, it is stated that of seven medical officers, five volunteer nurses, five sisters, eighty nurses, and five porters, only four of the nurses died of the disease, and of these, three lived out of the hospital. Dr. Letheby, referring to the probability of the water of the East London Water Company producing the disease, says that in a workhouse at Bromley, where the water was not used, twenty-seven cases of cholera occurred; and that in a workhouse in Hackney, supplied by the East London Water Company, not a single death occurred. These cases do not, however, disprove the overwhelming testimony brought forward by the Registrar General in favour of the theory that the water of this company was the great exciting cause of the cholera in the East of London.

SOCIETIES.

BRITISH ARCHEOLOGICAL ASSOCIATION.—Nov. 8.—G. Godwin, Esq., V.P., in the chair.—Lord Boston exhibited a carved limestone pebble from Egypt.—Mr. Wimple exhibited a collection of Roman antiquities, with a few relics of earlier British times, procured from some diggings in the new Southwark Street.—A remarkable cylindrical lime-box, found by Mr. John Lloyd, formerly of Hrebury, in the possession of a farmer, was exhibited.—Mr. W. Whincopp exhibited some fine specimens of celts and flint arrow-heads, from Cambridgeshire and Suffolk, which the Rev. W. Simpson contrasted with two horn-stone celts from Denmark.

ROYAL SOCIETY OF LITERATURE.—Nov. 21.—Hogg, Esq., V.P., in the chair.—Mr. Vaux read a paper, communicated by C. T. Newton, Esq., on a very curious Greek inscription, found at Mytilene. This inscription, which refers to the coinage of Mytilene and Phocæa, appears to indicate that these two cities had a currency in common, and, at all events, that both had a common interest in preventing any deterioration of the standard. The currency alluded to is, doubtless, that in use among the Greek cities of the Western coast of Asia, in the fifth and fourth centuries B.C., of which Cyzicus and Phocæa were the principal mints. Of this coinage abundant specimens are still extant, in all of which more or less of silver is mixed with the gold. It is probable that the Greek States of Western Asia Minor used this mixed metal rather from expediency than from want of metallurgical skill, and that it would be more correctly termed *pale* gold than *electrum*.—Mr. Vaux also read a paper, communicated by Mr. J. T. Newton, on a small vase, of the class called *kyballos*, recently procured at Athens by the Hon. Mr. Strutt. The subject is similar to one formerly in the possession of Mr. Rogers, and now in the British Museum, on which Aphrodite is represented seated upon a rock, with her female attendants around her.

ZOOLOGICAL.—Nov. 22.—Dr. J. E. Gray in the chair.—Extracts were read of letters addressed to the Secretary by Mr. Grote, concerning the locality of *Acanthocherus Grotei*; by Dr. Huggins, relating to a bird forwarded from Trinidad, which was taken to be the young of *Chauna Derbiana*; and from Dr. G. Bennett, in rectification of a former communication.—A communication was read from Dr. Schlegel on the discoveries in mammals and birds lately made by Mr. F. Pollen, in Madagascar.—The Secretary read notices of some of the more noticeable recent additions to the Society's menagerie.—Mr. W. H. Flower read a memoir on the skeleton of *Inia Geoffroyensis*, and on the skull of *Ontoporia Blainvillii*, and made some remarks on the systematic position of these animals in the order Cetacea.—Communications were read from Dr. W. Peters on some mammalia collected by apt. A. C. Beavan at Moulmein, Burmah; on *Amphozous flaviventris*, Gould, a new species of bat from Australia; and on a collection of bats from Trinidad, forwarded by Dr. W. Huggins.—A communication was read from Mr. G. Krefft, of Sydney, N.S.W., on the classification of the small *Myiuridae* of Australia, with descriptions of two new species proposed to be called *Podabrus Mitelli* and *Chatocercus cristicauda*.—A communication was read from Dr. G. Hartlaub, on a new species of the genus *Crateropus*, from Damara-land, proposed to be called *C. melanops*.—Mr. L. Slater communicated a paper by Mr. D. E. Murin, containing notices of the pheasants found in the neighbourhood of Pekin.—A paper was read by Mr. E. P. Ramsay, describing a new species of the genus *Atrichia*, from the Richmond River, N.S.W., proposed to be called *A. rufescens*.—A communication was read from Viscount Alden containing notes on birds collected by apt. R. C. Beavan in Tenasserim and in the Andaman Islands.—Two communications were read from Mr. H. Adams, the first relating to the old and fresh-water shells, collected by Mr. E. Mallet on the Upper Amazons and on the River Cayali in Eastern Peru, with description of new

species; and the second to six new species of shells from various parts of the world.—A communication was read from Mr. Blandford on the genus *Opisthostoma*, with the description of a new species from the neighbourhood of Bombay, and of the animal and operculum of this form.—Two communications were read from Mr. A. G. Butler, entitled 'Corrections and Addenda to certain Papers on Lepidoptera, published during the Years 1865 and 1866, with Additional Notes on some of the Species described therein,' and 'A Monograph of the Genus *Euptychia*, a numerous Race of Butterflies belonging to the Family *Satyridae*, with descriptions of Sixty species new to Science, and Notes on their Affinities.'—Mr. F. P. Pascoe communicated the second part of his catalogue of the Longicorn Coleoptera, collected in the island of Penang by Mr. J. Lang.

INSTITUTION OF CIVIL ENGINEERS.—Nov. 20.—J. Fowler, Esq., President, in the chair.—The discussion upon the two papers, read at the previous meeting, 'On the Results of the Use of Steam Power on Canals,' occupied the whole of the evening.

Nov. 27.—C. H. Gregory, Esq., V.P., in the chair.—'On the Smelting of Refractory Copper Ores with Wood as Fuel, in Australia,' by Mr. J. L. Morgan.—'Light Railways in Norway, India, and Queensland,' by Mr. C. D. Fox.

SOCIETY OF ARTS.—Nov. 21.—Sir Thomas Phillips, Q.C., Chairman of Council, in the chair.—The Chairman delivered his opening address.

Nov. 28.—Sir Roundell Palmer, Q.C., M.P., in the chair.—The paper read was 'On Limited Liability and its Relation to Manufactures and Commerce,' by Mr. W. Hawes.

MEETINGS FOR THE ENSUING WEEK.

- | | |
|--------|--|
| Mos. | Geographical, 81.—'Physical Geography of Lower India,' Col. Trevellick; 'Pangong Lake, Tibet,' Capt. Godwin-Austen. |
| Tues. | Royal Academy, 8.—'Anatomy,' Mr. Partridge. Engineers, 8.—'Communication between Passengers and Guards on Railway,' Mr. Freese. Ethnological, 8.—'Ethnological Results of Arab Conquest of Spain,' Mr. Crawford; 'Archæology and Ethnological Problems,' Mr. Dunn. |
| Wed. | Microscopical, 8.—'Two New Species of Tube-bearing Rotifers,' J. Davis. Society of Arts, 8.—'Old London,' Mr. Craze. |
| Thurs. | Naturalist, 7. Syr-Egyptian, 7.—'Vale of Achor,' Mr. Ainsworth. Mathematical, 8.—'Geometrical Drawings,' Prof. Cayley; 'Symbolical Development of a certain Class of Functions,' Mr. G. C. De Morgan. |
| | Royal, 84. Zoological, 81.—'Sponges in British Museum,' Dr. Gray; 'Gadus marinus,' Mr. Murray; 'Osteology of Simia,' Mr. Mivart. Antiquarian, 81. |

FINE ARTS

ILLUSTRATED GIFT-BOOKS.

The most Celebrated of Rembrandt's Etchings. Thirty Photographs and Text. Edited by Joseph Cundall. (Bell & Daldy.)

The Ruins of Pompeii. Eighteen Photographs, with a Text by Thomas H. Dyer. (Bell & Daldy.)

Summer Scenes. By Birket Foster. Photographs and Selected Poetry. (Bell & Daldy.)

THROUGH the liberality of the Trustees of the British Museum and Mr. S. Haden, himself an admirable etcher, whose works we recently examined, Messrs. Cundall and Fleming were, on Messrs. Bell & Daldy's behalf, able to produce, from as many inestimable pictures of their collections, the splendid transcripts before us. These comprise the 'Burgomaster Six'—that marvellous portrait of a man reading at a window, the room in which he stands being dark, the light reflected to his features by the page he holds, and some almost miraculous triumph in tone in the accessories of the picture. Also the famous portrait of Rembrandt with the drawn sabre—a three-quarter figure, in a cap and feather, with bushy hair and robes of half-Turkish character, such as those in which the painters of that day delighted. The impression that has been photographed here was pur-

chased at Mr. Verstolk's sale for 150 guineas, no bad price for a single print. It is now in the British Museum. Here likewise is the 'Ephraim Bonus,' taken from one of those very rare impressions of the original plate which are spoken of with the adjunct to the sitter's name as "of the dark ring," a peculiar style, which is derived from the fact that a signet on the finger of Bonus, who appears descending a flight of steps, with his hand upon the balustrade, was printed nearly black in the early stage of the work. Of this state of the plate only three impressions are known, impressions that are almost worshipped by experts. John Lutma, the goldsmith of Groningen, seated, meditating a feat in his craft, is here, with a constant smile on his face, and in one of the quaintest of thoughtful attitudes, such as none but artists of Rembrandt's calibre venture upon. The rare 'C. Anso,' a stout Anabaptist minister, with his hand upon a book and seated at table,—a wonder in rendering of textures, character and lighting,—is here; also 'The Jewish Bride,' which Mr. Le Blanc called 'The First Wife of Rembrandt'—another marvel of its kind as among the etchings of the portrait class. 'Rembrandt Drawing,' a face of extraordinary power, withal very melancholy; Van Copenol, the writing-master, looking just such a man as could teach the calligraphic art when it was really enjoyed in a fashion of which we have no idea;—and that production of the most witching craft, 'Uytendogaert the Banker,' at which one can never look long enough to be satisfied with its ineffable beauty, are distinguishable where all are noteworthy. Among the landscapes is 'The Three Trees,' in its order an unrivalled piece of tone. We would fain have had more of this class, if it were possible to spare any from other sections of the book. Among the dramatic subjects is 'Dr. Faustus with the Magic Mirror,' one of those astonishing displays of chiaroscuro by which the art has been enriched; 'Haman and Mordecai'; the unfinished 'St. Jerome,' which in its subject only reminds one of Albert Dürer; 'The Death of the Virgin'; 'The Descent from the Cross,' original of the picture at Munich; 'Christ healing the Sick'; the 'Hundred Guilder Piece,' so styled because the etcher never sold an impression from the plate at a lower rate than about eight guineas; the noble design of 'The Resurrection of Lazarus,' probably one of the finest, as it is certainly among the most impressive, representations of the subject; and the inimitably wealthy 'Angel appearing to the Shepherds,' an unchallengeable transcript of a night landscape, must suffice for our applause. These will not, however, suffice for the reader's delight.

The literary value of this book is considerable; this is due to the fact of its containing a well-selected series of notes on the most recently obtained facts of the artist's biography. It is now known, thanks to Dr. Scheltema, of Amsterdam,—who has done for Rembrandt what Mr. Weale and others have so fortunately effected for Memling, and Dr. Woltmann and Mr. Wornum are doing for Holbein,—that half the popular stories about Rembrandt are fictions. He was not born in a mill, did not marry a peasant-girl, was not a sot, or an ignoramus, or a miser; and, lastly, he died not rich, but in comparative poverty. It is one of the great merits of this work that, whereas the etchings of Rembrandt when sold obtain such enormous prices as we have quoted, it contains not only fac-similes of unquestionable value, for the most part copies of renowned impressions, but that, even with the superb setting, the cost is absolutely trivial in comparison. The photographs have been successful to a

marvel: witness the luminosity of that most luminous, most varied 'Angel appearing to the Shepherds.' The binding of this volume, except so far as relates to a needless mixture of styles in ornament, is very beautiful.

The object of Mr. Dyer's volume is to give the ordinary reader a good general idea of Pompeii. To this end the photographs are the more effective means. The author took, he tells us, the substance of his text from the well-known work which was originally published by the Society for the Diffusion of Entertaining Knowledge, and has woven with the materials thus readily obtained some results of later researches. It would be hard indeed to furnish a better key to the general aspect and character of recent Pompeian excavations than is to be found in the second photograph, and the transcript which succeeds it, before us. The text opens with a brief description of the present state of the site and its buried remains as they return to light under the spade. The history of the city, brief as it is, follows next, and is supplemented by those most dramatic letters of Pliny the Younger, which so admirably detail its ruin, and are among the most interesting as well as complete accounts of natural catastrophes and civic desolation. The third photograph may be received as the apt and almost needful sequel to any new issue of Pliny's letters. It gives the columns standing, some with their highest, some with their lowest frustra; the trees of long-succeeding generations rise like these shafts, and burgeon in familiar suns, the light of which, do all we will, falls ghastly and strange among four square inclosures that were once men's houses or public places of labour and delight. Several among the photographs to this book lack some of that clearness and brilliancy which are the most valuable qualities of photography, and render it most fit for use in illustrating books. This may be due to the nature of the effects of light chosen for the subjects, as in the view of the Basilica, the negative for which was taken at about noon in the day, and was probably too long exposed to the light. The result is spotty; the shadows are heavy, and rather opaque. On the other hand, the 'View near the old Baths' is brilliant with sunlight, and admirably serviceable as a diagram of a portion of the city. The 'Street of the Tombs' is extremely rich in tone, and powerfully effective.

As might be expected, some of the interest of this charming book is derivable from its illustrations of decorations and furniture in detail. The latter appear in many woodcuts, the process of making which has also been employed here for architectural and general purposes. A photograph from a mosaic fountain, like that which may be found in the South Kensington Museum, and among the most curious of its relics of antiquity, describes with great good fortune one of the most necessary articles of Pompeian furniture. The wall-paintings of the houses are not only displayed here by means of wood-cutting, few of the examples of which are, we believe, original (they are not less serviceable on this account), but by photography. A detail of the building art in Pompeii is to be found in a photograph of 'The House of Holconius,' where the columns are seen to have been built up with a brick core, and stuccoed over, exactly as is now done by a much-abused process. In this house was found the valuable picture representing the finding of Ariadne by Bacchus, of which a photograph gives a clear idea: the design, although it was probably common to a hundred such decorations, is very spirited in conception, and executed with much of that technical felicity which results from the thorough train-

ing of a school of artists, through several generations, and is now most happily illustrated by our French neighbours. The "frescoes" in the house of Sicius, a ruin that was excavated in 1851, and is remarkable for its paintings,—give a most effective notion of the manner of wall-painting employed at Pompeii. One of these "frescoes" is among the most important of antique paintings; taking it with its companions on the same wall, we have an illustration of extraordinary value in the history of Art. There are other not less important pictures in the house of Holconius, not transcribed here. The peristyle of the house of Lucretius—one of the few to which their owners' names can with certainty be ascribed—testifies, as do almost all the other views of interiors before us, to the abundant use of stucco by the citizens in South Italy, a practice which has its right as well as its wrong side in architecture. The atrium which is attached to this part of the structure in question, deserves elaborate consideration by students, and has peculiar interest from the presence of the house-fountain, as seen in the view, which comprises the statue of Silenus, other figures and paintings. "Frescoes" in the house of Holconius are noteworthy in reproduction here, as two capital heads of Bacchus and a Faun, also 'Mars and Venus,' a spirited production, of inestimable value, one of the best remaining antique pictures, and probably not far inferior to the 'Achilles dismissing Briseis,' which was found in the house of the tragic poet at Pompeii, but is not represented here; the former surpasses 'The Judgment of Paris,' another picture here given; the last is valuable, as showing the ordinary decorative art of the Romans. On the whole, and within its proper limits, we can cordially commend this entertaining book.

Mr. Birket Foster's art, to which we owe the third of the splendid volumes on the list above, seems made, or at least purposely cultivated in prettiness, vivacity, and "tastiness," to be employed in the way which is now before us. From the point of view that is to be assumed by the critic of "gift-books" as a class,—albeit that class comprises some productions which, in their artistic and literary characters, are solid and likely to be durable,—the pictures before us are perfectly fascinating: even from a higher stand-point, much more may be said in respect for the very skilful and dextrous artist of such landscapes as are here named: 'Cottage near Huntingdon,' with aptly-chosen verses from Crabbe, and, better still, 'Sweet Water Lane,' a brook and road, with sheep in a meadow. 'Haymaking,' a well-known picture, shows water-meadows, low hills, and tall poplars. We differ from many in regard to Mr. Foster as a painter of landscapes, or of pictures in which the figures are dominant; we prefer the former among his works. Those who agree with, no less than those who dissent from, our opinion, will be equally pleased with this pleasant drawing-room table-book; fifteen photographs will gratify all the artist's admirers.

WESTMINSTER ABBEY.

31, Spring Gardens, Nov. 29, 1886.

MAY I be allowed to say a word in explanation, and in some degree in correction, of the notice which appeared in your columns relative to the reredos of Westminster Abbey? The work in hand is the translation, if I may use the term, from plaster into marble and alabaster of the reredos worked, in 1824, by Bernasconi, from the shattered and mutilated fragments of the ancient work which were discovered on the removal of the altar-piece of Queen Anne. In the central space over the altar it was intended to insert, under the series of fine canopies which overshadowed it, a mosaic picture, executed by Dr. Salviati from the

cartoon of Messrs. Clayton & Bell. On removing, however, these plaster canopies, I found that there had been no ancient authority for them, and that the whole central space had been occupied by a large oblong recess, surrounded by a very simple moulding. This was probably intended for the reception of a precious retabulum of the same nature, though not identical with that still preserved in the Abbey. As we are making the reredos an absolute reproduction (as far as we can find it out) of the ancient one, a plain recess will occupy the place of the fine central canopy and the space below them; and it is at present under consideration whether to fill this with a rich retabulum containing Salviati's mosaic, or to extend the mosaic-work to the limits of the recess. Meanwhile, the architectural portion of the work will be steadily proceeded with. GEO. GILBERT SCOTT.

FINE-ART GOSSIP.

THE General Meeting of the Society of Painters in Water Colours took place on the 30th of last month, the sixty-fourth anniversary of the institution, and was partly occupied by the election of officers. Messrs. F. Taylor, W. C. Smith and W. Callow were severally re-elected to the positions of President, Treasurer and Secretary. Messrs. Holland, F. W. Burton, C. Haag and P. Naftel form the Committee of Arrangement for the approaching Spring Exhibition. The vacancy in the list of Members caused by the death of Mr. T. M. Wright has been most satisfactorily filled up by the election of Mr. F. Walker from the list of Associates.

Mr. Doo has sent in his resignation as an Academician Engraver in the Royal Academy, thus causing another vacancy in the list of Members and another Retired R.A.-ship.

Referring again to the Exhibition of Sketches and Studies by Members of the Society of Painters in Water Colours, we cannot avoid directing attention to the inequality of the number of works displayed by the respective artists. In the best interests of the Society, we venture to suggest that some limit should be placed to the number of contributions furnished by individual members. The public would doubtless hail with satisfaction an increase on the part of some who are sparsely represented, and tolerate a diminution on that of others who are redundant contributors. If some restrictive rules were adopted which offered to each a fair opportunity for exhibiting a reasonable number of works on the walls of the Gallery, probably space might be found for an additional number of Associates, who would impart variety and give increased force to the exhibitions. While on this subject, we may as well quote from Mr. Stephens's 'Memorials of Mulready' the result of a friend's analysis of old Catalogues of the Exhibitions of the Society of Water-Colour Painters, showing what some of the most famous members did of yore. John Varley sent, between the opening of the series of exhibitions in 1805 and his ceasing to contribute, in 1843, not fewer than 737 drawings; in 1809 he exhibited 60 drawings. Copley Fielding, between 1810 and 1854, contributed 1,670 works; in 1824 he sent 54 works. David Cox displayed, between 1813 and 1854, 788 drawings. The contributions of W. Hunt were on a similarly large scale of numbers.

Having within the last two months inspected, for the second time, the works of restoration now going on in the chantry of Bishop Oldham, at Exeter Cathedral, as directed by the authorities of Corpus Christi College, Oxford, we regret to observe another instance of the impossibility of fairly "restoring" such ancient works. Nothing can be more obvious than the fact that the persons employed are doing their best in this matter, and that their competence to the task is unusual,—which is not saying much, of course. If we desired to have a new chantry in place of the old one, or a pseudo-Gothic structure of any sort, to no one would we more gladly apply than to the careful craftsmen who have almost finished the tomb-place of Bishop Fox's co-founder in Oxford. In more senses than one it is right to say that this work is "finished"; finished it is indeed, and will doubt-

as, when the public are admitted to see what has taken place, please many an eye with the brilliancy of its colouring; and the sharply-cut faces of the stones will be sufficient to make the chantry look as good as new. What has really been done, however, is probably more thoroughly mischievous in the woful treatment of other monuments in the same cathedral, such as that of the Carews, where the very statues were tooled all over, and, if that were not bad enough, being originally highly-chromatized Elizabethan monument, tinted of a "stone colour," and, finally, as to the figures and details, repainted in oil (!), in a manner which showed the operators to be utterly blind to colour "in Art, otherwise no such vulgar daubing befell the tomb in question would have been tolerable to them. The Courtenay monument has flared even more severely than that of the Carews. Returning to the Oldham chantry, we have to state that the surface has been entirely polished over with great care and with uncommon skill, but with fatal effect. The decorative carvings of the monument in the chantry have suffered dreadfully at all in the recent treatment; they have been as fairly cleaned as possible; it would have been better to let them alone. Now comes the mischief which it is too late to remedy. The figure of the bishop was, of course, originally coloured in accordance with the Art of that day, that is, in harmonious tints, and with the wise use of gold, to a result which is inconceivably different from that now in progress at Exeter, where only black, unbroken, and, in their effect, tawdry colours have been applied.

We read in some of the Parisian papers that a project is on foot for building, hard by the Arc de Triomphe, a cathedral, on a scale no less than those of the Middle Ages. Which of us, or of our children, will live to see it finished?

Folly seems to cleave to the door-posts of the place at Munich, so classically built by Von Lenze. There, in strange contrast with the savage Ghibelline frescoes on the walls, was planned the pleasure-house of Donna Lola Montes, whose odour, hung with guipure, may be said to have lost a foolish King his throne. Wiser men, however, than King Louis have lost their senses to ratify a favourite's whimsies. This time the disease has taken the form of a Wagner-mania, the reigning monarch, as the composer's "kingly friend," having commanded Herr Kaulbach to paint a series of pictures on scenes from the mighty master's operas, beginning with 'Tristan,' the glorious and successful!

MUSIC AND THE DRAMA

SACRED HARMONIC SOCIETY. Exeter Hall.—Conductor, F. COSTA.—NEXT FRIDAY, December 14, Mendelssohn's 'ELIJAH'—Subscription Concert. Principal Vocalists: Madame Harrison, Miss Robtine Henderson, Madame Sainton-Dolby, Mrs. Julia Derby; Mr. Sims Reeves, Mr. Chaplin Henry, and Mr. Bentley. The Band and Chorus, the most extensive available in Exeter Hall, will consist of as usual, nearly 700 performers. Numbered Stalls, 10s. 6d.; Reserved Area, 5s.; Unreserved, 3s.—THE MESSIAH Christmas Subscription Performance on the following Friday, December 21.—Tickets for either of the above could be applied for at once.

NEW PUBLICATIONS. INSTRUMENTAL.

BEFORE the year—now very old—dies, let a clearance be made of such new musical publications as will remain unnoticed.

One of the most important of these is a *Piano-forte Quartett*, Op. 2, by Ebenezer Prout, the work which gained the first prize awarded by the Society of British Musicians, 1865." Mr. Prout writes in a workmanlike fashion, but without any great affluence of ideas. The opening phrase of the *Allegro con brio* might not have been, save for 'The Wedding March' of Mendelssohn. The whole movement reveals traces of the same master's influence. This seems, for the time being, an inevitable characteristic of the writers of Young England; but it is one richer in grace and health and romances, than the dreary, dreamy, Schumannic ropensities of the writers belonging to Young Germany, resulting (to quote Gray) in

Passages which lead to nothing.

The *Andante con moto* is based on an elegant theme, nicely wrought. The *Scherzo* is more com-

monplace, and briefly developed. The *Finale* (and this implies no small credit to the writer, seeing that the last movement of a work is the one most difficult to produce) is, to our thinking, the best of the four divisions of the Quartett. The theme announced by the violoncello is broad and vigorous, the episodes are well devised, and the entire movement is conducted with spirit to its close.

Here is a work by one who is obviously a serious thinker, *Three Preludes and Fugues, with a Toccata, for the Pianoforte*, by F. W. Hird (Novello & Co.). We have not seen anything more solid and genuine from an English hand for a long time. The Preludes may be commended for their flowing grace and the distinctness of their ideas; the subjects of the Fugues, too (which are all in three parts), are very good; and they are carried through with a quiet mastery making it evident that the writer has studied the best models, without mechanically reproducing them, as young writers are apt to do when they would fain be scientific. Praise may be given to a *Berceuse*, by the same author (Hutchings & Romer),—a four-bar theme, varied in the serious style. With the view, however, of producing a lulling strain, Mr. Hird's brief melody is somewhat too monotonous. Within a compass so very narrow it was unwise to repeat one bar twice. The variations are anything but easy. We shall look with interest and expectation for any further music that bears Mr. Hird's signature.

Idylle, Op. 63, and *Romance*, Op. 64, by E. Silas (Schott & Co.), are two very elegant movements, worthy the attention of any pianist. The strength of this composer, so far as we know his works (not having heard his late Prize Mass), lies in his instrumental music, which is always well made, never vulgar, and, though without extraordinary brightness, rarely dull. Here the player will find sufficient difficulty and *finesse* to attract his attention without overtaxing his powers. The 'Idylle' may be described as the more characteristic piece of the pair. With these may be mentioned, also approvingly, "A la Chasse," *Allegro Brillant*, par Wilhelm Schultes, Op. 38 (same publishers), lively, joyous, and the animation well sustained.—"The Crystal Streamlet" and "Serenity," a *Reverie*, are by W. F. Taylor (Sinclair & Co.). The first of these slight pieces might hardly have taken its leading figure had not the *finale* of Mendelssohn's Second Pianoforte Concerto suggested it. "Serenity" is perhaps, of the two, the more individual.

ADRIEN FRANÇOIS SERVAIS.

To the musical necrology of the year must be added a very distinguished name, that of Adrien François Servais, the Belgian violinist, by many persons rated as the greatest player on his instrument who has appeared in our, if not in any, time. He was born at Hal some fifty-nine years ago, of parents in very humble circumstances. His father, M. Féis tells us, was a poor church-musician. The boy, who early gave signs of real genius, began life by studying the violin. On hearing Platel, a violoncellist of some note at Brussels, his purposes took a new course. He would be a violoncellist, too; and having gained admission to the Conservatoire at Brussels, where Platel was a Professor, unable to pay for conveyance, during one whole year, we are told, he trudged backwards and forwards three times a week on foot between Hal and the capital (no inconsiderable distance), with his violoncello slung at his back. Such indomitable energy is sure to find its reward:—that of Servais brought him to a perfect command over strings and bow. But this brilliant mastery, so far as we recollect his playing, was impaired by a certain violence and eccentricity of manner which disturbed the pleasure of the hearer. The deepest expression, the most vehement passion, are still consistent with grace and composure. It should be added, however, that we heard him at a time when the noxious influences of Paganini's personality had not yet become extinct, and when freaks and gesticulations were in fashion, being thought to attest originality and sincerity; and since years have elapsed since this impression was made, it is possible that with Time these extravagancies may have been, in some degree, toned down. After

having made the grand tour of the European capitals with success everywhere, Servais married in Russia, but made his chief residence in Belgium, being attached as a Professor to the Conservatoire at Brussels; in which capacity he formed many excellent pupils.

During a last artistic visit to Russia the climate laid hold of him, and he returned to Belgium, in April last, to die slowly. He was buried in his native place, and with all those funeral honours which our neighbours delight in. The town, we are told, put itself into mourning. A numerous procession of townsmen, friends and artists of all countries attended him to the grave. His violoncello, covered with crape, was borne behind the body by four of his pupils, and six eulogies, the first by M. Féis, were spoken in the cemetery.

NEW ROYALTY.—Another burlesque by Mr. Burnand has been produced, on the subject of Mr. Douglas Jerrold's popular melo-drama, 'Black Eyed Susan.' Mr. Burnand, according to his recent custom, introduces it with a long title, apparently thinking, notwithstanding the Shakespearean protest to the contrary, that "length is wit." Thus it runs: 'The latest Edition of Black Eyed Susan; or, The Little Bill that was Taken Up.' Well, we suppose we must accept this for fun, in default of something better. The new burlesque is well illustrated with scenic accessories and stage appliances; and, with a bevy of young ladies to represent smart seamen, is calculated for popularity. The parodies are numerous, both of scenes and songs; many of the latter were encored. A situation from 'The Long Strike' is introduced, and other liberties taken with the argument, which are now allowed in such pieces as this, albeit, by travelling out of the record, they vitiate the production as the caricature of a particular drama. Miss M. Oliver, as *Black Eyed Susan*, was, of course, all that could be desired; and we may add, that Miss Rosina Rance was especially saucy as *William*. Mr. Danvers made a great part of a subordinate character,—that of *Dame Hailey*, William's aged mother, which was evidently written-up for the purpose. It was remarkably grotesque.

SADLER'S WELLS.—Mr. Boucicault's comedy of 'London Assurance' was revived on Monday, and very well acted. Miss Marriott was *Lady Gay Spanker*, and Miss Leigh Grace *Harkaway*. Both realized these characters with skill and effect, and were recalled.

MUSICAL AND DRAMATIC GOSSIP.

WE learn, without surprise, that the conductorship of the Philharmonic Concerts has, by unanimous consent, been awarded to Mr. W. Cusins. A more amiable gentleman, a more honestly intentioned member of the English musical profession than he, could not be named; but it remains to be proved how far he commands experience, authority and independence of coterie influence, to reinstate the dilapidated fortunes of an establishment which, after having been one of the leading musical institutions of Europe, has now, in whatsoever aspect it be viewed, sunk to a position below mediocrity.

The programme of Saturday's *Crystal Palace Concerts* included an *Offertorium* by Schubert, and an *Overture*, in the Italian style, from the same source; both new to England, if, indeed, they were ever performed in their own birthplace. How strange (and not without its sadness) would it be, if the fame of the composer's more important works, neglected during his lifetime, was to be made not in his own country, but in ours. These odd turns of fate will happen. The beautiful etchings by Mr. Read, of Salisbury, some thirty-five years ago noticed in the *Athenæum* (and, so far as we can recollect, nowhere else in England), made their way to the collection of that earnest lover of Art, Goethe, at Weimar, and drew from him a letter of warm and discriminating admiration, which must have surprised the little-known artist to whom it was addressed.—At Monday's *Popular Concert* Schumann's *Pianoforte Trio*

in D minor was introduced for the first time, with Mr. Halle at the pianoforte.

It is said that Dr. Wylde has purchased the German Bazaar in Langham Place, with the view of building a music-school there, and, in connexion with it, a concert-room and a theatre.

It will be seen at a glance that, by a slip of the pen in our last number, the catalogue of the music given at St. Andrew's, Wells Street, on the Saint's Day, was *ante*—in place of its being, as it should have been, *post*-dated.

An opera by Herr Rheinberger, Court Organist at Munich, on the story of Calderon's 'Magician' (?), has been represented there, it is said, with great success: the same composer has completed a symphony with the title 'Wallenstein'.—M. Rubinstein is busy over a new Russian opera.

The rest of our musical talk this week chances to be concerning Parisian matters.

We can add something from personal experience to our trusty Correspondent's account of the new opera by M. Ambroise Thomas, and—what is always pleasant—can conscientiously say as much in praise of the music of 'Mignon' as he did. We find it an advance on the two former works by its writer which hold the stage, 'Le Caid,' and 'Le Songe d'une Nuit d'Été.' Those, though cleverly made, have always struck us as liable to the charge of containing far-fetched devices, and a certain dryness of melody, quite apart from that generic piquancy of style which distinguishes the music of Boieldieu, Hérold, and M. Auber. So, too (to exemplify our meaning), save in his 'Les Mousquetaires,' and certain portions of 'La Juive,' Halévy was dry. In 'Mignon,' greater freshness of thought and frankness of construction are to be recognized. Two of the numbers, the heroine's Swallow Song, and *Philine's bravura* in the second act, seize the ear, as no previous *motivi* by their writer have done. The music is throughout artistically made, and the opera, if compared with two of the last ones which have been most popular at the Opéra Comique, the languishing 'Lalla Roukh' of M. David, and the coarse and blustering 'Lara' of M. Maillart, must be felt to merit a higher place and a longer life than either. We cannot, however, so unhesitatingly indorse our friend's admiration of the *libretto*. The story is strained to the utmost; with little or nothing of Goethe in it, save the idea of the central figure, which is fairly well wrought out, and the names of her playfellows. MM. Barbier and Carré dealt far more respectfully by the philosopher-poet's 'Faust'; but then they had there to deal with a ready-made drama, whereas, in this case, merely an episodic figure and incident in a novel had to be arranged in a dramatic form. As regards the actors, Madame Galli-Marie deserves all praise as the heroine, though the style of her sentiment and action was indicated in her *Kaled*, in the 'Lara' aforesaid. Madame Cabel is, as of old, brilliant, dashing, but often incomplete. As an acting part, that of *Philine* suits her entirely. M. Achard, the *Wilhelm*, is a thoroughly good singer, more sympathetic than French tenors are usually. The scenery is beautiful. 'Mignon,' in short, may be rated as a real success.

To the book of anecdotes concerning 'L'Africaine,' which will make a curious volume among musical *ana*, another page has just been added. Signor Naudin, whose engagement at the Grand Opéra has terminated, has been replaced, in the part of *Vasco di Gama*, by M. Villaret. This gentleman has been freely handled by certain critics as having departed from the example of his predecessor, by making certain alterations of the text. As rejoinder, Meyerbeer's executors have "put in" a letter, from which it appears that the astute and provident master had himself directed these changes to be made, "in case M. Villaret should come to sing the part." Evidently 'L'Africaine' was his favourite opera, as the one which had cost him the most time and trouble.

M. Reyer, hitherto best known as the composer of one or two operas, has succeeded M. d'Ortigue, in the important post of critic to the *Journal des Débats*; and made his "throne-speech," ere commencing his task, by a review of 'Mignon.' In this, among other confessions of faith, he is pleased

to be condemnatory and sarcastic on the *libretto* of 'Fidelio,' which, he says, swamped that opera in Paris. "No French composer," says he, "would set a story which commenced with that 'ironing scene'!" What are the facts? The book of 'Fidelio' was written originally in French, and originally set by a Frenchman, Gaveaux,—a second time by Paër,—and every one has heard the anecdote, which, however, may be apocryphal, that when Paër showed his score to Beethoven, that rugged man of genius said, "I like your opera, and will set the book again!" 'Fidelio' was swamped in Paris a few years since, not because of the simplicity of the story, but because, for the sake of costume and stage-show, that simplicity was tampered with and destroyed.

Herr Joachim is carrying everything before him in Paris, as no violinist has done for many a long year. Crowds follow, and tickets rise to famine prices, wherever he plays.

Signor Pacini's 'Saffo' has been produced, as promised by M. Bagier, at the Italian Opera, with Mdlle. La Grus for heroine. The music appears to have pleased only moderately. The lady's singing is described as having been unequal; but her acting is, by some of our contemporaries, greeted with the highest praise, as something the like of which the Italian stage of Paris has not seen for many a day. Mdlle. Llanes was the *contralto*. The other evening 'Ernani' was produced, with an American *prima donna*, Mdlle. States, who is credited with a good voice. The "States" have of late years furnished a fair contingent of ladies to the opera-houses of Europe.—A lady, known on the other side of the Atlantic as Madame Jennie van Zandt, has been lately singing at Warsaw, with some popularity.

That clever but restless singer, Madame Ugalde, has composed the music of an operetta, which will be represented at Les Bouffes Parisiens. The title is 'Une Halte au Moulin.'—M. Duprato, who never seems to get beyond a certain point, has been producing a trifle, 'Le Chanteur Florentin,' at the Fantaisies Parisiennes, which is said to be agreeable. Mdlle. Peyret made her first appearance in it; a young lady from whom something is to be expected.

That excellent professor and violinist, M. Leonard, has finally decided on removing from Brussels to Paris.

A new three-act play, by M. Ponsard, with the strange title 'Galilee,' is in preparation at the Théâtre Français. Certain signs of health are beginning to manifest themselves in the Drama. The provincial towns appear disposed to amuse themselves with home-made ware, plays of native origin having been produced in small towns so far asunder as Toulon and St. Quentin. In Paris there is some attempt at making a stand against the use of free admissions, which has been carried to licentiousness. On the other hand, efforts are apparent to put down those who express displeasure alone. This is hardly fair, so long as the hired, horny-handed applause of the *claque* is allowed to annoy the honest and discriminating portion of the audience.

M. Nestor Roqueplan writes in *Le Constitutionnel* in very high praise of Mdlle. Ribelli, a young Italian lady, who has been singing in Paris, and has gone to try her fortune at the Pergola Theatre in Florence.

M. Demerseman, a flute-player of some Parisian celebrity, is dead.

M. Paris, who succeeded M. Émile Chevé, in France, as the propagator of what may be called the numerical system of teaching music, so largely discussed, died the other day.

Her Majesty's Theatre closed on Saturday. The failure of 'Oonagh' has apparently been fatal to Mr. Falconer's management. We trust that the house may re-open at Christmas for the Pantomime; but the appearance of matters at present is very discouraging.

MISCELLANEA

Sadowa or Königgrätz!—Your Correspondent "I. R. H. C." has very properly directed attention to the fact of our English writers calling that battle Sadowa which the Germans universally

name Königgrätz. He is probably not aware, however, that the battle was originally called the battle of Sadowa by the Germans themselves, and was occasionally so named in the German newspapers, until the King published a special decree ordaining that the crowning mercy of the campaign should thereafter be styled "Die Schlacht bei Königgrätz." Moreover, your Correspondent is misinformed as to the pronunciation of the word. I can answer for it that the people of Prague, at all events, pronounce the word "Sadōva," excepting, of course, the native Bohemians, who, following the Czechish spelling of Cadova, say "Chadōva." There is no reason whatever for the battle being called after the little clump of houses on the banks of the Bistritz. One might as well talk of the battle of Mylovitz, or of Neckanitz, or of Chlum, or of Horenovitz. W. B.

Meteor Shower.—Reading the quotation from Dryden's 'Hind and Panther,' alluded to by your Correspondent "X." in the *Athenæum* of November 24, it struck me that I had met with a passage in Shakespeare quite as appropriate to illustrate the meteoric shower of the 13th–14th of November. The following has rewarded my search. In 'King John' (act v. scene 2), in the scene between Lewis the Dauphin, Salisbury, &c., Lewis, in the course of his reply to Salisbury, says—

This shower, blown up by tempest of the soul,
Startles mine eyes, and makes me more amazed
Than had I seen the vaulted top of heaven
Figured quite o'er with burning meteors.

B.

Roman Antiquities.—A Roman mosaic flooring has been dug up at Salzburg, which is worthy of notice; it resembles in some measure the Roman mosaics which were here discovered a little while since, when the foundation for the Mozart monument occasioned a thorough digging, only the present mosaics lay not in such deep ground, but only one foot and a half under the surface of the earth. The place where they have been found is the courtyard of the residence of the former Prince-Bishops of Chiemees, in the Cai Quarter (*Civitas Caji*) of the town. This residence has been for some time in secular hands, and had just now been destined partly for the Chamber of Deputies. For this purpose gas-pipes were being laid, which led to the above-mentioned discoveries. The fragments laid open till now form spaces somewhat concavely pressed, the ornamentation of which consists of geometrical figures in very small coloured dice. One of these spaces shows a beautiful picture in mosaic, representing the carrying off of Europa; this composition seems to be of great artistic value, besides that of antiquity. It is framed in by drawings, in which a black heart is conspicuous. The brown, sharply-shaded bull carries its beautiful burden away so gallantly and quickly, and looks altogether so nimblefooted, that we might easily mistake him for the deer of the wood, if his fine, horned, sagacious-looking bull's head and his flying tail did not proclaim him to be Zeus changed into a Taurus. Indeed, there is such an intellectual life in this animal that you could not compare to it a common bull on our pastures. Of equally delicate conception is the figure of Europa, whose naked body is vivified, even now, after perhaps two thousand years, by a delicate, well-preserved flesh-tint, which takes a deeper shade at the rounded outlines of the bosom and the back. A grey mantle helps to raise the pale pink figure at places where otherwise it would be blended with the brown colour of the animal. Her outstretched right arm takes a firm hold of the bull's horn, while the left, as seeking an equilibrium and implying a wish to escape, holds up the corner of the mantle. The right leg is chaste wrapped by the mantle, which, however, allows the perfect shape of the limb to appear; the left leg is stretched, but clings to the other timidly. The head of the beautiful figure is unfortunately lost, and there seems little hope of its ultimate recovery. The whole picture measures about one foot and a half in length, and one foot in height. The small mosaic stones appear to be laid in a cemented substance which covers the ground.

TO CORRESPONDENTS.—H. M.—T. A.—D. S.—P. A. D. received.

PRESENTS FOR CHRISTMAS AND THE NEW YEAR.

S. & T. GILBERT'S SELECT LIST of VALUABLE BOOKS, chosen from their extensive Stock, and well worth the attention of all Book-buyers in search of really good Works on liberal terms, either for presentation, reference, or general reading.

To insure the exact Books and Bindings described it is respectfully requested that application be made direct to S. & T. GILBERT, who have incurred the expense of placing the List before the Public.

Note the Address—No. 4, Copthall-buildings, back of the Bank of England, London, E.C.

1. A TRIUMPH OF FLORAL TASTE.—Some of My Bush Friends in Tasmania, by Louisa Anne Meredith, with 14 exquisitely Coloured Plates in Chromo-lithography, 14 chase borders, and 100 pages of illustrative text, folio, handsomely bound in cloth, gilt edges, 10s. 6d.; pub. at 12s. 2s.

2. BETTER WORTH THE MONEY.—No Shilling Shakespeare can possibly be preferred when one can have the Globe Edition, with a carefully compared and corrected Text by two eminent Cambridge scholars, W. Aldis Wright, M.A., and W. G. Clark, M.A., type out of the best, made expressly for the book, in cloth binding, for only 2s. 11d.; postage 8d. Ask for "The Globe Edition of Shakespeare."

3. ANECDOTES FOR THE YOUNG.—Animal Sagacity: a Selection of Remarkable Incidents illustrative of the Sagacity of Animals, in Prose and Verse, edited by Mrs. S. C. Hall, very strikingly illustrated by Harrison Weir and others, gilt cloth, 4s. 2d.; pub. at 5s.; extra gilt cloth, gilt edges, 6s. 3d.; pub. at 7s. 6d.; postage 8d.

4. INDISPENSABLE TO BIBLICAL RESEARCH.—Dr. Kitt's Cyclopædia of Biblical Literature, New Edition, revised and enlarged, edited by the Rev. W. Lindsay Alexander, D.D., with the assistance of numerous Contributors, profusely illustrated with Engravings, in Wood and Steel, 3 vols. thick royal 8vo. cloth, 3s. 8s.; pub. at 4s. 4s.

5. USEFUL STATISTICS.—The British Almanack and Companion of the Society for the Diffusion of Useful Knowledge for 1867, edited by Charles Knight, with Woodcuts, post 8vo. cloth, 3s. 4d.; pub. at 4s.; postage 4d.

6. ANOTHER TREAT FOR CHILDREN.—A Sequel to the immensely popular book Ministering Children, by Maria Louisa Charlesworth, with title and 24 engravings engraved on steel, post 8vo. cloth, 4s. 2d.; pub. at 5s.; postage 6d.

7. HANDSOME GIFT-BOOKS.—

Twenty-nine Illustrations by John Everett Millais, designed for 'The Cornhill Magazine,' with Extracts descriptive of each Picture, cloth elegant, 8s. 9d.; pub. at 10s. 6d.

Twenty-five Illustrations by Frederick Leighton, A.R.A., designed for 'The Cornhill Magazine,' with Extracts descriptive of each Picture, cloth elegant, 8s. 9d.; pub. at 10s. 6d.

Twenty-seven Illustrations by Frederick Walker, designed for 'The Cornhill Magazine,' with Extracts descriptive of each Picture, cloth elegant, 8s. 9d.; pub. at 10s. 6d. Postage 1s. 4d. each.

8. THE SUPPRESSED VOLUME.—POEMS and Ballads by Algernon Charles Swinburne, fcap. 8vo. cloth, 7s. 6d.; pub. at 8s. 6d. "This book, thus dealing with the desire of the flesh should have been denounced as profligate because it does not paint the outside of the Sodom's apple of like colour of the ashes that it shows within, says little indeed for the thoroughness of current criticism."—*Examiner*.

9. A LIBRARY IN ITSELF.—The Penny Cyclopædia of the Society for the Diffusion of Useful Knowledge, the Articles contributed by the most Eminent Authors, complete, with the Supplements, profusely illustrated with Wood Engravings, 30 vols. bound in 17, cloth, 12s.; pub. at 12s. This valuable book is fast going out of print.

10. MILTON AND DORÉ.—Milton's Paradise Lost, illustrated with 50 large and splendid designs from the Master Pen of Gustave Doré, with Notes and a Life of Milton, by Robert Vaughan, D.D., in 1 large folio vol. cloth, 4s.; pub. at 5s.; or best morocco, extra gilt, 8s.; pub. at 10s.

11. LEECH'S BEST SKETCHES.—Punch, a complete set, from its commencement in 1841 (Leech's first sketch appearing in August of that year) to 1860, with thousands of humorous Wood Engravings by John Leech, Richard Doyle, John Tenniel, and others, bound in 30 vols. 4to. imitation half morocco, gilt edges, 6s. 10s.; pub. at 11s. 12s.

12. A CHARMING BOOK FOR GIRLS.—Aunt Judy's Christmas Volume, edited by Mrs. Alfred Gatty, containing Tales, Poetry, Natural History, Emblems, Charades, Proverbs, &c., with 36 illustrations by Morten and others, gilt cloth, 4s. 2d.; pub. at 5s.; postage, 8d.

13. ENGLISH LIFE AND SOCIETY.—The late John Leech's Pictures of Life and Character, being a Selection from Punch of the most celebrated sketches by this lamented Artist, comprising hundreds of humorous illustrations, 4 vols. in 1, cloth, 12s.; pub. at 12s. 12s. 6d.; pub. at 21s. 2s.

14. THE MUCH STUDIED PHILOSOPHER.—John Stuart Mill's Principles of Political Economy, People's Edition, crown 8vo. cloth, 4s. 2d.; pub. at 5s.; postage, 6d.

John Stuart Mill's Considerations of Representative Government, People's Edition, crown 8vo. cloth, 1s. 8d.; pub. at 2s.; postage, 4d.

John Stuart Mill's Essay on Liberty, People's Edition, crown 8vo. cloth, 1s. 2d.; pub. at 1s. 4d.; postage, 3d.

15. GOOD MANNERS.—The Habits of Good Society: a Handbook of Etiquette for Ladies and Gentlemen, with Hints and Anecdotes on Social Observances, &c., and on the Art of making Oneself Agreeable, post 8vo. cloth, gilt edges, 2s. 11d.; pub. at 3s.; postage, 4d.

16. THE OLD FAVOURITE.—Peter Parley's Annual for the New Year, full of amusing and instructive Stories, with Eight original Pictures, printed in Oil Colours, and upwards of 200 first-class Engravings, gilt cloth, gilt edges, 4s. 2d.; pub. at 5s.; postage, 7d.

17. A MARVEL OF CHEAPNESS.—A Cyclopædia of Exhibited Machinery represented at the International Exhibition, by D. K. Clark, Esq., 31 Wood Engravings and 39 Illustrative Engraved Plates of large size, imperial 8vo. cloth, 10s. 6d.; pub. at 11s. 2s.; postage, 1s. 7d. "Upwards of 1,100 machines and portions of machines are accurately noticed or described in detail; and the work is valuable as a text-book for Students and Engineers."

18. FOR THE EPIQUEURE and the INVALID.—Dainty Dishes: Receipts collected by Lady Harriett St. Clair, 879 valuable Receipts, with Index, crown 8vo. cloth, 6s. 3d.; pub. at 7s. 6d.; postage, 8d.

In special number of Cookery Books in existence, Lady Harriett St. Clair's volume is well worth buying, especially by that class of persons who, though their incomes are small, enjoy out-of-the-way and recherché delicacies."—*Times*.

19. A CURIOUS AND QUAIN VOLUME.—The History of Signboards, from the Earliest Times to the Present Day, by Jacob Larwood and John Camden Hotten. Coloured Frontispiece and 100 Curious Illustrations on Wood, over 500 pages, post 8vo. cloth, 6s. 3d.; pub. at 7s. 6d.; postage, 8d. "The compilers have evidently been actuated by a genuine love and enthusiasm for their subject, and therefore the seldom fall of being entertaining as well as instructive."—*Times*.

20. THE BRILLIANT HISTORIAN.—The Complete Works of Lord Macaulay, New Library Edition, edited by Lady Trevelyan, comprising History of England, Essays, Miscellaneous Essays, Speeches, Lays and Poems, with Portrait, 8 vols. 8vo. cloth, 4s. 7s. 6d.; pub. at 5s. 8s. Superior tree marbled, calf gilt, 7s.; pub. at 8s. 8s.

THE EDITION for the PEOPLE.—

Macaulay's History of England, from the Accession of James the Second to the Death of William the Third, 4 vols. crown 8vo. cloth, 12s. 6d.; pub. at 16s.; postage, 1s. 6d.

Still further Reduced in Price.

21. A MASTERPIECE OF ILLUMINATION.—The Sermon on the Mount, illuminated by W. & G. Audley, Architects. Chromo-lithographed by W. R. Tymms, with an Illustration in the most perfect style of Chromo-lithography, after the picture by Charles Kohl.

The Work contains 'The Sermon on the Mount,' St. Matthew, chapters v. vi. vii. It is a series of 27 full-page Illustrations, gorgeously executed in gold and colours, all of which are entirely different in design and treatment, with an illustration from a Picture painted expressly for the Work by one of the first Artists of the day. The size of the Work is 22 by 12 inches.

Artist's Proofs, on finest extra thick paper, bound in full morocco (only 510 printed), published at 12s. 12s., reduced in price to 6s. 6s.; now reduced to 5s. 5s.

Proofs on finest extra thick paper, bound in extra cloth, richly gilt (only 210 printed), published at 10s. 10s., reduced in price to 4s. 14s. 6d.; now reduced to 4s. 4s.

General Copies on thick paper, handsomely bound in extra cloth gilt (only 300 printed), published at 8s. 8s., reduced in price to 3s. 13s. 6d.; now reduced to 3s. 3s.

"S. & T. GILBERT are much pressed for room, in consequence of their accumulating stock; and this is the only reason for the further reduction in price of this elegant work."

22. SPECIMENS OF MODERN ART.—Idyllic Pictures, a series of choice Drawings by Barnes, Paul Gray, Pinwell, Houghton, Litch, Edwards, Small, Thomas, and others, with appropriate Verses, many published for the first time, small 4to. cloth elegant, gilt edges, 8s. 9d.; pub. at 10s. 6d.; postage, 1s. This is really a very pretty volume.

23. CELEBRATED FRENCH AUTHORS.—Half-Hours with the Best French Authors; being Short Passages from the most Celebrated Prose Writers of the 16th, 17th, 18th and 19th Centuries, translated into English, with 30 beautiful Wood Engravings from Designs by Émile Bayard, royal 8vo. cloth, gilt edges, 8s. 9d.; pub. at 10s. 6d.; postage, 1s.

24. MARVELLOUSLY CHEAP VOLUME.—Tables of Interest, enlarged and improved, calculated at Five per Cent. from 1s. to 365s., from 1 day to 365 days, with Tables for Calculation on Simple and Compound Interest, View of Jewish History Five per Cent. &c., by Joseph King, 7th Edition, 8vo. cloth, 6s. 3d.; originally pub. at 11s.; postage, 11d.

25. A DECIDED GEM.—Illustrated Edition of Jean Ingelow's Poems, with nearly 100 beautiful Vignettes, engraved on Wood from Original Drawings by Pinwell, Wolf, Houghton, and others, 4to. cloth elegant, 17s.; pub. at 21s.; or handsomely bound in morocco, 12s. 12s.; pub. at 21s. 2s.; postage, 1s. 4d.

Still further Reduced in Price.

26. THE LATE DAVID ROBERTS'S GREAT WORK. Popular Edition. Sketches of the Holy Land, Syria, Idumea, Arabia, Egypt, and Nubia, by the late David Roberts, R.A., from the Lithographs by Louis Haghe, with Historical and Descriptive Notes and an Introduction, View of Jewish History by the Rev. Geo. Croly, L.L.D., 250 plates, executed in the highest style of double-tinted lithography. The 250 Prints, of which the work consists, comprise the Holy Land, Syria, Idumea, Arabia, Egypt, and Nubia.

6 vols. in parts paper wrappers, pub. at 7s. 7s., reduced in price to 2s. 12s.; now reduced to 2s. 10s.

6 vols. cloth elegant, pub. at 10s. 10s., reduced in price to 4s. 4s.; now reduced to 3s. 10s.

6 vols. bound in 3, cloth elegant, pub. at 9s., reduced in price to 3s. 10s.; now reduced to 3s. 10s.

6 vols. bound in 3, half morocco, extra gilt, pub. at 10s. 10s., reduced in price to 4s. 4s.; now reduced to 4s. 4s.

6 vols. bound in 3, whole morocco, elegant, pub. at 11s. 11s., reduced in price to 4s. 14s.; now reduced to 4s. 4s.

"S. & T. GILBERT are much pressed for room in consequence of their accumulating stock; and this is the only reason for the further reduction in price of this beautiful work."

27. MONUMENTS AND RELICS OF ANTIQUITY.—The Baronia Hall and Ancient Picturesque Edifices of England, from Drawings by Harding, Ottomero, Prout, and others, 75 beautifully tinted Plates, with Descriptive Letter-press, by S. C. Hall, F.S.A., 9 vols. royal 4to. half morocco gilt, gilt edges, 8s. 3s.; pub. at 7s. 7s.

28. MEMENTO OF THE WORLD'S FAIR.—Masterpieces of Industrial Art and Sculpture at the International Exhibition, 1863, by J. B. Waring, with 300 Folio Plates in the best style of Chromo-lithography, with Descriptive Text in English and French, 3 vols. folio, whole morocco, extra gilt, gilt edges, 12s. 10s.; pub. at 12s. 12s. 6d.

29. ELEGANT SOUVENIR of the ROYAL MARRIAGE.—Thomas's Picture of the Marriage of H.R.H. the Prince of Wales and H.R.H. the Princess Alexandra, a Facsimile of the Original Picture, produced in the most brilliant style of Chromo-lithography. The Picture contains 50 Portraits of Royal and Distinguished Personages, taken from actual sittings. Framed to represent an oil painting, in chaste gilt frame, 11s. Framed, with 3-inch margin, like a drawing, in chaste designed gilt frame, 11s. 11s.

30. AN EXQUISITE WORK OF ART.—Victoria Paaler: or, the Palms of David, illuminated by Owen Jones, in a Series of 100 Splendid Plates, printed in gold and colours, small folio, embossed calf, bevelled boards, gilt edges, 3s. 3s.; pub. at 12s. 12s.

Coloured from Nature.

31. A SERIES OF STANDARD WORKS on Various Branches of NATURAL HISTORY, &c., produced with great care in the best style, at a moderate cost:—

1. MORRIS'S HISTORY OF BRITISH BIRDS, with 360 finely coloured Engravings, 6 vols. royal 8vo. cloth, 3s. 10s.; pub. at 5s.

2. MORRIS'S NESTS AND EGGS OF BRITISH BIRDS, with 223 exquisitely coloured Engravings, 5 vols. royal 8vo. cloth, 3s. 12s.; pub. at 3s. 3s.

3. MORRIS'S BRITISH BUTTERFLIES, with 71 beautifully coloured Plates, royal 8vo. cloth, 14s. 6d.; pub. at 30s.

4. LOWE'S NATURAL HISTORY OF BRITISH AND EXOTIC FERNS, with 479 finely coloured Plates, 8 vols. royal 8vo. cloth, 4s. 4s.; pub. at 6s. 6s.

5. LOWE'S NATURAL HISTORY OF NEW AND RARE FERNS, containing Species and Varieties not included in Ferns, British and Exotic; 71 coloured Plates and Woodcuts, royal 8vo. cloth, 14s. 6d.; pub. at 30s.

6. LOWE'S NATURAL HISTORY OF BRITISH GRASSES, with 74 exquisitely coloured Plates, royal 8vo. cloth, 12s.; pub. at 11s. 11s.

7. LOWE'S BEAUTIFUL-LEAVED PLANTS; being a Description of the most Beautiful in Cultivation in this Country, with 60 beautifully coloured Engravings, royal 8vo. cloth, 14s. 6d.; pub. at 12s. 12s.

8. COUCH'S HISTORY OF THE FISHES OF THE BRITISH ISLANDS, with 256 beautifully coloured Plates, 4 vols. royal 8vo. cloth, 12s. 12s.; pub. at 21s. 2s.

9. BREEN'S BIRDS OF EUROPE and their EGGS, not observed in the British Isles, with 226 splendidly coloured Plates, 4 vols. royal 8vo. cloth, 12s. 12s.; pub. at 21s. 2s.

32. A CAPITAL DICTIONARY for DESK or OFFICE USE.—Ogilvie's Student's English Dictionary, with about 200 Engravings on Wood, half morocco, marbled edges, 10s. 10d.; pub. at 12s. 12s.

Other Dictionaries from 1s. upwards.

33. NEW LIBRARY EDITION.—Curiosities of Literature, by Isaac Disraeli, complete, edited, with Memoir and Notes, by his Son, the Right Hon. B. Disraeli, M.P., with Portrait, 3 vols. post 8vo. cloth, 9s.; pub. at 12s.; postage, 2s.

34. MINIATURE DRAWING-ROOM EDITION.—Lord Macaulay's Lays of Ancient Rome, with 90 Original Illustrations by G. Schiav, 16mo. cloth elegant, 8s. 9d.; pub. at 10s. 6d.; or morocco elegant, 17s.; pub. at 21s.; postage, 7d.

35. JUVENILE BOOKS.—S. & T. GILBERT'S STOCK comprises a first-rate selection of JUVENILE BOOKS, illustrated, popular, and choice, adapted to all ages and every class of reader, varying in price from 1s. upwards. Come and see or write for Catalogues.

36. DIARIES, DIRECTORIES, POCKET-BOOKS, ALMANACKS, and all Annals for the New Year 1867, supplied at a discount of 3d. in the Shilling from the published price, for cash. Orders are recommended to be given at once, to insure early delivery.

37. DISCOUNT.—Although S. & T. GILBERT'S recognised Discount is 2d. in the Shilling, there are many books on which they can make a still more liberal allowance, as may be seen by reference to this List; but any Books, no matter by whom published, including Law Books and Medical Books, whether in stock or not, supplied to order at a Discount of 2d. in the Shilling.

38. CATALOGUES OF S. & T. GILBERT'S extensive and varied STOCK, containing Books suitable for all buyers, from 1s. upwards, sent post free on application.

39. BOOK SHOW-ROOM.—At S. & T. GILBERT'S Show-room may be seen all the principal Books of the day. Each Book is marked in plain figures with the price fixed by the Publisher, from which a most liberal discount is allowed.

40. SCHOOLS.—The Proprietors of Schools will find S. & T. GILBERT'S Remainder and General Catalogues first-rate mediums to select from for Prizes of all descriptions and cost.

41. FURTHER REDUCTION.—A further Reduction will be made to Buyers of three or more Copies of the SAME WORK, and orders of 5l. and upwards sent carriage free to any part of the United Kingdom, Ireland excepted (carriage being paid to Holyhead or Liverpool only).

42. WARRANTED PERFECT.—NOTICE.—The whole of the Books mentioned in this List, in fact all Books sold by S. & T. GILBERT, are warranted perfect in every respect, and precisely the same as when issued by the various Publishers, and equally good as if the full published price were paid.

43. APPLY DIRECT.—It is respectfully requested that applications be made direct to S. & T. GILBERT, who have incurred the expense of advertising this List, so that they may receive whatever benefit arises from the orders, and insure to the applicants the exact goods described.

NOTE THE ADDRESS.—S. & T. GILBERT, Booksellers, 4, COTTHALL-BUILDINGS, back of the Bank of England, London, E.C.

MR. SWINBURNE'S POEMS AND BALLADS.

NOTICE.—The Publisher begs to inform the very many persons who have inquired after this Work that Copies may now be obtained at all Booksellers', price 9s.

Mr. SWINBURNE'S 'NOTES' on his POEMS, and on the 'REVIEWS' which have appeared upon them, is now ready, price 1s.

ATALANTA in CALYDON. By Algernon Charles Swinburne. 6s.

CHASTELARD: a Tragedy. By A. C. Swinburne. 7s.

ROSSETTI'S CRITICISM on SWINBURNE'S POEMS. 3s. 6d.

"THE ENGLISH GUSTAVE DORÉ."

COMPANION TO 'THE HATCHET THROWERS.'

NOTICE.—*LEGENDS of SAVAGE LIFE, the New Work by James Greenwood (the "Amateur Casual"), with numerous inimitably Droll Illustrations by Ernest Griset, coloured after the Original Drawings, is ready this day, price 7s. 6d. coloured; 5s. plain.*

"THE 'TOM BROWN' OF WINCHESTER SCHOOL."

SCHOOL LIFE at WINCHESTER COLLEGE; or, the Reminiscences of a Winchester Junior. By the Author of 'The Log of the Water Lily.' Numerous Illustrations, exquisitely coloured after the Original Drawings. Ready this day, 8vo. 7s. 6d.

"AN AWFULLY JOLLY BOOK FOR PARTIES."

NOTICE.—*PUNIANA; or, Thoughts Wise and Other-wise, the best book of Riddles and Puns ever formed, Collected and Edited by the Hon. Hugh Rowley, with nearly 100 exquisitely fanciful Drawings, is ready this day, in beautiful cloth binding, gilt edges, with Picture by Gustave Doré, printed in colours and inlaid in cover, 7s. 6d.*

"It contains nearly 3,000 of the best Riddles, and about twice that number of the most outrageous Puns," and it is believed will prove to be "the most popular of all the Christmas books issued this year."

COMPANION VOLUME TO LEECH'S PICTURES.

SEYMOUR'S SKETCHES: the Book of Cockney Sports, Whims, and Oddities. Complete Set of the 180 highly amusing Illustrations, in oblong 4to. a handsome volume, half morocco, 12s.

*. A re-issue of the famous pictorial comicalities which were so popular thirty years ago. The volume is admirably adapted for a table-book, and the pictures will doubtless again meet with that popularity which was extended towards them when the artist projected with Mr. Dickens the famous 'Pickwick Papers.'

"AN APPROPRIATE BOOK TO ILLUMINATE."

NOTICE.—The PRESENTATION BOOK of COMMON PRAYER, exquisitely ornamented with Outline Illuminations from Old Missals, may now be obtained at all Booksellers' for 8s. 6d. in antique, crimson edges; or in blue, with gold cross, 7s. 6d. The full price is 18s.

THE MOST APPROPRIATE CHRISTIAN GIFT-BOOK.

*. Mr. Hotten would especially direct attention to an exquisitely printed Volume, entitled—

SONGS of the NATIVITY; being Christmas Carols, Ancient and Modern, including several never before given in any Collection. With the Music of the more popular. Edited by W. H. Husk, Librarian to the Sacred Harmonic Society. Handsomely printed by Whittingham, with beautiful floriated borders, in the Renaissance style. Cloth, elegant, 12s. 6d.

"A book which will delight all."—SPECTATOR.

FREDERICK WARNE & CO.'S NEW PUBLICATIONS.

THE ELDER DISRAELI'S WORKS.

In 3 vols. large crown 8vo. price 12s. cloth, the Complete Copyright Edition, elegantly printed, with Steel Portraits, and Edited, with Life, Notes, &c., by the Right Hon. the CHANCELLOR OF THE EXCHEQUER,

THE CURIOSITIES OF LITERATURE.

THE ADVANTAGES THAT THIS EDITION POSSESSES ARE—

- 1st. Its completeness, hundreds of Text Emendations and Notes being Copyright for many years.
- 2nd. Its Editorship, by the Son of the Original Author.
- 3rd. Its readable Type and handsome Steel Plates.
- 4th. Its ranging with the other Works of the same Author, viz., 'The Amenities of Literature,' 'The Calamities and Quarrels of Authors,' 'The Literary Character of Men of Genius.'

"The edition of the Warnes is in three readable volumes duly annotated; and contains the memoir of Isaac Disraeli by his more distinguished son, which all judges of biography respect for its excellent tone and taste, as well as for the spirit and elegance of its composition. To it, then, the reader may be safely referred as an agreeable specimen of an English classic; while the critic is naturally led by its appearance to inquire, in the interest of a new generation, what was the charm which made Isaac Disraeli's writings so dear to our grandfathers, and has preserved their popularity to the present day."—*Full Mall Gazette*, Nov. 28.

THE AMENITIES OF LITERATURE. 1 vol. 700 pp. 5s.

THE CALAMITIES AND QUARRELS OF AUTHORS. 1 vol. price 4s.

THE LITERARY CHARACTER OF MEN OF GENIUS. 1 vol. 4s.

THE RIGHT HON. BENJAMIN DISRAELI, M.P.—A Complete Edition of his NOVELS and TALES. Elegantly printed, 5 vols. fcap. 8vo. cloth, new style, 12s. 6d.

A Compendium of English Literature.

In 4 vols. crown 8vo. price 21s. cloth, new style, beautifully printed by Ballantyne & Co., with New Steel Illustrations.

HALF-HOURS WITH THE BEST AUTHORS. A Library Edition. Remodelled throughout by its original Editor, CHARLES KNIGHT; with Selections from Authors added whose works have placed them amongst the "Best Authors" since the publication of the First Edition.

* * * This book contains Three Hundred Extracts of the best efforts of our great Standard Authors, whether they be poets or historians, essayists or divines, travellers or philosophers, arranged so as to form half-an-hour's reading for every day of the year. The student finds a taste of every quality, and a specimen of every style. Should he grow weary of one author, he can turn to another; and if inclined to be critical, he can weigh the merits of one writer against those of his fellow. It gives us a glimpse of the celebrities assembled within its portals. At a glance, the student can obtain some idea of the subject. Such books as these are the true foundations of that knowledge which renders men celebrated and famous.

ILLUSTRATED WORKS.

A Fine-Art Gift-Book for 1867.

In post 4to. price 21s.; or morocco gilt or antique, 35s.

THE SPIRIT OF PRAISE: a Collection of Hymns, Old and New. Elaborately printed by Dalziel Brothers, and fully illustrated with Illuminations and Original Pictures by G. J. Pinwell, J. W. North, Paul Gray, W. Small, T. Dalziel, A. B. Houghton, &c.

This important volume, which is expected to take a high rank amongst the Illustrated Books for 1867, has had every novelty of choice printing exhausted in its progress. Its ornaments in red-letter and border lines are quite original and unique.

In post 4to. price 12s. 6d. cloth, elegantly gilt, gilt edges.

THE POETS of the NINETEENTH CENTURY. Selected and Edited by the Rev. R. A. WILLIAMS. With 100 Illustrations by J. Everett Millais, A. R. A., John Tenniel, F. R. Pickersgill, A. R. A., John Gilbert, Harrison Weir, &c. Engraved most elaborately by the Brothers Dalziel.

In small 4to. 12s. 6d. cloth gilt and gilt edges.

DALZIEL'S ILLUSTRATED EDITION OF DON QUIXOTE DE LA MANCHA, his Life and Adventures. By CERVANTES. With upwards of 100 Original Illustrations by A. B. Houghton, engraved by Dalziel.

This Edition (738 pp.) is exquisitely printed on the finest toned paper, in a good readable type; and is altogether one of the Cheapest Editions of 'Don Quixote' ever issued.

"As a grotesque designer he has no living rival."—*ATHENÆUM*.

In royal 4to. price 7s. 6d. picture boards.

TWO HUNDRED HUMOROUS and GROTESQUE SKETCHES BY GUSTAVE DORÉ. Printed by Dalziel on a fine toned paper.

This highly-amusing volume hits off to perfection the eccentricities of life in France. It forms a worthy companion to Leech's 'Characteristic Sketches.'

WARNE'S POPULAR GIFT-BOOKS.

In crown 8vo. price 5s. each, cloth gilt; or with gilt edges, 6s.

THE PALL MALL GAZETTE.

NOTICE TO NEWSVENDERS.

On and after the 26th of DECEMBER the PALL MALL GAZETTE will be printed at new premises in NORTHUMBERLAND-STREET, STRAND, where additional Machinery, capable of printing copies with great rapidity, has been erected by Messrs. Hoe & Co. The Publisher regrets the inconvenience to which Newsvenders have too often been subject in consequence of his inability to meet their demands promptly. It is hoped, however, that the resources of the new establishment will obviate all such difficulty in future.

PALL MALL GAZETTE OFFICE, 14, Salisbury-street, Strand.

THE PALL MALL GAZETTE.

An Evening Newspaper and Review.

PRICE TWOPENCE.

Apart from its sale as a London Evening Newspaper, the PALL MALL GAZETTE has a Large Circulation in the Country. It is found peculiarly acceptable to Residents in the Provinces who are desirous of receiving early every morning a Journal which contains the Latest News of the previous day, and which comprises, in addition to the ordinary contents of a Daily Newspaper, a large number of Original Articles of various character.

The First Edition of the PALL MALL GAZETTE is published at 3 P.M., and a Second Edition is published in time for despatch to the Country by post.

For the convenience of persons residing in the country subscriptions will be received by the Publisher; and a single copy will be sent to any place out of London on receipt of three postage stamps.

Terms (Inclusive of Postage).

AUTHOR'S EDITION.

London: S. W. PARTRIDGE, 9, Paternoster-row.

ATLASES,

Designed and Arranged under the Superintendence of the Society for the Diffusion of Useful Knowledge,

With the Latest Corrections by Eminent Geographers,

PUBLISHED BY

EDWARD STANFORD, 6, CHARING CROSS, S.W.

New Edition.—Just published,

The **CYCLOPÆDIAN ATLAS**: containing 40 Coloured Maps, with Index. Strongly half bound, 21s.

The present Edition contains two Maps of Germany, one showing the Boundary and the States of the Germanic Confederation as it existed before the late War, and the other Map clearly exhibiting the recent Territorial Changes, the new North German Confederation, &c.

New Edition, with a Thumb or Ledger Index, to facilitate the reference to Maps,

The **FAMILY ATLAS**. A Selection of 80 Maps, including the Geological Map of England and Wales, by Sir RODERICK MURCHISON, K.C.B. F.R.S. &c.; the Star Maps, by Sir JOHN LUBBOCK, Bart.; Plans of London and Paris, on a large scale; recent Discoveries in all Parts of the World; and an Index. Half bound in Morocco, 3s. 3d.

150 Maps, beautifully Coloured,

The **USEFUL KNOWLEDGE SOCIETY'S ATLAS of MODERN GEOGRAPHY**: containing all the modern Maps in the series; Geological and Physical Maps of England and Wales; India, North America, &c. very fully represented; six Maps of the Stars, &c. Elegantly half bound, with Index, 5s. 5d.

The **COMPLETE ATLAS of ANCIENT and MODERN GEOGRAPHY**: containing 230 Modern, Classical, and Celestial Maps, including Plans of celebrated Cities, and Alphabetical Indexes to both Modern and Classical Maps, constructed and engraved on Steel, in the best manner, by eminent Geographers, with the New Discoveries and other Improvements to the latest date. One vol. strongly bound in half Russia, with the Maps Coloured, 9s. 10s.; or bound in 2 vols. half Morocco, 10s.; or without the Plans of Cities, 17s. Maps, 7s. 7d.

A Complete List of the Maps and Plans in these Atlases may be had gratis, or will be forwarded per post upon receipt of one stamp.

* In addition to the Atlases contained in this List, the Stock of EDWARD STANFORD includes almost every Atlas or Map of repute published in England, the Colonies, and on the Continent.

London: EDWARD STANFORD, 6, Charing Cross, S.W.,
And all Booksellers.

F. S. Ellis, 33, King-street, Covent-garden.

SALOM'S NEW OPERA and FIELD GLASS, and 'THE RECONNOITERER GLASS,' price 10s. 10d.; sent free. "This 'Tourist's Favourite,' through extraordinary division of labour, distinctly shows small windows in miles of landscape at 30 miles, Jupiter's moons, &c.—The MARQUIS of CARMARTHEN: "The Reconnoiterer is very good."—EARL of BRADFORDSHIRE: "I find it all you say, and wonderfully powerful for so very small a glass."—BART. of CAITHNESS: "It is a beautiful glass."—Rev. LOUIS SCARLE: "Approved of it."—Lord Gifford: "Most useful."—Lord GARVAGH: "Remarkably good."—Sir DENY CAYLEY: "It gives me complete satisfaction, and is wonderfully good."—CAPT. SENDY, Royal Small Arms Factory, Enfield: "I have found it effective at the 1,000-yards range."—F. H. HAWKES, of Farnley, Esq.: "I never before used a glass, it has therefore completely answered the recommendation of its maker, nor, although I have tried many, a Glass combining so much power for its size with so much clearness."—The Field: "We have carefully tried it at an 800-yard rifle range against all the Glasses possessed by members of the Corps, and found it fully equal to any of those present, although they had cost more than four times its price."—Notes and Queries: "What intending tourist will now start without such an indispensable companion to a pleasure-trip?" The celebrated "HYTHE" GLASS shows bullet-marks at 1,300 yards, and seen at 3½ miles, price 31s. 6d. All the above Glasses, respecting bearing the registered trade-marks, "Salom," "Reconnoiterer," and "Hythe," are only to be had direct from SALOM & CO. 88, Princess-street, EDINBURGH, and 127, Regent-street, LONDON.

Actuary and Secretary—Frederick Hendricks, Esq.

Economical rates of Premium: Annual Bonus Division, by abatement of original premium, or by addition to sum assured. Claims settled and premiums received in England or India.
At the Third Annual Meeting, a reduction was made of 50 per cent. on all premiums upon participating policies of six years' standing, for the year ending May, 1867. The average bonus at preceding divisions of profit has afforded similar reductions of 50 per cent., or a cash return of half the original premium.

EIGHTH DIVISION OF PROFITS.
ROCK LIFE ASSURANCE COMPANY.
Established A.D. 1806.
ACCUMULATED FUND £2,161,202 14s.

The next Division of Profits will be made in 1868.
Assurances effected during the current year will participate therein.

ASSURANCE OF PROSPECTIVE BONUS.
The Assured may, without immediate delay, secure the accruing Bonus.
15, New Bridge-street, London, E.C. JOHN HAYDEN, Actuary.

SUN LIFE ASSURANCE SOCIETY,
THREADNEEDLE-STREET,
AND
CRAIG'S-COURT, CHARING CROSS, LONDON.

The attention of persons desirous of making a provision for their Families, by means of Life Assurance, is directed to the paramount importance of resorting for that purpose to an Office of established credit.

Among the advantages offered by this old-established Society to persons effecting assurances now are—
Low rates of premium, especially for young lives, payable annually, half-yearly, or quarterly.
Participation in 50 per cent. of the profits.

A Bonus every five years, apportioned to Policies on which three or more annual premiums have been paid at the period of division, and receivable in cash, or applied in augmentation of the sum assured or reduction of the premiums, at the option of the Policyholder.

N.B. Proposals are now received and Assurances may be effected at the Office in Craig's-court, as well as at the Chief Office in Threadneedle-street.

JAMES HARRIS, Actuary.

PROVIDENT LIFE OFFICE,

No. 50, REGENT-STREET, LONDON, W.

Established 1866.

INVESTED CAPITAL..... £1,963,919
ANNUAL INCOME..... £203,438
BONUSES DECLARED..... £1,451,187
CLAIMS PAID since the Establishment of the Office..... £2,908,423

President—THE RIGHT HON. EARL GREY.
Managing Director—JOHN A. BEAUMONT, Esq.

The principle upon which the Surplus Profits are divided in the Provident Life Office between the Insured and the Shareholders gives to each interest a share proportionate to its respective contributions to the Society.

The advantages which this principle of allotment gives to the Policy Holders is shown by the following statement:—
Out of £23,194, the amount of profit upon the recent division, £2774, only was apportioned to the Shareholders, and the remaining sum of £20,420, was allotted among the various Policies entitled to Bonus.

The parties insured thus enjoy the advantages of a mutual Society, and are relieved from any liability.

EXAMPLES OF BONUSES added to POLICIES issued by THE PROVIDENT LIFE OFFICE.

| No. of Policy. | Date of Policy. | Annual Premium. | Sum Insured. | Amount with Bonus additions. |
|----------------|-----------------|-----------------|--------------|------------------------------|
| | | £. s. d. | £. | £. s. d. |
| 4,718 | 1828 | 194 15 10 | 5,000 | 10,535 14 2 |
| 3,924 | 1821 | 155 4 2 | 5,000 | 10,164 19 0 |
| 4,287 | 1824 | 205 13 4 | 4,000 | 8,537 9 2 |
| 3,927 | 1816 | 123 12 4 | 4,000 | 8,576 11 2 |
| 3,944 | 1821 | 49 15 10 | 1,000 | 3,426 7 6 |
| 788 | 1808 | 20 18 4 | 1,000 | 3,327 13 8 |

The Forms of Proposal for Insurance are prepared with a view of giving the life proposed the least possible trouble.

INSURANCES may be effected in any part of the Kingdom by a letter addressed to "THE SECRETARY," No. 50, Regent-street, London, W.

THE SMOKER'S BONBON immediately and effectually removes the Taste and Smell of Tobacco from the Mouth and Breath, and renders Smoking agreeable and safe. It is very pleasant and wholesome. Prepared by a patent process, from the recipe of an Eminent Physician, by SCHOOLING & Co., Wholesale and Export Confectioners, Bethnal-green, London.—One Shilling per Box; post free, 14 stamps.—Sold by Chemists, Tobacconists, &c.

STARCH MANUFACTURERS
TO H.R.H. THE PRINCESS OF WALES.

GLENFIELD STARCH, EXCLUSIVELY USED IN THE ROYAL LAUNDRY, and pronounced by HER MAJESTY'S LAUNDRESS to be THE FINEST STARCH SHE EVER USED.

MR. HOWARD, SURGEON-DENTIST, 52, FLEET-STREET, has introduced an ENTIRELY NEW DESCRIPTION OF ARTIFICIAL TEETH, fixed without springs, wires, or ligatures. They so perfectly resemble the natural teeth, as not to be distinguished from the originals by the closest observer; they will never change colour or decay, and will be found superior to any teeth ever before used. This method does not require the extraction of roots, or any painful operation, and will support and preserve teeth that are loose, and is guaranteed to restore articulation and mastication. Decayed teeth stopped and rendered sound and useful in mastication.—52, Fleet-street.

COUGHS. — ANOTHER TESTIMONIAL (this week) to DR. LOCKE'S PULMONIC WAFERS.—Mr. Earwaker, Stationer, High-street, Alton, Hants., writes, December 1, 1866: "I hear many speak of their goodness. They give instant relief to Coughs, Consumption, Coughs, and all Disorders of the Throat. To Singers and Public Speakers they are of great service. Voice, and have a pleasant taste.—Price 1s. 6d. per box, 14 stamps. Sold by all Chemists."

TUCKER & SON'S GASELIERS, HALL LIGHTS, BRACKETS, and other GAS-FITTINGS, in Ormolu, Bronze, and Crystal Glass. A large and varied Stock. Prices attached in Plain Figures. rect, Liverpool; 16, Market-street, Manchester; and Wolver-
hampton.

SILVER FIR FURNITURE, by **HOWARD**

& SONS.—The Nobility and Gentry are respectfully invited
to inspect the Furniture made by **HOWARD & SONS** of this ele-
ment wood; being manufactured by steam-power, although of the
best possible quality, the price is moderate.—26 and 27, Berners-
street, Oxford-street.

DELICATE and CLEAR COMPLEXIONS,

with a delightful and lasting fragrance, by using

HE CELEBRATED UNITED SERVICE SOAP TABLETS,

4d. and 6d. each. Manufactured by

J. C. & J. FIELD, UPPER MARSH, LAMBETH.

Order of your Chemist, Grocer, or Chandler.

THE OCEAN ST. LEGER of 1866.—What

Lord Lyon was to his Owner was the Tasting to her Captain,

2. winner of the race, having distanced all Competitors, as the

AST INDIA TEA COMPANY have invariably done in their

choice and sale of fine new season's teas, now selling at importer's

prices.—Warehouses, 9, Great St. Helen's Churchyard.

BREAKFAST. — EPPS'S COCOA

(more commonly called Epps's Homoeopathic Cocoa, as being

prepared and introduced by James Epps, the Homoeopathic Chemist

first established in England). The very agreeable character

of this preparation has rendered it a general favourite. For

breakfast no other beverage is equally invigorating and sustain-
ing. This Cocoa is used by thousands who never used Cocoa

before. "Cocoa stands far higher than tea or coffee," Dr. Haassall

writes.—Sold in 4 lb., 1 lb., and 1 lb. packets.

WILLIAM SMEE & SONS respectfully

caution intending Purchasers of the "SMEE'S SPRING

MATTRESS, TUCKER'S PATENT," or "SOMMER TUCK-
ER," against various imitations and infringements, preserving

the appearance of the Original, but wanting all its
essential advantages.

Each Genuine Mattress bears the Label "TUCKER'S PATENT,"

and a Number.

The "Smee's Spring Mattress, Tucker's Patent," received the

High Prize Medal, or Honourable Mention, given to Bedding of

any description, at the INTERNATIONAL EXHIBITION, 1862, and

may be obtained (price from 25s.) of most respectable Bedding

Merchants and Upholsterers, and Wholesale of the Manu-
facturers, **WILLIAM SMEE & SONS**, Finsbury, Moorgate

alley Terminus, London, E.C.

SAUCE.—LEA & PERRINS'

WORCESTERSHIRE SAUCE.

This delicious condiment, pronounced by Connoisseurs

"THE ONLY GOOD SAUCE."

Is prepared solely by **LEA & PERRINS**.

The Public are respectfully cautioned against worthless imita-
tions, and should see that Lea & Perrins' Names are on Wrapper,
Label, Bottle and Stopper.

ASK FOR "LEA & PERRINS' SAUCE."

*** Sold Wholesale and for Export by the Proprietors, **Wes-
ter, Messrs. CROSBY & BLACKWELL**, Messrs. BARCLAY
SONS, London, &c.; and by Grocers and Oilmen universally.

THE PERFECT SUBSTITUTE FOR SILVER.

—THE REAL NICKEL SILVER, introduced more than 20
years ago by **WILLIAM S. BURTON**, when PLATED by the
patent process of Messrs. Elkington & Co., is beyond all com-
parison the very best article next to sterling silver that can be
employed as such, either usefully or ornamentally, as by no
possible test can it be distinguished from real silver.

A small useful set, guaranteed of first quality for finish and
durability, as follows:—

| | Fiddle or Old Silver Pattern. | | Beed Pattern. | | Thread Pattern. | | King's or Shell and Thread. | |
|---------------------------------|--|--------|------------------|--------|--------------------|--------|---|--------|

pure Solution of Magnesia as the best remedy for Acidity of the

Stomach, Headache, Heartburn,

COMPLETION OF THE CAMBRIDGE SHAKESPEARE.

"The edition of all others without which no Shakespeare Library can possibly be regarded as complete."

NOTES AND QUERIES.

THE WORKS OF WILLIAM SHAKESPEARE.

EDITED BY

WILLIAM GEORGE CLARK, M.A.,

Fellow and Tutor of Trinity College, and Public Orator in the University of Cambridge; and

WILLIAM ALDIS WRIGHT, M.A.,

Librarian of Trinity College, Cambridge.

9 vols. 8vo. cloth, price £4 14s. 6d.

OPINIONS OF THE PRESS.

"An Edition on a plan which differs altogether from that adopted by any—a plan so excellent in itself, and so well carried out, that we have no hesitation in saying that it is likely to be, when completed, the most useful one to the scholar and intelligent reader which has yet appeared."—*Athenæum*.

"We regard the appearance of the Cambridge Shakespeare as an epoch in editing the works of the foremost man in the dramatic world. Besides many positive virtues in this edition, the hitherto prevailing errors are avoided. The gross blunders and unauthorized fancies of generations of editors are banished from the text; the more tolerable or the less noxious conjectures are removed to the notes; space is allowed and justice is rendered to all former labourers in the editorial field. He who is indifferent to verbal criticism may read in peace an orthodox text; and he who is curious in such matters will find various readings supplied to him in full measure."—*Saturday Review*.

"There were, indeed, plenty of editions of Shakespeare, great and small, with plenty of notes, small and great, but a critical text founded at once upon the exhaustive collation of all existing sources, and upon the immense mass of learning and conjecture accumulated by Shakespearean scholars, was absolutely wanting."—*Spectator*.

"A work which, when complete, will deserve to take its place as the Library Edition of Shakespeare. While the greater part of the contents can never grow old, it will have a value far superior to that of a conjecturally amended text, or a simple reprint of the First Folio. It shows us, with singular conciseness and clearness, how much, or how little, previous editors have been able to do for the text, and thus gives us the results of many men's labours. . . . We have the result of the latest investigations without the pain of seeing critic or commentator struggling over the text of Shakespeare."—*Guardian*.

THE EIGHTIETH THOUSAND NOW SELLING.

THE GLOBE EDITION OF

SHAKESPEARE'S COMPLETE WORKS,

In One Compact Volume, royal fcap. 8vo. beautifully printed on Toned Paper, and bound in extra cloth,

Edited by W. G. CLARK and W. ALDIS WRIGHT,

Is now being published as follows:—

In Five Sixpenny Parts, published Monthly.

PARTS I., II. and III. are NOW READY. PART IV. on MONDAY, DECEMBER 10.

Also now ready,

Complete in Paper Covers, price 2s. 6d.; in cloth, 3s. 6d.

"A marvel of beauty, cheapness, and compactness. The whole works—plays, poems, and sonnets—are contained in one small volume; yet the page is perfectly clear and readable. New paper has been made, new type has been cast, for this edition. The text

is that of Messrs. Clark and Wright, freed from all encumbrances of notes and commentaries. For the busy man, above all for the working student, this Globe Edition is the best of all existing Shakespeare books."—*Athenæum*.

MACMILLAN & CO. LONDON.

THE GOLDEN TREASURY SERIES,

ADAPTED FOR PRESENTS, THE DRAWING-ROOM TABLE, OR THE LIBRARY.

Beautifully printed on Toned Paper, in 18mo. With Vignette Titles by Millais, Woolner, Holman Hunt, Noel Paton, &c. Bound in extra cloth, price 4s. 6d. each volume.

"Some of the choicest books in the world, carefully edited, and presented in a form which fits the hand and delights the eye."—*Pall Mall Gazette*.

"The Golden Treasury Series' disputes, if it do not bear away the palm of excellence amongst works in which the taste of the publisher, printer, stationer, engraver, and binder is jointly exercised to give additional grace to the productions of writers."—*Illustrated London News*.

The ADVENTURES of ROBINSON CRUSOE. Edited from the Original Editions, by J. W. CLARK, M.A., Fellow of Trinity College, Cambridge. With a Vignette Title by J. E. Millais.

THE HISTORY of LORD SEATONS

REGIMENT (the 82nd Light Infantry) at the BATTLE of WATERLOO; together with various Incidents connected with that Regiment, not only at Waterloo, but also at Paris, in the North of France, and for several years afterwards: to which are added, many of the Author's Reminiscences of his Military and Clerical Career, during a period of more than Fifty Years. By the Rev. WILLIAM LEEKE, M.A. (of Queen's College, Cambridge), Incumbent of Holbrooke, Derbyshire, and Rural Dean. Who carried the 32nd Regimental Colours at Waterloo. The Author claims for Lord Seaton and the 82nd the honor of having defeated, single-handed, without the assistance of the 1st British Guards or any other Troops, that portion of the Imperial Guard of France, about 10,000 in number, which advanced to the last attack on the British Position: the 3rd Battalion of the 1st Foot Guards, by the Duke of Wellington's order, drove the skirmishers of the Imperial Guard off the British Position, the other Battalion of General Maitland's Brigade of Guards remaining stationary. With a Portrait of Field-Marshal Lord Seaton, and Three Plans of Waterloo, showing the Positions and Movements of the 82nd during the Action.
 London: Hatchard & Co. 187, Piccadilly.

A POPULAR HISTORY of LONDON, from the Invasion of Julius Caesar to the present time. Part the First from B.C. 55 to A.D. 1066.

London: FREDERICK WARNE & CO.,
Bedford-street, Covent

Price One Shilling and Sixpence,

THE ISLAND OF THE RAINBOW:

A FAIRY TALE;

AND OTHER FANCIES.

By Mrs. NEWTON CROSLAND,

Author of 'HILDRED THE DAUGHTER,'
'MRS. BLAKE,' &c.

ILLUSTRATED.

Examiner.

"This is a very cheap little book, with a frontispiece of fairies dancing upon a spider's web, in which the writer herself moves with the right lightness of step and the right gaiety of innocence to give her rank as comrade of the fairies. Mrs. Newton Crosland, who has written many a true-hearted story-book for girls, has in 'The Island of the Rainbow' tried her hand at fairy writing with the happiest results."

Saturday Review.

"By Mrs. Newton Crosland, who has won distinguished fame in this line."

Globe.

"The fairy tales of Holme Lee are not more graceful."

News of the World.

"The author writes about fairies as though her life had been spent among them; and 'The Island of the Rainbow' is certainly one of the best fairy tales that has appeared in print. There is a charming freshness about it; and it has all the beauty of a prose poem, full of fancy and delightful incidents. We think it will be not only a great favourite among the young at the present time, but will maintain a permanent place among the literature of fairy-land; to be drawn upon occasionally for theatrical spectacles and the gorgeous openings of Christmas pantomimes."

Morning Advertiser.

"Mrs. Newton Crosland has once again called her pleasant fancy into play in a fairy-tale, in which Oberon, Titania, Mab, Ariel, Puck, and the Shakspearian fay-ology is extended into a minute history of fairy-land, and a remarkable incident that befel therein."

Manchester Examiner and Times.

"Has achieved a complete success;... most pleasantly and trippingly told."

Guardian.

"A graceful fairy-tale with a twinkling of humour in it."

Illustrated Times.

"This is a real bright bit of fairy literature."

Sunday Times.

"A fresh, graceful, and unhackneyed fairy story, which will be the delight of children, and which elder folk may read with pleasure and even with profit."

Berkshire Chronicle.

"A story of fairy-land which, with perhaps the exception of 'The Water Babies,' may fairly compete with any that have gone before it."

London: GEORGE ROUTLEDGE & SONS,
The Broadway, Ludgate-hill.

SMITH, ELDER & CO. 65, CORNHILL.

MESSRS. BELL & DALDY'S CHRISTMAS BOOKS.

"The *SOSI* of Fleet-street give us a single artist and his choice masterpieces. They publish not so much for the flimsy taste of accidental purchasers, but with a view of making solid and permanent contributions to Art. Many of their books this year are intended, and the intention is realized, to stand as contributions to the History of Art, and may be classed rather as galleries founded on principle than as collections gathered by the accidents of the market."—*SATURDAY REVIEW*.

ART AND SONG.

Edited by ROBERT BELL. A Series of Original highly-finished Steel Engravings, from Masterpieces of the Nineteenth Century; with a Selection of the Choicest Poetry in the English Language.

*. The Illustrations include Six beautiful Landscapes from the Pencil of J. M. W. Turner, R.A.; also several by John Martin, Stothard, Singleton, Leitch, Wright, and other eminent Painters, which are copyright, and hitherto unpublished.

GREAT WORKS OF RAPHAEL.

Illustrated with a Series of Thirty Photographs, from the finest Engravings of his most celebrated Paintings. With a Memoir by GIORGIO VASARI, translated by Mrs. JONATHAN FOSTER. New Edition, and enlarged. Handsomely bound, 42s.

"Substantial and important contributions to the highest Art."—*Saturday Review*.

REMBRANDT'S ETCHINGS.

Thirty large Photographs, taken from the Collections in the British Museum, and in the possession of Mr. Seymour Haden. With a Lecture on his Life and Genius, by Dr. SCHELTEMA, of Amsterdam. Handsomely bound in cloth and gold, 42s.

"We have every touch and scratch which we know to be Rembrandt's; and the noble discovery of photography is never more legitimately employed than in such work as this. Messrs. Bell & Daldy have completed this delightful volume with a Life of Rembrandt. The printing leaves nothing to be desired."—*Saturday Review*.

"It is one of the great merits of this work that, whereas the etchings of Rembrandt when sold obtain such enormous prices as we have quoted, it contains not only fac-similes of unquestionable value, for the most part copies of renowned impressions, but that, even with the superb setting, the cost is absolutely trivial in comparison. The photographs have been successful to a marvel."—*Athenæum*.

FLAXMAN'S DANTE.

Complete, consisting of more than One Hundred large Plates, engraved by Moses. With a full Description of each Composition, from the Translation of the Rev. HENRY FRANCIS CARY. Very handsomely half bound in scarlet morocco, price 2l. 12s. 6d.

"A very noble volume."—*Saturday Review*.

THE RUINS OF POMPEII.

By THOMAS H. DYER, LL.D. A Series of large Photographic Views of the most interesting Remains, with a History of the Destruction of the City. Handsomely bound, 31s. 6d.

"A very sumptuous and artistic publication. So complete is the descriptive letter-press that it might almost stand for a manual of Roman domestic and social life."—*Saturday Review*.

"We can cordially recommend this entertaining book."—*Athenæum*.

MEMORIALS OF MULREADY.

By F. G. STEPHENS. With a Selection of Fourteen beautiful Photographs of his most celebrated Paintings. Handsomely bound in cloth and gold, 42s.

"Here we have Mulready's precision, his poetical taste, and his sweetness, very fairly preserved.... Mr. Stephens has bestowed great pains on his subject."—*Saturday Review*.

MR. BIRKET FOSTER'S NEW BOOK.

SUMMER SCENES.

Consisting of carefully-selected Photographs of his most-admired Water-Colour Drawings. With Illustrative Selections from the Poems of Bloomfield, Clare, Crabbe, Joanna Baillie, Thomson, Bryant, N. P. Willis, &c. Royal 4to. 31s. 6d.

"Mr. Birket Foster's art seems made to be employed this way. As Art-studies the collection has great interest."—*Saturday Review*.

"The pictures are perfectly fascinating."—*Athenæum*.

THE BOOK OF GEMS.

Containing 150 Steel Engravings, from Drawings by the most eminent Painters of the Eighteenth and Nineteenth Century; and a Selection from the Works of British Poets, from Chaucer to Tennyson. New Edition. In Three Series, 4to. very handsomely bound in walnut covers, each 21s.; cloth gilt, each 18s.

Sold separately, { First Series. CHAUCER to DRYDEN.
Second Series. SWIFT to BURNS.
Third Series. WORDSWORTH to TENNYSON.

EPISODES OF INSECT LIFE.

By ACHETA DOMESTICA. With 108 beautiful Outline Engravings. New Edition. Revised by the Rev. J. G. WOOD. Price 21s.

ORIGINAL STUDIES BY MICHAEL ANGELO.

Etched by JOSEPH FISHER. In 4to. price 21s.

ORIGINAL STUDIES BY RAFFAELLE.

Etched by JOSEPH FISHER. In 4to. price 31s. 6d.

Drawn in Fac-simile from the Collection in the University Galleries, Oxford.

"We cordially recommend this series from Raffaele's own drawings as a thing not only beautiful in itself, but sure to be an enduring source of pleasure and instruction. Having frequently studied the original designs, we can speak to the taste and general fidelity of Mr. Fisher's designs; and the same praise may be extended to a smaller companion volume, containing a similar series from the noble Collection of Drawings by Michael Angelo."—*Saturday Review*.

LEGENDS AND LYRICS.

By ADELAIDE ANNE PROCTER. With additional Poems, and an Introduction by CHARLES DICKENS; a Portrait by Jeens, and 20 Illustrations by W. C. T. Dobson, A.R.A., J. Tenniel, W. H. Millais, and other Artists. Fcap. 4to. 21s.

PARABLES FROM NATURE.

By Mrs. ALFRED GATTY. The Four Series, complete in 1 vol. illustrated by W. Holman Hunt, Otto Speckter, C. W. Cope, R.A., W. Millais, H. Weir, J. Tenniel, and other Artists. Quarto, ornamental cloth, 21s.

FIRST and SECOND SERIES, 16 Illustrations, 10s. 6d.

THIRD and FOURTH SERIES, 15 Illustrations, 10s. 6d.

"Stand alone in the sweetness of their stories, the truth of their moral, and the simple beauty of their language."—*Literary Churchman*.

"Lessons of faith, hope, patience, obedience, and love, expressed with winning sweetness, and pointed with polished wit."—*John Bull*.

LONGFELLOW'S POETICAL WORKS.

In one very handsome 4to. volume, with nearly 250 Illustrations, price 21s.

FLAXMAN'S INFERNO OF DANTE.

Thirty-five large Plates, engraved by MOSES, with the Passages to which the Compositions refer selected from the Translation by the Rev. HENRY FRANCIS CARY. Handsomely bound in cloth and gold, 21s.

FORTY DAYS IN THE DESERT,

On the TRACK of the ISRAELITES. By W. H. BARTLETT. Illustrated with numerous Engravings on Steel, price 10s. 6d.; or in superior walnut binding, 15s.

THE ART OF ILLUMINATION, as Practised during the Middle Ages.

By HENRY SHAW, F.S.A. This Work contains Examples of the finest English, Flemish, French, German, and Italian Art, from the Ninth to the Sixteenth Century, executed in the most finished style of Wood Engraving; together with a Practical Description of the Metals, Pigments, and Processes employed by the Artists at different periods. The Text is also profusely embellished with examples of Initial Letters, Borders, and other Ornaments from Illuminated MSS. Imperial 8vo. very handsomely bound, gilt edges, price 31s. 6d.

"To those who have not been watching closely the development of wood-engraving—who have not, for instance, seen the Illustrated Testament published two or three years ago by Messrs. Longmans—such exquisite results as we have here will appear almost mysterious.... A more serviceable and exhaustive piece of Art-exposition we do not remember ever having read."—*Reader*.

London: BELL & DALDY, YORK-STREET, COVENT-GARDEN, and 186, FLEET-STREET.

Complete in 1 vol. royal 4to. handsomely bound in cloth extra, gilt, 42s.

SCHNORR'S BIBLE PICTURES:

SCRIPTURE HISTORY ILLUSTRATED

in a Series of 180 Engravings on Wood, from Original Designs by JULIUS SCHNORR.

With English Text.

Published also in 3 vols. bound in cloth extra, gilt (each containing 60 plates), 15s. each volume.

"A series of large woodcuts by that admirable artist, which seem to us precisely to supply the want of the mass of English people. We consider ourselves doing a service to the cause of true public love of Art by calling attention to them."

"We have certainly no other work which can be compared to it for excellence, cheapness, and completeness. Parents and teachers of children will find them an inexhaustible aid to religious instruction."—*Churchman.*

WILLIAMS & NORGATE, London and Edinburgh.

8vo. cloth, with 156 Woodcuts and 3 Plates, 15s.

PREHISTORIC TIMES, as illus-

trated by Ancient Remains, and the Manners and Customs of Modern Savages. By Sir JOHN LUBBOCK, Bart., F.R.S., President of the Ethnological Society, Vice-President Linn. Soc. &c.

"It terms with information on everything that has yet been discovered bearing on the early history of our race, and is written in so clear and agreeable a manner that it is sure both to gratify and instruct every class of readers."—*Reader.*

"Those who desire a compact and careful review of the whole subject, well illustrated, will find it in this volume."—*Athenæum.*

"A work of more than usual interest, in which he has dealt with a very difficult subject in the most scientific, but at the same time in the most alluring manner."—*Times.*

"There is not an idle page in the volume, nor one that can be skipped. We can speak of the value of the work, as a whole, with unqualified praise."—*Standard.*

Just published, crown 8vo. cloth, price 4s. 6d.

ESSAYS on SYMBOLISM.

By HENRY CLARK BARLOW, M.D. F.G.S., Author of 'Critical, Philosophical, and Historical Contributions to the Study of the Divina Commedia,' &c.

Price 10s. 6d. crown 8vo. cloth,

ORTHODOXY, SCRIPTURE, and

REASON: an Examination of some of the Principal Articles of the Creeds of Christendom. By the Rev. WILLIAM KIRKUS, LL.B.

"Temperate and well-reasoned. Students of theology will find this volume very worthy of perusal."—*Spectator.*

"The essays are clever, and often give noble views of Christian truth."—*Eccl. Journal.*

"He writes like a worthy man, genuinely seeking after divine truth. His book may well be studied quite apart from the question of agreement or disagreement with its teachings."—*Literary Churchman.*

Price 7s. 6d. crown 8vo. cloth,

The LEGENDS and THEORIES of

the BUDDHISTS compared with HISTORY and SCIENCE. With Introductory Notices of the Life and System of Gotama Buddha. By R. SPENCE HARDY, Hon. M.R.A.S., Author of 'Eastern Monachism,' 'A Manual of Buddhism,' &c.

Just published, in 1 vol. post 8vo. price 8s. 6d.

THE FIRST MAN and HIS PLACE in CREATION, considered on the Principles of Common Sense from a Christian Point of View: with an Appendix on the Negro. By GEORGE MOORE, M.D. M.R.C.P.L., &c.

"As a plea for what may be called anthropology of the Bible, this book is exceedingly able and well timed. We have found the twenty-four chapters of which the work consists most interesting and instructive. The language is clear and forcible, the facts are well selected, and the conclusions are distinctly stated; while a high moral and religious tone is conspicuous throughout."—*Journal of Sacred Literature.*

London: Longmans, Green, and Co. Paternoster-row.

The Complete Work, in 4 vols. 8vo. price 4l. 13s. cloth.

A SYSTEM of SURGERY, Theoretical and Practical, in Treatises by various Authors. Edited by T. HOULES, M.D. &c., Surgeon to the Hospital for Sick Children and Assistant-Surgeon to St. George's Hospital.

MODERN COOKERY for PRIVATE

FAMILIES reduced to a system of Easy Practice in a Series of carefully tested Receipts, in which the Principles of Baking and other eminent writers have been as much as possible applied and explained. By ELIZA ACTON.

"A much enlarged edition of this useful collection of receipts has lately been published. The preface seems particularly worth attention: it depreciates the waste so common in kitchens, yet shows good cookery to be desirable for persons of limited income as well as for the wealthy."—*Gardener's Chronicle.*

"Of this popular Cookery-Book 84,000 copies have been sold."—*Medical Times and Gazette.*

London: Longmans, Green, and Co. Paternoster-row.

In One Volume, crown 8vo. of 512 pages, with Portrait, price 5s. cloth, or 10s. 6d. well bound in calf, half extra.

LIFE of the DUKE of WELLINGTON.

By the Rev. G. R. GLEIG, M.A. F.R.G.S., Chaplain-General to the Forces, and Prebendary of St. Paul's. Popular Edition, carefully revised and Corrected, with copious Additions from Authentic Sources.

"Mr. Gleig has written the life of our greatest hero as it has not been written yet. He has made good use of materials which for completeness and accuracy of detail, have perhaps no parallel. French and English authors alike have contributed to his resources, and he has filled in the outline of the hero's portrait with a minuteness of drawing and a vivid colouring which are entirely satisfactory."—*Saturday Review.*

A PRESENT SUITABLE TO ALL OCCASIONS.

In One Volume, crown 4to. price 65s. in cloth, with gilt top; or price 51. 5s. bound in morocco by Rivière,

THE NEW TESTAMENT illustrated with Borders, Ornaments, and Initial Letters copied from Italian MSS. of the 15th and 16th Centuries, and by numerous other Engravings on Wood from the OLD MASTERS.

"This edition of the New Testament is the finest thing that has ever been done in wood engraving; and no volume of equal artistic merit has for many years been published in this country." *Times*.

"A volume which is second in point of art to no contemporary publication: a book which will always be a treasure to bibliographers, and which will be reckoned in future generations as one of the choicest typographical monuments of this age." *Saturday Review*.

London: Longmans, Green, and Co. Paternoster-row.

SEASONABLE GIFT-BOOK ILLUSTRATED BY J. LEIGHTON, F.S.A.

In 4to. in richly ornamental covers appropriate to the Work, designed by the Artist, price 42s., and may be had also elegantly bound in morocco by Rivière.

THE LIFE of MAN SYMBOLISED by the MONTHS of the YEAR in their SEASONS and PHASES: with Passages selected from Ancient and Modern Authors. By RICHARD PIGOT. Accompanied by a Series of 36 full-page Illustrations and numerous Marginal Devices, Decorative Initial Letters, and Tail-pieces, engraved on Wood from Original Designs by JOHN LEIGHTON, F.S.A.

"A book of rare merit and beauty, one that must abundantly satisfy by its elegance the most dainty bibliophile." *Art-Journal*.
 "The sketches of natural scenery are exquisite; while the typical borders, initials, &c. are full of meaning and applicability, and are frequently very touching in their concentrated moralizings on life and its fragility." *Daily News*.

"A noble specimen of what the English press can produce, and he must indeed be a bigot in matters of taste who will fail to recognize its merits." *Times*.

London: Longmans, Green, and Co. Paternoster-row.

WORKS BY WILLIAM HOWITT, APPROPRIATE FOR CHRISTMAS READING, or CHRISTMAS PRESENTS AND NEW-YEAR'S GIFTS.

THE RURAL LIFE of ENGLAND. With Illustrations on Wood by Bewick and Williams. Third Edition, 12s. 6d.

HISTORY of DISCOVERY in OUR AUSTRALASIAN COLONIES, AUSTRALIA, TASMANIA, and NEW ZEALAND. 3 vols. with Maps, 30s.

"The romantic adventures and touching incidents of this history make it a most fitting book for the winter fireside."

London: Longmans, Green, and Co. Paternoster-row.

FOURTH EDITION OF GRAY'S ANATOMY.

Just published, in 1 vol. royal 8vo. price 28s.

ANATOMY, DESCRIPTIVE and SURGICAL. By HENRY GRAY, F.R.S., late Lecturer on Anatomy at St. George's Hospital. With nearly 400 large Woodcuts from Original Drawings, from Dissections made by the Author and Dr. Carter. Fourth Edition, by T. HOLMES, M.A. Cantab., Assistant-Surgeon and Lecturer on Anatomy at St. George's Hospital.

London: Longmans, Green, and Co. Paternoster-row.

ILLUSTRATED EDITION OF MISS INGELOW'S POEMS.

Just published, in fcap. 4to. price 21s. cloth, gilt edges; or 42s. bound in morocco by Rivière,

POEMS by JEAN INGELOW. A New Edition, with Ninety-seven Illustrations from Original Drawings by E. Dalziel, T. Dalziel, A. B. Houghton, J. W. North, G. J. Pinwell, E. J. Poynter, W. Small, and J. Wolf; engraved on Wood by the Brothers Dalziel.

"Every admirer of good engravings and every lover of good poetry will find their tastes gratified in this beautifully illustrated edition." *Morning Post*.

"This new edition, with excellent illustrations, will be a favourite with the public. It is agreeable to see, as we do here, how readily one Artist interprets the meaning of another."

Athenæum.

"For its special purpose as a drawing-room-table book, nothing can be more suitable. As the poems, so are the pictures, graceful, slightly suggestive, and sufficiently varied." *Saturday Review*.

"A much greater share of popularity assuredly awaits Miss Ingelow's Poems with the attraction of a large number of beautiful woodcuts; illustrations as

London: Longmans, Green, and Co. Paternoster-row.

The THIRD and CONCLUDING
VOLUME of the HISTORY of the AMERICAN WAR. By
Lieut.-Col. FLETCHER, Scots Fusilier Guards. Demy 8vo.
18s.
"Of the many books already written upon the late American
War, Col. Fletcher's narrative must be placed in the very foremost
rank by virtue of its scrupulous impartiality, its artistic deli-
neations of military movements, its highly suggestive comments,
and its clear, fluent and vigorous style."—*Globe*.

**ENGLISH ECCENTRICS and EC-
CENTRICITIES.** By JOHN TIMBS, Esq. F.S.A., Author

13, Great Marlborough-street.

HURST & BLACKETT'S NEW WORKS.

NEW AMERICA. By William Hep-
worth DIXON. 2 vols. 8vo. With Illustrations.
[In the press.]

A BOOK ABOUT LAWYERS. By
J. C. JEAFFRESON, Barrister-at-Law. 2 vols. 8vo. 20s.
From the *Times*, Dec. 6.—"A Book about Lawyers" deserves to
be very popular. Mr. Jeaffecton has accomplished his work in a
very creditable manner. He has taken pains to collect informa-
tion from persons as well as from books, and he writes with a
sense of keen enjoyment, which greatly enhances the reader's
pleasure. He introduces us to Lawyering under a variety of
phases. We have lawyers in arms, lawyers on horseback, lawyers
in love, and lawyers in Parliament. We are told of their salaries
and fees, their wigs and gowns, their jokes and gaieties. We meet
them at home and abroad, in Court, in chambers, and in com-
pany. In the chapter headed 'Mirth' the author has gathered
together a choice sheaf of anecdotes from the days of More down
to Erskine and Eldon."

The LIFE of JOSIAH WEDGWOOD.
From his Private Correspondence and Family Papers. By
ELIZA METEYARD. Dedicated to the Right Hon. W. E.
GLADSTONE. Complete in 2 vols. 8vo. embellished with Por-
traits and above 300 beautiful Illustrations. 42s. bound.
"The author has achieved a work not less creditable to herself
than it is indispensable to all who wish to know anything about
English ceramic art and its great inventor. The volumes are
marvels of decorative and typographical skill."—*Saturday Review*.

**LODGE'S PEERAGE and BARO-
NETAGE for 1867.** Under the Special Patronage of Her
Majesty, and Corrected by the Nobility. 39th Edition. 1 vol.
with the Arms beautifully engraved, handsomely bound, gilt
edges, 31s. 6d.

A WINTER with the SWALLOWS.
By MATILDA BETHAM EDWARDS. 8vo. with Illustra-
tions, 18s.

"A bright, blithe, picturesque, artistic book, full of colour and
sunshine, and replete with good sense and sound observation. To
the enthusiasm of the book a great portion of its beauty and its
attraction are owing, but solid information and the reality of
things in Algeria are never disguised in favour of the bright land
to which the author followed the swallows."—*Post*.

**MY PILGRIMAGE to EASTERN
SHRINES.** By ELIZA C. BUSH. 8vo. with Illustrations, 18s.

**TRAVELS in FRANCE and GER-
MANY in 1865 and 1866;** including a Steam Voyage down
the Danube, and a Ride across the Mountains of European
Turkey, from Belgrade to Montenegro. By Capt. SPENCER,
Author of 'Travels in Circassia,' &c. 3 vols. 21s.

**The SPORTSMAN and NATURAL-
IST in CANADA;** or, Notes on the Natural History of the
Great Canadian Fish and Game Country. By MAJOR
W. ROSS KING, F.R.G.S., F.S.A. Royal 8vo. Illustrated
with beautiful Coloured Plates and Woodcuts, 20s. bound.

**FIELD-MARSHAL VISCOUNT
COMBERMERE'S MEMOIRS and CORRESPONDENCE.**
From his Family Papers. By the RIGHT HON. MARY, VIS-
COUNTES COMBERMERE, and Capt. W. W. KNOLLYS.
2 vols. 8vo. with Portraits, &c. 30s. bound.

**LIGHTS and SHADOWS of LONDON
LIFE.** By the Author of 'MIRK ABBEY,' &c. 2 vols.

THE NEW NOVELS.

MADONNA MARY. By Mrs.
OLIPHANT, Author of 'Agnes,' &c. 3 vols.

"Madonna Mary" is written with evenness and vigour, and
overflows with the best qualities of its writer's fancy and humour.
The story is thoroughly original."—*Athenæum*.
"Madonna Mary" is a book of great power and beauty—a per-
fect work of its kind."—*Morning Post*.

LEYTON HALL, and other Tales.
By MARK LEMON. 3 vols.

CHRISTIE'S FAITH. By the Author
of 'No Church,' 'Owen,' 'Mattie,' &c. 3 vols.

"Very heartily may we congratulate the author upon the pro-
duction of this new work, which does equal honour to the skill
and ability of the novel-writer, and to the earnest feeling of the
philanthropist. The interest of the story is so enthralling
throughout, that it holds the reader enchained during its progress,
and the purpose of the story is so admirable, that the wisest and
the best among us may justly consider the time well bestowed that
is occupied by its perusal."—*Star*.

**ANNALS of a QUIET NEIGHBOUR-
HOOD.** By GEORGE MAC DONALD, M.A. 3 vols.

"The charm and value of Mr. Mac Donald's work need not be
sought. They present themselves unasked for in the tender beauty
of his descriptions, whether of nature or of life and character; in
his almost supernatural insight into the workings of the human
heart and in his unceasing fertility of thought and happy exten-
sion of illustration. Whoever reads the book once will read it
many times."—*Pall Mall Gazette*.

KINGSFORD. By the Author of
'SON and HEIR.' 2 vols. 21s.

"A very good novel, written with great spirit."—*Star*.
A WOMAN'S CONFESSION. By
LADY CAMPBELL. 3 vols. [Next week.]

use of Schools, by ALPHONSE BECK. 12mo. cloth limp, 2s.

WILLIAMS & NORGATE,

14, Henrietta-street, Covent garden, London; and 10, South
Frederick-street, Edinburgh.

powers both of cajolery and of obstinacy. 'I must congratulate your Majesty,' said Pitt, 'on looking better now than on your recovery from your last illness,' alluding to the spring of 1801.—'That is not to be wondered at,' replied the King. 'I was then on the point of parting with an old friend; I am now about to regain one.' The skill and promptitude of this flattering answer could not be surpassed, and went far to secure a victory over his powerful subject."

Pitt, however, was quite as prompt as his master, and Fox was ever ready to praise him:—

"Pitt was ready with those retorts in conversation which are the marks of a quick and lively wit. Every one has heard of the colonel of volunteers who repeatedly insisted as a condition of his offer of service, 'Mind, we are not to go out of the country, Mr. Pitt! we are not to go out of the country.'—'Except, I suppose,' said the Minister, coldly, 'in the case of actual invasion.' The Duchess of Gordon, upon her return to London, said to the Minister: 'Have you been talking as much nonsense as usual, Mr. Pitt?'—'I am not sure about that,' he replied, 'but I think that since I last saw your grace, I have not heard so much.' A translation which Lord Harrowby repeated to me shows his command of the English language. Some one mentioned a sentence in the Essay 'De Oratore,' attributed to Tacitus: 'Magna eloquentia, sicut flamma, materia alitur et motibus excitatur, et urendo clarescit.' One of the company said it was untranslatable. 'By no means,' said Pitt, and at once proceeded: 'It is of eloquence as of a flame; it requires matter to feed it, motion to excite it, and it brightens as it burns.' The best way to test the merit of this translation is to compare it with that of Murphy: 'The true spirit of eloquence, like an intense fire, is kept alive by fresh materials; every new commotion gives it vigour, and in proportion as it burns, it expands and brightens to a purer flame.' Here, indeed, is a flame which is quite buried under the heavy materials which Mr. Murphy has heaped upon it. In the mouth of Pitt, the English language attained all the force and precision of which it is capable. It is said that Fox, in speaking of his oratory, observed: 'I never want a word, but Mr. Pitt always has at command the right word.' An instance may be given of this *curiosa felicitas*. When replying to a motion of Fox, which had been weakly seconded by Erskine, Pitt said: 'The hon. and learned gentleman who seconded the right hon. gentleman, attenuating the thread of his discourse,' &c. In eloquence, as an orator, he was probably superior to his father, Lord Chatham; in wisdom, as a statesman, far inferior."

The late Duchess of Gloucester (Princess Mary, youngest daughter of George the Third) assured Lord Russell that her father, on hearing of Fox's death, said to her: 'I never thought I should have regretted the death of Mr. Fox so much as I do.' The good old king had more sympathies, as well as antipathies, than he himself expected.

The Russian Government in Poland. With a Narrative of the Polish Insurrection of 1863.

By William Ansell Day. (Longmans & Co.)

THREE years have passed away since the last and saddest of the Polish struggles for independence was overcome by the irresistible might of Russia, and the subject has now lost almost all interest for any but Slavonic readers. At that time all Europe was anxious to know what truth there was in the stories which were told about the terrible contest which had just been taking place, and especially in the charges which each side made against the other of having resorted to cruel and unnecessarily oppressive measures. If Mr. Day had brought out his book then, it would have met with a ready hearing, and might have produced some effect upon the public mind. But he has waited too long, and has come forward with his statement

at so late an hour that he will find but a small audience inclined to listen to him. The insurrection was a failure, and scarcely any one will care, after such a lapse of time, to pay any great attention to the question why it failed, or which of the contending parties concerned in it is entitled to the greatest share of our sympathy or reprobation. At St. Petersburg and Moscow there are readers, no doubt, for whom the subject still retains its original fascination; but for the English public, we are inclined to believe, it has acquired a wearisome and unattractive appearance. There is much, however, in Mr. Day's book which deserves attention, and, in spite of the tardiness of its publication, we should not be justified if we were to pass it by unnoticed. Mr. Day has said in it all that can fairly be pleaded in behalf of the Russian Government. It is imbued throughout with strong party spirit, and a vigorous effort has been made in it to paint the Russians entirely white and their opponents utterly black. The Poles are vigorously abused in it through some 300 pages, while the rulers against whom they had the audacity to rise are represented as a race only a little inferior to angels. If Mr. Day had held a brief for Russia in the court of European public opinion, he could scarcely have uttered kinder words about his client than those which have flowed in the present instance from his pen. But we do not think he has been consciously unfair. He seems to have been living for some time in a thoroughly Russian atmosphere, and to have become imbued in consequence with so strong a Russian feeling that his utterances naturally take the form of vigorous abuse of Poland. At the same time, although he can see nothing but perfection in Russia as it is, he does not hesitate to express a strong condemnation of Russia as it was; and while he speaks in honied terms of the present Russian Government in Poland, he evinces a generous indignation in relating the sad story of how unjustly and tyrannically the Emperor Nicholas treated that unhappy land.

Mr. Day evidently began his book long ago, for he says, at its commencement, "The events I chronicle are scarcely those of yesterday; the flush of triumph yet lingers on the brow of the conqueror, the tear yet glitters in the mourner's eye; and only a few months since the strife yet lingered on amid woods and morasses, and ever and anon was embittered by some dark assassination or some high-handed act of power,"—a statement which somewhat clashes with what he says with perfect truth elsewhere, that before the Christmas of 1863 "the last of the revolutionary bands dispersed, and the Polish insurrection was at an end." Accordingly, he has been able to pay considerable attention to his style, and especially to conceive and mature a variety of metaphors and other figures of speech, many of which are not a little striking—as, for instance, when he speaks of the Russian army, and mentions that it had been the idol of the Emperor Nicholas, and exclaims, with warm poetic feeling, "the hour of trial came, the idol was shattered, and the priest lay dead before the violated shrine." But however rich his imagery may be, we should have preferred a scantier exhibition of it, if it could have been coupled with a greater display of judgment on his part in sifting the evidence of which he has made use. The chief fault of his book is, that while he has taken great pains to show the worthlessness of the documents put forward by the Poles, he has seldom manifested even the slightest suspicion of the accuracy of the Russian statements. For instance, he lays great stress upon that very suspicious manifesto said to have been found in a dead insurgent's pocket, according to which the National Government

makes the singular assertion that "the Russian, with his rude and frank nature, is always full of self-esteem, and the title of 'barbarian' enrages him. To be freed from this odious epithet he is ready to plunge a knife in the breast of his own countrymen." On another occasion he states that "ladies were seen to dance with drunken peasants," in order to inspire them with patriotic feelings, as if the story were based on unquestionable authority, instead of upon that of a somewhat suspicious Government report; and he draws a political moral from an anecdote about a Count "who descended from his pedestal to make visits to shoemakers and tailors," which is evidently not worth the space it occupies. In speaking of Mouravieff he never allows a harsh expression to escape his lips. That stern and unfeeling executioner is evidently to him a model of justice, almost of amiability; and he devotes a considerable space to the somewhat disagreeable task of proving that it is absurd to call a man cruel because he merely tears a brave and generous antagonist from the couch on which a mortal wound has stretched him, and hangs him in a hurry, for fear of his dying elsewhere than on the scaffold. Many of the anecdotes Mr. Day tells would be the better for additional confirmation. We have always regarded with considerable suspicion that which makes Prince Gortschakoff reply to the patriot who excused his friends for adopting only peaceable opposition on the score that they had no arms, "Is that the only difficulty? If so, I will gladly supply them;" and we look on the statement as somewhat doubtful that "there were at this time in Warsaw bands of the lower orders, who made it their business to hire themselves out to whoever desired to annoy an enemy. A regular tariff of prices was established, and one charge was made for a mere *charivari*, another for a *charivari* which was accompanied by breaking windows."

The stories also of atrocities committed by the insurgents must be taken with a good-sized grain of salt. Numbers of them were freely circulated at the time, and were, no doubt, devoutly believed in Russia; but they rest upon as slight a foundation of evidence as the greater part of the charges made against the Russians themselves of having tortured and mutilated their prisoners. There is no occasion to believe half the horrible tales told by the Poles about the cruelty of their enemies; and a similar distrust may be reasonably entertained towards Mr. Day's anecdote how "a band of horsemen, under the guidance of a priest, rode towards a village intending to stir up the peasants to revolt. Stopping at the first cottage, and finding the owner of it absent, the priest inquired of his wife where he was to be found. She refused to inform him, and he, in a transport of rage, murdered her by stabbing her with a knife, and then set fire to the dwelling,"—and his "well-authenticated instance of the excesses which inaugurated the revolt," in "the case of a soldier who was tied to a tree, his feet and hands were then cut off, and while he was screaming in agony, a cigar was put into his mouth, and he was asked whether he wished to have it lighted."

In one respect Mr. Day has dealt very fairly with his subject; he has not allowed his prepossessions in favour of the Russians to blind him to the injustice and cruelty with which they treated Poland in olden days, and he shows a generous sympathy with the cause which he generally opposes when he speaks of the sufferings through which it once had to pass; and after saying "There comes, to nations and to men alike, a time when every hope in the justice or the mercy of those placed in authority above them perishes; when, sick and

worn out with a prolonged series of injuries, hope fades utterly away in the dulled and broken heart, and, weary with prayers that are not answered, and representations that meet with no redress, the spirit, thrown back upon itself, will darkly ponder, and resolve to win by force the justice that monarchs and governments refuse," he adds, "Thus it had been with the Polish race," and admits how the crimes of the Emperor Nicholas led to the revolt which brought such trouble to his son.

The Mysore Reversion, "An Exceptional Case."

By Major Evans Bell. Second Edition. With Remarks on the Parliamentary Papers, and a Few Words to Mr. R. D. Mangles.

Remarks on the Mysore Blue-Book, with a Few Words to Mr. R. D. Mangles. By Major Evans Bell. (Trübner & Co.)

Adoption versus Annexation: with Remarks on the Mysore Question. By Vishwanath Narayan Mandlik. (Smith, Elder & Co.)

The first edition of Major Bell's 'Mysore Reversion' was noticed by us on the 11th of February, 1865. To the second edition he has now added 'Remarks on the Mysore Blue-Book,' which he has also printed separately, as shown in the heading to this article. His view of the subject, which in essentials is the same as that taken by the natives of India, is completed by the pamphlet of Vishwanath Narayan Mandlik. Since Major Bell's book, 'The Mysore Reversion,' first appeared, two events of importance have happened in connexion with the Mysore question. On the 18th of June, 1865, the Rájáh formally and publicly adopted a son, and this event was followed by the publication of the papers moved for by Sir H. Rawlinson, on the 27th of February, 1866. Both these circumstances have strengthened the Rájáh's case. According to Hindú law and Indian custom, an heir has been provided for the Mysore principality, and the Rájáh's claims have been substantiated by the publication of various documents, among which the five Minutes in his favour, and the two against him, by Members of the Council of India, are not the least important. We class these seven documents together, for it may be truly said that the minutes penned by Mr. Mangles and Mr. Prinsep, with the intention of disproving the Rájáh's claim, testify in his favour no less strongly than those of his five defenders, for they show how very little even the most experienced Indian statesmen have to say on the side of annexation.

The Mysore question has already been discussed and decided, so far as these pages are concerned, and the whole subject has been so thoroughly ventilated, that but for the fact of the Rájáh's having adopted a son, little new matter would remain to be added. We will, therefore, briefly recapitulate the facts of the case, as now undeniably proved to all candid minds, and then add a few remarks on the adoption, suggested by the pamphlet of Vishwanath Narayan Mandlik.

After the fall of Tipú, in 1799, Lord Wellesley, instead of dividing the conquered territory equally between the British Government and that of the Nizám, chose, against the advice of Sir Thomas Munro, to restore a large portion of it to the representative of the Hindú princes by whom it was anciently governed. He made a treaty "of perpetual friendship and alliance" with the new prince, a child of five years old, "to be binding upon the contracting parties as long as the sun and moon shall endure." In return for placing the young prince on his throne, the English Governor-General stipulated for great and lasting advantages to

his own Government. Among them, the principal was the maintenance of a military force, under the direction of the English, but paid for by the Rájáh. In case of apprehended failure in the funds for the support of that force, the Governor-General was to be at liberty "either to introduce such regulations and ordinances as he shall deem expedient for the internal management and collection of the revenues, or for the better ordering of any other branch and department of the Government of Mysore, or to assume and bring under the direct management of the servants of the said Company Bahádur, such part or parts of the territorial possessions of his Highness Máhá Rájáh Mysore Kistna Rájáh Udiávar Bahádur as shall appear to him, the said Governor-General in Council, necessary to render the said funds efficient and available either in time of peace or war."

On the 30th of June, 1799, the child Rájáh was enthroned, and on the 8th of July the treaty from which the above is an extract was signed. Purniah, a minister who had served under Tipú, acted as regent until 1811, and by persevering exaction amassed from the over-taxed ryots a treasure of two millions. While striving to instal himself as *Maire du Palais*, the young Rájáh, then in his sixteenth year, expelled him from office, and assumed himself the administration of the country. Neither better nor worse than the average of Orientals at that age, he gave way to the pleasures natural to his youth, and gradually dissipated the treasure that had been accumulated. Meantime, the over-assessments of Purniah were not reduced, and the impoverished ryots betook themselves from murmurs and complaints to disaffected meetings, and from disaffection to rebellion. The Madras Government had from the first discouraged the establishment of the new Principality. The Residents, who were all Madras officials, looked coldly on as things grew from bad to worse, tendered unpalatable advice not in a way to render it more acceptable, and finally, as the climax neared, stood almost aloof. It could hardly be otherwise. Mysore opened a wide field for the employment of Europeans; and in those days such opportunities were elsewhere scant. It being seen that the Madras Government was not too earnest in the young Rájáh's favour, his enemies took courage, and in 1831 rebellion had grown to a head which only English intervention could put down. So the insurrection was quelled, and not altogether with rose-water, though the Rájáh showed less severity than his allies. Then the Governor-General, Lord W. Bentinck, deceived by the exaggerated statements of the Madras Government, was induced to think that the time had arrived when the fourth article of the treaty already quoted should be acted on, and the administration of the country be taken from the weak hands of the Rájáh and his corrupt officers, and placed in those of Europeans. Having appointed, however, a commission of worthy officers to inquire into the facts of the case, the Rájáh was in a great degree exculpated, and Lord William came to the opinion that the government ought to be restored to him,—a measure which was deferred, in spite of the remonstrances of the Rájáh, for some thirty years, until Lord Canning was induced by some idle gossip of the Resident's munshis, or "writers," to suppose that the Rájáh, who was childless, and had not adopted a son, would bequeath his territories to the English. This belief was not dispelled until the famous Adoption Despatch had been penned, and led to the Rájáh's being excluded from the benefit of it, so that when it became known that there would be an adopted heir to Mysore, Lord

Canning was stung with disappointment, and addressed a letter to the Prince he had but lately complimented on his loyalty, in terms at once unjust, and in direct contradiction of the sentiments expressed in the Adoption Despatch.

Such, in brief, is the history of the Mysore case—a case which has, more perhaps than any other, divided English and Indian statesmen. It remains only to say a few words in reference to the discussion, and to point out what is now clearly the path of duty for the English Government. Major Bell is right in saying that no circumstances connected with the treaty, and nothing in the treaty itself, can be taken to justify annexation; but we do not agree with him when he asserts that the wording of the fourth article did not support the Governor-General in withdrawing the administration from the hands of the Rájáh, after the insurrection, and placing it, as he did, in the hands of Europeans. Lord William Bentinck indubitably apprehended that the funds for the payment of the permanent military force would fail, and whether wrong or right in that apprehension, the treaty gave him the power of making any arrangement he chose for the better administration of the country. It is futile to argue that he could only do this for "such part or parts" of the territory as he judged right, and not for the whole; for as long as he left any part, however small, unmeddled with, and for the Rájáh's sole use, as to reside in, for example, there was no infraction, even literally, of the treaty. On the other hand, annexation is out of the question; for the fifth article obliged the Governor-General to render "a true and faithful account of the revenues and produce" to the Rájáh, and to pay him certain fixed sums. Whether the country should now be restored to the Rájáh is a more difficult question. There can be no immediate apprehension of a failure of funds at present, even were the old Prince to return to the follies of his youth, and squander the present surplus as he squandered the two millions amassed by Purniah. But although the letter of the treaty demands that the Rájáh should be reinstated, is it right that a confessedly prosperous state of things should be disturbed, or even exposed to the danger of disturbance? All things considered, the wisest and most just course for all parties is to leave things as they are, but, by recognizing the adoption, at once to set at rest all question of annexation. In Lord Wellesley's time there was no such thing as public opinion in India, nor unity on any point. The natives were all divided amongst and against themselves; but the case is very different now; and the English power, by its vast predominance, has made all the separate particles of class and nationality cohere, while the rapidity of communication and the abundance of native newspapers have evoked a public opinion which it would be dangerous to disregard. Vishwanath's pamphlet is a sufficient exponent of what that opinion is, and it is this: "The right of a Hindú to adopt is absolute. To say that he can adopt a son to perform his funeral rites, but that such a son cannot inherit that man's worldly possessions, is a mere mockery. It is nothing less than adding insult to injury."—"The law for all is alike. The sovereign as well as the subject are under its equal sway."—"The paramount state might, with as much propriety, prohibit a man's marrying in order to prevent his begetting an heir to his principality or estate, as forbid him to adopt."—"The Maharajah of Mysore is a sovereign under a specific treaty. If he breaks it, let him by all means be punished in accordance with that treaty. But for the British nation to permit mere land-hunger to turn itself from the scrupulous observance of treaties, is like a

descent from the spiritual to the material—a lapse from monotheism into idolatry, which must in time corrupt the governors and the governed, to the certain ruin both of India and England.”

After all, Hindú adoption, in the particular case of the Mysore Rájáh, does but accomplish exactly what would be done in England were the sovereign childless. The nearest male relative would be sought for, and made to succeed. That is what has been done in Mysore. “The young prince is a child of the Bettada Kotay House, one of the thirteen branches of the family most nearly related to the reigning Rájáh. He is now by Hindú law the Rájáh’s son.” He is only four years old, and, consequently, the English Government have the power of training him as they think best. Thus he may grow up to be the equal or superior of the present enlightened Rájáh of Travancore, and, if not, he may be punished “in accordance with the treaty,” and a new sequestration may lead to the choice of a better successor.

NEW NOVELS.

Gemma: a Novel. By T. Adolphus Trollope. 3 vols. (Chapman & Hall.)

Mr. Adolphus Trollope again gives us one of his novels of Italian private life of the present day. The descriptions of the city of Siena,—of the country around,—of Savona, the desolate town of the Maremma,—are wonderfully graphic, and bear witness to their having been done from the life by one who has lived in the places and loved them. The scene in the great church of Savona is brought vividly before the reader, who will not easily shake off the impression it produces. The story is one of love and revenge, that seems specially appropriate to Italy, though the same drama has been enacted in every country under the sun, even in those where the inhabitants are not

Souls made of fire and children of the sun
In whom revenge is virtue.

The passions are cosmopolitan, and tragedies follow wherever they gain the mastery. Mr. Trollope invests his story with a picturesque interest and with novel surroundings which give it a freshness to the English reader. The characters are nicely discriminated, and they are all real Italians. Dianora Orsini, one of the real old Orsini family, with the old type upon her as unmistakably as in the time of the Republics, and Gemma Venturi, the daughter of a learned bookseller in Siena, are the two heroines, schoolfellows in the convent of Santa Teresa sulla Costa, in Siena. There is an amusing account of a school-girl plot against their dancing-mistress, in which the Orsini is the ringleader; and of the scene at the judgment-seat of the Lady Superior, resulting in the con-dign punishment of the audacious and impudent offender,—a punishment which is the accident that seems to pull down the destiny suspended over the heads of everybody in the book. The Orsini is ordered into close confinement and very meagre diet in her own cell, and consequently she is not allowed to go out to dine with her uncle on the next visiting day. There is a beautiful young man named Gino Donati, between whom and Dianora a marriage had been arranged by their relations, at a very early period of their lives, and they had been brought up with the understanding that they were to be married so soon as Dianora’s education in the convent was finished. They had not been formally betrothed, nor even engaged, only they had learnt to consider their future marriage a settled thing. Gino was very calm in his feelings towards Dianora, and quite patient, feeling that he must hasten the

period; but Dianora had become desperately in love with Gino, and he had not perceived it. On the day of her imprisonment for contumacy, Gino comes up to Siena by previous arrangement to see Dianora at the palace of her uncle, the Marchese Bandinetto, to transact some family business with Domenico Venturi. Of course, it results that he does not see Dianora; but he does see Gemma Venturi, for her father invites him to dinner, and he goes, and falls violently in love, Romeo fashion, at first sight, and the pretty Gemma does the same. It is far too vehement a passion to be subdued by the thought that there is another woman who has a prior claim to him. At table with the family there is a young medical professor, Carlo Parenti, who has lived in the Venturi house for many years. He sees at the first glance how matters are going; he has himself fallen hopelessly in love with Dianora, and he conceives that he may work mischief to his own advantage. Through him Dianora learns that Gino is faithless; she verifies this intelligence beyond the possibility of doubt. The professor makes his own declaration of love, and Dianora promises that if he will help her to her revenge, he shall have his own reward. Dianora takes the initiative, goes to Savona, sees an old beldame who gives her a philtre warranted to destroy the beauty of her rival, and her life also if that be desired. Dianora has then to persuade the professor to administer the drug, which is antimony in minute doses. The difference in the nature of the man and the woman is well discriminated; he is difficult to persuade, but relentless when once he has begun. Dianora is saved from the reader’s execration by the intense misery she is enduring; by the strong, vehement reality of her passions. She is always a fine creature rendered mad. The professor is detestable and detested because of the deliberate treachery of his share in the business, and because he is not a gentleman; he is so underbred, that the reader feels no sympathy with him. The relenting of Dianora is shown in a masterly manner; the blazing out of her pride of birth, the wreck of qualities that had noble elements, secure her from the reader’s contempt. We would recommend the reader to learn for himself the unravelling of the plot and the final result. The story will well repay perusal, and the interest increases as the story proceeds.

Christie’s Faith. By the Author of ‘Mattie: a Stray.’ 3 vols. (Hurst & Blackett.)

If ‘Christie’s Faith’ is not found so fascinating as ‘Mattie, a Stray,’ the reason may be that boys are less charming than girls! The author was bound by all the laws of poetical justice to find a counterpart to Mattie, the stray creature rescued from the London dens of thieves by the generous trust of a poor tradesman, who gave her a chance to learn the difference between good and evil. The story of the two brothers, Zach and Teddy Fernley, is the history of how two London Arabs were rescued from their life under the shadow of a gaol, and trained to be honest men, each under different influences. Zach is adopted by a rich aunt, a hard, worldly woman, who is half persuaded, half shamed into doing something for her dead sister’s child,—the sister who had run away to marry her music-master, and who had been disinherited and forsaken by her family, who left her to fall from degradation into misery, until she died of starvation under an archway. She had separated from her husband, who was a thorough black-guard, taking one of the children and striving to keep him honest. The father had taken the other, and brought him up to be a thief. The account of the catching and taming of the two wild creatures,—the irksomeness to them of

the comforts of life,—the fascination of the old misery and lawlessness, and the positive hardship of having to keep their hands from loose articles left about,—is most graphically and truthfully told. Zach, the boy who had been taken by his mother, had never been “a regular,” as it is phrased: he had only been a tramp, living by his wits: a hard, selfish, unimpressible boy, but shrewd and clever, having abilities for anything; not altogether bad, but the spark of good scarcely able to shine in the “tenement of clay.” He is first adopted by an old private watchman in the service of Mrs. Henwood, the rich aunt of the two young vagabonds, Zach and his brother Teddy Fernley. The father of the lads makes every effort to obtain possession of Zach, and at first succeeds; but through the efforts of Teddy, he is transferred to the aunt’s care, to be educated and brought up like her own son. The teaching he receives is, however, the worst type of education, and in its influence little better than what he would have learnt with his father, except that it did not lead him to break the laws openly; but all that is bad, low, selfish, vulpine, has been fostered in him, in order that he may make haste and learn to be rich. He is forbidden to hold intercourse with his brother, or with his early benefactors, all of whom he gives up very easily. He becomes an elegant, handsome man, clever to the finger-ends, with a wonderful capacity for business and for amassing money. He succeeds in becoming partner in the business and highly respected by the world; but in reality he is little better than if he had followed his father. The immorality of selfishness is extremely well brought out in the character and career of Zach. Whilst Zach has been rising in the world, Teddy seems predestined to a life of crime and a shameful end. He is clever in all the lighter branches of theft, and in his own particular circle extremely well known to the police; acquainted, too, with the inside of prisons. His father holds him fast, preventing all his attempts to be honest, following him up whenever he tries to escape from him. The terrible bond of wickedness, the difficulties in the way of escape when once the life of a thief has been begun, are all shown with a truthfulness that touches the reader with deepest pity for the outcast. Teddy has, however, a friend, who wishes to rescue him; but Teddy has set down in despair. He desires to be honest, but sees no escape, and believes he is too bad to mend. Martin struggles to draw Teddy into the right way; Teddy’s father struggles to keep him in the bad one. At last Teddy’s good angel prevails, and he goes to Martin Wynn. Teddy’s education is on a different basis from his brother Zach’s; he is of a better disposition and a finer nature. The plain education, based on religion, strengthens his good qualities into good principles. He learns his master’s trade, that of a worker in marquetry,—a trade for which, curiously enough, Teddy’s previous training as a thief came in very usefully, his quickness of eye and delicacy of finger having been cultivated to the utmost perfection. The after-fortunes of the two brothers are the natural results of their respective educations; but the progress of the story, and how at last evil is overcome by good in fair fight, and how the faith of Christie Wynn in Teddy Fernley is justified, and how everybody is going to be happy when the story ends, readers must go to the book to learn for themselves. The story is well worth reading for other things than mere amusement.

The Wedding Guests; or, the Happiness of Life: a Novel. By Mrs. Hume Rothery. (Pitman.) “‘There, Cissy,’” runs the first paragraph of this novel, “‘this is my last,’ said Lady Emily,

throwing one of those delicate concoctions of orange-flowers and white satin ribbon cleft 'favours' across the table to her pretty sister,—almost too young she looked for a bride-elect." A concoction of orange-flowers and white satin ribbon! We refer the good lady to her dictionary, if she has one. The finer passages of the story are written thus: "For though of love, as of all realities, there are many counterfeits—selfish passions, fickle fancies, misplaced affections, which are to love as the mirage to the life-giving pools of the desert-oasis, and are permitted, in mercy, to pass away from the hearts they degrade and desolate—such counterfeits afford no standard for judging of the reality they mock. The true chord once struck, be it early or late, in a true, pure heart, thrills once and for ever; alike amid the discords of disappointment, or the heaven-lent harmonies of heart-sufficing happiness." From this passage the susceptible reader may infer of what stuff Mrs. Hume Rothery's novel is composed. A lady with a more copious flow of words we never encountered. But we are in no disposition to speak or think lightly of Mrs. Rothery's romance, or anything else, after wading through more than four hundred closely-printed pages about such lofty and exhausting subjects as "the life-giving pools of the desert-oasis," and "heaven-lent harmonies of heart-sufficing happiness."

Maxence Humbert. By Amédée Achard. (Hachette & Co.)

THIS novel does not please us so much as 'The Caudine Forks' and 'Animals sick of the Pestilence,' but it is not without the lightness and humour that enlivened Amédée Achard's former tales. Like them also, it may be recommended to English women who like to keep up their French by reading every now and then a new French story, but have a natural wish to avoid the risks attendant upon undirected exploration amongst the yellow volumes of the Paris publishers.

From Waterloo to the Peninsula. Four Months' Hard Labour in Belgium, Holland, Germany, and Spain. By George Augustus Sala. 2 vols. (Tinsley Brothers.)

NOR the least remarkable fact concerning these clever, sprightly, fantastic volumes is that their contents originally appeared in the columns of a newspaper, as contributions from a Special Correspondent. It is needless to remind our readers that on more than one occasion Mr. Sala has discharged the functions of a special reporter with singular ability. From America he sent us a vivid, though one-sided, and, as we took occasion to tell him upon his return, radically false account of the rebellion; when he visited Algeria in the wake of the French Emperor, he plied his nervous pen with felicitous results; and to that same pen we are indebted for our completest and most picturesque records of several grand and gorgeous domestic affairs, such as the first Review of our Rifle Volunteers in Hyde Park and the ceremony of the Prince of Wales's marriage. Both at home and in foreign country, when a fitting and definite task has been assigned to him, he has shown himself an observant, instructive and indefatigable chronicler. Mr. Sala's present aimless mission, however, is unfavourable to his powers, and a source of disappointment to his readers. Had he been sent to any spot of the habitable world, to report the progress of any movement in which the public felt an interest, or to draw general attention to any country, organization, or political undertaking, for which it was thought that intelligent people

ought to entertain peculiar care, he would, no doubt, have maintained his reputation and popularity; but as the case stands, it must be admitted that the labour of saying a great deal about nothing in particular has been found too much for the writer.

Still, even under the most unfavourable circumstances, Mr. Sala cannot be otherwise than a droll and enlivening companion; and as we travelled with him from Belgium to Holland, from Amsterdam to Hamburg, and from Northern Germany to Madrid, he has provoked a good deal of merriment. Very good are his notes about the field of Waterloo, and Brussels, where Napoleon's "friends, the enemy," continue to plot, starve and grind their teeth in impotent rage at their powerlessness to unseat the silent man. "The 'Young Republic,'" he says, "languishes in Brussels. You may buy 'Napoléon le Petit' and 'Les Châtiments,' 'Les Propos de Labiénus' and 'Pauvre Français,' and a crowd of fouler libels still, accusing the imperial family of France of all the crimes Blackstone and Beccaria ever dreamt of, on the bookstalls." Having made his sneer at the enthusiasts who, less than twenty years since, hoped and strove to free France for ever from the chains of kingscraft, Mr. Sala, from a window of his hotel at Antwerp, directs a shot at Alpine and all other climbers, of whom he remarks, "The middle-aged clergymen, juvenile barristers, and ninnies generally, afflicted with the Excelsiorist mania, are nothing without their guides"; and with more justice, whilst he is in the same city he observes, "We sneer at the foreigners who come among us and know nothing of London beyond 'Leycesterre Squarr' or 'Le Soho'; but Englishmen find in foreign towns an orbit even more circumscribed. They live in portmanteaus and foreign Bradshaws, and *salles-à-manger* where the English newspapers lie on the table, and guide-books which, as a rule, resemble the encyclopædias, perpetuating from century to century the blunders of their predecessors." Of the Hague the roaming commissioner gives an excellent description, beginning with, "To come to the Hague, after struggling and splashing about muddy, amphibious, bustling, brawling Rotterdam, is like driving out of the crowd and turmoil of Fleet Street into the cool courts and quiet gardens of the Temple." Even when the tranquil place has lost its novelty to him, Mr. Sala observes in a tone of kindness, "It is within the bounds of reason to conceive a person growing after a time weary of wandering up and down Hanover Square with a pond in the middle, canals running down the adjacent streets, and Oxford Street close by, bordered with linden-trees, from Old Cavendish Street to Hyde Park Corner. I say this is within the bounds of reason; but, few as were the days I spent at the Hague, I was very sorry to leave it. I think I could have passed a month there and not got bored. There was variety to me in the quacking of the ducks. No two doorsteps were scrubbed, to my mind, in precisely the same manner."

Mr. Sala's letters from Spain are bright and sunny, as letters from the land of sun ought to be; and on several points they contain information that will be of service to English tourists travelling within Queen Isabella's boundaries. Here is a part of what he says about Spanish currency:—

"No remarks, however cursory, on the actual condition of Spain would be complete without especial reference to the amazing amount of bad money which circulates in the provinces; in fact, 'smashing' must ever form one of the chief corollaries to any argument bearing on Spanish finance. In Madrid you do not run much risk of taking bad

money. Keep your eyes open; change as seldom as you can; and beware of gold ounces: these are the principal items of advice I should give to a foreigner in the capital of Spain. The ounces, or *onzas*, gold pieces, which should be worth three pounds fifteen, but are seldom worth so much as three pounds ten—the bonny cart-wheel looking pieces which are so common in Mexico and the Spanish West Indies, and are in England erroneously termed doubloons—these ounces are current in Spain, and are generally genuine enough, but have in almost all cases been sweated, or clipped, or filed, or in some way or another reduced in weight. Before taking an ounce in change you are justified in having it weighed, and in exacting a certificate of its exact weight from the person from whom you receive it. Once out of Madrid, however, you enter on the domain of open, impudent smashing. In a three weeks' tour in Andalusia I took four pounds' worth of bad money. Of the sharp young *muchacho* at Baylen who favoured me with the brass two-dollar piece I have already told the reader. At Cordova, the very hotel-clerk who detected that a dollar I tendered him was bad, gave me two bad five-franc pieces, or *Napoleones*, as they are called in Spain, among the change for a good Isabellino. I tendered unwittingly one of these bad *Napoleones* in part payment of my fare from Cordova to Seville. '*Es falso*,' the money-taker simply remarked, pushing the piece back to me. I had no more silver, and was compelled to change gold; whereupon this very same clerk 'planted' on me among the change a bad dollar and two bad pesetas. Everywhere it is the same thing. In the shops, at the inns, in the railway refreshment rooms, the game of 'smashing' is carried on with unblushing and almost hilarious activity. The impudent openness of the waiters at the hotels in 'ringing the changes' becomes, after a time, positively amusing. You become, of course, aware of the tricks upon travellers which are played, and grow to be a tolerable judge of good and bad money; and then it is laughable to see how by slow degrees the waiter will turn decently honest. 'Thank you, Pepe. I'll trouble you for another dollar: this one is bad. Just one little good *peseta*, my friend, in lieu of this one, which is of tin. Aha! would you? Another bad *duro*? Replace it by a good one and we shall be quits.' And so, little by little, you obtain your proper change. You gain nothing by losing your temper. The waiter who tries to swindle you never loses his; and directly he begins to know you he would scorn to cheat you of a farthing. It is only the *extranjero* whom he strives to fleece. If his roguesy be detected, he is not in the slightest degree abashed. It is an error, he remarks, and shall at once be rectified. And in the absence of any moral stigma attaching to 'smashing,' lies, I think, its most disastrous effect on the character of the people of Spain. They plead that they have taken the bad money innocently; that they cannot afford to be losers by it, and that they must needs pass it off on the first novice they come across. Such a plea necessarily begets a very low moral tone, and inclines every man to play at the game of *pelar recino*, or beggar my neighbour. Juan takes a bad *peseta* from José, and immediately tries to pass it off on Jacobo. The foreigner finds at last that his own stock of ethics is getting very slender; and after taking—say, four pounds' worth of 'duffing' *duros* and *pesetas*—has very little hesitation in paying away to the unwary the false gold and silver he has received. The line must be drawn at blind beggars. To the mendicant who cannot see it would be wicked and treacherous cruelty to give alms that will not pass current for bread and meat; but I ingeniously own that on several sacristans and *custodes*—notably to the person who showed me over Pontius Pilate's house at Seville—on more than one palace-doorkeeper, and on two *concierges* of a picture gallery, I bestowed the dubious silver coinage I had taken in the course of my preceding day's peregrinations. It comes to this at last. You grow as knavish as the knaves who, because you were a stranger, took you in. The genuine gold coinage of Spain, notably the Isabellinos or hundred-real pieces, worth about twenty-one shillings and ninepence, cannot be grumbled at. It is good,

honest, standard gold, very bright in hue, though not so red as the French pieces of twenty francs, and handsomely stamped. Indeed, as an example of mintage, the Isabellino is a comelier coin than our English sovereign—*la belle et bonne Victoria*, as the French Canadians call it. The tourist in Spain would do well to be on his guard against all other gold coins—the ounces, because they are usually, as I have pointed out, deficient in weight; the two-dollar pieces, because they are frequently fraudulent. I was a more especial sufferer from these last-named pieces, as the only Spanish gold coins I had hitherto known were then current in Cuba and Mexico, where the gold, very old and very pure, has still a pale, dull, brassy appearance. Now these brassy-looking bits are, in Spain, precisely the bad ones; whereas, the genuine pieces have a sharp ring, and a glittering Brummagem look. As respects the silver coinage, the name of the imitations is Legion. All kinds of scraps of silver, copper, tin, pewter, albatra, and lead circulate as *duros* and *pesetas* and ten-real pieces. You may watch an expert sorting a handful of silver change, and hear him say, 'This one is good; this one is pretty good; this one is bad,' whereupon he puts it into a separate pocket, to be bestowed on the unwary, at a convenient moment. 'This one is doubtful; but I think it will pass.' The doubtful *peseta* he slips into the midst of the good ones, as a wild elephant to be broken in is placed between two tame ones; and trusts to good luck, or the carelessness of his neighbours, to get rid of it. When I came back to Madrid, from the South, one of the pockets of my courier's bag was quite full of bad money."

For his own no less than his friends' interests, Mr. Sala has been over-long in foreign parts. We advise him to think again about his resolution with respect to that London district of which he writes, "I shall not reside in Bloomsbury, I conjecture, any more," and to ask himself whether he cannot do better work as a British householder than as a cosmopolitan tourist. If he is in a mood to take good counsel, he will fill his pockets with gold Isabellinos, and forthwith begin his homeward journey.

Commentary on the Gospel according to Luke; showing the Doctrines taught by Jesus Christ, and how far these agree with the Doctrines taught by Paul and other Apostles, and by Modern Churches. By James Stark, M.D. 2 vols. (Longmans & Co.)

LAYMEN who write on the Bible look at it from another standpoint than that of professional theologians. They use not the technical terms or nice distinctions of the schools; they are less careful about the parts of a system fitting harmoniously; they speak out with less reserve on all subjects; and they attach less importance to dogma. They also exhibit a more tolerant spirit towards others; and had they power to persecute, they would not use it so unmercifully.

Dr. Stark has given much time and attention to the study of the Bible. Belonging, as he tells us, to the class of original thinkers who write on theological and religious subjects and publish the result of their observations, he gives to the public a Commentary on the Gospel of St. Luke, the result of twenty-five years' preparation. The plan of it is somewhat novel; to show what are the doctrines which Christ himself taught, and how far these agree, not only with the doctrines taught by St. Paul and the other apostles, but with the creeds of modern churches. In perusing the third Gospel, he seems to have been strongly impressed with the idea that Christians generally profess to believe many dogmas foreign to the mind of Christ and opposed to his precepts. The wide difference between the creeds of the churches and the teaching of Jesus Christ made a deep impres-

sion on his spirit, leading him to exhibit it in all its nakedness by means of a continuous exposition of St. Luke. This feature of comparison stamps his book with freshness and originality.

The volumes are very readable. The author writes in a plain, clear, straightforward style, without circumlocution or mysticism. Thinking vigorously, he uses a vigorous and homely diction, not elegant or correct, but remarkably lucid. As to his spirit, it is commonly large and catholic. Not always so, certainly; for whenever he begins to speak of the Presbyterians, who take the Westminster Confession of Faith as their standard, or alludes to certain portions of the Calvinistic creed, such as election, he uses language too vehement and extravagant. His indictments against almost all modern sects or churches are numerous and heavy; and they are too often preferred in an offensive way, which will repel readers. It is strange also that one who is himself so heretical in the eyes of orthodoxy, should speak of the German writers whose works fell in his way as having loosed themselves from all faith in a revelation. Many will apply similar language to Dr. Stark, the Scotch writer, when he affirms that the Gospels are not inspired, except such parts of them as record Christ's own words, and that the inspiration even of these words of Jesus does not reside in the words themselves, but in the things which the words teach. It is evident that the author's view of inspiration, which makes it identical with *revelation*, is erroneous. Neither philosophy nor Scripture warrants him in asserting that some parts of Scripture are inspired, others not. Inspiration belongs to the mind, and does not desert it at times. The creed of the author would make a curious figure if it were collected from the opinions advanced in this Commentary. It might be called liberal and confined. It is composite in character, because while very heterodox in the main, it has orthodox elements in it. One thing is evident—he is not afraid to speak his mind on all subjects touched upon in the Bible, and all doctrines promulgated in the creeds. The atmosphere of Scotland seems a very ungenial one for him, because the Presbyterians there, especially the Free Church, are soundly and frequently rated about the unscriptural doctrines they hold. The author is a sort of Ishmael in his own land.

While we admire many things said in the Commentary, especially those fine practical lessons with which it is interspersed, while we approve of the author's free speech and honest expression of belief, we cannot avoid thinking him an incompetent commentator on the Gospel.

The work shows a self-taught man, who has thought out for himself all the parts of it, and sees clearly little more than one thing at a time. His mind is without academic training, philosophical reflection, critical power, and comprehensive survey.

The scholarship is very defective. Indeed, the majority of his Greek criticisms are ludicrous. Too often the English version is decried as bad, when it is perfectly correct. In many places he introduces digressive topics, dilating upon them at considerable length as if he had discovered something new about them, whereas they are far better explained elsewhere. He hammers too much on certain peculiarities belonging to churches, to the neglect of good taste and the infliction of pain. Hence, readers who may be pleased with one paragraph will probably be irritated by the next. He is also too fond of reading lectures to the clergy on their ignorance and bigotry, exaggerating the picture of their resistance to

reforms to make it more telling, and rendering it so far repulsive. Doubtless his object is praiseworthy, his motives pure and upright. His work shows fearless honesty. Thinkers will read it and learn; but the philippics against all ministers of religion, and the strong assertion of false opinions, will show scholars that the book is not for them.—The author says,

"The clerical mind never changes, never has changed in any age or country, no matter what the religion be. It is constantly seeking the advancement of its own order, and the subjugation of the people; and cares not how this be done, so it be attained. Hence, in every age, in every country, under every religion, they have sought the subjugation of the multitude, and have endeavoured to raise themselves above the civil power. They are only repeating now what their clerical predecessors have done from the beginning of the world. What a depth of wisdom was in Solomon's remark: 'The thing that hath been, is that which shall be; and that which was done, is that which shall be done.' (Eccl. i. 9.) History just repeats itself. Hence the clergy are never found leading the van in the investigations into the truths of Scripture, or in promoting any object which would tend to free mankind from the bigotry and despotism of creeds, which the clergy have endeavoured to palm on men as Scripture truths. Adopting a narrow creed, often drawn up by their own predecessors in a dark, unenlightened age, the clergy of each church never advance beyond it. They only see one side of every question, and that side they style truth and orthodoxy; and whatever does not belong to that side they brand with the names of untruth and heresy. Occasionally, a Paul, a Peter, an Elijah may appear and endeavour to dispel the darkness which the clergy throw around the word of God by their traditions, creeds, and confessions of faith; but so few dare think for themselves, that, though the great mass of the people are convinced of the falsity of much that is taught by the clergy, they remain enslaved still."

This is sweeping, reckless, and not altogether fair.

After quoting "Glory to God in the highest, and on earth peace, good will toward men," and referring to the Greek *ἐν ὑψίστοις*, he states, "From this it is evident that the translation 'in the highest' must be a mistake, and that the Greek phrase ought to have been translated 'Glory to the most High God.'" This is totally wrong.

As a specimen of good commentary, the work is inferior. The ordinary reader cannot adopt the expositions implicitly. They are often wrong and often right. No critic will resort to it who is familiar with some of the recent works that have done so much to advance Biblical interpretation. Many of the clergy upon whom our author looks with contempt will look upon his performance with a like feeling. Nor can it be wondered at when they see a reformer of creeds gravely arguing that the Greek words translated "and supper being ended" (John xiii. 2) are correctly rendered, and proposing "Smyrna opium" as the meaning of *σμίρνα* (myrrh).

The Prophet: a Drama—[Il Profeta: o la Passione di un Popolo, &c., di David Levi, già Deputato al Parlamento]. (Torino, Società Tipografica Editrice; London, Asher & Co.)

FREEDOM of speech was an acknowledged privilege of the Hebrew prophets. They might rail against kings and princes, and priests and people, to any extent that the spirit gave them utterance—it was no crime. The lawgiver with whom prophesying began, in his aspirations for popular liberty, had expressed the generous wish that all the Lord's people were prophets. In fact, any one, however humble his condition, might rise to this dignity; the mantle might fall on the shoulders of a herdman, as well as

on persons of sacerdotal and royal descent. A profound conviction of the Divine will, and an urgent sense of justice and rectitude, would seem to have been the essential conditions to constitute a prophet; and this conviction and these sentiments gave them a boldness of speech which set at naught all personal dangers. The prophet was regarded as the immediate messenger and interpreter of the will of Jehovah; he had, necessarily, no connexion with the priesthood or the temple; his sanctuary was an *idea*; the idea of Jehovah, of justice and righteousness. He came forth unprepared, and moved by the greatness and holiness of his subject, and the authority under which he was speaking, in the public places of the city, on the threshold of the temple, at the foot of the throne, he uttered without fear or trembling the denunciations of the Most High, and no one had the right to impose silence on his censures, or to call him to account for his words. This was a marked feature in the commonwealth of Israel.

Samuel was the first to give to prophecy the character of a special calling. He established a school of prophets; in his hands prophecy assumed a political character, and was used as a means of checking the arbitrary conduct of kings, the setting up of whom had been contrary to the fundamental principle of the Hebrew legislation. Prophesying thus became an essential part of the new social constitution of the state. The disciples, or sons of the prophets, formed an order, ruled by a superior, and consisted of various grades; the members lived together, removed from the busy haunts of men, took their frugal meals in common, and had a secret doctrine in reference to divine things.

The Prophet in the drama of Signor Levi is Jeremiah, the son of Hilkiah, who exercised this office for upwards of forty years, up to the time of the destruction of Jerusalem by the Chaldeans, B.C. 588, the last scenes of which are here vividly depicted. The termination of the kingdom of Judah, 134 years after the ruin of the kingdom of Israel, marks an important epoch in the religious history of mankind. New elements were then introduced into the Hebrew system, new motives arose, and the first faint dawnings of Christianity may be traced to this period. The author, aware of this, precludes his drama by a long and comprehensive dissertation on the religious systems of antiquity, and shows how superior the Hebrew faith was to any other in inspiring the virtues of firmness and constancy. But he is no bigot: all the great teachers of the human family are treated by him with respect and consideration:—

The ancient and sacred Indra, Manu, Brahma, Mâtra, Chakya Mouny, Confucius, Moses, Zoroaster, the Hebrew prophets, Hillel, the precursor of Jesus, Paul, Mohammed, are all so many colossi of intelligence and of love, symbols of force and of piety, who rise up, like the summits of lofty mountains, above a humanity prone and kneeling at their feet. They are, as it were, centres of light and heat which draw around them millions of living spirits conjoined and united in them, and who thence derive the nourishment of the mind and heart. Thanks to them, the religious sentiment, which alone renders life truly great and precious, was born, grew, refined itself, and rose to higher perfection. Thanks to them, humanity, like the goddess beholding her form in the fountain, discovered its own likeness, and recognized the divine beauty of its original: and the spirit, released from vulgar cares, liberated from the phenomena which dazzle and disappear, rose to the still higher rank of universal laws, and was privileged to announce those general principles which regulate the divine movement in time and space, and pre-

sides over the course of our human nature through its historical epochs.

In the year 606 B.C. Nebuchadnezzar, who had been associated with his father, Nebopolassar, in the government of the kingdom of Babylon, laid siege to Jerusalem, made Jehoiakim, King of Judah, tributary, and carried into captivity a portion of the people, among whom was the youthful Daniel. A few years later (599 B.C.), Jehoiakim was slain, and his son, Jeconiah, became king; but in little more than three months he, also, with many of the people, and among them the Prophet Ezekiel, were taken captives by Nebuchadnezzar, who made Zedekiah, the uncle of Jeconiah, king in his stead. The new viceroy, for only such he was, at the instigation of intriguing priests and courtiers, and in defiance of the Prophet's predictions, broke faith with his superior lord, and, in league with the King of Egypt, rebelled against him. This brought the army of the Chaldeans again to the gates of Jerusalem. The siege commenced; the Egyptians, who came to the aid of the Jews, were driven back, and the city was taken. We read in Jeremiah xxxvii. 11-15 that, when the army of the Chaldeans turned from the siege to encounter the troops of Egypt, Jeremiah went forth out of the city to go into the land of Benjamin, and that he was arrested by Irijah, captain of the guard, and accused of falling away to the Chaldeans. The Prophet had publicly declared that whoever remained in the city should die by the sword and the famine and the pestilence, but that whoever went over to the Chaldeans should live; and it seemed that he desired to add example to precept—at least, this was the charge made against him. The princes accused him of weakening the hands of the men of war who remained in the city, and the hands of all the people, in speaking such words unto them. So Jeremiah was delivered up to them, and put in prison. His trial occupies the most interesting scenes in the drama, the first act of which is laid at Ramah, in the house of the Prophet, the other four at Jerusalem. In addition to the Bible *dramatis personæ*, among whom the faithful Ethiopian, Ebed-melech, acts a conspicuous part, are Alda, the prophetess, wife of Jeremiah; Rachele, his daughter, betrothed to Emanuel, a valiant Hebrew; Ananias, the priest of Baal, also in love with Rachele, and resolved to get her into his power; and Giovanni, commander of the forces, a zealous defender of the city, whose god is his sword: the two latter are antagonistic to the Prophet and his principles. A numerous host of priests, prophets, judges, elders, citizens, exiles, workmen, soldiers, children, and choruses, fill up the interstices and swell the pompous train. The work dates from 1848, or even a little earlier, the inter-act, which occurs between the second and third acts, and is addressed to Italy, having been written at Venice in 1846. There is much philosophical doctrine scattered through the drama, and the language partakes of the phraseology of Dante. The fundamental principles of the Law are set forth, and illustrated in the characters, which are drawn with force and freedom; and the interest is well sustained. The *dénouement* is as satisfactory as could be expected where lovers are not to be made happy, and citizens are to be dragged in chains and sorrow to an enemy's land. In the last scene, to the horror of the fear-stricken exiles, the Temple is beheld in flames; the elders, the princes, and the people throw dust on their heads, tear their clothes, and fall on their knees; Jeremiah pronounces a valedictory address, not without some seeds of consolation,—consecrates the child Daniel, who, by a poetic licence, is present on the occasion,—and the drama ends with a prayer to the

God of Ages that the tears of the nation may be as a universal sacrifice offered up for all peoples, for the triumph of the truth and the glory of His name.—

Or tu, Signor del secoli, quel pianto,
Onde, osteria universal, debbe il Giudice
Tutte irrorar la terra, pel trionfo
Del dritto d'ogni gente, pel trionfo
Del Vero, per la gloria del tuo Nome,
Ricever degna, e sovra ogn' uom rieda
In onda che fortifichi e consoli.

This sentiment illustrates the universal application to be made of the designs of Divine Providence manifested in the rise, progress, and eventful history of the dispersed Hebrew race.

Three Phases of Christian Love. By Lady Herbert. (Bentley.)

THIS is an exquisite book, and men and women of all sects and shades of religious faith will thank Lady Herbert for her labour of love. It is a pure offering at the shrine of humanity, to show the world how divine a thing human nature may become when it is interpenetrated by the gift of charity, transforming and restoring it to the image of Him in whose likeness it was at the first created. The Christian love to which it is consecrated is that Charity which St. Paul has pronounced to be first and greatest of all virtues, and the one that will not cease or pass away with this life, but endure for ever.

The three types selected by Lady Herbert are all women. There is the phase of the mother's love, as exemplified in St. Monica, the mother of St. Augustine; the daughter, as shown in Mdlle. Victorine de Galard Terraube; the religious life of charity, in Madame Dévos, the Superior of the Sisters of Charity of St. Vincent de Paul. They are types of Christian love as developed in the Roman Catholic Church, except St. Monica, who, like her son St. Augustine, may be claimed by the whole of Christendom; but the Romanism may be taken as the accidental element in which they worked and lived; the strength and spirit of the excellence that was in them is not peculiar to Catholicism, it is Christianity itself. Lady Herbert, being a Catholic, writes as one; but the most rigid Protestant will find little to protest against. The foundation on which these lives were built was love to Almighty God and the love of all creatures for His sake. Each of these three monographs is a gem of biography. The story of St. Monica is the most fascinating, as it has been the most important in its influence on the Christian world. It professes to be a translation from the French of M. l'Abbé Bougaud, Vicar-General of Orleans; but the pure and graceful style bears no trace of a foreign source. The figure of St. Monica is reproduced vividly and tenderly, one may almost catch the tones of her voice. St. Augustine has immortalized his mother. Who is there who can read without awe his account of that last conversation he held with her at Ostia, when they were resting on their journey towards their old home in Africa, where, says he, "I stood leaning in a certain window that looked into the garden of the house where we now lay at Ostia; we were discoursing there together alone very sweetly, and forgetting those things which were behind, and reaching forwards unto those things which are before; we were inquiring between ourselves in the presence of the truth, of what sort the eternal life of the saints was to be which eye hath not seen nor ear heard." The story of Monica is addressed to mothers. In her Introduction, Lady Herbert says—

"It should not be written, it should be sung, for it is a poem. It is the history of the most beautiful and the purest love that has ever existed, passing through twenty-five years of trial and of

fear without faltering for an instant in its course, becoming all the more ardent as difficulties increase; and finally ending in a flood of ecstasy, of glory and of joy. It is of that mother we would write to console the anxious, fearful mothers of these days, and to reveal to them the enormous power God has put into their hands for the safety of their children. * * Perhaps there never was a moment when wives and mothers, if worthy of the name, were called upon to bear such deep sorrows. Let them read the history of St. Monica. Let them learn to pray and to weep like her, to hope to the end, never to be discouraged, and to believe that if the young men of the present day yield to their terrible temptations, it is because there are not enough tears and prayers in the hearts of their wives and mothers ascending daily and hourly before the throne of God."

The life of Mdlle. Victorine Galard Terraube is the story of a young French girl of distinction, and is thus prefaced by the author:—

"In this nineteenth century, when to be brilliant, to be 'fast,' and to be admired, seem to be the main object of English girls, when the style of conversation among themselves is such as to lower instead of raising their moral tone, and the indiscriminate reading of doubtful popular novels still further vitiates their natural purity and good taste, it has been thought advisable to give a short English version of the life of a young French lady lately dead—a girl of high birth and station, leading outwardly the common life of other girls in a similar position; hoping that some of our young readers may be induced to follow so bright an example."

To do this there is not the smallest need for them to become Roman Catholics. The value of Mdlle. Victorine's example consists in her steady resolve to live for others and not to please herself. Her "Resolutions," drawn out at the age of seventeen, are remarkable, and the spirit of them worthy of all imitation. This life may be studied with great advantage by young ladies who are discontented with their natural position at home, and who either "want a mission," or who insist on making the whole household uncomfortable by religious dissipation. They will find that to do their duty as obedient children, and to make their home happy, is the first phase of Christian love which it behoves them to cultivate. Victorine's conduct in the fashionable world in which she had to live is a lesson to the religious young ladies who set up in books—and real life too, alas!—to be better than their parents. She had a great wish to become a Sister of Charity. Her father, who was from home, wrote her a kind and sensible letter on the occasion, in which he declared that to fulfil the manifold duties of her station with simplicity and diligence was better for her soul than to leave home, where no one could take her place, to go to the houses of Sisters of Charity, where they were working admirably without her help. The spirit in which Victorine gave up her own will was the key-note to her character; she found plenty of useful work to do. There is an account of her journey to Italy and her visit to the churches, which is given from the Catholic point of view; non-Catholic readers must make the necessary grains of allowance for all that. It is the beautiful spirit in which she led her life that constitutes the edification of her story.

The third biography is the life of the Vénérable Mère Dévos, Superioress of the Order of Sisters of Charity of St. Vincent de Paul, a most important post to occupy. It is written to give an insight into the work and rules of the community; but the special information is not much. The Mère Dévos herself was a remarkable woman, with talents for organization and administration; she will remain in the memory of our own Florence Nightingale as a distinguishing trait of her life was her piety,

in word more, if possible, than in deed; her tongue was consecrated to the law of kindness as her life was to good deeds. Hard towards herself, very tender to others; never resting, never thinking of herself, with the care of the whole Order upon her hands, yet laying upon herself the humblest duties of watching and nursing; guiding, comforting, strengthening all who were under her rule, her whole life was one act of charity. No one can read the story of these lives without an aspiration after the same spirit; but it is not necessary to be a Romanist to obtain it. In all religious communities there are to be found persons of a like mind, whose attainments have been as great; and the more each and all press on towards perfection, the more the likeness of character under all diversities of gifts shines out; the same spirit working in them all, the differences that have divided them disappearing in the light and heat of fervent charity.

The book is beautifully printed and got up; and for those who do not object to Roman Catholic heroines, it is a charming gift-book.

OUR LIBRARY TABLE.

The Tropical Resident at Home. Letters addressed to Europeans returning from India and the Colonies on Subjects connected with their Health and General Welfare. By Edward J. Waring, M.D. (Churchill & Sons.)

HINTS to those proceeding to India as to the management of their health and purse are to be found in many books, as, for instance, in Murray's Handbook, and other similar publications. Dr. Waring has reversed the instructive process, and discourses very sensibly to gentlemen of the Colonel Newcome class as to the precautions to be observed on revisiting their native land. The old Indian, however, of the story-books has passed away, and there are very few Englishmen now who pass their whole service in India without a furlough, or rather without frequent returns to Europe. For the few of the old school who still remain, Dr. Waring's book will be a treasure, and to all tropical residents returning home it affords some useful advice. Thus, even the period of the year for returning must be considered, and our author is right in ruling that it should, if possible, be "late in May or early in June," as well for health as for mental impressions. In some points Dr. Waring is a little too minute, as in the following passage, for example: "Both in winter and in summer, in the latter especially, it is advisable that you should be provided with two full suits of woollen garments, to be worn on alternate days, the suit not in use being hung up either in the sun or before a fire, so as thoroughly to dry and ventilate it, and cause the evaporation of the exhalations it has imbibed on the previous day. In this way the garments are rendered sweeter, fresher, and more healthful than if kept in daily use." The economic Muse descends somewhat too low when she discourses of the husbanding of flannels. The book, nevertheless, is readable, useful and instructive.

Lessons in Elementary Physiology. By T. H. Huxley, LL.D. (Macmillan & Co.)

THIS little work is an admirable text-book for teachers and students in boys' and girls' schools. The principles of human physiology, of which boys and girls know little or nothing, are plainly and concisely defined, and the students of this best of "handy books" will be so grounded as to have "but little to unlearn as our knowledge widens." Prof. Huxley modestly says: "I have endeavoured simply to play the part of a sieve, and to separate the well established and the essential from the doubtful and the unimportant portions of the vast mass of knowledge and opinions we call Human Physiology." The manner and purpose of this manual could not be better explained; and we may add, that though it is intended for the young, and for those who teach the young, the book will be found of interest and use by persons of all ages who wish

to know something of the tabernacle of flesh in which life is temporarily lodged.

The Organization of the Empire. By the Hon. Joseph Howe. (Stanford.)

IN opposition to the politicians who are buying themselves with schemes for setting the mother-country free from her colonies, or for relaxing the bonds which at present unite Great Britain with her remote dependencies, Mr. Howe maintains that England's true policy is to stimulate the filial affection of her children, and draw them nearer to her life and heart. In his opinion, the self-governing colonies should be invited to send representatives to the English House of Commons, so that in the Parliament of the empire a voice might be heard speaking the wish of every one of its constituent parts. He is also of opinion that every colony possessing responsible government should be required to contribute its quota to the defence of the entire nation. Of course no act for taxing colonies for national purposes would be valid until it had received the sanction of the local legislatures, as well as the assent of the imperial Parliament; but Mr. Howe is inclined to think that the self-governing colonies, instead of wishing to shirk their proper share of the empire's burdens, would without reluctance co-operate in any well-considered measure for the consolidation and security of the whole country. Colonial representation in the House of Commons, and colonial taxation for imperial objects,—these are the grand features of Mr. Howe's scheme. Of course the projector is aware that objections can be offered to his suggestions, and that it remains to be ascertained whether the numerous dependencies, separated by vast distances, and having no apparent tendency towards political cohesion, could be brought to co-operate in the desired manner. Avoiding details, Mr. Howe offers only the outline of a proposal for which the goodness of its object and the services of the writer during thirty years of public life will secure a proper measure of respectful attention.

At the suggestion of several teachers, Mr. A. K. Isbister has prepared an edition of *The First Three Books of Xenophon's Anabasis* (Longmans), on a plan similar to that of "Caesar." Before the text he places a number of reading lessons, consisting of passages from the *Anabasis*, preceded by the separate elementary sentences, of which the longer and complex sentences are composed. The pupil is thus prepared to construe by a previous acquaintance with the words and phrases, and at the same time gets a clearer insight into the formation of the sentences than would otherwise be possible. We cannot understand why the accents should have been omitted in the elementary sentences. The vocabulary contains not only the meanings of the words, but also all necessary information as to irregularities of form and peculiarities of construction, with translations of difficult passages. On the whole, we consider it a work admirably adapted for school purposes.

We have on our library table *The British Workman*, illustrated, Second Series, 1860-64, dedicated to the Industrial Classes (Partridge).—*The Christian World Magazine*, 1866 (Clarke).—*Simple Truth spoken to Working People*, by Norman Macleod, D.D. (Strahan).—*Dr. Goethe's Courtship: a Tale of Domestic Life*. From the German (Routledge).—*Transactions of the Historic Society of Lancashire and Cheshire*. New Series. Vol. V. Session 1864-5 (Liverpool, Holden). Also New Editions of *The Church and the World: Essays on Questions of the Day* by Various Writers. First Series, edited by the Rev. Orby Shipley, M.A. (Longmans).—*Daily Bible Illustrations*, by John Kitto, D.D., revised and enlarged by J. L. Porter, D.D. (Edinburgh, Oliphant).—*Line upon Line; or, a Second Series of the earliest Religious Instruction the Infant Mind is capable of receiving, with Verses illustrative of the Subjects*, by the Author of 'The Peep of Day' (Hatchard).—*The Adventures of Philip on his Way through the World: showing who robbed him, who helped him, and who passed him by*, by W. M. Thackeray (Smith & Elder).—*Inorganic Chemistry*, by the late George Wilson, M.D., revised and enlarged by Stevenson Macadam (Chambers).—*An Essay on Dots, and*

several Appearances connected with it, by William Charles Wells. Edited, with Annotations, by J. P. Casella, and an Appendix by R. Strachan Longmann),—*Homæopathy and Hydropathy impartially appreciated*; with Notes illustrative of the Influence of the Mind on the Body, by Edwin Lee, M.D. (Churchill),—*Pass and Class*: an Oxford Guide-Book through the Courses of Literæ Humaniores, Mathematics, Natural Science, and Law and Modern History, by Montagu Burrows (Parker),—*The Paris Sketch-Book*, by W. M. Thackeray Smith & Elder),—*Lady Lisle*, by the Author of *Lady Audley's Secret* (Ward & Lock),—*Brazil and the Brazilians portrayed in Historical and Descriptive Sketches*, by the Rev. James C. Fletcher and Rev. D. P. Kidder, D.D. (Low),—*The Sporting Rifle and its Projectiles*, by Lieut. James Forsyth Smith & Elder),—*The Poetical Works of Edward Young*,—*The History of Sandford and Merton*, illustrated,—*The Pilgrim's Progress*, by John Bunyan, illustrated,—*Stories and Studies from English History*, by Mrs. S. C. Hall and Mrs. J. Foster, illustrated,—*My Brother's Keeper*, by A. B. Warner,—*Winning Words: a Lamp of Love for the Young Folks at Home*,—*Natalie*; or, the Broken Spring,—*Setna, the Turkish Maiden*, translated from the German of Dr. Barth,—*Heinrich's Struggles*; or, *How the Poor Boy became the Great Man*, by the Author of 'The Valley of Decision' (Edinburgh, Gall & Inglis),—and *How to Win Love*; or, *Rhoda's Lesson*, by Miss Mulock (Dean & Son).

BOOKS FOR CHILDREN.

Aunt Judy's Christmas Volume for Young People. Illustrated. Edited by Mrs. Alfred Gatty. (Bell & Daldy.)

AMONGST the numerous literary and artistic attractions that entitle this miscellany to take rank high above the ordinary literature of the play-room are some illustrations by Mr. Morten, the young artist whose mournful end has recently cast a gloom over many studios; a brief tale by the author of 'Dénise,' and the first five chapters of a new story, entitled 'Home with the Hooping-cough,' by the author of 'Mary Powell.' From the publishers' announcement affixed to this entertaining book of fiction, poetry, music, and verbal puzzles, it appears that the editor purposes to issue two annual volumes of 'Aunt Judy's Magazine'—one at Christmas, and the other on May-day.

Shifting Winds: a Tough Yarn. By R. M. Ballantyne. With Illustrations. (Nisbet.)

THERE is a mistake on the very first printed page of this capital book. 'Shifting Winds' is not a tough yarn, but a hearty, vigorous, bracing story, fresh with the pure breezes and sparkling with the bright waters of the everlasting sea,—just such a volume, in fact, as the best of Mr. Ballantyne's tales for children have taught us to look for from his pen at this season of the year. Having on former occasions told us the story of 'The Life-boat' and the story of 'The Lighthouse,' the author, in his present work, gives us some words of good counsel and seasonable encouragement about shipwrecked mariners and sailors' homes. In a brief preface he renders due acknowledgment of literary assistance received from the secretaries of 'The Shipwrecked Mariners' Society' and 'The Sailors' Home, Wells Street.'

Beechenhurst. By A. G. (Nisbet.)

IN a style that will please children, and with considerable literary ability, A. G. sets forth the evil and redeeming qualities, the naughtiness and gradual amendment, of little Gertrude, whose perversity and strange misconduct were not more attributable to inherent sinfulness of nature than to the injudicious leniency of Aunt O'Brien and the still more injudicious severity of Uncle O'Brien. Whilst the indolent aunt was too ready to yield to Gertrude's waywardness and violence, the harsh uncle, going to extremes in the other direction, roused the young lady's indignation by having recourse to a system of discipline that has very generally gone out of fashion in these later days. Whether the humane papas and mammas of the present generation do not subject their offspring to quite as much pain and humiliation and physical exhaustion, by impositions and other apparently

lenient punishments, as the parents of former times inflicted by moderate administrations of a sharper and unfashionable remedy for evil tendencies, is a question on which we will not enter. It is enough to say, that whippings "didn't answer" with Miss Gertrude; whereas upon her removal to Beechenhurst—the home of a milder and kinder uncle than Mr. O'Brien—she soon evinced signs of amendment. At the close of the story, after we have taken leave of the numerous little cousins who are Gertrude's playmates, the author encourages us to hope the best for Gertrude's future career. "We have seen," she says, "only the first faint budding forth of the good seed sown in her heart; but we can rest assured that the work begun thus early will not be left unfinished."

Casimir: the Little Ecile. By Caroline Peachey. With Illustrations by Clark Stanton. (Griffith & Farran.)

THE hero of this story for children is a Polish boy, who, upon the partition of Poland and the deaths of his father and mother, the Count and Countess Pulaaski, makes his escape from the oppressors of his country, and, after passing through many romantic perils and trials, reaches England, where he finds a hospitable protector and a good education. Miss Peachey is an artistic writer; and she has done well in closing the story whilst Count Casimir is still a school-boy. The character of the little Count may be inferred by his letter to his friend Franz, with which the volume ends:—"If, when I am old enough, there is still no chance of striking a blow for dear old Poland, I think I shall enter the English military service. I am not clever, like Philip, who is to be a barrister; nor studious, like Eugene, who says he hopes to take holy orders. Or, perhaps, I may become a great traveller; I do love seeing different countries and peoples." The tone of 'Casimir' is healthy, and to boys of a certain temperament the story will be no less beneficial than interesting.

Old Memories of the Stukeleys. (Chapman & Hall.)

THESE "old memories" of past events are so very old that they have not the faintest possible resemblance to real life. The book seems to be the work of an aged amateur; and the worst harm it can do will be to sop up a few crown-pieces that might otherwise find their way into the pocket of a deserving scribe.

A Summer in Leslie Goldthwaite's Life. By the Author of 'Faith Gartney's Girlhood.' (Low & Co.)

BY the great merit of her previous stories the author of this tale for girls has encouraged critics to judge her productions by a standard that is far too high for her present contribution to juvenile literature. The narrative sets forth the pleasures, mishaps, and experiences of Leslie Goldthwaite during a summer's trip, made with a party of friends from her home, in an inland city of Massachusetts, to the White Hills, or "the Mountains," as they are ordinarily designated in New England. Of course, the book is not without pleasant touches and good points. Nothing altogether bad, or even altogether inferior to the better work of commonplace writers, could come from the pen that gave us the history of 'Faith Gartney's Girlhood'; but, on the present occasion, the author fails to do herself justice. Her once natural style has become tainted with affectation; her story lacks precision, dramatic interest, directness; and even in the passages that are least open to blame her meaning is expressed by hints and suggestions more often than by the plain and unmistakable language in which young minds should be addressed by their teachers.

Three Tales for an Idle Hour. By the Author of 'The Sunbeam.' (Parker & Co.)

WE cannot recommend any idle man to seek diversion in this collection of highly-romantic tales, until he has tried every other available means for rendering idleness agreeable.

Animal Sagacity. Edited by Mrs. S. C. Hall. (Partridge.)

OF the few books for children that have appeared this Christmas, Mrs. Samuel Carter Hall's collection of anecdotes, illustrating the sagacity of ani-

mals, is the only volume that we can recommend in enthusiastic terms for quite young children; but, though little tunic-wearing boys and short-skirted girls will derive pleasure from its well-told stories and abundance of excellent pictures by Harrison Weir, boys and girls of larger growth and stouter habiliments will peruse the book with equal satisfaction. Having read and re-read every line of the entertaining and richly-embellished work, we have great pleasure in expressing our own as well as our children's gratitude for the treat which Mrs. Hall has given us; and we do hope that hundreds of English lads and lasses will take to heart the lesson which she would fain impress upon the mind of the little friend to whom she says, in her dedicatory letter: "At least, I can profit by the occasion to convey you assurance of my love, of my hope and my faith in your future, and also my earnest prayers that God may teach to you, and to all who are to be the hereafter of the World, the greatest lesson, that happiness can be obtained only by making others happy; and that none can be esteemed or honoured by men, or loved by God, who are not considerate and 'merciful' towards the meanest thing He has created."

My New Home: a Woman's Diary. By the Author of 'Win and Wear.' (Edinburgh, Nimmo.)

IN lieu of new tales by English writers, the commercial caterers of literary toys are giving us in this "children's season" reprints of old stories by authors of Peter Parley's and Miss Edgeworth's dates, reproductions of translations of familiar German literature, and importations from America. The publisher of this readable story has covered his stall with Transatlantic wares, and, so far as his own interests are concerned, he has perhaps exercised sound discretion in doing so. 'My New Home' is a sketch of the privations, struggles, and experiences of a poor country pastor's family; and its author betrays her nationality by such expressions as "I had long ago dabbled some in literature, and have accumulated from the proceeds of my pen quite a little independence." Apart from such blemishes, the book is well written. The events and characters are natural; the ending is not provocative of despondency; and the power of the story to amuse an English reader is heightened rather than lessened by its occasional Americanisms.

One Hour a Week: Bible Lessons for the Young. By the Author of 'Jesus upon Earth.' (Edinburgh, Nimmo.)

SURELY the author of this uncommendable collection of fifty-two sermons for juvenile worshippers does not mean to say that one hour a week is all the time that little children should devote to religious exercises! We are inclined to think that the little girl who works through the series of homilies at the rate prescribed by the author of 'Jesus upon Earth' will not retain much of the instruction imparted in the first hour by the time that she is ready to enter on the fifty-second instalment.

Seeing the World: a Young Sailor's Own Story. By Charles Nordhoff. (Edinburgh, Nimmo.)

FOR boys who delight in tales of nautical life, and boys whom their parents would inspire with a love of the sea and maritime pursuits, the author of 'The Young Man-of-Wars-Man' has produced a capital story in this record of a young sailor's experiences on board a merchant ship. The hero of the narrative is the same lad who is the most prominent character of the author's previous book, to which, indeed, 'Seeing the World' is a sequel; and, at the outset of the volume, he ships himself, at New York, in a barque bound for New Orleans, and thence to Liverpool and Havre. Before he returns to America he visits London, of his opportunities for studying which city he observes: "The reader will perhaps desire to know what we, the sailors, saw of London. As the dock-gates close at seven, it is impossible to be out in the evening without remaining out all night, which involved a serious expense to our limited means.....So that our only opportunities of viewing the city were the Sundays and the solitary 'liberty day' which was granted us. On these occasions we saw St. Paul's,

ascended the London Monument (whence we saw nothing but smoke), visited Hyde Park, with a few of the squares, and passed several times through the Thames Tunnel. When I took into consideration the vast number of noteworthy objects of which I saw no more than though I had not been in London at all, I was almost sorry that I had come, and certainly had to admit to myself that I had gone a very hard voyage to very little purpose, so far as sight-seeing was concerned." So much for a common sailor's chance of "seeing the world" in the ordinary pursuit of his calling.

The Martyr Missionary; or, Five Years in China.
By the Rev. Charles P. Bush, A.M. (Edinburgh, Nimmo.)

THE hero of this not ill-written biography is William Aitchison, an American missionary, who died in China, of dysentery, a few years since. Mr. Aitchison was an intimate friend of Mr. John S. Burdon, of the English Church Missionary Society, who, after losing two wives at the scene of his evangelical labours, recently came back to his native country to refit a constitution which arduous exertion in a trying climate had greatly injured and almost broken. Not only has Mr. Burdon returned to China, but he has found an English lady brave enough to accompany him as his third wife. Mr. Bush's memoir of Aitchison mentions Mr. Burdon in terms of appropriate respect.

LIST OF NEW BOOKS.

Apocryphal Fathers, Writings of, edit. by Roberts & Donaldson, 10/6
Art and Song, edit. by Robert Bell, illust. 4to. 21/1 cl.
Bond's Handy Book of Rules, &c. for Verifying Dates, cr. 8vo. 15/ British Assoc. for Advancement of Science, Nottingham, 1866, 6/
Buchanan's Ballad Stories from Scandinavia, illust. 10/6 cl.
Bulstrode's Fifteen Sermons preached at Ely, 12mo. 5/ cl.
Bush's My Pilgrimage to Eastern Shores, 8vo. 15/ cl.
Byron's Poetical Works (Pearl Edit.), cr. 8vo. 3/4 cl.
Cassell's Shilling Story-Books, 8 vols. 12mo. 1/ cl.
Chambers's Diseases of the Digestive Organs, 8vo. 10/ cl.
Clark's Sermons to Explain the Doctrines of the Gospel, 12mo. 5/ cl.
Clarke's Treatise on the Law of Extradition, 12mo. 7/6 cl.
Combes and Hine's Arithmetic Step by Step, 12mo. 1/3 cl.
Dod's Epistles to the Seven Churches of Asia, 12mo. 2/6 cl.
Elitz's New Table-Book, edit. by Mark Lemon, 4to. 25/ cl.
Everything about Them, 12mo. 1/ swd.
Dante, Illustrations to, by Plaxman, folio, 52/6 cl.
DeLisach's Biblical Commentary, Book of Job, Vol. 2, 8vo. 10/6 cl.
Dyer's Ruins of Pompeii, photo. illust. 4to. 31/6 cl.
Fenn's Original Penny Christmas Readings, 12mo. 1/ bds.
Ferrier's Lect. on Greek Philosophy, ed. Grant and Lushington, 24/
Gaskell's Wives and Daughters, post 8vo. 6/ cl.
Golden Zingis, 12mo. col. illust. 2/6 cl.
Great Harfield, cr. 8vo. 12/ cl.
Hall's The Prince of the Fair Family, sm. 4to. 12/ cl.
Hankey's Principles of Banking, 8vo. 5/ cl.
Heath and Gorse's 141 Double Acrostics, sq. 3/ cl.
Holbein, Some Account of Life of, by Wornum, illust. imp. 8vo. 31/6
Hours of Rest, or Sabbath Churches, by author of 'Protoplast,' 6/
Hugo's Toilers of the Sea, cheap edit. cr. 8vo. 6/ cl.
Justin Martyr and Athenagoras, ed. Roberts and Donaldson, 10/6
Kebble (John), an Essay, 12mo. 3/ cl.
Knox (John) and his Times, by Warren, 12mo. 4/6 cl.
Law of Strikes and Lock-Outs, cr. 8vo. 4/ swd.
Little Folks, 20 illust. by Pictet, imp. 8vo. 2/6 bds.
Living into God, 12mo. 3/6 cl.
Lydis, a Tale of the Second Century, from the German, cr. 8vo. 4/6
Macdowell's Trigonometry, cr. 8vo. 3/6 cl.
Macgregor's The Rob Roy on the Baltic, cr. 8vo. 5/ cl.
Marshall's Account of the East India Company, 8vo. 3/ cl.
Marston's Fundamental Truths, 12mo. 1/6 cl.
Marston's The Four Gospels, their Diversity, &c., 12mo. 2/ cl.
Martensen's Christian Dogmatics, 8vo. 10/6 cl.
Melodies of Zion, containing Tunes for 'Times of Refreshing,' 3/6
Melville's Cerie, post 8vo. 1/ cl.
Miller's My Father's Garden, post 8vo. 5/ cl.
Monsell's Religion of Redemption, 8vo. 12/ cl.
Moore's Irish Melodies, Mackenzie's illust. edit., 4to. 30/ cl. gilt.
Nature and Art, Vol. 1, illust. royal 8vo. 10/6 cl. gilt.
Noble (Rev. T. L.) Memoir of Missionary to Telugu People, 8/ cl.
Ogilvy's Sunday Acrostics, cr. 8vo. 1/ bds.
Rawe's Homeward, a Tale of Redemption, cr. 8vo. 5/6 cl.
Rushton's Shakespeare Illust. by Old Authors, Pt. 1, cr. 8vo. 4/ cl.
Rushton's Sketches, oblong folio, 12/ half bound.
Seymour's Notes on the Revelations, 12mo. 3/6 cl.
Songs of the Nativity, Christmas Carols, &c. by Husk, sm. 4to. 12/6
Stowell's The Passover, and other Sermons, cr. 8vo. 5/ cl.
Sullivan's Conquerors, Warriors, &c. of India, 8vo. 12/ cl.
Thomas (Anne), Played Out, 3 vols. post 8vo. 31/6 cl.
Three Tales for an Idle Hour, 12mo. 2/ cl.
Tupper's Proverbial Philosophy, illust. by Doré, sm. 4to. 21/ cl. gt.
Voltaire's Life (3 vols.), Vol. 1, 8vo. 16/ cl.
Waugh's Home Life of Lancashire Factory Folk, fc. 8vo. 5/ cl.
Waugh's Tufts of Hawthorn, 12mo. 3/6 cl.
Wheler (Col.), Memoir of John H. M. Conran, 12mo. 3/6 cl.
Wood's Curiosities of Clocks and Watches, post 8vo. 10/6 cl.
Yates's Kissing the Rod, post 8vo. 6/ cl.

LITERARY PIRATES.

118, William Street, New York, Nov. 23, 1866.

THE want of an International Copyright Law permits, if it does not sanction, a wholesale "appropriation" of the works of writers resident in Great Britain by American publishers. British publishers repay the offending parties by occasionally "returning the compliment in kind," at which "we Americans" cannot and do not grumble. But we must be permitted, not only to grumble, but to enter our protest against the course pursued by Messrs. Cassell, Petter & Galpin, who are now running through their *Illustrated Paper* the

romance, 'Dead Letter,' which formed the serial of *Beadle's Monthly* during the year just closing. This romance comes back to us mutilated by changes necessary to make the work read as an original English production; and as such it is put forth by the publishers named. To have appropriated the production of the American writer, it was their legal privilege to do, considering that no law exists to prevent such an act; but to add to the act of literary piracy that of mutilation and deception, strikes us as an excess of discourtesy which merits censure. BEADLE & COMPANY.

COPYRIGHT AND STATONERS' HALL.

Dec. 12, 1866.

SOME years' experience of the Registry Office at Stationers' Hall enables me not only to corroborate Mr. Moy Thomas's account of the difficulties often attending a search there, but also to assure you that the matters of which he complains are not by any means the only ones which require mending. Take the system of original registration, for instance. Although this is frequently of the utmost importance to literary property, nothing can be more unsatisfactory. The proprietor of copyright, or some one for him, attends with a paper filled up, pays 5s. fee, and leaves it with the clerk. It is understood that this is to be formally entered into the register-book; but as to this, the party registering is wholly at the mercy of the clerk, and can only check him by going up some time afterwards, paying another fee, and searching to ascertain whether this has been done. Of course, he rarely does this, so that if ever there should be a dishonest clerk in charge, he would be able to omit to register and pocket fees with pretty good hopes of long impunity. Nor would it, as a rule, be possible to prove any payment to him if he chose to deny it, or had accidentally mislaid the paper, or forgotten the transaction. The registration paper is generally presented at the office by a clerk of a publisher or agent: no memorandum whatever of the fact remains. If you ask for any such memorandum, you are told that you can have one by paying another 5s. The meaning of this is, that the Act directs that if any one should want a certified copy of the registration, to be received as *prima facie* proof of proprietorship in a Court of law, he can have one, duly impressed with the stamp of the company, &c., for that sum. The party registering of course does not want anything of this kind, unless he is going to law; but the authorities will not give him a memorandum of his payment in any other form, all which, of course, tends to increase the fees of the office. I have not the slightest doubt of the perfect honesty of the present registry clerk; but it is the system I complain of. The registration would not occupy more than five minutes, and ought to be made in the presence of the party paying the fee. I could say a great deal more on this subject, but fear to weary your readers. A PUBLISHING AGENT.

18, Norfolk Street, Strand, Dec. 12, 1866.

WILL you permit me to say a few words in your columns likely to prove of use to Mr. Mey Thomas and others who, like him, desire to see our copyright laws "reformed," and would lend a helping hand to that good end?

It will be remembered, perhaps, that Mr. Adam Black, whilst M.P. for Edinburgh, prepared a Bill on Copyright. When the fact became known, it was suggested to him that there was in London a gentleman more than commonly conversant with the details of the question with which Mr. Black proposed to deal; "in fact," said his informant, "armed at all points, and overflowing with information as to its necessities and intricacies." The gentleman referred to was Mr. G. H. Davidson, the well-known music-publisher, and son of the proprietor and publisher of the *Athenæum's* forerunner, the *Literary Chronicle*. Mr. Davidson was at once applied to, and he had conferences with Mr. Black and Mr. Robert Lowe, who evidently appreciated his advice and assistance. Mr. Davidson had, I believe, much correspondence with Mr. Black, stating objections to and suggesting emendations in the Bill, which, however good, had the unfortunate effect of delaying the Bill until the session was too advanced to allow

of its passing; and in the ensuing Session Mr. Black was no longer a Member of Parliament.

In case, owing to Mr. Thomas's letter and your admirable remarks on its subject, the question of copyright should engage the attention of any literary M.P., with a view to the introduction of a Bill thereon during the ensuing Session, this letter (if you deem it worthy of publication) may prevent the aid which Mr. Davidson (with whom, I may mention, I have no personal acquaintanceship whatever) is able, and always willing, to afford, from being overlooked. S. R. T. MAYER.

NATURAL SELECTION.

13, Londond Road, St. John's Wood, Dec. 4, 1866.

THE question at issue between Mr. Wallace and myself is, I think, of scarcely sufficient general interest to be transferred from the *Proceedings of the Entomological Society* to the columns of the *Athenæum*; but as Mr. Wallace has done me the honour to think differently, I will endeavour to answer *seriatim* the objections he has put forward to the explanations of mimicry proposed by me.

No. 1. is framed in such a way as to render it very difficult to grasp its meaning. I take it, however, to mean this: that it is difficult to suppose mere superficial resemblances can be the result of hereditary transmission from a common parent, unless in the same animals we find likenesses in other parts of its conformation. In answer to this, I would point out that any one character is transmitted by parents to their offspring from generation to generation, so long as no circumstances act on the organism affecting, directly or indirectly, that character. Considering this, we can easily understand that important points of structure may be gradually changed by natural selection so as to adapt the organism to the altered circumstances in which it is placed, while at the same time a less important point is transmitted unchanged (or but little changed), just because it is less important.

2. Mr. Wallace has in this used, instead of my expression "similar conditions of life," an expression of his own, "climatal conditions." These are, in my opinion, by no means synonymous. If Mr. Wallace's word "climatal" be omitted, and the remainder of the paragraph left as it is, it appears to me that Mr. Wallace, as a Darwinian, will stand in the peculiar position of believing that, whereas alteration of circumstances has been sufficient to develop the offspring of an amoeba into a man, it has been insufficient to influence the markings of a butterfly's wing!

3. It will be generally admitted, especially by those who have read Mr. Spencer's 'Principles of Biology,' that resemblances of markings and colours *do*, to a great extent, appear in "all groups not too remotely allied," and that common conditions are accompanied by resemblances among the animals affected by them. I have merely extended this evident fact so as to account for resemblances among species more distantly related to one another. The position I take is this. The markings on the wing of a butterfly remain unchanged from generation to generation, except in those cases where there is some power at work to change them, while in those cases where the markings have been changed the transformation has been brought about in order more completely to adapt the animal to the conditions in which it has to live. Mr. Wallace will, I think, readily agree with me, that *did* "causes affect all insects alike" we should cease to have any differentiation at all.

4. In this it is asserted that like conditions cannot be called in so as to account for the resemblances in form between a coleopterous and an orthopterous insect. I ask, why not? Let the case be put thus:—The form of the coleopterous insect is the result of an adaptation of the organism to the conditions in which it lives; the form of the orthopterous insect is determined in a similar manner; now the insects being constantly found in company (*i. e.* living under similar conditions), we readily understand their resemblance. Mr. Wallace, I may remark in passing, has not attempted to show that the resemblance between the Orthopteron and the Tricondyla is of any benefit to either, while to establish a mimicry theory it is absolutely necessary that he should show this.

5. As I have in all my remarks only referred to the resemblances existing between animals, this paragraph (as also the first part of 6.) does not affect my position. It would certainly be difficult to consider my remarks even "plausible," had they implied that the resemblance of a caterpillar to a stick was the result of descent from a common parent, or even of exposure to similarity of conditions. A considerable number of such resemblances may, I believe, be naturally and satisfactorily accounted for by the doctrine of natural selection.

6. The fact that in some cases the females only resemble another species is a most interesting one. In other words the fact stands thus: the male and female of the same species being different, the offspring are not a mean between the two, but the males resemble the male parent, the females the female parent, and it happens that in some cases also the females resemble an insect of another species. This phenomenon (styled by Prof. Laycock sexualistic transmission) is constantly forced on the attention of medical observers. It proves no greater obstacle to my theory than to Mr. Wallace's; for I say that the female resembles another species because of a common descent, while the male differs from that other species to adapt it to the circumstances in which it is placed. The explanation of the *modus operandi* of sexualistic transmission will be found to rest on laws of nutrition and development, of which we are yet nearly entirely ignorant.

In conclusion, I should like to say that, in common with all other naturalists who believe in organic evolution, I entertain the greatest respect for Mr. Darwin, in that he has pointed out in the most able manner the great means by which organized beings have been differentiated. As a natural result of this appreciation, we are very apt to apply this power to explain facts which really depend upon very different causes. But there remain questions as to the origin of species more fundamental than natural selection still to be considered. Natural selection, says Mr. Darwin, acts by taking advantage of variations occurring among animals. But at once we ask, what are the laws in accordance with which such variations occur? Mr. Darwin is on this point nearly silent; but those who care to pursue the investigation further will find interesting trains of thought suggested by the perusal of Herbert Spencer's 'Principles of Biology.'

D. SHARP.

THE END OF ALL THINGS.

41, Guildford Street, Russell Square, Dec. 10, 1886.

I am sure you would not willingly do me an injustice; but that would be the effect, without rectification, of two statements in your review in the last *Athenæum* of the third and concluding volume of my new work, 'The End of all Things.' You represent me as saying that while the doctrine of the Millennium is rapidly spreading, "clergymen convinced of its baselessness are discontinuing to preach in its support." This, as it stands, represents me as saying, at one and the same time, that Millenarianism is rapidly spreading, and yet that clergymen are discontinuing to preach in its support because they have become convinced of its baselessness. My words are: "I know various instances in which the rashness, the extravagancies, and the presumption of modern Millenarians have compelled some of the ablest advocates of the personal reign of Christ to adopt a resolution, *while still adhering to their principles*, no longer to publish or preach in favour of Millenarianism."

The other inconsistency of which your observations make me guilty consists in representing me as in one page "describing Millenarianism as a fortress that must be attacked by the artillery of orthodoxy," while in another page "it is presented to us as a mass of ruins." The supposed inconsistency is explained thus: When I speak of the prevalence of Millenarianism, I deal solely with the *fact* that it does extensively prevail, and, therefore, ought to be assailed; but when I speak of its being in "a mass of ruins," I use the words in relation to its groundlessness in point of *argument*. My words are: "If I have succeeded in making out my case in these important points, then Millenarianism

has not a resting-place for the sole of its foot. The foundations are destroyed, and the edifice stands before us one vast mass of utter ruin." The obvious meaning of this language is, that though Millenarianism extensively prevails, yet that neither in reason nor in Scripture has it the slightest foundation on which to rest.

I am sure you will readily concede to me the small amount of your space which I solicit with the view of setting myself right with your readers.

JAMES GRANT.

GOSSIP FROM VENICE.

Venice, Dec. 1, 1886.

FROM Milan we came by rail to Padua, passing the Lago di Garda, with the Austrian gunboats, now ceded to Italy, lying close in by Peschiera; here we had to stop for some time, for passports to be examined, and an Austrian officer told us about Custozza, where he had been slightly wounded. He praised the Italian troops, and said they had borne great fatigue and hunger on that day, many having been without food for fourteen or more hours. Custozza is within five miles of Peschiera, and we passed near the field of battle in continuing our journey. Traces of war were visible on every side, houses riddled with shot or partly burnt, trees cut down to facilitate the movements of cavalry, and to be used for stockades and abatis. (It is but right to say that the Austrian Government is having the trees valued, and will pay for them, which they are by no means bound to do.) The peasants were ploughing, picking their grapes and weeding their Indian corn, as if nothing had happened, and the contrast was very striking. From Padua we had to take a carriage to Mestre, and embark in a gondola for Venice, the railway not being repaired. The drive lay between villas and country-houses, chiefly occupied as barracks by the Austrians; and we met baggage and forage waggons at every turn of the road. The bridge over the Brenta had been destroyed, and was temporarily replaced by a wooden one.

At Mestre our gondolas were waiting for us; and, threading our way through the strong forts, many of recent make, but armed, as far as we could judge, with very light guns, we emerged into the Laguna and saw Venice close before us. How we pitied the people who go by rail into Venice! The beautiful city lay on the water more like a wonderful mirage than a real town of brick and stone: the campaniles standing out against the setting sun, which flooded the Laguna with gold, save where the ebbing tide laid bare a mudbank overgrown with seaweed, which moved its long tendrils to and fro with the waves of the water, like some living creature.

We passed a few days in sight-seeing and lounging, waiting for the entry of the Italian troops. The good people of Venice were much alarmed at the few cases of cholera that occurred daily, and the Podestà issued a proclamation which amused us not a little:—"Citizens of Venice, the year of sacrifice is not yet at an end. You are forbidden to eat figs, jujubes, or unripe fruit, as they will cause '*tristezza e dolore*,'"—a very poetical way of saying stomach-ache. The excitement had reached its height on the 19th of October, the day the Italian troops entered and garrisoned Venice and the adjacent forts. Early in the morning we were on the Piazza to see the Italian flag hoisted on the three tall masts in front of St. Mark's Church. The crowd was not at all dense, and we had expected more enthusiasm; but the morning was bitterly cold, and the Venetians are like butterflies, and love sun and warmth. We got into our gondolas, and rowed up the Grand Canal towards the station, where the troops were to arrive at mid-day. The beauty of the scene on the canal baffles all description; every window was decorated: those of the fine old palaces with velvet, old tapestry, silk and embroidered banners of the different families; those of the poor, small houses with the national flag. Off every campanile streamed banners and flags. The whole place was a mass of gorgeous colour reflected in the broad canal, and lit up by a brilliant sun. Each gondola bore its little flag at the prow, and some of the private ones were strewn with flowers, and had large basketfuls to throw at the

troops. The embarkation at the railway was slowly accomplished; but when the long chain of barges and lighters was once in motion, there arose a deafening cheer, echoed back by the soldiers, and taken up again and again in the far distance. The procession looked like a great serpent slowly gliding down the canal. Two other detachments of troops marched on foot through the narrow street to the Piazza, where General Revel was to review them. Owing to the small space, the review consisted only of marching past, and to our English eyes the lines looked very irregular; but allowance must be made for the men's weariness, and for the extreme difficulty of walking, not to talk of marching, on the slippery pavement of the Piazza di San Marco. One poor *bersagliere* came flat on his back, just in front of the General, to the amusement of the crowd and his own mortification. That evening the town was illuminated; and most beautiful it was, the small canals still tapestried with their hangings, and reflected in the water. Certainly Venice is the city for *fêtes* and decorations.

The archives in Venice are curious and interesting, and we were particularly anxious to see them, after hearing so much of Austrian depredations. After walking through rooms and endless galleries, filled to the roof with manuscripts, and most carefully and systematically arranged, we came to a suite of small rooms, out of which the Austrians had taken altogether some 800 or 900 volumes. These related to Dalmatia, Switzerland and Ratisbon, and the treaties of peace they had also taken, but were about to restore them. We had expected to find half the building empty. There is a very curious collection of autographs; and in the mortmain department some fine illuminated missals. We also saw several bills of old Venetian merchants, dishonoured in Lombard Street, London. The English brokers were artists in those days; some drew an elaborate monogram; others, after signing their name, a distinctive mark, prettily decorated. We were shown the reports and letters of the Englishmen who had served so well in the wars of the old Republic, and wrote to recommend the adoption of some improvement in firearms to their "most High and Puiasant Seigneurie." Some of the letters are on private matters, and very amusing. One poor man writes to the Governor of Milan begging him, by the love he bears him, to stop a certain Jeannette, a French woman, who left him, bearing with her some 400 ducats of his. The next letter offers 1,000 ducats to have her back, and the service of 1,000 lances; "for indeed," says he, "life is impossible without her; and though it should be against law, I pray you detain her, and put her in some very safe place, where none may have access to her." We could not discover whether our poor countryman ever got faithless Jeannette back.

The 7th of November, 1886, was a joyful one for Venice and Italy. King Victor Emanuel was to enter the Città d'Oro; but, alas! a dense fog hung over everything, and we could but dimly distinguish the draped gondolas and barges pulling past our balcony towards the railway-station. About mid-day the *cortège* came slowly down with an ebbing tide, one huge mass of magnificence; the King's barge, all gold, and with a tall mast, in the centre of the crowd. Unfortunately, owing to the damp fog, His Majesty and suite all stood under a canopy, with glass windows, so that it was difficult to catch a glimpse of him. Disembarking in the Piazzetta (not in the middle, between the two columns of St. Mark and St. Theodore, which would have been unlucky), the King went to the Church, and heard Mass, and afterwards walked across the Piazza to the Palace. The enthusiasm with which the populace greeted Victor Emanuel cannot be described, and must have gratified him. Even in the church it could not be restrained; every one was perfectly silent, listening to the organ, until the King entered St. Mark's, when deafening *cirivas* burst forth, to the evident dismay of the Patriarch and his clergy, as the cheers rolled backwards and forwards like thunder, under the domes of the "Golden Church." The poor pigeons of St. Mark's had a hard time of it; what with the saluting from the ships, the illuminations, and the cheering, their accustomed quiet haunts were made too hot to hold them, and they wheeled about in

the air, trying in vain to settle on some pet saint's head or shoulder, or on a friendly window-sill.

The illuminations would have been very pretty, had the night been clear. A blaze of light now and then shone dimly through a curtain of fog, and it was not until we were quite under the old Porta di Rialto, that we saw it was all illuminated. The Venice *fêtes* have been so often and so well described, that it is needless to recapitulate them; suffice it to say that the gala representation at the Fenice was a splendid sight, though the opera troupe was the worst that ever was scraped together, and had been hissed off the stage before the King arrived in Venice. Next night there was a ball at Prince Giovanelli's, to which the Princes Humbert and Amadeus went, but not the King. The masked ball, at the Fenice, took place on Saturday, and His Majesty, the Duchess of Genoa, and the Princes, remained a long time watching the motley and brilliant crowd of masks which thronged the theatre beneath their box.—The regatta was to be rowed on Sunday, when all the gondolas, draped with velvet and brocade, were to re-appear; unfortunately, we were obliged to leave Venice that morning, and so missed perhaps the most characteristic and pretty sight of all. J. R.

OUR WEEKLY GOSSIP.

THE Committee of the Palestine Exploration Fund have arranged their exploring operations for 1867. In the spirit of many suggestions made in this journal, the Committee have resolved to attack their chief treasury—Jerusalem. We have always maintained that the true site of the Holy Sepulchre could be placed beyond reach of controversy; probably that of the Temple also. Capt. Wilson in a recent memorandum says:—"The chief interest centres in the sites of the Temple and Holy Sepulchre; the former might easily be ascertained if a firman authorizing excavations in the surface of the Haram Area could be obtained; but failing this, excavations might be made to lay bare the western wall of the triple passage (supposed eastern face of the Temple) to its foundations, and make such other explorations in the vaults as might seem necessary, to make an opening so as to examine the character of the masonry of the western wall of the Haram Area north of the Bab-es-Silaleh, and another in the *via dolorosa* opposite the Turkish barracks, to see if a ditch exists there. The authenticity of the site at present shown as that of the Holy Sepulchre depends in great measure on the course of the second wall, and there would be no difficulty in obtaining permission to make excavations in search of this in the plot of ground called 'Muristan,' where the Hospital of the Knights of St. John stood. This excavation would have to be made on an extensive scale, and there would be some trouble in exploring the most important part near the Bazaars."—Acting on this opinion, the Committee are about to make a fresh appeal to the public for funds; and when it is clearly understood by the religious world that the money now asked for is to be employed in settling that great question,—the site of the Holy Sepulchre,—we cannot doubt that funds will be willingly placed in the Committee's hands.

One of the choicest gift-books of the season—of any season—has been issued by Messrs. Bradbury, Evans & Co., in the form of an illustrated edition of Jerrold's 'Story of a Feather.' This exquisite tale—so full of wit, of poetry, of pathos—has been lovingly treated by Mr. Du Maurier, who has made about seventy pictures of the Feather's adventures.

On Thursday evening the Westminster Scholars gave their first performance of Terence's 'Andria.' The second and third evenings, on which the Prologue and Epilogue will be spoken, are Tuesday and Thursday of the ensuing week.

The Institute of Civil Engineers will hold their annual general meeting on Tuesday, December 18th, when the ballot for the President, Vice-Presidents, and other members of Council, will take place.

The Board of Trade, from their Weather Department, the 7th

of the present month they cease to publish "storm-warnings," on the ground that the Council of the Royal Society, whom they consulted on the question, recommended the discontinuance, because "the rules on which the warnings are founded are mainly empirical." This resolve of the Board of Trade has excited much discussion; they are urged to reconsider their decision, and persevere with the warnings notwithstanding their empirical origin. It appears to be already forgotten that last spring a Blue Book was published by the Board of Trade, containing the correspondence that had taken place with the Royal Society, and the Report of a committee, in which, after very careful investigation and comparison of the series of warnings with the facts of the weather, it was shown that the warnings were no more trustworthy than if they had been derived from the tossing up of a halfpenny. Of course, there were a few lucky hits, and these having excited the imagination of the public, all the failures have been quietly ignored. If the Board of Trade will only carry out the great scheme of meteorological observations by sea and land, as recommended by the Royal Society, it is to be hoped that in a few years such a knowledge of meteorological laws will be obtained as will enable the Board to resume their system of storm-warnings with some approach to scientific certainty. Meanwhile, the "Weather Reports" will be published as heretofore, and any port desirous to receive information from headquarters may be gratified, on undertaking to pay the cost of a weather telegram. And now that trustworthy barometers are established at so many ports and fishing stations all round the coasts, it will not be difficult for every place to prepare its own warnings from careful watching of the mercurial column.

Mr. Ernest Hart has been appointed editor of the *British Medical Journal*.

Mr. John Morley has succeeded Mr. G. H. Lewes as editor of the *Fortnightly Review*—a periodical which, despite its name, is to appear in future once a month.

The pamphlets written at various periods by the late Mr. Cobden have been reprinted, and will shortly appear in two volumes. Some of these works created much sensation at the time of their publication, but have been for years out of print. The book will be published by Mr. Ridgway.

London topographers should take notice that the ancient Tennis Court in James Street, Haymarket, which retained its former service until two months ago, is now disused, and in process of conversion to other purposes.

It is worth notice, especially by those who love green trees and fresh air, that Mr. Beresford Hope mentioned in his opening address to the Royal Institute of British Architects that the remnant of Epping Forest is to pass into the category of Public Parks, by being transferred from the office of Woods and Forests, which regards the financial value of its trusts only, to that of Public Works, which deals with them for general recreation and the decorative improvement of the ground. Nature has done so much for Epping Forest, that we hope there will be no attempt to do much in the way of "decorative improvement," which too often restricts free range and prevents enjoyment. But whatever is to be done should be done promptly, for every month the Forest is more and more encroached upon, newly-built houses mar the sylvan character, and the fences multiply which bar out the public.

'Roby's Traditions of Lancashire,' a local book of some celebrity, for many years out of print, has just been reprinted. The whole of the edition, large paper as well as small, has been sold in Lancashire and the adjoining counties before the work was out of the printer's hands, leaving not a single copy for the London publishers to sell. This is rather a novelty in publishing annals.

Advocates of the extension of free libraries were much interested by the proceedings of the meeting which was held on the opening of the Branch Free Library for the inhabitants of Chorlton and Ardwick, Manchester. The fact of the edifice having considerable architectural pretensions—the work of

Mr. A. Waterhouse, designer of the new Anze Courts, Manchester—rendered it peculiarly attractive to us. It contains a news or reading-room, which is spacious and lofty, and a book-room of ample size. The library comprises 5,000 volumes, a noble collection in its order. In extension of the same subject, we may note the appearance of the Fourteenth Annual Report to the Council of the City of Manchester on the working of Public Free Libraries. From this document we can report the progress of the institution in Manchester, the events of the year being the inauguration of a new building in Stratford Road for the Hulme Branch Lending Library, and the opening of the structure for Chorlton and its neighbourhood, which is above mentioned. During the past year 9,500 volumes have been added to the shelves of the Public Free Libraries in Manchester. Of these, nearly 9,000 volumes were purchased. The aggregate number of books is nearly 80,000, of which about one-half are in the five lending libraries of the city.

Our lively near neighbours are resolute to enrich their language with sporting neologisms derived from this country. One of the newest is the name of a carriage—*Boghey*.

Tourists and travellers, whose bad fortune may cause them to be weather or otherwise bound at Aosta, may be glad to be informed that the Turin Alpine Club have opened a Succursale, or branch establishment, in the Hôtel de Ville in that town. A collection of books and maps, having reference principally to Alpine matters, has been formed, and information is given in regard to hotels, guides, tariffs of horses, carriages, &c. A few English and French newspapers are also taken in. The Canon Carrel, of Aosta, has been appointed managing director of this branch club; and we are assured that it is his wish, as well as that of the members of the Turin Alpine Club, to do all in their power to make the Aosta establishment useful and agreeable to Englishmen and other foreigners.

Rhenish Prussia, always remarkable for its various and extensive manufacturing establishments, has lately organized a new branch of industry. This consists in utilizing refuse wood and sawdust, which, after undergoing certain preparations, are submitted to enormous pressure in moulds. Picture-frames, cornices, and various other ornamental articles are manufactured with this material, which has been called *Scifarine*. It is also capable of taking a very high polish, and is, we are informed, an extremely beautiful object when thus treated.

The old *Augsburgh Gazette* follows the example of its Cologne contemporary, and is about to issue, in addition to its daily numbers, a weekly paper, containing the principal news, correspondence and leaders of the previous six days, and adds a *feuilleton* for literature and criticism.

The Princess Sophie Lichtenstein, who died at Pesh not long since, was, in her unmarried days, none other than Mdle. Sophie Löwe, long the idol of the Berlin opera-house, in rivalry to Mdle. Fassmann, who appeared under Mr. Lumley's management at Her Majesty's Theatre, without creating any sensation, and afterwards sang for a time in some of the principal theatres of Italy. She was, we believe, the daughter of an actor; and had many good qualifications for the stage, among these an elegantly expressive and handsome face and a stately figure. She understood the grace of costume better than any German actress we have ever seen. Her demeanour was ladylike and pleasing, her acting was sprightly when needful,—not without passion, never heavy, rarely exaggerated. Her voice was a high *soprano* of harpsichord quality, sufficiently flexible by nature or cultivation, though her execution wanted that last finish lacking which facility is only so much pretence, more or less. Avoiding obstinately the operas of Spontini, which were the vogue at Berlin when she was the opera Thalia there, as overtaking means like hers, and uncongenial to her nature, she made herself the delight of the modish and frivolous half of the opera-goers by singing in translated light French operas. Not even Mdle. Lucca's self in these degenerate days was more uproariously received

an Mdle. Löwe, as the author of 'Modern German Music' put on record. The income turned her head; and, determined to queen it in more brilliant capitals than the Prussian one, she left the Berlin theatre; nor could an offer of double terms sent her haste after her (so loth were her admirers to see their darling) prevail on her to return. In Paris, we believe, she was unable to obtain an engagement; in London she appeared in 'La raniera,' in 'Marino Faliero,' and as Donna Ivira in 'Don Juan' (the last her best character), vain. We were then used to complete vocalists from England Mdle. Löwe passed into Italy, here her singing-and-acting were commemorated by Mrs. Trollope in her 'Travels.' There she may be said to have changed her occupation. After having formally declined in Berlin to sing Spontini's chaunting operas, she consented to "create" (as the French say) the frantic part of *Abigail*, in *ignor Verdi's* 'Nabucco.' But her Italian career was not a protracted one. After a short period of age service, she married and retired into noble life—not too soon for her fame.

An important international meeting of the booksellers and publishers of the three northern kingdoms, Sweden, Norway, and Denmark, was recently held at Stockholm. The assembly numbered 45 members, and comprised, in addition to booksellers proper, printers and paper-makers, a few men of letters, and among them Professor Arrhenius, of Stockholm, and Prof. Das, of Christiania. One of the oddest results of the meeting was that, though each speaker spoke his own language, Swedish or Danish, as the case might be, they were mutually intelligible. "We understand each other when we speak," said Prof. Das, "but that is not the case when we write; and the reason is that when we write we are pedantic." In a discussion which took place afterwards, on the right of the original author of a work to forbid translations, Wieselgren, one of the officers of the Royal Library at Stockholm, said that he considered translations from one Scandinavian language into another, or rather into the other, as there are but two, to be altogether superfluous; and the observation was received with applause. The chief practical result of the meeting was the establishment of a common bibliographical organ for the Scandinavian North, under the title of *Nordisk Boghandlertidende*, or "Scandinavian booksellers' Journal," which has appeared in weekly numbers since the 28th of July. The articles are in Swedish and Danish indifferently. It was a great triumph of international liberality that this new journal, founded by a meeting at Stockholm, was settled to be published at Copenhagen. A few Swedish patriots among the booksellers opposed the proposal as placing Sweden in subordination to Denmark; but Adolph Bonnier, the principal bookseller of Stockholm, reminded them that, in literary matters, "even the great Berlin, that outstretches its wings to become the capital of all Germany, places itself in subordination to little Leipzig." The general complaint among "the trade" in the North is that the reading public of each northern nation almost entirely disregards the literature of its neighbours, but gives all the attention it has to spare to the foreign productions of France and Germany. It is a little remarkable that from one end to the other of the booksellers' meeting, which is reported at considerable length in the *Nordisk Boghandlertidende*, not one syllable with regard to English literature appears to have been uttered.

INSTITUTE OF PAINTERS IN WATER COLOURS.—EXHIBITION OF SKETCHES AND STUDIES. OPEN FROM TEN TO SIX, at their Gallery, 83, Pall Mall opposite Marlborough House.—Admission, 1s.; Catalogue, 6d. G. FAHEY, Secretary.

WINTER EXHIBITION.—THE FOURTEENTH ANNUAL EXHIBITION OF PICTURES, the Contributions of British Artists, is NOW OPEN, at the French Gallery, 130, Pall Mall.—Admission, 1s.; Catalogue, 6d. LÉON HEFÈVRE, Secretary.

SOCIETY OF PAINTERS IN WATER COLOURS.—THE WINTER EXHIBITION OF SKETCHES AND STUDIES by the MEMBERS is NOW OPEN, 5, Pall Mall East.—Admission, 1s. from till six. Lighted by gas on dark days. WILLIAM GALLOW, Secretary.

THE SECOND ANNUAL EXHIBITION OF WATER-COLOUR DRAWINGS is NOW OPEN to the Public, at T. McLean's New Gallery, 7, Haymarket, next the Theatre.—Admission, 1s. R. CLOTHIER, Hon. Sec.

MR. ARTHUR POOTHS FIRST ANNUAL WINTER EXHIBITION OF WATER-COLOUR DRAWINGS is NOW OPEN to the Public, at the Fine-Art Gallery, 5, Haymarket, from Ten till Six.—Admission, 1s., including Catalogue.

MR. MORREYS COLLECTION OF MODERN HIGH-CLASS PICTURES is ON VIEW at the Royal Exchange Fine Arts Gallery, 84, Cornhill. This Collection contains examples of Leslie, R.A.—D. Roberts, R.A.—E. M. Ward, R.A.—Holman Hunt—J. Phillip, R.A.—T. Ford, R.A.—D. Begg, R.A.—F. Frith, R.A.—Rosa Bonheur—Henriette Brown—Goodall, R.A.—Cooke, R.A.—Creswick, R.A.—Pickersill, R.A.—Caldron, A.R.A.—Sant, A.R.A.—Le Jeune, A.R.A.—Amsdell, A.R.A.—Frost, A.R.A.—Pettie, A.R.A.—Yeames, A.R.A.—P. Nasmyth—Linnell, sen.—Dobson, A.R.A.—Cooper, A.R.A.—Gale—Marks—F. Hardy—John Ford—Frère—Ruijsers—Liddell—George Smith—Druvker—Peter Graham, &c.—Admission on presentation of address card.

ARTEMUS WARD—EGYPTIAN HALL—EVERY EVENING at Eight. Doors open at half-past Seven. Saturday afternoon at Three P.M. In consequence of the great success of ARTEMUS WARD AMONG THE MORMONS, Stall Tickets should be engaged some days beforehand. They may be secured at Mitchell's Royal Library, 33, Old Bond Street; Austin's Ticket Office, St. James's Hall; and at the Egyptian Hall. Stalls, 3s.; Floor, 2s.; Gallery, 1s.

MADAME STODARE (Widow of the late Colonel Stodare) begs to announce that the THEATRE OF MYSTERY, Egyptian Hall, is OPEN for the SEASON. Madame Stodare will present the Sphinx, Marvel of Mecca, and Basket Trick, assisted by Mr. Firbank Burman, Ex-pupil of Colonel Stodare, in Colonel Stodare's Royal Entertainment of Magic. Doors open every Evening at 7.30, and Wednesday and Saturday Mornings at 2.30.—Admission, 1s. and 2s.; Stalls, 3s.; Schools and children half price. Seats may be secured at the Box-office from 11 till 6; and at Mitchell's, 33, Old Bond Street.

Mr. JAMES WEAVER, Manager.

SCIENCE

MEDICAL BOOKS.

On the Treatment of Pulmonary Consumption. By J. Henry Bennett, M.D. (Churchill.)

THIS is a modest pamphlet on a subject that is too often, in the hands of medical men, a bait to catch patients. Dr. Bennett has not written for the sake of saying something on consumption, but because he had something to say. He need not have introduced himself as he has done in this little book, for he needed no introduction to the profession of which he is so distinguished a member. He does not come forward to tell the public how great has been his success in curing consumption, but he tells us that, seven years ago, he was in consumption, and that, retiring to the shores of the Mediterranean to die, he there recovered health and strength by the adoption of a system of treatment which he now recommends to others. Dr. Bennett comes forward with no new theories and no new remedies for the disease, but with a scientific and sensible account of his own case, and that of others who have come under his observation.

Buckmaster's Elements of Animal Physiology. By John Angell. (Longmans & Co.)

WHY this work has been christened 'Buckmaster's Elements of Animal Physiology,' when it is written by Mr. Angell, we are at a loss to know. At any rate, Mr. Angell has no need to be ashamed of his work. He has written a book on physiology well adapted for use in schools and college classes, and evidently prepared with great care. It is profusely illustrated with woodcuts, which are somewhat coarse, but nevertheless will assist greatly the learner to understand the text. We shall be glad to see such books extensively used in our schools of all sorts, as we are deeply convinced of the necessity of this kind of knowledge to enable people to take those precautions against the invasion of those diseases which now carry off annually such large numbers of our population.

A System of Medicine. Edited by J. Russell Reynolds, M.D. Vol. I. *General Diseases.* (Macmillan & Co.)

THIS is the first volume of a work to be devoted to a series of essays, by distinguished practitioners, on every disease to which the human frame is liable. Such comprehensive treatises have been before published, as the 'Cyclopaedia of Medicine,' edited by the late Sir John Forbes, and the 'Library of Medicine,' edited by Sir Charles Locock. These works are, however, getting somewhat out of date, and the present 'System of Medicine' is brought out in order to bring up the science and practice of medicine to the present date. In the vast field which the study of medicine presents there is, no doubt, an advantage in allowing individuals who have studied particular diseases an opportunity of stating all that they know with regard to them. At the same time, the method has its disadvantages. It is not always the best man who

will undertake to write on the subject which he knows best, and one is chosen who knows even less than the generality of his medical brethren. The present volume of 'A System of Medicine' is devoted to General Diseases; and whilst some are discussed with great ability and exhaustiveness, others are written on by persons who have little knowledge of the subjects on which they write, and but little ability to treat them in a practical and useful manner.

Club-Foot: its Causes, Pathology, and Treatment.

Being the Essay to which the Jacksonian Prize for 1864, given by the Royal College of Surgeons, was awarded. By William Adams. With Illustrations. (Churchill & Sons.)

THE title of this complete and excellent treatise on a department of surgery, in which the author has acquired special distinction, states one of its claims to attention. The arrangement and literary style deserve praise. The numerous varieties of malformation and the various devices for their treatment are displayed in a series of illustrations, as well as in the text of the work; and on every point connected with the management of orthopaedic cases, Mr. Adams proves himself a well-informed and judicious surgeon. As a manual for study and a handbook of practice, this volume on 'Club-Foot' is an able and timely contribution to surgical literature.

SOCIETIES.

ROYAL.—Nov. 30.—*Anniversary Meeting.*—Lieut.-General Sabine, President, in the chair.—The President delivered the anniversary address and presented the medals.—The following were elected Council and Officers for the year ensuing:—President, Lieut.-General E. Sabine; Treasurer, W. A. Miller, M.D.; Secretaries, W. Sharpey, M.D., and G. G. Stokes, Esq., M.A.; Foreign Secretary, Prof. W. H. Miller; other Members of the Council, L. S. Beale, W. Bowman, Commander F. J. O. Evans, R.N., E. Frankland, J. H. Gladstone, W. R. Grove, W. Huggins, T. H. Huxley, W. Lassell, Prof. A. C. Ramsay, Col. W. J. Smythe, W. Spottiswoode, T. Thomson, M.D., W. Tite, Vice-Chancellor Sir W. P. Wood, D.C.L., and Lord Wrottesley.

Dec. 6.—Lieut.-General Sabine, President, in the chair.—The following papers were read:—'Discussion of Tide Observations at Bristol,' by Mr. T. G. Bunat;—'On the Heating of a Disk by Rapid Rotation in Vacuo,' by Messrs. B. Stewart and P. G. Tait;—'On the Bones of Birds at different Periods of their Growth,' by Dr. Davy.

GEOGRAPHICAL.—Dec. 10.—J. Crawford, Esq., V.P., in the chair.—The following papers were read:—'On the Physical Geography of the Lower Indus,' by Col. C. W. Trevelyan;—'On Lake Pangong in Western Tibet,' by Capt. H. H. Godwin-Austen.

GEOLOGICAL.—Dec. 5.—W. W. Smyth, Esq., President, in the chair.—Messrs. C. J. H. Allen, H. P. Cassidy, R. Etheridge, jun., M. Hall, A. G. Henriques, H. Linnson, J. W. Pike, and Dr. J. Murie, were elected Fellows.—The following communications were read:—'A Description of some Echinodermata from the Cretaceous Rocks of Sinai,' by Mr. P. M. Duncan;—'Geological Description of the First Cataract, Upper Egypt,' by Mr. J. C. Hawshaw;—'On the Drift of the North of England,' by Mr. J. Curry.

ENTOMOLOGICAL.—Dec. 3.—Sir J. Lubbock, Bart., President, in the chair.—Mr. E. T. Higgins and Mr. Swamy were elected Ordinary Members; Mr. H. L. Schrader, a Foreign Member; and Mr. F. L. Keays and Mr. W. Thornborough, Annual Subscribers.—Mr. Stalton exhibited living specimens of *Gracilaria scalaricella*, bred from larvae found at Cannes, mining the leaves of *Echium vulgare*; and some flat, pouch-like galls formed on the leaves of *Pistacia lentiscus*, apparently by aphides, but which were inhabited by a Phycideous larva; these were from Mentone.—Mr. Janson exhibited a collection of insects, chiefly Coleoptera, made by Mr. W. Hume, in the vicinity of Rio de Janeiro.—Mr. Evans sent for exhibition a number

of insects, principally *Pyronota festiva*, found in wool imported from New Zealand.—Mr. Duer exhibited a pupa of *Vanessa* with some extraordinary projections from both wing-cases.—Dr. Sharp exhibited *Stenus maior*, captured at Southend, and new to the British Fauna.—Prof. Westwood mentioned that the late Mr. S. Stone, of Brighton, had bequeathed his valuable collection of wasps' nests, &c. to the Oxford Museum; and read a letter from Edward Holdsworth, Esq., of Shanghai, giving a detailed description of the larva of *Arctias Luna*. Prof. Westwood also exhibited a series of *Liparis dispar*, which gave rise to considerable discussion, in which Mr. M'Lachlan, Mr. Jenner Weir, and Mr. A. R. Wallace took part.—The discussion commenced at the previous meeting, on Natural Selection and Mimetic Analogies, was then resumed by Dr. Sharp, and participated in by Mr. Bates, Mr. Belt, Mr. Stainton, Mr. Weir, Mr. Wallace, Mr. M'Lachlan, Prof. Westwood, and others, and was concluded by the President.—Mr. M'Lachlan read two papers, entitled, 'A new Genus of Hemerobiidae,' and 'A new Genus of Perlidae.'

CHEMICAL.—Dec. 6.—Dr. W. A. Miller, President, in the chair.—The following were elected Fellows: Dr. A. C. Cook, Messrs. H. Dircks, J. Forrest, W. Huskisson, A. F. Marréco, J. H. Richardson, and Dr. Alex. M. Thomson.—Mr. E. T. Chapman read a paper 'On a new Synthesis of Formic Acid.' By the action of permanganate of potash and diluted sulphuric acid upon purified lamp-black, the author has succeeded in effecting a direct union of carbon with the elements of hydroxyl so as to produce small quantities of formic acid.—Mr. Parkinson exhibited and described the 'Alloys of Magnesium,' nearly all of which prove to be very brittle and readily tarnished, so that they do not offer great promise of practical employment. The phosphide, arsenide, and silicide of magnesium were prepared, and their chemical properties described, as also those of the magnesium amalgam.—Mr. R. H. Smith read a short paper 'On the Oxidation of Ethylic Benzoate.' By treatment with chromic acid, benzoic ether furnishes, as products of oxidation, simply benzoic and acetic acids, without liberation of any gas.

PHILOLOGICAL.—Dec. 7.—Sir John Davis, Bart., in the chair.—The Rev. C. Holme was elected a Member.—The papers read were: 'On Palæotype, or a Means of representing Spoken Sounds, for Philological Purposes, by means of the Ancient Types,' and 'On the Diphthong *oy*,' both by Mr. A. J. Ellis. The object of the first paper was to propose, as a makeshift, instead of the Phonetic or Panethnic alphabet, "an alphabet consisting entirely of those types which we may expect to find in every printing-office, and hence consisting only of Roman and Italic letters, without any superadded accent-marks whatever, and employing them in such a way that all the most usual characters should be Roman, while the Italics should be used for modifications of occasional occurrence." The alphabet was thought by the Meeting well calculated to serve its purpose, though much objection was made to the use of the consonants *q*, *c* and *x*, to represent certain vowel sounds; but as Mr. Ellis offered the use of the turned *a*, *c*, *e*, or *v*, *o*, *e*, instead, the objection can be in practice overcome.—In the second paper, Mr. Ellis traced the history of the pronunciation of the diphthong *oy* from Sir Thomas Smith's and Palgrave's times, in English and French; and then, after remarking that the true diphthong *oi* was peculiar to English, asked, how did it come into our language, and what sound did it represent? To answer this question, he gave the etymology of every word in English containing the diphthong, and concluded: "The rule is for the English *oi* to come from the *ui* of French, &c., or from the direct derivatives of that sound, *qi*, *ge* (*q* is the *o*, of *omi*), and that it comes from *ai* so seldom that it may be considered an accident." Mr. Ellis also showed that the French *oi*, Latin *oi*, Greek *oi*, were identical with the principle. The learned reader was requested.

investigations into the history of the pronunciation of our diphthongs and vowels, and lay his results before the Society.

INSTITUTION OF CIVIL ENGINEERS.—Dec. 4.—C. H. Gregory, V.P., in the chair.—Thirty candidates were elected, including six Members, viz.: Messrs. P. Ashcroft, J. C. Craven, W. Johnstone, T. Martin, J. R. Rushton, A. A. West; and twenty-six Associates, viz.: Messrs. J. Abernethy, T. Andrews, R. D. Baxter, J. Blackburn, W. W. Bonnin, T. Brassey, jun., A. J. L. Cappel, G. J. C. Dawson, G. E. Eachus, J. B. Fryer, T. W. Gardner, J. T. Johnson, W. Mercer, C. J. More, C. Mumford, M. Patterson, W. Ridley, C. P. Sandberg, W. B. Taylor, J. F. Tuson, E. H. Woods, Lieut. J. C. Ardagh, Lieut. L. C. Gordon, and Capt. F. G. S. Parker.

Dec. 11.—C. H. Gregory, Esq., V.P., in the chair.—The paper read was, 'On the best Means of Communicating between the Passengers, Guards, and Drivers of Trains in Motion,' by Mr. W. H. Preece.

SOCIETY OF ARTS.—Dec. 5.—C. S. Read, Esq., in the chair.—The paper read was, 'On Trade in Foreign Cattle,' by Mr. J. Irwin.

MEETINGS FOR THE ENSUING WEEK.

- Mon.** Actuaries, 7.—'Mortality Experience Data,' Mr. Melkile; 'Limitations of Risks, Part 2,' Mr. Sprague; 'Royal Academy, 8.—Anatomy,' Mr. Partridge.
- Tues.** Architects, 8.—'Architects, 8.—Annual General Meeting.
- Wed.** Engineers, 8.—'Combinations, Strikes, and Wages,' Mr. Waley.
- Thurs.** Ethnological, 8.—'Indian Architecture,' Mr. Fergusson; 'Geological, 8.—'New Telerpeton Rhipidense,' Prof. Huxley; 'Section at Litcham: Glaciation,' Mr. Wood; 'Third Boulden Clay, Norfolk,' Mr. Harner.
- Fri.** Literature, 8.—'Italian Miracle-Play, 16th Cent.,' Dr. Ingley.
- Thurs.** Zoological, 4.—General Business.
- Linnean, 8.—'Morphology of Malvaeeae,' Dr. Masters; 'Introduced Plants, Sydney,' Mr. Woola.**
- Chemical, 8.—'Basicity of Tartaric Acid,' Mr. Perkin; 'Absorption of Vapours by Charcoal,' Mr. Hunter; 'Reactions of Hydroiodic Acid,' Mr. Chapman.**
- Royal, 8; Antiquaries, 8½.**

FINE ARTS

ILLUSTRATED GIFT-BOOKS.

Touchees of Nature. By Eminent Artists and Authors. (Strahan.)

Roses and Holly. A Gift-Book for all the Year. (Edinburgh, Nimmo.)

Griset's Grotesques; or, Jokes drawn on Wood, with Rhymes drawn on Wood. (Routledge & Sons.)

Divine and Moral Songs for Children. By Isaac Watts. Illustrated. (Nisbet & Co.)

The Book of Martyrs. By John Foxe. Revised, with Notes and an Appendix, by the Rev. W. Bramley-Moore. Illustrated. (Cassell, Petter & Galpin.)

Routledge's Scripture Gift Book. Illustrated. (Routledge & Sons.)

The Book of Common Prayer. With Decorative Illustrations. (Rivingtons.)

Hymns of Faith and Hope. By Horatius Bonar. With Borders. (Nisbet & Co.)

'*Touchees of Nature*' comprises beautiful drawings and choice, selected thoughts, in prose and verse, by current artists and writers. One of the best-known literary contributors is Miss C. Rossetti, whose poem, 'Hoping against Hope,' has two stanzas that may serve as examples of her power to describe the effects of love neglected. A damsel says—

Make me fair when I lie on my bed,
Fair where I am lying;
Perhaps he may come and look on me dead—
He for whom I am dying.

Dig my grave for two, with a stone to show it,
And on the stone write my name;
If he never comes, I shall never know it,
But sleep on all the same.

To this poem Mr. F. Sandys has furnished a spirited design, the damsel seated by the sea-shore, idly and wofully looking outwards, and unconsciously and slowly pulling the ends

of her dishevelled hair through her teeth. Mr. Tenniel has furnished a design to Mr. A. Smith's 'The Norse Princess,' which is not without dramatic effect, although it is a little stagey. Mr. J. W. North has produced a very pretty snow-piece in 'Winter.' Mr. G. Du Maurier's 'Father Line' is rich and potent in expression: an hospital scene. Miss D. Greenwell's poem, 'The Carrier Pigeon,' is admirable, but quite distinct in its qualities from that by Miss C. Rossetti; in its way few poems surpass the beauty and gravity of thoughtful picturing that are to be found in 'A Song that none but the Redeemed can sing,' by Miss D. Greenwell. Mr. F. Walker's design to 'Love in Death,' by the last-named lady, is very rich in tone. Mr. Holman Hunt contributes a design to another poem by this lady, 'Go, work while it is called To-day,' which, although beautiful in drawing, is not very well proportioned in the figure: see the legs and feet, the one being too large, the other too small for the rest of the body. The face is intensely fine. Mr. W. Small's design to Mr. C. Reade's 'Tale-maker and Tale-Bearer' is very good. Mr. Holman Hunt's orientalism in Art contrasts very favourably and finely with the same quality in Mr. J. D. Watson's illustration to 'The Spirit of the East,' a drawing which is by no means excellent. There is much genuineskill and good sense of character in Mr. G. J. Pinwell's design to Miss J. Ingelow's 'Reconciled,'—a poem which is by no means worthy of her genius. There is a great deal of skilful drawing in Mr. R. Barnes's illustration to Mr. J. Gotthelf's fragment, 'A Humble Mind.' Contrasted with the last in subject and in execution is Mr. Tenniel's design to Mr. W. Forsyth's 'Battle of Gilboa,'—which is not one of the best poems in this book. Mr. A. B. Houghton presents a capital illustration to a poem by Miss Isa Craig, 'The Vision of Sheikh Hamil.' Among the drawings here are three, by Mr. Millais, which we have seen before. Other noteworthy examples are supplied by Messrs. J. Pettie, H. H. Armistead, C. Keene, F. J. Shields, W. Orchardson, W. J. Linton,—a capital landscape with a showery effect. Among the literary contributors are Messrs. G. MacDonald, Isaac Taylor, Gerald Massey, A. Hughes, C. Kingsley, R. Buchanan, and John Hollingshead. Many ladies, besides those who have been named above, are fortunately represented here; it must suffice to name the author of 'John Halifax, Gentleman,' the Countess de Gasparin, Mary Howitt, Mrs. Henry Wood, and Miss Bessie R. Parkes. Ninety-eight drawings and the same number of poems constitute an admirable and very wealthy gift-book.

'*Roses and Holly*' comprises thirty-three woodcuts, by Mr. R. Paterson, from drawings by Messrs. J. M'Whirter,—a series of very pretty landscapes,—Clark Stanton, C. A. Doyle,—an illustration to Thackeray's 'Sorrow of Werter,' by this artist, is very comically and rather prettily drawn,—J. Lawson,—see that to Poe's 'Annabel Lee,' p. 23, and 'The Two Sisters,' the well-known old song, 'Binnorie,'—Gourlay Steell, a finely-sketched stag. The literary portion of the well-devised volume is supplied from the works of Carew, Butler, Shakspeare, Massinger ('The Height of Honour'), Surrey, Ben Jonson, Swift, Goldsmith, Coleridge, Leigh Hunt, and a few living writers, enough to produce the richest variety in the selection.

'*Griset's Grotesques*' is wealthy in nonsensical fun. Mr. Griset's forte is caricature of a "loud" kind; by its means, and no contemptible skill in drawing, he will charm those who appreciate such qualities in an artist. We have

enjoyed the frontispiece, which shows a photographer "operating" in the wilds of Africa, himself the object of the pranks of a pair of apes; also the quaint vignette on the title-page; the very comical dog whose effigy precedes 'A Duke and an Earl'; the adjacent bird with a wooden leg, 'The Minstrels,' the black cat on the miser's bed, which is among the oddest of sketches in its order; the illustration to 'The Gentle Gorilla.' The artist is great in delineating miserable men and gaunt animals.

The 'Divine and Moral Songs for Children,' by Dr. Watts, as a literary production call for no comment at our hands. The republication in this form is signalized by the illustrations, which have been executed by means of the graphotype process, by Messrs. Holman Hunt, W. C. Thomas, J. D. Watson, G. Du Maurier, and others, "under the superintendence of Mr. H. Fitzcook." It is evident that the new process in question has operated rather to the disadvantage of the artists, inasmuch as their inexperience with regard to its peculiar method deprived them of some power in producing "effects," and stayed the freedom of their hands in drawing. This drawback need, we presume, be but temporary in its nature; and future results may become more valuable in Art than those which are before us here. The more delicate portions of the decorations to these pages, which are borders and vignettes, the work of Mr. Fitzcook, are wrought with great precision and clearness, and designed with varied elegance. Here is a capital moonlight landscape by Mr. D. C. Hitchcock. A certain "fuzziness," as artists say, appears in many examples.

'The Book of Martyrs' may have been rendered more portable in this "revised" edition than in the ancient and not a little cumbersome folios. Some of its horrors are opposed to the taste of the present day. Illustrations by such artists as those who have furnished the present version will be acceptable to the public who do not care very deeply for those refinements in reproduction which nothing less than careful printing on thick paper can afford. This book is evidently a cheap one as regards cost, and not less so in its appearance. Much good artistic workmanship has suffered by the exigencies of rapid printing and inferior engraving; nevertheless, enough that is excellent remains here to please the largest class of readers. There is good workmanship in the heads of Nero and other Romans; much forcible expression in Mr. G. H. Thomas's 'Perpetua.' Miss M. E. Edwards's woman going to martyrdom is vigorous and apt to the subject. Mr. Priolo's design is stagey; that by Mr. T. Morten is intensely pathetic and well executed. For spirit in conception, see the drawing of a girl who has pushed a soldier over a precipice. Among so many, not a few are foolish in design, and crudely wrought; the mass is satisfactory. Some buildings, such as that which represents the Arch of Constantine, and others of the same order, are remarkably bright and clear.

'The Scripture Gift-Book,' of Messrs. Routledge, is a child's book; very vigorously illustrated, and effectively but rather gaudily illuminated in coloured printing. A series of Biblical histories that well deserve success.

'The Book of Common Prayer' and the 'Hymns of Faith and Hope' may be classed together in respect to that order of decoration which has been employed for both. The former, however, is infinitely superior to its companion here in the quality and beauty of its decorations. No fault can be found with the latter because its aims are obviously simpler and lower in Art. It is very long since we have

seen such beautiful and admirably-printed workmanship, or such richly designed ornaments as those which make the publication of Messrs. Rivington welcome to the trained eye. The borders are firmly wrought, delicately drawn, and, not displaying anything of importance in respect to figure-drawing, are satisfactory in every respect. Those objections which apply to super-delicate engravings on wood, where the human figure is displayed and unfortunately drawn,—the common faults of highly finished woodcuts,—are not effective here, where the mass of decoration is ornamental in the ordinary sense of the term. The decorations to the Hymns consist of "open-lined" borders of various design and elegant character. The hymns by Dr. Bonar will be welcome to many on account of their spirit, clearness and point.

FINE-ART GOSSIP.

THE recently-created office of Curator in the Life School of the Royal Academy has been filled up by the appointment of Mr. R. S. James, a first-class life student, one of the teachers of drawing in University College School, London.

We venture to suggest to the managers of the Royal Academy, when newly housed, that they should arrange the Catalogues of their Exhibitions upon some plan more convenient for reference and record than the present very unscientific one. Probably the best mode of setting out the contents of an Exhibition Catalogue is that alphabetical one which obtains in France and at the French Gallery, Pall Mall. There the works of each artist are grouped in successive numbers, the painters' names being in alphabetical order, and the numbers of the pictures—as they appear on the walls—not necessarily, as with us, in sequential order. By this arrangement the visitor sees at a glance to the Catalogue the whole of each contributor's works, and can readily learn who sends, and who does not do so. Moreover, this disposition permits, without the issue of a second Catalogue, of ready re-arrangement of the contents of a gallery after the first has become familiar to visitors. We believe that change in the places of pictures, as practised abroad, would not only enable hanging committees of the Royal Academy to rectify the unavoidable errors of a primary exposition, but prove amply remunerative to the body which could thus effectually present novel attractions to the public.

With regard to the appointment of English Jurors to the forthcoming Exhibition in Paris, we beg to point out the great advantages that may be expected from the selection of men who are not only competent to the office, as before, but remarkable for practical knowledge and zeal in the kind of work which may fall to their lot to perform. These gentlemen will be required not only to execute the labour in detail of their functions, and to be possessed of taste as well as artistic knowledge, but to represent England before the world.

Mr. C. H. Jeens, one of the most skilful of our engravers, whose works we have frequently had occasion to applaud, has been commissioned by the Art-Union of London to execute, in the line manner, a large plate from one of Mr. Armitage's pictures in the last Royal Academy Exhibition, 'The Parents of Christ Seeking Him.'

The collection of specimens of Lowestoft china on loan, to which, as represented in the South Kensington Museum, we recently called attention, has been rendered as nearly complete as it can well be. The public is indebted, for the most part, to the energy of Mr. Chaffers, for the present opportunity of examining these examples of a very interesting, and hitherto little known, branch of English manufacture.

The British Museum has yet received but a small portion of the recently-purchased Blacas Collection of Antiquities and Works of Art. The remainder will probably not arrive until a few weeks have elapsed, and Mr. Newton, who transacted the affair, returns from Paris. The articles are not likely to be visible in London until immediately after the Christmas recess, if so soon.

Those who are anxious to see how good taste in decorating an interior building may be profitably applied, will do well to examine a pseudo-classic house, of George the Fourth's style, at York Gate, Regent's Park, to the exterior of which chromatic decoration has been applied with exquisite skill and feeling for Art, so that what would otherwise remain tame almost to puerility has been made pleasant to the educated eye. The simplest means have effected a change in this case. A little colouring by delicate hues, a little refined, well-executed and wisely-placed pattern-decoration has done it all.

Mr. F. M. Brown has completed another of his 'King Lear' subjects—a work in water-colours, but having all that seriousness of purport and care in execution which are oftenest found in oil-pictures; it is styled 'Cordelia's Portion.' The moment chosen is just after Lear spoke the words, "The truth then be thy dower." The Duke of Burgundy, richly attired, stands biting his nails in disappointment at finding Cordelia portionless. The King of France, younger than the Duke, and of more gallant bearing, presses one hand of Cordelia to his heart as he pronounces the lines which begin with "Dearest Cordelia, that art most rich in being poor, most choice forsaken," &c. She, with one hand nervously twisted in her bridal veil, stands as though dazed, with eyes that are ripe for weeping, and seemingly stupefied by the quick succession of conflicting emotions. The two elder daughters of Lear, and their husbands, are represented as clutching the crown which the old King has taken from his head; his white hairs still show the ring-like impression of the diadem. In loose robes of white the aged monarch shrinks to the backward corner of his large throne, and eyes his once most-loved daughter with the anger of disappointed affection. The banished Kent is seen departing through a doorway in the background, which gives glimpses of a forest. Goneril, swelling with pride and scorn, stout, ruddy of skin, and red-haired, stands looking on, and is robed gorgeously in crimson. Regan preserves her snake-like malignity of smiling; her husband kneels before Lear, and is heavy of limb, coarse, and insolent-looking. Behind is the Fool, watching Goneril. Gloucester observes the event with an air of vacillatory concern. The costume is mixed, classical and mediæval, in form and character, as the subject admitted.

M. Alma-Tadema's picture, the 'Egyptian Dance,' which attracted much attention when exhibited in this country at the French Gallery, and was so highly applauded when displayed in Paris, has been successfully repaired and restored. These processes were imperatively needed, in consequence of the injuries inflicted on the work at the explosion in Mr. Gambart's house, when the canvas was literally torn to ribbons; its relics were, on that occasion, picked up by the artist himself, with the remark, "Here is the end of my picture." This prophecy has turned out a false one. So carefully and successfully have the repairs been effected, that when the fragments were joined together a hasty glance failed to notice the injuries. Since then M. Alma-Tadema has so wrought upon the picture that it will, after it leaves his hands, show not the slightest signs of the explosion. It will appear at the forthcoming Paris Exhibition.

MUSIC AND THE DRAMA

THREE OPERAS IN PARIS.—That the revival of Gluck's 'Alceste' at the Grand Opéra has excited a real interest cannot be doubted. Though only the first two acts are played,—though the opera is anything but well given, the orchestra of the Grand Opéra being in a decayed state, and, as compared with its former plight, incompetently conducted,—the effect of the music cannot be doubted by those who can separate the genuine feeling of the public from the hired raptures of the hateful, grimy *claque*. Yet 'Alceste,' in point of story, is the weakest of the "Tentonic Pigmy's" five antique operas. Its tragic sentiment is monotonous. The "love stronger than death" which nerved the heroic Queen to her sacrifice was displayed in far more picturesque guise within the narrower compass of the story of 'Orphée.' It is curious to see,

as we have elsewhere remarked, how in this opera, for the sake of stage effect, Gluck deliberately violated the principles announced by him in that prefatory document so pompously by him affixed to 'Alceste,' which has proved so mischievous as a class-cry and a point of departure for all and sundry disorderly musicians. After his denunciation of repetitions *da capo*, it is comical—nothing less—to hear how the controversial writer introduced them, after his own fashion, as freely as the most Italian of the Italians against whom his specious periods were directed. No matter;—for truth of expression, for nobility of melody, for those thoughts which create thoughts which are of all time, and which "age cannot wither," nay, too, and for that entire orchestral satisfaction which has been assumed as belonging to a newer (Mozart's) world, the Teutonic Pigmy stands a giant, unparagoned in treatment of antique fable for the musical stage, inasmuch as in his works alone has it lasted. We defy the faint praisers of this great man, with their glib cant about "counterpoint," to name another opera of the kind, so deficient in story as 'Alceste,' which would be endured by an audience of our time. The emotion which we record, the conviction which it is good for Art to repeat, owe nothing to excellence of performance on the occasion of the revival chronicled. The music, it is true, has been carefully studied, under the direction of M. Berlioz, whose knowledge of Gluck is as deep and true as his sympathies for the master are real. Mdlle. Battu has been incited and taught to do her best as the heroine, and is a different Mdlle. Battu from the lady we knew in London; but an *Alceste* is as hard to find as a *Lady Macbeth*. Then, as to the *Admetus*: "Give me a Grecian profile," said a great actress (greater in nothing than in her self-knowledge), "and I will play 'The Grecian Daughter.'" M. Villaret is most unluckily deficient in every physical requisite for a Greek part; but his voice is more sympathetic than that of M. Michot, who was the *Admète* to Madame Viardot's *Alceste*, and he sings the music conscientiously, as one who has been duly prepared. The chorus, when we heard the two acts of 'Alceste,' was shabbily out of tune, and the orchestra went with neither the chorus nor the principal voices. But when every drawback, ancient, middle-aged, or of to-day, has been pointed out, Gluck, if only on the strength of the impressions produced the other evening, remains, in our judgment, to be the greatest composer of grand antique opera who has till now existed.

M. Gounod's 'La Colombe,' which makes part of the repertory of the Opéra Comique, adds yet another justification to the universal admiration of its charming composer's genius. The opera is a trifle; originally written, some years ago, for M. Bénazet's theatre, at Baden-Baden, and based on an anecdote too sentimentally delicate for music—Boccaccio's tale of 'The Falcon.' The choice of a subject like this indicates M. Gounod's weak side—his want of discretion in selecting the story to be set. He has been too apt to assume that every tale which seduces himself must therefore engage public sympathy. Further, 'La Colombe' was obviously composed in haste; the score contains a larger than usual amount of its writer's mannerisms, in the form of reiteration of phrase. This, however, is better than the trick of short-winded writers, who, in their agony to be original, do not give their ideas a fair chance of taking root in the ear; but, having exposed a thought, snatch it away, as though their purpose was to tantalize the ear. Allowing for this peculiarity to its utmost,—allowing, too, on the present occasion, for paltriness of execution,—there is more in the music of 'La Colombe' to gratify the hearer than in most of the more pretending contemporary French operas which could be named—to wit, grace, tenderness, that occasional unexpectedness of turn which is characteristic of its writer's country,—and no want of life, though the story invites languor rather than suggests spirit. The exquisite *entracte*, added for Paris, in order to give consequence to the opera, has been heard at our Crystal Palace; but the introduction is little less excellent. The orchestra is deliciously treated throughout. In the comic part of *Maitre Brûlé*, 2 and 8, Pianoforte Score, Chorus, and music

is graceful, tuneable and ingenious. In brief, he must be a real artist, not a small artificer, and an accomplished musical colourist to boot, who could make so much of so mere a trifle.

Of the 'Mignon' of M. Ambroise Thomas we spoke last week; it remains for us, now, to give some account of the careful and splendid revival of 'Der Freischütz,' at the Théâtre Lyrique. Treated in print often and again, as Weber's best opera has been, there is still something to be said concerning a work which contains only one real character (that of *Caspar*), only one elaborate *finale* (that of the last act, in some degree a superfluity), only one duet, and which relies on the national, supernatural interest of the legend (which, be it recollected, Spohr's sagacity had already discerned and measured ere Weber took it in hand), and the brightness and felicity of the music in which the most "flattering" of melodies (Mendelssohn's epithet) are alternated with scenes of a rugged wildness and gloomy colour, such as till Weber came had never been touched, and such as since he went have never been exceeded. It is this genuine character which makes 'Der Freischütz' imperishable, and places it apart and alone among fantastic operas, worn threadbare and vulgarized though it has been, and its humour attempted *ad nauseam* by a swarm of imitators in every country (Italy excepted). In a French dress, it has never had a chance of being properly comprehended before the late revival took place. Heard with any sung recitative, the opera loses its speciality, becoming a shapeless hybrid betwixt grand opera and melodrama, and the recitatives written for the Grand Opéra, when it was produced there some years ago, were perversely cacophonous and ugly. Then it is impossible too highly to praise the fine taste with which it has been placed on the stage by M. Carvalho. Scenery, dresses, groupings, are all that they should be; most especially to be admired the incantation scene, which has tempted the larger number of those who have taken it in hand to flaring melodramatic effects, provocative of ridicule rather than of horror with all save children and their nursery-maids. Yet there is nothing managed, nothing mannered, nothing (may we say, without offence meant?) French, in the entire performance. Setting aside the translated text, the only thing to remind us of the place of hearing was the quality of tone in the chorus. This would not stand a second's comparison with that of the Germans, or our own. The orchestra, conducted by M. Deloffre, was excellent. No better heroine has ever been heard or seen than Madame Miolan-Carvalho. Her voice was at its best; her finish and expression were what they always are, and which, conjointly with a truth of accent which becomes rarer year by year, have always made us rate her in the first rank of great female singers. The great scene was admirably delivered, with a power in its closing movement for which we were unprepared. Her friend and confidante, the lively *Anne*, was less efficiently represented. Mdlle. Daram sings Weber's music correctly; but the trembling of her voice (reminding one of chronic ague) is, in so young a singer, with an organ so pleasing in quality, without excuse. We can hardly call to mind a stronger case of mistakes. M. Michot is a fairly good *Max*, and is heard to his best advantage in this opera, because his part is principally *solo*, and his tones do not blend with those of his fellow-singers. M. Troy, *Caspar*, pleased us greatly, as having disclaimed all those tricks of scowling visage, and charnel-house voice, and betraying gesture, by using which the majority of those who undertake the part of the Demoniacal Huntsman (the striding, scowling, sepulchral Herr Formes not forgotten) have been in the habit of ticketing the character. M. Troy is earnest, vicious, sinister enough; though he is neither tall nor peculiarly robust in figure, and though his hair and beard are not of the Devil's colour. He sings his music with true fiendish unction and spirit. To close these notes,—this revival is another feather in M. Carvalho's cap, and that such is obviously the universal judgment was evident from the vehement and universal applause with which it was received.

MISS GLYN'S READINGS AT ST. JAMES'S HALL.—Miss Glyn's reading of 'Antony and Cleopatra,' on the 7th of December, justified the fame which she gained in the latter character, when she embodied it on the stage. 'Antony and Cleopatra' is not remarkable for striking incident; but the delineation of the Egyptian queen is so wonderful as to give the play a front rank amongst Shakespearean productions. The character of *Cleopatra* asks from its representative power to depict the most varied and conflicting impulses of woman's nature, from whim to overwhelming passion, and to blend them all into a consistent individuality. This task, with its exacting claims upon sense and judgment, as well as upon emotion and imagination, Miss Glyn nobly accomplished. In a representation at once so large and so diversified, there were, of course, some points of interpretation and treatment which might be open to question. There might be a doubt, for instance, whether the numerous and rapidly-shifting lights of suggestion which Miss Glyn's quick fancy scattered over the character would not at times have been advantageously replaced by a steady and more concentrated illumination. The lady has, however, thought out her text with such minuteness—even with such subtlety—that few intelligent hearers would hastily pronounce against her conclusions, especially when, as in this case, the total result was most brilliant and lifelike. In the early scenes of the tragedy, Miss Glyn displayed, with the happiest tact and variety, the arts by which *Cleopatra* is able still more to enslave—even while she provokes—the spirit of the lordly Roman. Her confidence in her own power to win him back, even in his most dangerous moods, was a prominent feature in the reading. With this confidence was skilfully combined the expression of her utter self-devotion to him, as if she had felt that the chief secret of her power was the irresistible intensity of her passion. In the tragic scenes Miss Glyn, after portraying the shock and violence of grief, rose into solemn calmness of determination, and equally brought home to the hearer the wildness of passion in its struggles, and its repose when it is sublimated into resolve. Nothing could be finer than the gentleness—almost tenderness—of her manner to the clown who brought her the fatal asp; it was as if she had seen in him the friend by whose aid she should rejoice the spirit of Antony. Her rendering of *Antony* himself was also marked by some of her finest qualities. The infatuation of his love and the utter emptiness of life to him after the supposed loss of *Cleopatra* were conveyed by Miss Glyn, in uttering the simple words,—

Eros, unarm; the long day's task is done,
And we must sleep,—

with an effect that no description of it could well suggest. The fidelity of Eros, again, when he sacrifices his own life to escape taking that of his master, was most affectingly brought out. It is in a scene like this that Miss Glyn, with true poetic instinct, subordinates the pain and violence of the incident to the moral beauty which it calls forth, and thus extracts ennobling pathos from circumstances in which inferior minds would have seen only distress. There were moments of inequality, no doubt, in Miss Glyn's rendering of the play; but, taken as a whole, it was an achievement of the highest kind. The single character of *Cleopatra* embraces the extremes of imaginative comedy and tragedy, and its present exponent proves her supremacy in both.

SADLER'S WELLS.—A new actor, named Mr. Barry, with an Australian reputation, has made his appearance at this theatre, and given proof of his powers in *Damon*, *Master Walter*, and *Jespar*. He is a tall, powerful man, and has evidently had much practice on the boards. His elocution is deliberate and weighty, perhaps a little too emphatic and too slow, but withal well considered and generally accurate. There can be no doubt that he is an intelligent actor; whether he has sufficient depth of passion must be determined by future trial. At all events, he will do good service in the ranks of legitimacy as a skilful and judicious performer.

ADDELPHI.—A drama in one act, entitled *The Baronet Abroad*, and the Rustic Prima Donna, half musical, half sensational, has been produced with moderate success. Neither the theme nor structure of the piece is new; but the acting and singing are both exceedingly good. Miss Constance Roden, as the musical heroine, revels in all the masters, intimating to her guest, by her snatches of song, the peril that awaits him. Miss Roden supported the character with great skill, being equally at home in Rossini, Bellini, Verdi, Mozart, Weber, Virginia Gabriel, and Ernest Gaston. This exhibition of her powers ought to benefit greatly her reputation.

MUSICAL AND DRAMATIC GOSSIP.

Mr. Danareuther, whose progress as a pianist since he has been in England has been steadily upwards, played, and played well, on Saturday last, at the *Crystal Palace*, the interesting, piquant, but too long-drawn 'Krakoviak' concert rondo of Chopin. There is no music more difficult than his master's; since, after the passages, which are peculiar, not to say frequently uncouth, have been mastered, there must be added that freakishness and delicacy (both within regulated bounds) which are indispensable to the effect intended. Further, a difficulty is laid on the player, by Chopin's ignorance of orchestral combination. In what may be called his "full compositions," the principal instrument is perpetually hampered and interfered with. The singers were Mdlle. Sinico and Mr. Hohler.—Herr Wilhelmj and Mr. Halle played once more at Monday's *Popular Concert*, the last before Christmas. The Beethoven Quartett was his Op. 130, in a minor. Herr Wilhelmj's playing of classical music has been satisfactory in no common degree, because promising. In Beethoven's minor Quartett on Monday week his purity of tone was striking, though his reading was somewhat too quiet. This reserve may imply coldness of temperament, or, on the other hand, the modesty of one whose attention, in public at least, has till now been directed to brilliant solo display, rather than to classical music. We expect much from his young artist.—'Elijah' was given by the *Sacred Harmonic Society* last night.—At Mr. Halle's Manchester performance of 'Judas Maccabeus,' Mr. Leigh Wilson took the principal tenor part, and, local journals assure us, to the satisfaction of his audience.

Mr. A. Mellon announces an operetta of his composition, 'The Terrible Hymen,' in which Madame Martorelli Garcia and Signor G. Garcia will appear, to be performed before the *Pantomime*.

On making up the accounts of the recent Worcester meeting of the Three Choirs, the result is 'the largest surplus of receipts over expenditure ever realized,' and this independently of contributions at the Cathedral doors, amounting to more than a thousand pounds: so that the Earl of Dudley's 'move' of discomfiture has counted (every one will be glad to see) for nothing!

Our Royal Academy authorities announce that the examination for the Westmorland Scholarship (for vocalists) will take place on the 21st, and that of the two King's Scholarships on the 22nd of December.

Among the events of the week has been Madame Sainton-Dolby's *Ballad Concert*. The lady sticks intently to 'Silver Chimes' and 'Maggie's Secret.' We can ill spare so thorough a musician and so accomplished a singer from the ranks of our executants, whenever the day of her retirement shall come. But Madame Sainton-Dolby is doing her utmost to lessen our regret and our wish that her time may be long postponed—by her resolution to degrade, not to raise, the taste of her audiences, which can only be accounted for on grounds unworthy of so genuine an artist's consideration.—Nothing, we must say again, (would it might be the last time!) works more mischief in English music than the *Royalty* system!

We are sorry to see that the friends of Mr. Henry Phillips, so long our most redoubtable bass singer, and it necessary to appeal to the public in his behalf, a subscription having been announced.

Signor Rossini, who is apparently fond of writing

letters, and whose letters have the habit of finding their way into print, the other day congratulated one Dom Abela, belonging to the monastery of Monte Cassino, on some church-music of the holy father's making. In his epistle he announces his intention of again besieging the Pontiff with a view to the admission of females to the Roman Catholic musical rite,—when, he sagaciously adds, the uncertainties of the Pope's present situation shall have passed by.

Another American lady, who travels under the name of Signora Drusilla Garbato, has been singing in 'Il Barbiere,' at the Teatro Santa Radegonda, Milan. "She is a beautiful woman," says the *Gazzetta dei Teatri*, "with a well-developed figure and an ample voice, with surprising low notes. She sings, to say the truth, with a method *sui generis*, flings out her notes with wonderful certainty; but when she would refine them she finishes, not seldom, by becoming inaudible. To sum up, she has great means, but an imperfect method." The same journal speaks with praise of Signora Corinna Simoni, who has appeared at the Carcano Theatre, and whose greatest fault is said to be her youth. If not prematurely overworked, she may become a valuable singer.—Signora Vaneri, who, as our readers may recollect, has sung in London (with Mr. Charles Braham), has appeared as *Selika* in 'L'Africana,' at Genoa. The orchestral performance of this work, under Signor Mariani's able baton, is said to have been admirable; the choruses to have been very bad. Meyerbeer's opera (which we hardly expected) is obviously travelling everywhere.—At the Teatro Paganini of Genoa, Signora Finoli is mentioned in terms of praise.—Nothing can apparently be much worse than the state of affairs at Naples. Signor Harvin (Arvini) having failed ignominiously as principal tenor, the management of San Carlos has fallen back on Signor Stigelli.—*Il Trovatore* mentions Signora Armandi as one who, by her performance in *Lucia*, has advanced in the favour of the Venetian public.—'Fieschi,' by Signor Montuoro, is to be played at Turin, and, besides other operas which we have named, a new work, 'Vittoria,' by Signor Bona, will be produced at La Scala this winter. The management is said to be in sad straits for want of a *prima donna*.

Madame Ristori's success in America seems to have overpassed all expectation.

In answer to questions of a Correspondent in regard to 'Don Juan,' let us say that we were wrong in stating a fortnight ago that the opera, composed to Italian text, was originally written with *talked* recitative, being misled in the haste of the moment by our recollection of performances of the work in its German translation; this the Baron A. von Wolzogen has undertaken to re-arrange, so as to bring the whole into better harmony with Mozart's intentions. If we mistake not, the *finale* after the supper-scene was performed in England by the German company brought to England by Mr. Monck Mason, with Madame Schröder-Devrient as *prima donna*. If so, we presume, it was found an excrement superfluous to a tale already concluded.

The noticeable difference between musical affairs in London and Paris was never more clearly illustrated than on Sunday last, when, on the occasion of the Festival of the Assumption of the Virgin, was performed, at the Church of St. Eustache, the twenty-third Mass of M. Dietsch, with *soli*, chorus, organ and military band. A twenty-third Mass! Yet our neighbours are up to this time not able to compass or to digest an Oratorio, save, perhaps, it be Haydn's 'Seasons,' which is heard from time to time. That strenuous and thorough artist, M. Pasdeloup, one of the best conductors now before the public, whose remarkable influence over the people in Paris is attested by the thousands who flock to his hebdomadal popular concerts (exclusively orchestral) is doing much to let in light and to widen sympathy, having now a chorus, largely composed of Orphéonists, under his care. Yesterday, at one of the capital concerts at L'Athénée, over which he presides, Mendelssohn's choruses to 'Athalie' were to be performed.

A new Mass, by M. Amédée Mereaux, was produced at the Church of Saint-Vincent, at Rouen, on St. Cecilia's Day.

M. Victorien Sardou's play, 'La Maison Neuve,' produced last week at the Théâtre Vaudeville, in some of its scenes outdoes in cynicism and naked horror almost every melo-drama of the kind which has gone before it. When will writers have had enough of such heroines as *Madame Bovary* and *Madelon* and *Mdlle. Cléopâtre* and *Miss Gwilt*? When will the public be sickened with the display of female crime and cupidity? Mdlle. Fargueil, who is notoriously successful in the display of female coquetry, guilt and suffering, has never been better fitted with a part. The hideous story, however, for once, ends in unnatural rehabilitation and happiness. The play is a failure, though it may attract for a while, because of the controversy which it has excited. Madame Dubarry figures at the Porte St.-Martin in 'La Reine Coton.' 'Cadet la Perle' is another novelty, in five acts, which has been produced at the Gaité.

The little Théâtre des Nouveautés, opened not many months ago, was, the other evening, totally destroyed by a fire, which broke out at the moment when the theatre was being lighted and the audience was assembling. Another of the many new theatres which are being built in Paris, the 'Salle de Menus Plaisirs,' was to open a few nights ago.

'Colbert et Fouquet,' a three-act play, in verse, unknown to Paris, has been brought forward at the Théâtre des Célestins, Lyons, with success.

M. Victor Hugo is said to be building a theatre near his residence in Guernsey, where two unperformed plays by him, 'Torquemada' and 'La Grand'mère,' are to see the footlights.

The deaths of two more estimable professors, who held offices of trust in Germany, have to be registered among the events of 1866. These were Herr Strauss, chapelmaster at Carlsruhe, a symphony by whom was performed at one of our Philharmonic Concerts some years ago; and Herr Kalliwoda, also a chapelmaster.

The Olympic has, we hear, passed under a new management, that of Mr. Webster, who will conduct it on a broader principle than that adopted by the recent conductor. The star-system will be introduced, and Mr. and Mrs. Charles Mathews promise to put in an early appearance.

Mr. Toole, we are told, goes to the Holborn Theatre, and Mr. Belmore will transfer his services to the Adelphi.

The Polygraphic Hall is now the arena of a new troupe of minstrels, who claim to be different from others, as proceeding from the Academy in New York, and existing independent of the name of Christy. They blacken their faces, however, and adopt the negro business, interposing ludicrous dialogue between the songs, and adding a variety of dancing and burlesque by way of a second part to the entertainment. There are some good voices among the troupe. Mr. Frank Husey, as "bones," is clever, and contributes much to the success of the performance.

By an error last week, Servais, the violoncellist, in the third line of our obituary notice, was spoken of as a violinist.

MISCELLANEA

Cut or Uncut.—I have no less than seven paper-knives in use in my house; but, in common, I dare say, with many of your readers, it very often happens that I am unable to lay my hands upon one when wanted. I know that to many it is a luxury to have the first read of a book, and with paper-knife in hand cut away as they read; but I think the balance of convenience is on the other side, and I wish to take the opinion of the literary world as to whether a period of civilization has not arrived when the readers of books and periodicals might reasonably ask that they should be delivered from the publishers ready cut.

A GREAT READER.

Steam Whistles.—It does not seem to have been noticed that electric signals upon railways have dispensed almost entirely with the use of the steam whistle, and travellers upon those lines where this system has been carried to well-nigh perfection, like the South-Western and South-Eastern, cannot fail to have observed the absence of that demoniacal shriek that renders a journey

on the northern railways so oppressive. The whistle is used for two purposes: to give warning of approach, and to signal the guard to put on or release the brakes. Electric bells *now* do the first. Electric communication between driver and guard *would* do the second. We may, therefore, hope for a speedy deliverance from the intolerable nuisance, if Parliament do their duty. II.

Lake People.—The letter of "A. R.," in the *Athenæum* for November 24, suggests a few remarks on the habit of building houses on piles, which characterizes so many tribes of the far East. My respected friend, Mr. Crawford, in his great work, 'The History of the Indian Archipelago' (I. 159, *seqq.*), after mentioning that the Malays, and most of the people of Sumatra, Borneo, and Celebes, build on piles, whilst the Javanese, Balinese, and some others build on the level of the ground, proceeds to say: "This distinction . . . has its origin in the different circumstances under which the two classes exist, and their different state of society. The maritime tribes inhabit the marshy banks of rivers and the sea coast, and for the purposes of health their habitations *must* be raised from the ground. . . . The superior salubrity, natural to the well-cultivated countries of the agricultural tribes, renders the precaution of building on posts unnecessary." &c. But some curious facts seem to show that, however the difference of practice may have originated, it has now got as it were into the blood, and may almost be regarded as a test of race, having often no traceable relation to local circumstances. The Bengalee inhabits a marshy country; his villages are for several months in the year almost lacustrine; but I think I am right in saying that he *never* builds on piles; his floor is always the lap of Mother Earth. On the other hand, the Indo-Chinese tribes, on his eastern border, as far as I have seen them, *all* build on piles, though many of them inhabit mountains in place of marshes. In Silhet, for example, a region of vast swamps, inhabited by Bengalees, up to the very base of the mountains, the villages (unless they be Indo-Chinese colonies) are built on the earth. The moment you enter the mountain county of the Kásias, you find the houses elevated on piles, though in this case they are of little height. Further south, the Khyens of the Aracan Yoma chain, at a height of several thousand feet above the sea, raise their cottages on lofty stilts of bamboo. Their neighbours, the Burmese and the Karens, always raise their houses from the earth whether dwelling in high ground or low. Even in Java, unless memory misleads me, whilst the true Javanese builds on the ground, the people of the Sunda mountain districts, a different race, raise their dwellings on posts. May we not regard the remarkable difference of practice between the Javanese and Malays as an indication that their races are not so closely connected as has been generally supposed?

H. YULE, Colonel.

Palermo, Dec. 3, 1866.
Another Correspondent says:—In reference to "A. R.'s" letter in the *Athenæum* for November 24, allow me to mention that the "lake habitations," or crannoges, in Ireland, were inhabited long after the historical period, as they are frequently mentioned in the 'Annals of Ulster' and the 'Annals of the Four Masters.' The last mentioned was "Crannagh MacKnavin," in the parish of Tynagh, barony of Leitrim, and county of Galway, which was taken by the English in 1610, and the chief of the sept of the MacKnavins carried prisoner to Galway, and there hanged. The site of this is now unknown. It is remarkable that in the descriptions of the Continental lake habitations the writers generally seem to believe that such habitations were first discovered on the Continent; and yet so far back as 1840, Mr. (now Sir W.) Wilde described a crannoge (see 'Proceedings of the Royal Irish Academy,' vol. 1, p. 420); and in Wakefield's 'Ireland,' which was published in 1812, there is a short description of a crannoge in Tipperary.

"Two Centuries of Song" goes far to redeem the credit of 1866 for Christmas books. The arabesque borders to the beautifully-toned pages are in exquisite taste, and of high typographic merit. Of these there are sixteen patterns. Larger full-page illustrations are not wanting, and are the gems, gleaming in the glory of green and gold, are secured by a handsome clasp.—*Reader.*

"Two Centuries of Song" is a collection of 'lyrics, madrigals, sonnets, and other occasional verses of the English poets of the last two hundred years. The gathering begins with George Wither's famous poem, 'Shall I send thee but a simple gift.' The latter poet has made the collection, and it is a good one, embracing pieces from the works of more than a hundred various authors, from Browning and Brummell, to Waller, Wordsworth, and Alaric Alexander Watts. The poems are illustrated by engravings from equally various hands, and are generally of a bright and lively kind. . . . All the engraving in this book is good; indeed, that is one of its chief merits."—*Pall Mall Gazette.*

"Solidly bound in green and gold cloth, which looks so like morocco as not to disfigure the metal clasp which holds the covers together, Mr. Walter Thornbury's 'Two Centuries of Song; or, Lyrics, Madrigals, Sonnets, and other Occasional Verse of the English Poets of the Last Two Hundred Years,' recommends itself as a volume pleasant in its contents, and charming in its illustrations. Many of the landscapes are very beautiful; the figure-pieces are generally good; the tinted borders to the pages are extremely graceful; and the arabesque on the half-title is one of the most dainty and fascinating things of the kind we have ever seen."—*Daily News.*

"It avoids long poems, and inclines rather to graceful and elegant trifles, whether they are associated with great names or not. We may consult it if we wish to see how near Milton came to writing verses of society, or what Dr. Johnson could achieve as an amatory poet. It contains songs differing widely in date and quality, for instance, Carey's 'Sally in our Alley,' and Haynes Bayly's 'I'd be a butterfly.' The type is clear, the paper tinted, the borders handsome, the illustrations are generally good, and some of them are by artists who seldom appear as illustrators."—*Guardian.*

"The book is good as well as handsome, literature and Art being alike well represented in it."—*Examiner.*

London: SAMPSON LOW, SON & MARSTON,
Milton House, Ludgate-hill.

NEW BOOKS, HUMOROUS AND SERIOUS.

"The English *Gustave Doré*."

Companion to 'The Hatchet Throwers.'

LEGENDS OF SAVAGE LIFE, the

New Work by James Greenwood (the "Amateur Camal"), with numerous imitatively Droll Illustrations by Ernest Grisct, coloured after the Original Drawings, is READY THIS DAY, price 7s. 6d. coloured; 5s. plain.

"Readers who found amusement in 'The Hatchet Throwers' will not regret any acquaintance they may form with this comical work. The pictures are among the most surprising which have come from this artist's pencil."

"An awfully jolly book for parties."

PUNIANA; or, Thoughts Wise and

Other-wise, the best book of Riddles and Puns ever formed. Collected and Edited by the Hon. Hugh Bowley, with nearly 100 exquisitely fanciful Drawings, is READY THIS DAY, in beautiful cloth binding, gilt edges, with Picture by Gustave Doré, printed in colours and inlaid in cover. 7s. 6d.

"It contains nearly 3,000 of the best Riddles, and about twice that number of the most outrageous Puns," and it is believed will prove to be "the most popular of all the Christmas books issued this year."

Immense Fun for Everybody.

"A book to laugh over and enjoy." "A complete collection, at an exceedingly moderate price, of the highly amusing Comic Pictures designed by Robert Seymour, the well-known illustrator of 'The Pickwick Papers.'"

This day, in 4to. a handsome volume, half morocco, 12s.

SEYMOUR'S SKETCHES: The Book

of Cockney Sports, Whims, and Oddities. Complete set of the 180 Humorous Illustrations.

"* A re-issue of the famous pictorial comic-strip which was so popular thirty years ago. The volume is admirably adapted for a table-book, and the pictures will doubtless again meet with that popularity which was extended towards them when the artist projected with Mr. Dickens the famous 'Pickwick Papers.'"

"The 'Tom Brown' of Winchester School."

SCHOOL LIFE at WINCHESTER

COLLEGE; or, the Reminiscences of a Winchester Junior. By the Author of 'The Log of the Water Lily.' Numerous Illustrations, exquisitely coloured after the Original Drawings. Ready This Day. 8vo. 7s. 6d.

This day, Third Edition, price 7s. 6d. paper 5s. 9d.

HISTORY of SIGN-BOARDS. By

JACOB LARWOOD and JOHN CAMDEN HOTTEN. With 100 Curious Illustrations.

From the Times.

"It is not fair on the part of a reviewer to pick the plums out of an author's book, thus fleecing away his cream and leaving little but skim milk remaining; but, even if we were ever so maliciously inclined, we could not, in the present instance, pick out all Messrs. Larwood and Hotten's plums, because the good things are so numerous as to defy the most wholesale depredation."—*Times Review of three columns.*

"A beautiful book to illuminate."

PRESENTATION BOOK of COM-

MON PRAYER, exquisitely ornamented with Original Illustrations from Old Missals, may now be obtained at all Booksellers for 8s. 6d. in antique, crimson edges; or in blue, with gold cross, 7s. 6d. The full price is 12s.

The most appropriate Christian Gift-Book.

"* Mr. Hotten would especially direct attention to an exquisitely printed Volume, entitled

SONGS of the NATIVITY; being

Christmas Carols, Ancient and Modern, including several never before given in any Collection. With the Music of the more Popular. Edited by W. H. HUSK, Librarian to the Sacred Harmonic Society. Handsomely printed by Whittingham, with beautiful floriated borders, in the Renaissance style. Cloth elegant, 12s. 6d.

New Book of Popular Humour.

WIT and HUMOUR: Poems by the

AUTOCRAT of the BREAKFAST-TABLE. This Day. Crown 8vo. toned paper, 8s. 6d.

"A volume of delightfully humorous poems, very similar to the mirthful verses of Tom Hood. Readers will not be disappointed with this work."

MR. SWINBURNE'S POEMS AND BALLADS.

NOTICE.—The Publisher begs to inform the very many persons who have inquired after this Work that Copies may now be obtained at all Booksellers, price 9s.

Mr. SWINBURNE'S 'NOTES' on his POEMS, and on the 'REVIEWS' which have appeared upon them, is now ready, price 1s.

ATALANTA in CALYDON. By Algernon Charles Swinburne. 6s.

CHASTELARD: a Tragedy. By A. C. Swinburne. 7s.

ROSSETTI'S CRITICISM on SWINBURNE'S POEMS. 8s. 6d.

London: JOHN CAMDEN HOTTEN, 74 and 75, Piccadilly; and the principal Booksellers throughout the Kingdom.

193, PICCADILLY, DECEMBER 14.

CASSELL, PETTER & GALPIN'S NEW ILLUSTRATED VOLUMES.

MILTON'S PARADISE LOST. Illustrated with Large Designs by Gustave Doré. Edited, with Notes and a Life of Milton, by ROBERT VAUGHAN, D.D. In One Large Folio Volume, bound in cloth, 5l.

"The book of the year."—*Saturday Review*.
"One of the finest monuments that typography and the art of book decoration have ever furnished to the honour of one of the greatest—perhaps the greatest but one—of our English poets."
"Take him all in all, 'Paradise Lost' is as yet, except perhaps the 'Inferno,' his greatest work; and if his faults were ten times as numerous as they are, we should owe him a world of gratitude for his labours on that magnificent volume alone."—*Standard*.
"This is a volume which should at once be secured. It will inevitably get scarcer and rarer; and certainly first impressions in such woodcuts as these are the finest and best."—*Publishers' Circular*.

The HOLY BIBLE. Illustrated by Gustave Doré. Divisional Volume I. Folio, cloth, 21s.

"Doré's Bible will be a monument—the culminating and vastest work of his life as a work of illustration. Many of Doré's Bible illustrations are conceptions of the most daring and astonishing originality, in perfect harmony with the Oriental largeness of the narrative."—*Fine-Arts Quarterly*.
"The grandeur, the tenderness, the awe of the inspired volume are unprofaned by clever conceits, by brilliant trickery, or sombre nightmare fancies."—*Daily Telegraph*.
"No commentary ever written has the instructive value of these illustrations."—*BUILDER*.

DON QUIXOTE. By Cervantes. With about 400 Illustrations by Gustave Doré. In One Handsome Quarto Volume, bound in cloth, 1l. 10s.; in half morocco, 2l. 5s.; in best morocco lines, 3l. 10s.

"Every plate, and there are scores, is marked by some trace of genius, some eccentric comicality, or unexpected suggestion of dread. Here, at last, we have an illustrated book in which the illustrations aid the reader's imagination."—*Spectator*.
"The contrast of fact and fancy is invariable, yet ever fresh."—*Pall Mall Gazette*.

DANTE'S INFERNO. With 76 Full-page Illustrations by Gustave Doré. Cary's Translation and Notes. Crown folio, price 50s.

"The most Dantesque work on Dante that was ever produced, from the Pontificate of Leo X. to that of Pius IX. M. Doré's sketches have for a considerable time obtained a European celebrity, and any words that may be suggested to us by the splendid English edition now before us can scarcely add to or detract from it."—*Times*.
"Messrs. Cassell & Co. have published a noble volume of Cary's text and Doré's illustrations. . . . The publication is a sumptuous one, and reflects the highest credit on the enterprising publishers."—*Saturday Review*.

The HISTORY of CROQUEMITAINE, and the Chivalric Times of Charlemagne. Illustrated throughout by Gustave Doré. The Text freely rendered from the French by TOM HOOD. 4to. cloth, printed on toned paper, 1l. 1s.

"The 'Croquemitaine' is a perfect treasure of humorous art."—*Saturday Review*.
"Deserves a place by the more dignified 'History of Don Quixote.'"—*Pall Mall Gazette*.

ADVENTURES of BARON MUNCHAUSEN. A New and Revised Edition, with about 140 Illustrations by Gustave Doré, and an Introduction by T. TEIGNMOUTH SHORE, M.A. Complete in One Volume, 4to. cloth, One Guinea.

"Munchausen's Travels is really the book for Gustave Doré, and we have to congratulate Messrs. Cassell on the publication of an edition of Munchausen which is a true *livre de luxe* as regards size, paper, print, and pictures."—*Saturday Review*.

The LEGEND of the WANDERING JEW. (Cassell's English Edition.) With 12 Large Designs by Gustave Doré. Large folio, cloth, 15s.

"The *Saturday Review* says, 'Messrs. Cassell have devoted themselves to the work of giving the English bookbuyer Gustave Doré, in all the profusion of his prodigal pencil. This year, at any rate, may be pronounced to be the Doré year. We resist the too obvious solicitations of a sorry joke, but we hope it will be a golden year to those enterprising publishers, who send us the 'Bible' with Doré illustrations, 'Dante,' with Doré illustrations, 'Paradise Lost,' 'Don Quixote,' 'Munchausen,' 'The Wandering Jew'—all from the same dashing and vigorous artist. Here are seven most sumptuous volumes, all handsomely printed, and with paper and type 'de luxe,' and all from the same artist and entrepreneur. They may be proud of each other.'"

IDYLLIC PICTURES. Drawn by Pinwell, Houghton, Paul Gray, Barnes, &c. Royal 8vo. cloth gilt, 10s. 6d.

"There is a good deal of character and dramatic force in some of the sketches, while the taste of those who prefer landscape or representations of feminine beauty in repose have also been consulted. We may notice here, with much regret, that among these illustrations the merits of one young and promising artist (Paul Gray) are here displayed for the last time. Many, in turning over the book, will be arrested by the grief-tormenting, gentle, free from conventionalism—of his mourner in the churchyard, and will find a sad interest in connecting the subject of the picture with the sad fate of the artist, who recently died in his twenty-fourth year. The poems which accompany the pictures are creditable, on the whole; some may even claim higher praise."—*Athenæum*.
"Pleasant and graceful echoes. . . . Many of them exhibit a considerable and practised sense of melody."—*Saturday Review*.
"Almost all these engravings are pretty, and some, like those of Miss Edwards, really graceful. We can conscientiously give the book a good word."—*Pall Mall Gazette*.

The CHILD'S GARLAND of LITTLE POEMS. With exquisite Illustrative Corners by Giacomelli, and Original Poems by MATTHIAS BARR. Square 8vo. cloth gilt, 7s. 6d.

"This is another of the volumes that must gladden a child's heart, while a man may glance over it with pleasure. It contains a series of charming little tales and nursery rhymes, written in verse as pleasant and rhythmical as easy of comprehension. . . . The entire book is a gem."—*Sunday Times*.
"There is a pleasant sentiment in them which has quite caught the taste of nursery readers."—*Saturday Review*.
"Every page is enriched with a pictorial border charmingly illustrative of the text. Signor Giacomelli, indeed, may be congratulated upon the fertility of idea and the grace of treatment which he has chosen. The book is altogether a delightful one for little ladies and gentlemen whose age can be told by a single numeral."—*Athenæum*.

BRIGHT THOUGHTS for the LITTLE ONES. 27 Original Drawings by Proctor. With Prose and Verse by GRANDMAMMA. Square 8vo. cloth gilt, 7s. 6d.

"The pictures are pretty, and nicely drawn. Skillful mothers will be able to vary the stories without much effort, and all the stories are written with a burning zeal for the maternal authority."—*Spectator*.

FOXES' BOOK of MARTYRS. Edited by the Rev. W. Bramley-Moore, M.A. Illustrated with Full-page Designs by the best Artists. Complete in One Volume, plain cloth, 12s.; handsomely bound in cloth gilt, 15s.

"The Rev. C. H. Spurgeon, referring, in the *Sword and Trowel*, to this edition of 'Foxe's Book of Martyrs,' says, 'This magnificent volume should be the Christmas present to his children of every father who can afford it. In these days of the threatened revival of Popery, the lover of his country, the lover of liberty, the lover of Gospel truth, can scarcely do a wiser thing than aid the circulation of this precious volume. The edition before us is worthy of any drawing-room table; it is profusely illustrated, beautifully printed, elegantly bound, and exceedingly cheap; and deserves to be, as we have already said, the Christmas gift-book of the year.'"

The QUIVER, Volume for 1866. Illustrated with upwards of 100 Original Drawings. Bound in cloth, with plain edges, 7s. 6d.; with gilt edges, 8s. 6d.

CASSELL'S ILLUSTRATED HISTORY of ENGLAND.—The First Volume of the New-Toned Paper Edition. This Volume, extending from the Earliest Period to the Reign of Edward IV., is illustrated with about 350 Engravings. Bound in cloth, 9s.

The BEGGAR'S BENISON: a Clydesdale Story. Illustrated by upwards of 300 Amateur Pen-and-Ink Sketches. In 2 vols. post 8vo. cloth, 21s.

"The author has managed to throw into his story an amount of plain verisimilitude, after the manner of Defoe, which makes it a thousand times more readable than the mass of high-flavoured romances. Plain print cannot do justice to the inimitably grotesque little woodcuts with which this funny story is so funnily illustrated. Altogether, the book is one of the quaintest and most diverting we have read for a very long time."—*Saturday Review*.

* * *Cassell's Illustrated Catalogue, containing Forty Engravings from the Illustrated Volumes of Messrs. Cassell, Petter & Galpin, is Now Ready.*

CASSELL, PETTER & GALPIN; LUDGATE-HILL, LONDON, E.C.; and BROADWAY, NEW YORK.

NEW NOVEL BY THE AUTHOR OF 'THE UTMOST MOST FARTHING.'

Now ready at all the Libraries, in 3 vols.

VICTORY DEANE: a Novel. By CECIL GRIFFITH, Author of 'The Utmost Farthing.'

"This is a book of power and of promise, and its power is of a true kind."—Morning Herald.
"The whole power of Victory's nature, and the passion that lies hidden in her flashing eyes, have yet to be brought out. She must be made fit and able to win back the heart of the man whose name she has a right to bear, in spite of all the allurements, grace, wit and beauty of the woman who has already captivated it. This part of her picture—the gradual, silent growth of passion in the young girl's heart, as it expands under the knowledge which his bounty places within her reach—is drawn with entire mastery of the whole subject, tenderly, deeply, as only a woman of intellect as well as of feeling, could draw it."—Standard.
London: Saunders, Otley & Co. 66, Brook-street, W.

Just published; crown 8vo. cloth, price 2s. 6d.

THE PROGRESS OF ENGLAND:

a Poem.

Edinburgh: William P. Nimmo.

Barbara's History. By Miss Edgeworth. Life of Edward Irving. By Mrs. Oliphant. St. Olave's. Sam Slick's American Humour.

The New Volume, just published, comprises

CHRISTIAN'S MISTAKE

By the Author of

'JOHN HALIFAX, GENTLEMAN.'

Illustrated by SANDYS.

"A more charming story, to our taste, has rarely been written. Within the compass of a single volume the writer has hit off a circle of varied characters all true to nature—some true to the highest nature; and she has entangled them in a story which keeps us in suspense till its knot is happily and cruelly resolved; while, at the same time, a pathetic interest is sustained by an art of which it would be difficult to analyze the secret. And if tried by the standard of the Archbishop of York, we should expect that even he would pronounce 'Christian's Mistake' a novel without a fault."—Times.

HURST & BLACKETT, 15, Great Marlborough-street.

HALLAM'S HISTORICAL WORKS.

Now ready, 10 vols. post 8vo. 6s. each.

A POPULAR and UNIFORM EDITION
OF

III. HALLAM'S LITERARY HISTORY OF EUROPE. Library Edition. 3 vols. 8vo. 36s.

Now ready, New Edition, with Portrait, fcap. 8vo. 7s. 6d.

REMAINS in VERSE and PROSE of ARTHUR HENRY HALLAM. With Preface and Memoir.

JOHN MURRAY, Albemarle-street.

SIR CHARLES LYELL'S WORKS.

NOW READY,

Tenth and entirely revised Edition, with Maps, Plates, and Woodcuts (to be completed in 2 vols.), Vol. I. 8vo. 16s.

PRINCIPLES OF GEOLOGY;

Or, the Modern Changes of the Earth and its Inhabitants, considered as illustrative of Geology.

By Sir CHARLES LYELL, Bart., M.A. F.R.S.

"The 'Principles' treat of such portions of the economy of existing nature, animate and inanimate, as are illustrative of Geology, so as to comprise an investigation of the permanent effects of causes now in action, which may serve as records to after-ages of the present condition of the globe and its inhabitants. Such effects are the enduring monuments of the ever-varying state of the physical geography of the globe, the lasting signs of its destruction and renovation, and the memorials of the equally fluctuating condition of the organic world. They may be regarded, in short, as a symbolical language, in which the earth's autobiography is written."—*Author's Preface.*

II.

LYELL'S

ELEMENTS OF GEOLOGY;

Or, the Ancient Changes of the Earth and its Inhabitants, as illustrated by Geological Monuments.

Sixth Edition, greatly enlarged.

With 770 Woodcuts, 8vo. 18s.

"The 'Elements' treat briefly of the component materials of the earth's crust, their arrangement and relative position, and their organic contents, which, when deciphered by aid of the key supplied by the study of the modern changes above alluded to, reveal to us the annals of a grand succession of past events—a series of revolutions which the solid exterior of the globe, and its living inhabitants, have experienced in times almost entirely antecedent to the creation of man."—*Author's Preface.*

III.

LYELL'S

GEOLOGICAL EVIDENCES OF THE ANTIQUITY OF MAN.

With Remarks on Theories of the Origin of Species and Variation. Third Edition, revised. With Illustrations.

JOHN MURRAY, Albemarle-street.

ROBERTSON'S CHURCH HISTORY.

Now ready, 8vo. 18s.

THIRD VOLUME

OF A

HISTORY OF THE CHRISTIAN CHURCH;

From the CONCORDAT OF WORMS to the DEATH OF BONIFACE VIII., A.D. 1122—1303.

By J. C. ROBERTSON, M.A.,

Canon of Canterbury, and Professor of Ecclesiastical History at King's College, London.

"A text-book for the student—while the host of references with which the author has studded his pages will be invaluable as a guide to the more advanced inquirer."—*Saturday Review.*

Also Now Ready,

THIRD EDITION of VOLUME I.; A.D. 64—590.

SECOND EDITION of VOLUME II.; A.D. 590—1122.

JOHN MURRAY, Albemarle-street.

**THE STUDENT'S MANUAL OF OLD TESTAMENT HIS-
TORY: from the CREATION to the RETURN of the JEWS FROM CAPTIVITY.**

The object of these Works is to provide TEXT-BOOKS OF SCRIPTURE HISTORY, which, in fullness, accuracy, and scholarlike treatment, may take their place by the side of the STUDENT'S HISTORIES OF GREECE AND ROME now in general use in all the best PUBLIC and PRIVATE SCHOOLS.

JOHN MURRAY, Albemarle-street.

DR. WM. SMITH'S**BIBLE DICTIONARIES.****I.—For Divines and Scholars.**

Now ready, with Illustrations, 3 vols. medium 8vo. 5l. 5s.

A DICTIONARY of the BIBLE:
its Antiquities, Biography, Geography, and Natural History.

By VARIOUS WRITERS,
including the Archbishop of York, the Bishops of Calcutta, Ely,
Gloucester and Bristol, Killaloe, the Deans of Canterbury and
Westminster, Lord Arthur Harvey, Professors Lightfoot, Plumptre,
Rawlinson, Selwyn, &c.

Edited by WM. SMITH, LL.D.
Classical Examiner in the University of London.

"Dr. Wm. Smith's 'Dictionary of the Bible' could not fail to take a very high place in English literature; for no similar work in our own or in any other language is for a moment to be compared with it."—*Quarterly Review*.

II.—For Families and Students.**A CONCISE BIBLE DICTIONARY;**
condensed from the above Work. With Illustrations. One Volume. (1050 pp.) Medium 8vo. 21s.

"This volume is so full and satisfactory that did it not appear as an abridgment it would be accepted as a full and complete Dictionary of the Bible."—*Cathartian*.

III.—For Schools and Young Persons.**A SMALLER BIBLE DICTIONARY;**
with 6 Maps, 30 Illustrations and Woodcuts. (600 pp.) Crown 8vo. 7s. 6d.

This Edition has been prepared as a Companion-Volume to Dr. Wm. Smith's SMALLER CLASSICAL DICTIONARIES, which are now generally used in all Public and Private Schools.

JOHN MURRAY, Albemarle-street.

**HISTORY OF
LATIN CHRISTIANITY,**

INCLUDING
THAT OF THE POPES TO THE PONTIFICATE OF
NICHOLAS V.
9 vols.

JOHN MURRAY, Albemarle-street.

Every Saturday, price 6d.,

MR. TROLLOPE'S NEW WEEKLY
SERIAL STORY,

THE LAST CHRONICLE OF BARSET.

Illustrated by GEORGE H. THOMAS.

" 'The Last Chronicle of Barset' is an innovation on the customary style of serial publication, appearing in sixpenny weekly numbers, instead of monthly parts. We are inclined to augur favourably of an experiment so much in harmony with the spirit of an age of rapid reading. There is no innovation in any other respect. Most of Mr. Trollope's personages are old friends of ours, and his pathos is as deep, his humour as jovial, his knowledge of the world as consummate as ever."

Illustrated London News.

"Mr. Trollope is in his old country, and the new fiction, as far as we can judge, will not be the least interesting of his productions. The story opens well, and we shall anticipate the numbers to follow with a keen relish, imparted by the first course."

London Review.

"It is the conclusion of the 'Warden' Series, and its readers will renew their acquaintance with Archdeacon Grantley, with poor Mr. and Mrs. Crawley, who appear in very unpleasant circumstances, and with sundry other persons who have already taken their stand among the classic characters of English fiction. . . . Upon the whole, judging from what we have already read, we incline to the opinion that 'The Last Chronicle of Barset' will be no unworthy companion of 'Framley Parsonage.' It certainly promises at its opening to be the best of Mr. Trollope's more recent novels."

Standard.

SMITH, ELDER & Co. 65, Cornhill.

Just published, in 1 vol. demy 8vo. price 15s.

THE GREAT PILOT AND HIS LESSONS.

By Rev. R. NEWTON, D.D.

AUTHOR'S EDITION.

London: S. W. PARTRIDGE, 9, Paternoster-row.

THE PALL MALL GAZETTE.—*Setting aside the Penny Papers, the circulation of the PALL MALL GAZETTE already greatly exceeds that of any other Daily Journal (Morning or Evening), the TIMES alone excepted.*

OFFICE, 14, Salisbury-street, Strand.

THE PALL MALL GAZETTE.—*NOTICE to NEWSVENDERS.*—On and after the 26th of DECEMBER the PALL MALL GAZETTE will be printed at new premises in NORTHUMBERLAND STREET, STRAND, where additional Machinery, capable of printing copies with great rapidity, has been erected by Messrs. HOBBS & Co. The Publisher regrets the inconvenience to which Newsreaders have too often been subject in consequence of his inability to meet their demands promptly. It is hoped, however, that the resources of the new establishment will obviate all such difficulty in future.

OFFICE, 14, Salisbury-street, Strand.

THE PALL MALL GAZETTE.—*Apart from its sale as a London Evening Newspaper, the PALL MALL GAZETTE has a Large Circulation in the Country. It is found peculiarly acceptable to Residents in the Provinces who are desirous of receiving early every morning a Journal which contains the latest News of the previous day, and which comprises, in addition to the ordinary contents of a Daily Newspaper, a large number of Original Articles of various character.*

The First Edition of the PALL MALL GAZETTE is published at 8 p.m., and a Second Edition is published in time for despatch to the Country by post.

For the convenience of persons residing in the country subscriptions will be received by the Publisher; and a single copy will be sent to any place out of London on receipt of three postage stamps.

Terms (Inclusive of Postage).

Sound.

"The Museum of Science and Art" is the most valuable contribution that has ever been made to the scientific instruction of every class of society.—"Sir David Brewster in the North British Review."

"The whole work, bound in six double volumes, costs but the price of a respect; and whether we consider the liberality and variety of the illustrations, the clarity of the writing, or the durable interest of the matter, we must express our belief that there is hardly to be found among the new books one that would be welcomed by people of so many ages and classes as a valuable present."—*Examiner*.

London: Walton & Maberly, 137, Gower-street.

UNIVERSITY OF LONDON.—MATRICULATION EXAMINATION.

GRIFFITH & FARRAN, Successors to Newberry & Harris, Corner of St. Paul's Churchyard.

NEW AND SPLENDID DRAWING-ROOM GIFT-BOOK.

Dedicated, by permission, to H.R.H. the Princess Royal.

THE YEAR, ITS LEAVES AND BLOSSOMS.

Illustrated by HERMINE STILKE, in 13 beautiful Plates, executed in the highest style of Chromo-lithographic
Art. Royal 4to. elegantly bound in cloth, gilt edges, price Two Guineas.

"This is a charming gift-book. The volume is most attractive, entirely satisfactory to the Art-lover, while it is sure to be heartily
welcomed by the 'refined' public, for whom it is intended."—*Art-Journal*.

London: GRIFFITH & FARRAN, Corner of St. Paul's Churchyard.

CHRISTMAS PUBLICATIONS.

PUNCH'S ALMANACK for 1867. With Illustrations by John Tenniel, George Du Maurier, Charles Keene, and C. H. Bennett. 3d.

CHRISTMAS Number of 'ONCE A WEEK.' With Eighty Pages of Christmas Tales and Stories, and numerous Illustrations (Six on Toned Paper), by well-known Authors and Artists. In a handsome Wrapper (printed in Colours), price 6d.

PUNCH'S POCKET-BOOK for 1867. With a Coloured Frontispiece, by Charles Keene, and numerous Illustrations (Six on Toned Paper), by John Tenniel and C. H. Bennett. Price 2s. 6d.

Just published, price Two Guineas, demy 4to. cloth gilt, printed on toned paper; or in handsome morocco, Three Guineas.

THE OBERLAND AND ITS GLACIERS, Explored and Illustrated with Ice-axe and Camera.

By H. B. GEORGE, M.A. F.R.G.S.

Fellow of New College, Oxford; Editor of the *Alpine Journal*.

With TWENTY-EIGHT PHOTOGRAPHS,

Illustrative of the various Glacial Phenomena, and of the Scenery described,

By ERNEST EDWARDS, B.A.

And a MAP OF THE OBERLAND.

"In this volume Mr. George has presented an agreeable and handsomely-embellished drawing-room book. The photographs are excellent. Glacier scenery is peculiarly suited for photographic representation, as it displays no great variety of colours, and the contrasts of light and shade are strong on tolerably fine days."—*Athenæum*.

"The interest of Mr. George's lucid exposition is greatly enhanced by the illustrations of Mr. Edwards. They are always beautiful, and often exceedingly instructive."—*Saturday Review*.

"Mr. Edwards is an excellent photographer, and his work is admirably executed. The book forms one of the most handsome quarto volumes we have seen for some time."—*Photographic News*.

"We have the Oberland Glaciers brought home to us with all their most characteristic details."—*Examiner*.

"Not only as a narrative of adventure, but also as an intelligent guide-book, we commend 'The Oberland and its Glaciers' as a work to be read for the interest which attaches to its matter, and to be looked at for the beauty of its photographic illustrations."—*Art-Journal*.

London: ALFRED W. BENNETT, 5, Bishopsgate-street Without.

SALOM'S NEW OPERA and FIELD GLASS,
 and THE RECONNOITERER GLASS, price 10s. 10d., sent free. "This 'Tourist's Favourite,' through extraordinary division of labour, distinctly shows small windows 10 miles off, landscape at 30 miles, Jupiter's moons, &c.—THE MARQUESS OF CAMARON: 'The Reconnoiterer is very good.'—EARL OF BREADALBANE: 'I find it all you say, and wonderfully powerful for so very small a glass.'—EARL OF CAITHNESS: 'It is a beautiful glass.'—REV. LORD SCARSDALE 'approves of it.'—LORD GIFFORD: 'Most useful.'—LORD GARYNCH: 'Remarkably good.'—SIR DIORY CAYLEY: 'It gives me complete satisfaction, and is wonderfully good.'—CAPT. SEXTON, Royal Small Arms Factory, Enfield: 'I have found it effective at the 1,000-yards range.'—F. H. HAWKES, of Farnley, Esq.: 'I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a Glass combining so much power for its size with so much clearness.'—*The Field*: 'We have carefully tried it at an 800-yard, rifle range against all the Glasses possessed by members of the Corps, and found it fully equal to any of those present, although they had cost more than four times its price.'—Notes and Queries: 'What intending tourist will now start without such an indispensable companion to a pleasure trip?'—The celebrated "HYTHE" GLASS shows bullet-marks at 1,200 yards, and men at 34 miles, price 31s. 6d. All the above Glasses, respectively bearing the registered trade-marks, "Salom," "Reconnoiterer," and "Hythe," are only to be had direct from SALOM & CO. 98, Princes-street, EDINBURGH, and 137, Regent-street, LONDON.

Order of your Chemist, Grocer, or Chandler.

BREAKFAST—EPPS'S COCOA

(more commonly called Epps's Homoeopathic Cocoa, as being
prepared and introduced by James Epps, the Homoeopathic Chem-
ist first established in England). The very agreeable character
of this preparation has rendered it a general favourite. For
breakfast no other beverage is equally invigorating and sustain-

ing. This Cocoa is used by thousands who never used Cocoa
before. "Cocoa stands far higher than tea or coffee," Dr. Haesall
says.—Sold in 1 lb., 2 lb., and 4 lb. packets.

WILLIAM SMEE & SONS respectfully

caution intending Purchasers of the "SMEE'S SPRING
MATTRESS, TUCKER'S PATENT," or "BOMMER TUCK-
ER," against various imitations and infringements, preserving
the appearance of the Original, but wanting all its
essential advantages.

Each Genuine Mattress bears the Label "TUCKER'S PATENT,"
and a Number.

The "Smee's Spring Mattress, Tucker's Patent," received the
Jury Prize Medal, or Honourable Mention, given to Bedding of
its description, at the International Exhibition, 1862, and
may be obtained (price from 25s.) of most respectable Bedding
architects and Upholsters, and Wholesale of the Manu-
facturers, **WILLIAM SMEE & SONS, Finsbury, Moorgate**
alley Terminus, London, E.C.

SAUCE—LEA & PERRINS'

THE PERFECT SUBSTITUTE FOR SILVER.

—The REAL NICKEL SILVER, introduced more than 30
years ago by WILLIAM S. BURTON, when PLATED by the
patent process of Messrs. Elkington & Co., is beyond all com-
parison the very best article known to sterling silver, that can be
employed as such, either usefully or ornamentally, as by no
possible test can it be distinguished from real silver.

A small useful set, guaranteed of first quality for finish and
durability, as follows:—

| | Fiddle or Old Silver | Band Pattern | Thread Pattern | King's or Shell Thread |
|---------------------------------|-------------------------------|-------------------|-------------------|---------------------------------|
| 12 Table Forks..... | £. s. d. 1 13 0 | £. s. d. 2 0 0 | £. s. d. 2 4 0 | £. s. d. 2 10 0 |
| 12 Table Spoons..... | 1 13 0 | 2 0 0 | 2 4 0 | 2 10 0 |
| 12 Dessert Forks..... | 1 4 0 | 1 10 0 | 1 12 0 | 1 15 0 |
| 12 Dessert Spoons..... | 1 4 0 | 1 10 0 | 1 12 0 | 1 15 0 |
| 12 Tea Spoons..... | 1 6 0 | 1 0 0 | 1 8 0 | 1 5 0 |
| 6 Egg Spoons, gilt bowls..... | 10 0 | 12 0 | 12 0 | 13 0 |
| 3 Sauce Ladles..... | 6 0 | 8 0 | 8 0 | 9 0 |
| 1 Gravy Spoon..... | 6 0 | 8 0 | 10 0 | 11 0 |
| 3 Salt Spoons, gilt bowls..... | 3 4 0 | 4 0 0 | 4 0 0 | 4 0 0 |
| 1 Mustard Spoon, gilt bowl..... | 1 8 0 | 2 0 0 | 2 0 0 | 2 0 0 |
| 1 Pair of Sugar Tongs..... | 3 6 0 | 3 6 0 | 3 6 0 | 4 0 0 |
| 1 Pair of Fish Carvers..... | 1 4 0 | 1 10 0 | 1 10 0 | 1 10 0 |
| 1 Butter Knife..... | 10 0 | 13 0 | 16 0 | 17 0 |
| 1 Sugar Ladle..... | 3 2 0 | 4 6 0 | 4 6 0 | 5 0 0 |
| Total..... | 9 19 9 | 13 9 0 | 13 9 6 | 14 17 3 |

Any article to be had singly at the same prices. An oak chest,
to contain the above, and a relative number of knives, &c. 2l. 10s.
Tea and Coffee Sets, Dish Covers and Corner Dishes, Cruet and
Juguet Frames, &c. at proportionate prices. All kinds of re-
plating done by the patent process.

CUTLERY, WARRANTED.—The most

varied assortment of TABLE CUTLERY in the world, all
warranted, is on SALE at WILLIAM S. BURTON'S, at prices
that are remunerative only because of the largeness of the sales.

BRITISH INSTITUTION, PALL MALL.—

In compliance with a requisition from many of the usual Exhibitors, it has been determined to open this Gallery for a short season with an Exhibition of the Works of British Artists, previous to Lady-Day next, when the present tenancy ends. The Exhibition will open about the middle of January and continue into March.

NOTICE TO EXHIBITORS.

All PICTURES intended for Exhibition and Sale must be sent to the Gallery for the inspection of the Committee on Wednesday, the 2nd, or Thursday, the 3rd, of January next; and the SCULPTURE on Wednesday the 9th, between the hours of Ten in the morning and Five in the afternoon, subject to the usual regulations.

By order of the Committee,
GEORGE NICOL, Secretary.

THE COMMITTEE OF THE KENT ASSOCIATION OF INSTITUTIONS have much pleasure in offering

PRIZES OF TEN POUNDS for the Best and FIVE POUNDS for the Second-best TALE, the object of which shall be to induce Young Men, and Especially Working Men, to avail themselves of the Advantages offered by Literary and Mechanical Institutes.

For particulars, send a stamped and directed Envelope to the Secretary, Kent Association of Institutes, Faversham.

BOROUGH OF LIVERPOOL. SEFTON PARK COMPETITION.

TO LANDSCAPE GARDENERS AND OTHERS.

The Council of the Borough of Liverpool offer Two Premiums for the BEST PLANS for LAYING OUT SEFTON PARK, viz.:—A First Premium of 300 Guineas. A Second Premium of 150 Guineas.

The Conditions of the Competition, together with a Lithographed Contour Plan of the Site, will be sent to any address on receipt of Post-office Order for One Guinea, which latter will be returned if Plans are received according to the Conditions.

Application to be made to Mr. E. K. ROSSON, Architect and Surveyor, Town Hall, Liverpool.

The time for sending in Plans has been extended to Tuesday, the 25th of March.

HEAD MASTER.—The Office of HEAD

MASTER of the BIRMINGHAM and EDGBASTON PROLETARIAN SCHOOL will become VACANT at the end of the current quarter, in consequence of the appointment of Dr. BADHAM to the Chair of Classics, in the University of Sydney. On the 25th instant, as usual, will be published, the New Number, price 3d. post free, of

WILLIS & SOTHERAN'S MONTHLY CATALOGUE OF SECOND-HAND BOOKS;

To which is appended a LIST of the NEW PUBLICATIONS, with the Prices and the Publishers' Names.

This Number is particularly recommended to the notice of Book-buyers generally, as containing Two entire Private Libraries just purchased by W. & S., and numerous Curious Books from other sources. The present Number is enlarged, to afford an extra opportunity of bringing their recent New Purchases before the Public. They have also the most EXTENSIVE COLLECTION of ANCIENT and MODERN BOOKS ON SALE in ENGLAND, including all the best Standard Literature, many CURIOUS and RARE WORKS, fine BOOKS of ENGRAVINGS, NATURAL HISTORY, COUNTY HISTORIES, TOPOGRAPHY, &c., in perfect condition and good bindings, at reasonable prices. A subscription of THREE SHILLINGS secures these highly-interesting Catalogues, post free, for Twelve Months.

WILLIS & SOTHERAN, 136, Strand, London.

SELECT YOUR BOOKS FROM OUR IMMENSE STOCK.

WILLIS & SOTHERAN beg to announce, that they have now on SALE the largest Collection of BOOKS, comprising all the BEST NEW WORKS of the SEASON, and Standard Books by the most esteemed Authors, selected from the principal Publishers, and from the prices of which a LARGE DISCOUNT will be allowed.—136, STRAND, LONDON.

A Catalogue sent free.

BOUND BOOKS ON SALE.

WILLIS & SOTHERAN employ almost exclusively the large Bookbinding Establishment of Messrs. Hayday & Co. for their CALF and MOROCCO BINDING, and they have now ready for selection all the principal NEW BOOKS of the Season, as well as the best Standard Works, in plain and elegant CALF, MOROCCO and RUSSIA BINDINGS, at prices much below those usually charged for inferior workmanship.—136, STRAND, LONDON.

TO PRINTSELLERS, PUBLISHERS, AND ARTISTS' COLOURMEN.

For Sale by Private Bargain.

THE GOODWILL AND STOCK-IN-TRADE of the late ALEXANDER HILL, Printseller and Publisher to Her Majesty the Queen, His Royal Highness the late Prince Consort, Artists' Colourman to the Royal Scottish Academy, &c. The STOCK, which consists of well-known Works of Art, and a complete and most judiciously selected assortment of artists' materials, has been carefully inventoried and valued.

Mr. Hill's prominent position as a Publisher of High Art in Scotland is well known, and the long-established and successful character of his business enabled him to secure the co-operation of many of the principal English Houses, both in regard to his own and their publications; and the exhibition of Pictures in the course of publication formed a special and valuable feature in his business.

Combined with, and as a department of, the Printselling Business, Mr. Hill carried on an extensive business as a Carver and Gilder, and the GOODWILL and STOCK-IN-TRADE of this BUSINESS will be DISPOSED OF along with the other.

The LEASES of the present PREMISES, No. 67, PRINCES-STREET, Edinburgh, which are spacious and suitable, situated in the most fashionable and best business thoroughfare in the city, and in which the business has been conducted for many years, does not expire till Whitsunday 1868.

It is rarely so important a Fine Art Stock, or so desirable an opening for a person of moderate capital and energy, is offered for the successful establishment in Edinburgh of a Printseller and Publisher's business of this nature.

Further particulars regarding the business and conditions of sale will be furnished on application to Mr. ADAM MORRISON, S.S.C., 45, York-place, Edinburgh, agent for Mr. Hill's Executors.

Office: 9, St. Bride's-avenue, Fleet-street, London.

THE PALL MALL GAZETTE.—Setting

aside the Penny Papers, the circulation of the Pall Mall Gazette already greatly exceeds that of any other Daily Journal (Morning or Evening) the Times alone excepted. Perhaps a more important fact for Advertisers is that the circulation of the Pall Mall Gazette is almost wholly amongst the educated and wealthy classes of society.

Office, 14, Salisbury-street, Strand, W.C.

THE PALL MALL GAZETTE.—NOTICE

TO NEWSVENDERS.—On and after the 28th of December the Pall Mall Gazette will be printed at new premises in Northumberland-street, Strand, where additional machinery, capable of printing copies with great rapidity, has been erected by Messrs. Hoe & Co. The Publisher regrets the inconvenience to which Newsvenders have too often been subject in consequence of his inability to meet their demands promptly. It is hoped, however, that the resources of the new establishment will obviate all such difficulty in future.

Office, 14, Salisbury-street, Strand, W.C.

THE PALL MALL GAZETTE: an Evening

Newspaper and Review. Price Two pence.

Apart from its sale as a London Evening Newspaper, the Pall Mall Gazette has a large circulation in the country. It is found peculiarly acceptable to residents in the provinces who are desirous of receiving early every morning a Journal which contains the Latest News of the previous day, and which comprises, in addition to the ordinary contents of a Daily Newspaper, a large number of Original Articles of various character.

The First Edition of the Pall Mall Gazette is published at Three p.m., and a Second Edition is published in time for despatch to the country by post.

For the convenience of persons residing in the country Subscriptions will be received by the Publisher; and a single Copy will be sent to any place out of London on receipt of three postage-stamps.

Terms (inclusive of postage):—

Quarterly.....0. 12s. 6d.

Half-yearly.....11. 12s. 6d.

Yearly.....21. 12s. 6d.

A New Volume will be commenced on the 1st of January.

Office, 14, Salisbury-street, Strand, W.C.

Now ready, price 7s. 6d.

"A work of immense research, patient ingenuity, and great fairness."—*British Quarterly*.

"We can bestow unqualified praise on the dissertations."—*Spectator*.

"One of the most lucid concordances or harmonies that we remember to have met with. No more appropriate present could be made to any candidate for holy orders."—*John Bull*.

"It is not too much to say that the learning with which he has crowded his pages is almost immense."—*Eclectic Review*.

Now ready, the New Edition, corrected throughout, in One Volume, cloth gilt, royal 8vo. price 33s.

SIR BERNARD BURKE'S (Ulster King-of-Arms) PEERAGE AND BARONETAGE.

Twenty-ninth Edition for 1867.

This Peerage and Baronetage is the only complete book of the kind extant. It gives the historical and genealogical account and present state of all the Peers and Baronets, with their armorial bearings engraved and described; it furnishes full details respecting all the Archbishops and Bishops and their families; it enters fully into the subject of precedence, and sets forth all the Rolls, Authorizations, and Usages, which regulate it; Foreign Titles borne by British Subjects; Peerages recently Extinct and Dormant; the Orders of Knighthood, with their Insignia depicted and explained; the List of Knights and Knights Bachelors; the Mottoes of all the Peers and Baronets, with Translations and Illustrations; and an Alphabetical List of the Seats and Mansions. The above are the main features of the work, and such a combined and immense amount of information as this book contains would be vainly sought for in any other Peerage or Baronetage past or present.

Just published, in One Volume, royal 8vo. price 21 2s., a New and Enlarged Edition of

SIR BERNARD BURKE'S (Ulster King-of-Arms) EXTINCT, DORMANT, AND SUSPENDED PEERAGES.

Illustrated by Steel Engravings of the principal Arms.

In this New Edition the history of each title is continued to the present time; and the various dignities are traced down to their existing representatives.

Fourth Edition, complete in One Volume, royal 8vo. price 21 16s.

SIR BERNARD BURKE'S (Ulster King-of-Arms) LANDED GENTRY OF GREAT BRITAIN AND IRELAND.

**THE STUDENT'S MANUAL of OLD TESTAMENT HIS-
TORY: from the CREATION to the RETURN of the JEWS FROM CAPTIVITY.**

The object of these Works is to provide TEXT-BOOKS of SCRIPTURE HISTORY, which, in fullness, accuracy, and
scholarlike treatment, may take their place by the side of the STUDENT'S HISTORIES of GREECE and ROME now in
general use in all the best PUBLIC and PRIVATE SCHOOLS.

JOHN MURRAY, Albemarle-street.

**DR. WM. SMITH'S
BIBLE DICTIONARIES.****I.—For Divines and Scholars.**

Now ready, with Illustrations, 3 vols. medium 8vo. 5l. 3s.

A DICTIONARY of the BIBLE:
Its Antiquities, Biography, Geography, and Natural History.

By VARIOUS WRITERS,
including the Archbishop of York, the Bishops of Calcutta, Ely,
Gloucester and Bristol, Killaloe, the Deans of Canterbury and
Westminster, Lord Arthur Hervey, Professors Lightfoot, Plumptre,
Rawlinson, Selwyn, &c.

Edited by WM. SMITH, LL.D.
Classical Examiner in the University of London.

"Dr. Wm. Smith's 'Dictionary of the Bible' could not fail to
take a very high place in English literature; for no similar work
in our own or in any other language is for a moment to be com-
pared with it."—*Quarterly Review*.

II.—For Families and Students.**A CONCISE BIBLE DICTIONARY;**
condensed from the above Work. With Illustrations. One
Volume. (1000 pp.) Medium 8vo. 21s.

"This volume is so full and satisfactory that did it not appear
as an abridgment it would be accepted as a full and complete
Dictionary of the Bible."—*Churchman*.

III.—For Schools and Young Persons.**A SMALLER BIBLE DICTIONARY;**
with 6 Maps, 30 Illustrations and Woodcuts. (600 pp.) Crown
8vo. 7s. 6d.

This Edition has been prepared as a Companion-Volume to
DR. WM. SMITH'S SMALLER CLASSICAL DICTIONARIES, which are
now generally used in all Public and Private Schools.

JOHN MURRAY, Albemarle-street.

JOEL ROWSELL,

9, King William-street, Strand, London.

STANDARD

WORKS OF REFERENCE.

Just published,

In 2 vols. imperial 8vo. cloth, 3l. 12s.

THE

IMPERIAL BIBLE DICTIONARY,

Historical, Biographical, Geographical, and Doctrinal. By numerous Eminent Writers. Edited by the Rev. PATRICK FAIRBAIRN, D.D., Author of 'Typology of Scripture,' &c. With many hundred Engravings on Wood and Steel.

"This magnificent work is now completed, and in two hands some volumes the Biblical student will find everything that he can possibly expect to find in a Dictionary. We heartily commend the volumes to every Christian who seeks to be well instructed in the Scriptures."—*Christian Advocate and Review*.

"Orthodox in tone, reverent in spirit, and showing in every page the marks of independent and industrious research."—*Churchman*.

II.

2 vols. imperial 8vo. cloth, 4l.

THE IMPERIAL DICTIONARY:

ENGLISH, TECHNOLOGICAL, and SCIENTIFIC. Adapted to the present state of Literature, Science, and Art. By JOHN OGILVIE, LL.D. Illustrated by above 2,500 Engravings on Wood.

"Dr. Ogilvie has not only produced the best English Dictionary that exists, but, so far as the actual state of knowledge permitted, has made some approach towards perfection."—*British Quarterly Review*.

III.

1 large vol. super-royal 8vo. cloth, 25s.

THE COMPREHENSIVE ENGLISH DICTIONARY:

EXPLANATORY, PRONOUNCING, and ETYMOLOGICAL. By JOHN OGILVIE, LL.D. The Pronunciation adapted to the best modern usage by RICHARD CULL, F.R.S. Above Eight Hundred Engravings on Wood.

"We do not hesitate to recommend this Dictionary as, next to the more costly and cumbersome 'Imperial,' the very best that has yet been compiled."—*London Review*.

IV.

Imperial 16mo. cloth, red edges, 10s. 6d.; half morocco, 12s.

THE STUDENT'S ENGLISH DICTIONARY:

ETYMOLOGICAL, PRONOUNCING, and EXPLANATORY. Prepared specially for Colleges and Advanced Schools. By JOHN OGILVIE, LL.D. With about 300 Engravings on Wood.

"A very compact, complete Dictionary for the use of Students and the Upper Forms of our Public Schools."—*Churchman*.

"The best Etymological Dictionary we have yet seen at all within moderate compass."—*Spectator*.

V.

2 vols. imperial 8vo. cloth, 4l. 6s.

THE IMPERIAL GAZETTEER:

a General Dictionary of Geography, Physical, Political, Statistical, and Descriptive. Edited by W. G. BLACKIE, Ph.D. F.R.G.S. With nearly 750 Wood Engravings.

"This excellent book of reference . . . All the articles we have examined, whether long or short, exhibit a greater degree of correctness in minute detail than we should have thought practicable in so comprehensive a work."—*Athenæum*.

VI.

Imperial 4to. half morocco, gilt edges, 5l. 5s.

THE IMPERIAL ATLAS OF MODERN GEOGRAPHY.

A Series of above One Hundred carefully Coloured Maps, embracing the most recent Discoveries and the latest Political Divisions of Territory in all Parts of the World. Edited by W. G. BLACKIE, Ph.D. F.R.G.S. With an Index to nearly 120,000 Places.

"Beyond comparison the best collection of maps which has yet been made."—*Morning Herald*.

"Finally, an Index of no less than 120,000 names makes this excellent Atlas a most convenient one for general use and reference."—*Saturday Review*.

SUCCESSFUL ILLUSTRATED BOOKS.

THE FINE-ART GIFT-BOOK for 1867.

In post 4to. 21s. cloth; or morocco gilt, 35s.

THE
SPIRIT OF PRAISE:

A COLLECTION OF HYMNS,
OLD AND NEW.

Elaborately printed by DALZIEL BROTHERS, and
fully illustrated with illuminations and Original
Pictures by G. J. PINWELL, J. W. NORTH, PAUL
GRAY, W. SMALL, T. DALZIEL, A. B. HOUGHTON, &c.

Opinions of the Press.

PALL MALL GAZETTE.

"The Gift-Book of the Season, which many people will
think most seasonable of all. 'The Spirit of Praise,'
besides being timely in its conception, is happy in its
execution. We commend it as a handsome volume and
a beautiful specimen of typography."

MANCHESTER EXAMINER.

"A perfect gem, the production of which does honour
to the firms which have given it to the world,—perfect in
all its details, printing, paper, and engraving. It is a
sample of what the Camden Press and the spirit of
a London publisher can do."

MORNING POST.

"A seasonable gift is this beautifully-illuminated
volume. It richly deserves the highest admiration."

SPECTATOR.

"Fit for the drawing-room table of a bishop."

NONCONFORMIST.

"In the production of this magnificent volume, it is
difficult to say whether the artist, the engraver, the
printer, the illuminator, or the binder has excelled.
It is a handsome quarto, fit for a palace."

STANDARD.

"This book is, externally and internally, a charming
production. In every respect, this handsome volume is
satisfactory."

NEWCASTLE COURANT.

"As a specimen of what printing, engraving, and book-
binding can accomplish, 'The Spirit of Praise' is unsur-
passed in our recollection. In one sentence, let us say
that it is quite impossible for us to speak too highly of
the book. A perfect, unique gem, it is fit for any draw-
ing-room table or Christmas gift-book."

THE CHANDOS POETS.

*Under this Distinguished Title will, from time to time, be
published New and Elegant Editions of Standard Poetry.*

Now ready, Red-Line Edition, new type, crown 8vo. cloth,
gilt edges, 6s. 6d.; or morocco, 12s. 6d.

THE COMPLETE
POETICAL WORKS OF
LONGFELLOW.

With ORIGINAL ILLUSTRATIONS by COOPER,
SMALL, HOUGHTON, &c.

Opinions of the Press.

BELL'S WEEKLY MESSENGER.

"Never has Longfellow's Poems come before us in a
more elegant shape, nor been presented with more richly
deserved honours. As the first volume of 'The Chandos
Poets,' we herald the commencement of a worthy purpose,
highly honourable to the house from which it emanates."

MANCHESTER EXAMINER.

"Handsomely got up, and worthy the name of a Christ-
mas book, is the Chandos Longfellow. It is, also, a more
complete edition, with cantos from the poet's new trans-
lation of Dante as well as his recent poems."

STANDARD.

"In every respect, this tastefully got-up book is deserv-
ing of praise. All admirers of Longfellow should possess
the 'Chandos Edition.'"

NORFOLK NEWS.

"The Chandos Poets,' which commences with Long-
fellow's Poems, is in a form which does the publishers
infinite credit. Seldom have we seen a book got up hand-
somer or in better taste. It is also the most complete
edition published at present."

PUBLIC OPINION.

"A rich and charming production."

SATURDAY REVIEW.

"The value of the Chandos Longfellow is its complete-
ness, for it contains pieces hitherto not published in
England, and, notably, specimens of Dante translation
by the poet. Former Christmases have given us more
elaborate Longfellows, but this, the Chandos, we must
pronounce to be the standard English edition."

NEWCASTLE COURANT.

"The plates are admirable, and the edition a complete
one, most handsomely produced."

GUSTAVE DORÉ'S HUMOROUS
SKETCHES.

In royal 4to. price 7s. 6d. picture boards.

TWO HUNDRED
HUMOROUS
AND GROTESQUE
SKETCHES.

By GUSTAVE DORÉ.

Printed by DALZIELS on a fine toned paper.

Opinions of the Press.

ATHENÆUM

"As a grotesque designer he has no living rival."

SATURDAY REVIEW.

"In this volume it is impossible not to measure Doré
with Leech. For broad exaggeration and artistic facility
Doré can never be studied in vain, and this volume is a
perfect magazine of fun, always intelligible."

QUEEN.

"This volume must everywhere receive a hearty wel-
come, and supply the Christmas fireside with an ample
fund of amusement and a refined pleasure that grows
upon acquaintance."

EXAMINER.

"A comic gift-book full of clever fun in the caricature
style."

SUNDAY GAZETTE.

"The drollest book we know of, next to Leech's."

FUN.

"No one who enjoys a laugh at genuine fun and drollery
should fail to buy this book. It is one continued guffaw
from beginning to end; letter-press and cuts alike tickle
the risible faculties."

COURT CIRCULAR.

"We know no one to equal Doré in the grotesque; many
of the sketches remind us of Cruikshank's old familiar
drawings. It must indeed become a popular book."

CITY PRESS.

"Well have the publishers done in producing these
comic sketches. All who appreciate genuine humour
should possess themselves of this volume. Every sketch,
and there are hundreds, has an English description."

GRATIS—WARNE'S Catalogue of RECENT PUBLICATIONS.—To be had of any Book-
seller in Town or Country. Its Contents embrace the Newest and Most Attractive Books issued during the last Eighteen
Months, at Popular Prices.

London: FREDERICK WARNE & CO. BEDFORD-STREET, COVENT-GARDEN.

MESSRS. BELL & DALDY'S CHRISTMAS BOOKS.

"The *SOSH* of Fleet-street publish not so much for the flimsy taste of accidental purchasers, but with a view of making solid and permanent contributions to Art. Many of their books this year are intended, and the intention is realized, to stand as contributions to the History of Art, and may be classed rather as galleries founded on principle than as collections gathered by the accidents of the market."—*SATURDAY REVIEW*.

Art and Song. A Series of exquisite Original

Steel Engravings, from Drawings by J. M. W. Turner, R.A., David Roberts, R.A., John Martin, Thomas Stothard, R.A., Singleton, Leitch, Wright, and other eminent Painters; with a Selection of the Choicest Poetry in the English Language. Edited by ROBERT BELL. Superbly bound in walnut covers, 36s.; cloth gilt, 31s. 6d.

"The most splendid illustrated work of the year."—*The Bookseller*.

The Great Works of Raphael. A Series of Thirty

Photographs, from the finest Engravings of his most celebrated Paintings. With a Memoir by GIORGIO VASARI, translated by Mrs. JONATHAN FOSTER. New and Enlarged Edition, 42s.

"Substantial and important contributions to the highest Art."—*Saturday Review*.

Rembrandt's Choicest Etchings. Thirty large

Photographs, taken from the Collections in the British Museum, and in the possession of Mr. Seymour Haden. With a Lecture on his Life and Genius, by Dr. SCHELTEMA, of Amsterdam, 42s.

"We have every touch and scratch which we know to be Rembrandt's; and the noble discovery of photography is never more legitimately employed than in such work as this."—*Saturday Review*.

"Splendid transcripts. It is one of the great merits of this work that, whereas the etchings of Rembrandt when sold obtain such enormous prices as we have quoted, it contains not only fac-similes of unquestionable value, for the most part copies of renowned impressions, but that, even with the superb setting, the cost is absolutely trivial in comparison. The photographs have been successful to a marvel."—*Athenæum*.

Flaxman's Illustrations of Dante. Complete, con-

sisting of more than One Hundred large Plates, engraved by Moses. With a full Description of each Composition, from the Rev. HENRY FRANCIS CARY'S Translation of the Divina Commedia. Very handsomely half bound in scarlet morocco, 2l. 12s. 6d.

"A very noble volume."—*Saturday Review*.

The Ruins of Pompeii. By Thomas H. Dyer,

LL.D. A Series of large Photographic Views of the most interesting Remains, with a History of the Destruction of the City. 31s. 6d.

"A very sumptuous and artistic publication. So complete is the descriptive letter-press that it might almost stand for a manual of Roman domestic and social life."—*Saturday Review*.

"As might be expected, some of the interest of this charming book is derivable from its illustrations of decorations and furniture in detail."—*Athenæum*.

Memorials of Mulready. By F. G. Stephens. With

a Selection of Fourteen beautiful Photographs of his most celebrated Paintings. 42s.

"Here we have Mulready's precision, his poetical taste, and his sweetness, very fairly preserved.... Mr. Stephens has bestowed great pains on his subject."—*Saturday Review*.

Birket Foster's Summer Scenes. Consisting of

carefully-selected Photographs of his most-admired Water-Colour Drawings. With Illustrative Selections from the Poems of Bloomfield, Clara, Crabbe, Joanna Baillie, Thomson, Bryant, N. P. Willis, &c. Royal 4to. 31s. 6d.

"Mr. Birket Foster's art seems made to be employed this way. As Art-studies the collection has great interest."—*Saturday Review*.

"The pictures are perfectly fascinating."—*Athenæum*.

The Book of Gems. Containing 150 Steel En-

gravings, from Drawings by the most eminent Painters of the Eighteenth and Nineteenth Century; and a Selection from the Works of British Poets, from Chaucer to Tennyson. New Edition. In Three Series, 4to. very handsomely bound in walnut covers, each 21s.

CHAUCER to DRYDEN. 1l. 1s. SWIFT to BURNS. 1l. 1s.
WORDSWORTH to TENNYSON. 1l. 1s.

Aunt Judy's Christmas Volume for Young People.

Edited by Mrs. ALFRED GATTY. Profusely illustrated with full-page Wood Engravings, from Drawings by Eminent Artists. Very elegantly bound in cloth and gold, bevelled boards, gift edges, price 5s.

The Art of Illumination, as Practised during the

MIDDLE AGES. By HENRY SHAW, F.S.A. This Work contains Examples of the finest English, Flemish, French, German, and Italian Art, from the Ninth to the Sixteenth Century, executed in the most finished style of Wood Engraving, together with a Practical Description of the Metals, Pigments, and Processes employed by the Artists at different periods. The Text is also profusely embellished with examples of Initial Letters, Borders, and other Ornaments from Illuminated MSS. Imperial 8vo. 31s. 6d.

"To those who have not been watching closely the development of wood-engraving—who have not, for instance, seen the Illustrated Testament published two or three years ago by Messrs. Longmans—such exquisite results as we have here will appear almost mysterious.... A more serviceable and exhaustive piece of Art-exposition we do not remember ever having read."—*Reader*.

Original Studies by Michael Angelo. 4to. 21s.

Original Studies by Raffaele. 4to. 31s. 6d.

Etched in Fac-simile by JOSEPH FISHER from the Collections in the University Galleries, Oxford.

"We cordially recommend this series from Raffaele's own drawings as a thing not only beautiful in itself, but sure to be an enduring source of pleasure and instruction. Having frequently studied the original designs, we can speak to the taste and general fidelity of Mr. Fisher's etchings; and the same praise may be extended to a smaller companion volume, containing a similar series from the noble Collection of Drawings by Michael Angelo."—*Saturday Review*.

Episodes of Insect Life. By Acheta Domestica.

New Edition, in 1 vol. Revised and Edited by the Rev. J. G. WOOD. 8vo. handsomely bound, 21s. [Early in January.]

Legends and Lyrics. By Adelaide Anne Procter.

With additional Poems, and an Introduction by CHARLES DICKENS; a Portrait by Jeans, and 20 Illustrations by W. C. T. Dobson, A.R.A., J. Tenniel, W. H. Millais, and other Artists. Fcap. 4to. 21s.; beautifully bound in walnut, 25s.

Also, in Two Series, fcap. 8vo.

SERIES I. With an Introduction by Charles Dickens, and a Portrait. 6s.
SERIES II. 5s.

Parables from Nature. By Mrs. Alfred Gatty.

The Four Series, complete in 1 vol. Illustrated by W. Holman Hunt, Otto Speckter, C. W. Cope, R.A., W. Millais, H. Weir, J. Tenniel, and other Artists. 4to. 21s.

FIRST and SECOND SERIES. 16 Illustrations, 10s. 6d.
THIRD and FOURTH SERIES. 15 Illustrations, 10s. 6d.

"Stand alone in the sweetness of their stories, the truth of their moral, and the simple beauty of their language."—*Literary Churchman*.

"Lessons of faith, hope, patience, obedience, and love, expressed with winning sweetness, and pointed with polished wit."—*John Bull*.

Longfellow's Poetical Works. In one very hand-

some 4to. volume, with nearly 250 Illustrations, 21s.

Forty Days in the Desert, on the Track of the

ISRAELITES. By W. H. BARTLETT. Illustrated with numerous Engravings on Steel, 10s. 6d.; or in superior walnut binding, 15s.

Messrs. Bell & Daldy's Imperial Gift Books.

Illustrated by Birket Foster, H. Noel Humphreys, John Gilbert, Tenniel, and other Artists. Beautifully bound in ornamented cloth, imperial 16mo. 5s. each.

By W. H. LONGFELLOW.—1. The *WAYSIDE INN*. 2. *EVANGELINE*.

By WORDSWORTH.—3. The *WHITE DOE* of RYLSTONE.

LOWE & BELL & DALDY, YORK-STREET, COVENT-GARDEN, and 186, FLEET-STREET.

HULLAH'S PART MUSIC, NEW EDITION, WITH
PIANOFORTE ACCOMPANIMENT.

On the 1st instant, No. II. *Secular Series*, in imperial 8vo.
price 1s.—to be continued monthly.

PART MUSIC, SACRED and SECULAR,
for SOPRANO, ALTO, TENOR, and BASS. Edited by
JOHN HULLAH, Prof. of Vocal Music in King's College
and in Queen's College London. New Edition, with Pianoforte
accompaniment. Each Number will be published in Score, with
Pianoforte Accompaniment, and in separate Parts (Soprano, Alto,
Tenor, and Bass), uniform with the Score in size, but in larger
type. Each Series (Sacred and Secular) to be completed in 12
numbers, forming a Volume, in Imperial 8vo.

Price of each Number:—

The Score, with Pianoforte Accompaniment 1s.
The Parts (Soprano, Alto, Tenor, or Bass) each 3d.

Contents of No. II. *SECULAR SERIES*:—

MADRIGAL .. Lady, see, on every Side Luca Marenzio.
GLEE Crabbed Age and Youth R. J. S. Stevens.
PART SONG .. The Hardy Norseman Pearsall.
CHORUS Freeman, rejoice Purcell.
GLEE Come, let us all a-maying go Atterbury.
PART SONG .. Awake, sweet Love Dowland.

*. * The Score, or any Voice Part, of each Number may be had
separately. Orders should specify the particular Part or Parts, as
all as the Number required.

London: Longmans, Green, and Co. Paternoster-row.

Part I. now ready, in 12mo. price 4s. cloth.

SHAKESPEARE illustrated by Old Authors.
By WILLIAM LOWES RUSHTON, of Gray's Inn, Bar-
ster-at-Law.

London: Longmans, Green, and Co. Paternoster-row.

CHRISTMAS BOOKS FOR YOUNG PEOPLE.

Lately published, in 1 vol. post 8vo. price 3s. 6d.

ELLICE: a Tale. By L. N. COMYN.

"This is one of the prettiest
books for the young that has
been published for some time.
The story is very touching,
the moral is excellent, and the
writing decidedly of a superior
quality. The hero, Gerard, is a
boy who will rival the far-famed
'Guy' in 'The Hilt of Red
Lycie,' and is indeed, in some
ways, still more worthy of imi-
tation. Ellice, his loving little
sister, is also a pleasing charac-
ter, though by no means fault-
less. We cannot doubt that the
book will be deservedly popular
with any young people, of either
sex, who may be fortunate
enough to obtain possession of it."
—*Athenæum*.

By the same Author, in 2 vols. price 21s.

ATHERSTONE PRIORY.

London: Longmans, Green, and Co. Paternoster-row.

Lately published, in crown 8vo. price 7s. 6d. cloth,

**THE WAY TO REST: Results of a Life-
search after Religious Truth.** By ROBERT VAUGHAN,
D.D., Author of 'Revolutions in English History.'

"It is impossible to conceive
more able defence of orthodox
vanclical opinions than is
contained in this volume. The
difficulties that reason has
thrown in the attempt to
solve the mysteries of life, and
the difficulties that are involved
in the rejection of Scripture
authority, could not be present-
ed with greater clearness and
force."
—*Spectator*.

London: Longmans, Green, and Co. Paternoster-row.

Cheaper Editions, 2 vols. fcap. 8vo. price 7s. cloth,

LYRA GERMANICA. Translated from the
GERMAN by CATHERINE WINKWORTH. Revised
Editions. First Series, *Sundays and Festivals of the Christian
Year*, price 3s. 6d.; Second Series, *The Christian Life*, 3s. 6d.

HYMNS from LYRA GERMANICA, 18mo.
price 1s.

THE CHORALE-BOOK for ENGLAND: the
Hymns translated from the German by C. WINKWORTH; the
Gospels for 4 voices, compiled, &c. by W. S. BENNETT and by
T. T. GOLDSCHMIDT. Fcap. 4to. 12s. 6d.

CONGREGATIONAL EDITION, in fcap.
o. 2s.

London: Longmans, Green, and Co. Paternoster-row.

Just published, in 8vo. price 10s. cloth,

MESSIAH the PRINCE, or the Inspiration
of the Prophecies of Daniel; containing Remarks on the
Jews of Dr. Pusey, Mr. Desprez, and Dr. Williams, concerning
a Book of Daniel: together with a Treatise on the sabbatical
years and Jubilees. By J. W. BOSANQUET, F.R.S.

"A clearer and fuller exposi-
tion of the prophecy of the
seventy Weeks could not be de-
vised, and a Rabbinical para-
phrase of the prophecy of 'the
latter days' is given, throwing
such light upon its interpreta-
tion. The work also contains
several diagrams to illustrate
the retrograde movement of the
far ray upon the dial in the
lucis of Heschiah."
—*London Review*.

"This is decidedly an able
work, so far as chronology is
concerned. We think that
By the same Author, price 5s. mounted on linen on a roller or
folded in a cloth case,

**CONSPICUUS of HEBREW CHRONO-
LOGY**, from Solomon to the Birth of Christ, arranged in con-
sistency with Assyrian, Babylonian, Egyptian, and Persian Chro-
nology about the time of the captivity: showing how the First
Temple was dedicated 480 years, or 70 weeks of years, after the
fashion of Moses; how the Building of the Second Temple was
begun 480 years after the Dedication of the First; and how the
Second Corner Stone of the Third Temple, not made with hands,
is laid 480 years after the Second was begun to be built.

London: Longmans, Green, and Co. Paternoster-row.

NEW WORKS.

under the Author's superintendence. New Edition now ready,
in 8vo. price 21s. cloth, or 27s. half bound in morocco with gilt
top.

HOMES WITHOUT HANDS: being a De-
scription of the Habitations of Animals, classed according
to their Principle of Construction. By J. G. WOOD, M.A. F.L.S.

"It is more interesting than a fairy tale. . . . It is a work cal-
culated to bring pleasures of the most rational and elevating kind
into many a school-room and many a family circle during the
Christmas season; and certainly it would be impossible to recom-
mend a more suitable present to a young person." *Daily News*.

London: Longmans, Green, and Co. Paternoster-row.

CATS' and FARLIE'S EMBLEMS.

Second Edition, in imp. 8vo. with Frontispiece, 60 large circular
Pictures and 60 Tail-pieces on Wood printed within Orna-
mental Frames, price 31s. 6d. in Grouler covers, or price 52s. 6d.
in morocco by Rivière.

MORAL EMBLEMS, with Aphorisms, Adages
and Proverbs of all Ages and Nations, from JACOB CATS
and ROBERT FARLIE. The Illustrations composed from Designs
found in their Works by J. LEIGHTON, F.S.A. The Text trans-
lated and edited with Additions by R. FROST.

"A splendid gift-book. . . . It is solid: and what renders its
merit more striking is its marked
disimilarity from the works
usually published as presents."
—*Times*.

London: Longmans, Green, and Co. Paternoster-row.

THE CHURCH and the WORLD: Essays on

Questions of the Day, by Various Writers. Edited by the
Rev. ORBY SHIPLEY, M.A. Second Edition.

"We think there can be little
doubt in the mind of any in-
partial reader as to the merits
of the 'Church and the World.'
—*Saturday Review*.

"We recommend this book to
all readers who would be satis-
fied of the real tendency of the
Ritualistic school."
—*Athenæum*.

"The book presented to Con-
vocation was that which com-
posed of Sacramentalism, Ritual-
ism, and Jeumont, entitled 'The
Church and the World.'
—*Record*.

"Without any claim to au-
thority, [the Essays] may be
said fairly to represent contem-
porary opinion, as it exists
among advanced Churchmen."
—*Guardian*.

"This volume will undoubt-
edly be perceived in its
depth of purpose, a freedom
of mind, and an extent of re-
search which will surprise
them."
—*Fortnightly*.

London: Longmans, Green, and Co. Paternoster-row.

Just published, in 1 vol. post 8vo. price 8s. 6d.

THE FIRST MAN and HIS PLACE in

CREATION, considered on the Principles of Science and
Common Sense, from a Christian Point of View: with an Appendix
on the Negro. By GEORGE MOORE, M.D. M.R.C.P.L., &c.

"As a plea for what may be
called the anthropology of the
Bible, this book is exceedingly
able and well timed. . . . Where
found the twenty-four chapters
of which the work consists in-
teresting and instructive. The
language is clear and forcible;
facts are well selected, and the
conclusions are distinctly stated;
while a high moral and religious
tone is conspicuous throughout."
—*Journal of Sacred Literature*.

London: Longmans, Green, and Co. Paternoster-row.

The Complete Work, in 4 vols. 8vo. price 41. 13s. cloth,

IMPRESSIONS OF SPAIN. By the
Right Hon. LADY HERBERT OF LEA. Royal 8vo. with
16 Full-page Illustrations, 21s.

COMPLETION of the LIFE of
CHARLES JAMES FOX. By the Right Hon. EARL
RUSSELL, K.G. Vol. III. Crown 8vo. 12s.

"Fox is presented to us as a refined gentleman, a profound
scholar, a patriot who was, perhaps, too much addicted to find
fault with his country and its government, and to over-praise
foreign lands. The period embraced in the present volume was
most eventful."—*Athenæum*.

The THIRD and CONCLUDING
VOLUME of the HISTORY of the AMERICAN WAR. By
Lieut.-Col. FLETCHER, Scots Fusilier Guards. Demy 8vo.
18s.

"Of the many books already written upon the late American
War, Col. Fletcher's narrative must be placed in the very foremost
rank by virtue of its scrupulous impartiality, its artistic delinea-
tions of military movements, its highly suggestive comments,
and its clear, fluent and vigorous style."—*Globe*.

**ENGLISH ECCENTRICS and EC-
CENTRICITIES.** By JOHN TIMBS, Esq. F.S.A., Author
of 'A Century of Anecdote,' 'Club Life of London,' &c. 3 vols.
crown 8vo. 21s.

COMPLETION of the HISTORY of
ROME to the FALL of the REPUBLIC. By Dr. THEODOR
MOMMSEN. Translated by Professor DICKSON. Vol. IV.
In Two Parts. Crown 8vo. 16s.

THREE PHASES of CHRISTIAN
LOVE. By the Right Hon. LADY HERBERT OF LEA.
8vo. 12s.

"This is an exquisite book; and men and women of all ages
and shades of religious faith will thank Lady Herbert for her
labour of love. It is a pure offering at the shrine of humanity, to
show the world how divine a thing human nature may become
when it is inspired by the gift of charity, transforming and
restoring it to the image of Him in whose likeness it was at first
created. It is a charming gift-book."—*Athenæum*.

**THE HEAVENS: an Illustrated Hand-
book of Astronomy.** By M. AMÉDÉE GUILLÉMIN. Edited
by J. NORMAN LOCKYER, Esq. F.R.S. A New Edition.
Royal 8vo. 200 Illustrations, 21s.

CHARLES TOWNSHEND, Wit and
Statesman. By PERCY FITZGERALD, Esq. M.A., Author
of 'The Life of Laurence Sterne.' Large post 8vo. 10s. 6d.

The INGOLDSBY LEGENDS. A
New Illustrated Edition, containing all the Illustrations of
LESLIE, CUTLER, and TENNIEL; with New Illustrations by
Du Maurier. Crown 4to. 21s.

CURIOSITIES of CLOCKS and
WATCHES, from the Earliest Times. By EDWARD J.
WOOD. In large post 8vo. 10s. 6d.

NODDEBO PARSONAGE. From the
Original Danish. By the Translator of 'The Guardian,' &c.
3 vols. post 8vo.

GLUM-GLUM: a Fairy Romance for
Children, Good and Bad, their Pretty Aunties and their Sen-
sible Papas. By HERACLITUS GREY. In small 4to.

LETTERS from HELL. By a Danish
Pastor. In 2 vols. post 8vo. 21s.

RICHARD BENTLEY, New Burlington-street,
Publisher in London.

18, Great Marlborough-street.

HURST & BLACKETT'S NEW WORKS.

NEW AMERICA. By William Hep-
worth DIXON. 2 vols. 8vo. With Illustrations.
[In the press.]

A BOOK ABOUT LAWYERS. By
J. C. JEAFFRESON, Barrister-at-Law. 2 vols. 8vo. 30s.

From the *Times*, Dec. 8.—"A Book about Lawyers" deserves to
be very popular. Mr. Jeafrerson has accomplished his work in a
very creditable manner. He has taken pains to collect informa-
tion from persons as well as from books, and he writes with a
sense of keen enjoyment, which greatly enhances the reader's
pleasure. He introduces us to lawyers in arms, lawyers on horse-
back, lawyers in love, and lawyers in Parliament. We are told of
their salaries and fees, their wigs and gowns, their jokes and
gaucheries. We meet them at home and abroad, in Court, in cham-
bers, and in company. In the chapter headed 'Mirth' the author
has gathered together a choice sheet of anecdotes from the days of
More down to Erskine and Eldon."

The LIFE of JOSIAH WEDGWOOD.

From his Private Correspondence and Family Papers. By
ELIZA METEYARD. Dedicated to the Right Hon. W. E.
GLANVILLE. Complete in 2 vols. 8vo. embellished with Por-
traits and above 300 beautiful Illustrations, 42s. bound.

"The author has achieved a work not less creditable to herself
than it is indispensable to all who wish to know anything about
English ceramic art and its great inventor. The volumes are
marvels of decorative and typographical skill."—*Saturday Review*.

**LODGE'S PEERAGE and BARO-
NETAGE for 1867.** Under the Especial Patronage of Her
Majesty, and Corrected by the Nobility. 36th Edition. 1 vol.
with the Arms beautifully engraved, handsomely bound, gilt
edges, 31s. 6d.

A WINTER with the SWALLOWS.
By M. BETHAM EDWARDS. 8vo. with Illustrations, 15s.

"A bright, picturesque, artistic book, full of colour and sun-
shine, and replete with good sense and sound observation."—*Post*.
"A pleasant volume. A genuine graphic record of a time of
thorough enjoyment."—*Athenæum*.

MY PILGRIMAGE to EASTERN
SHRINES. By ELIZA C. BURH. 8vo. with Illustrations, 15s.

**TRAVELS in FRANCE and GER-
MANY in 1865 and 1866.** Including a Steam Voyage down
the Danube, and a Ride across the Continent, to Europe and
Turkey, from Belgrade to Montenegro. By Capt. SPENCER,
Author of 'Travels in Circassia,' &c. 3 vols. 21s.

**THE SPORTSMAN and NATURAL-
IST in CANADA; or, Notes on the Natural History of the**
Game, Game-Birds, and Fish of that Country. By MAJOR
W. ROSS KINO, F.R.S., F.S.A. Royal 8vo. Illustrated
with beautiful Coloured Plates and Woodcuts, 20s. bound.

FIELD-MARSHAL VISCOUNT
COMBERMERGH'S MEMOIRS and CORRESPONDENCE.
From his Family Papers. By the Right Hon. MARY, VIS-
COUNTESS COMBERMERGH, and Capt. W. W. KNOLLYS.
2 vols. 8vo. with Portraits, &c. 30s. bound.

LIGHTS and SHADOWS of LONDON
LIFE. By the Author of 'MIRK ABBEY,' &c. 3 vols.

THE NEW NOVELS.

MADONNA MARY. By Mrs.
OLIPHANT, Author of 'Agnes,' &c. 3 vols.

"Madonna Mary" is written with earnestness and vigour, and
overlows with the best qualities of its writer's fancy and humour.
The story is thoroughly original."—*Athenæum*.
"Madonna Mary" is a book of great power and beauty—a per-
fect work of its kind."—*Morning Post*.

LEYTON HALL, and other Tales.
By MARK LEMON. 3 vols.

"We commend 'Leyton Hall' most heartily to our readers.
The story is an extremely good one, extremely well told, and the
shorter tales are all of a very effective character. There is not one
that is not cheery and pleasant."—*Illustrated News*.

CHRISTIE'S FAITH. By the Author
of 'No Church,' 'Owen,' 'Mattie,' &c. 3 vols.

"The interest of this story is so enthralling, that it holds the
reader enchained during its progress, and the purpose of the story
is so admirable, that the best among us may justly consider the
time well bestowed that is occupied by its perusal."—*Sun*.

A WOMAN'S CONFESSION. By
LADY CAMPBELL. 3 vols.

**ANNALS of a QUIET NEIGHBOUR-
HOOD.** By GEORGE MAC DONALD, M.A. 3 vols.

"The charm and value of Mr. Mac Donald's work need not be
sought. They present themselves unasked for in the tender beauty
of his descriptions, whether of nature or of life and character; in
his almost supernatural insight into the workings of the human
heart; and in his unobtrusive utility of thought and happy exqui-
tude of illustration. Whoever reads the book once will read it
many times."—*Pail Mail Gazette*.

KINGSFORD. By the Author of
'SON and HEIR,' 2 vols. 21s.

"A well-written, clever, and artistic novel."—*Post*.

Also, just ready, in 2 vols.
Two Marriages. By the Author of
'JOHN HALIFAX, GENTLEMAN,' &c.

SAMPSON LOW & CO.'S LIST OF NEW BOOKS.

FAIRY LAND and FAIRIES. From
Sketches by E. S. A., and other good Authorities. Collected,
Corrected, and Improved. 1 vol. 8vo. cloth, price 4s.

The ROB ROY on the BALTIC; the
Narrative of the Rob Roy Canoe, on Lakes and Rivers of
Sweden, Denmark, Norway, and on the Baltic and North Seas.
By JOHN MACGREGOR, Trin. Coll. Cambridge. With
numerous Illustrations, price 5s.

BRAZIL and the BRAZILIANS. Por-
trayed in Historical and Descriptive Sketches by the Rev.
JAMES C. FLETCHER and the Rev. D. P. RIDDER. D.D.
An Enlargement of the Original Work, presenting the Ma-
terial and Moral Progress of the Empire during the last Ten
Years, and the results of the Author's recent Explorations of
the Amazon to the verge of Peru. With 150 Illustrations. 8s.
cloth extra, price 18s.

TWO CENTURIES of SONG, comprising
Lyrics, Madrigals, Sonnets, and other Occasional Verse of the
English Poets of the last 200 Years. With Critical and Bio-
graphical Notes. By WALTER THORNBURY. Illustrated
by Original Pictures of Eminent Artists, drawn and engraved
especially for this work. Printed on toned paper, with Coloured
Borders, very handsomely bound with clasp, price One Guinea.
The Ornamental Title-page and Borders designed by Henry
Shaw, F.S.A., and engraved by E. B. Utting.

An ILLUSTRATED EDITION of BISHOP
HERBERT HUME'S. With upwards of One Hundred Pictures
engraved in the first style of art, under the superintendence of
J. D. Cooper. Small 4to. handsomely bound, price 10s. 6d.

MILTON'S PARADISE LOST. With the
Original Steel Engravings of John Martin. Printed on large
paper, royal 4to. handsomely bound in cloth, 3. 15s. 6d.; or in
morocco extra, 4l. 15s. 6d.

VARIA: Rare Readings from Scarce
Books. By the Author of 'The Gentle Life.' Reprinted by
permission from the *Saturday Review*, *Spectator*, &c. 8vo.
5s. price 6s.

Also, now ready, in the same Series, 6s. each Volume:
or in calf extra, 10s. 6d.

THE GENTLE LIFE.
ABOUT IN THE WORLD.
LIKE UNTO CHRIST.
FAMILIAR WORDS.
THE GENTLE LIFE. Second Series.
ESSAYS BY MONTAIGNE.
SIDNEY'S ARCADIA. [Shortly.]
CELEBRATED LETTERS. [Shortly.]
CONCORDANCE TO MILTON. [Shortly.]
THE SILENT HOUR. [Shortly.]

TOILERS of the SEA. By Victor Hugo.
With Two Engravings from Original Pictures, by Grosse
Dore, done especially for this Edition. I. The Last Break-
water. II. The Struggle with the Devil-Fish.

The CONSPIRACY of GIANLUIGI
FIENCHI: an Episode in Italian History. By M. DE
CELESIA. Translated by D. H. WHEELER, Esq. M.A.,
Consul at Genoa. With a Frontispiece Portrait. Demy 8vo.
cloth, price 14s.

The MASQUE at LUDLOW, and other
Romancesque. By the Author of 'Mary Powell.' Crown 8vo.
cloth, price 8s.

**A SUMMER in LESLIE GOLD-
THWAITE'S LIFE.** By the Author of 'The Gayrathes.'
With Illustrations. Fcap. 8vo. cloth, gilt edges, price 3s. 6d.

AMERICA, from the Declaration of the
Independence of the Thirteen United States to the Death of
Lord Chatham. By GEORGE BANCROFT. 8vo. cloth,
price 12s. (Forming also Volume IX. of the complete 'History
of America,' with which it may be had, bound uniform, of 14
a distinct work.)

The MISSION of GREAT SUFFERINGS.
By ELIHU BURRITT. Small post 8vo. cloth, price 4s.

RICHMOND and ITS INHABITANTS
from the Olden Time. With Memoirs and Notes by RICH-
ARD CRISP. With Illustrations. Post 8vo. price 10s. 6d.

HOBSON'S CHOICE: a Story. By Dutton
COOK, Author of 'Paul Foster's Daughter,' &c. Reprinted
from *Once a Week*. Post 8vo. cloth, 8s.

**The TRUE HISTORY of DAME PER-
KINS and HER GREY MARE.** Told for the Country and
the Fireside. By LINDON MEADOWS. With Eight
Coloured Illustrations by Philz. Small 4to. cloth, price 4s.

GREAT FUN. Stories told by Thomas
ARCHER and THOMAS HOOD to Edward Wadsworth
Pictures. Printed in Colours. 4to. cloth, gilt edges, 10s.
10s. 6d. coloured; or 6s. plain.

Milton House, Ludgate-hill.

LONDON, SATURDAY, DECEMBER 22, 1866.

LITERATURE

English Merchants: Memoirs in illustration of the Progress of British Commerce. By H. R. Fox Bourne. 2 vols. (Bentley.)

WHEN King Athelstan issued his famous decree that every man who had made on his own account three voyages for mercantile purposes to foreign shores should be ennobled, he did not so much show that the calling of a trader was a noble calling, as he intimated that, in his own opinion, it deserved to be so accounted. There must have been a little scorn in the female Saxon mind for chapmen great and small, or there must have been some timidity or lack of speculative spirit on the part of the men to open mercantile negotiations with foreign customers, since the King was induced to tempt them by such a boon. A diploma of nobility as the prize of three voyages stimulated the Saxon trader who cared for rank, and it dignified the calling in the eyes of women. An Elwina who previously might have turned up her pretty nose at the suit of some Ethelred who bartered with France, Italy or Spain, learned to look upon him as an eligible young gentleman after Athelstan had ennobled him for his success in "business." They were proud young creatures, nevertheless, those fair-haired Saxon maidens, but the ennobled merchants' daughters, doubtless, became as proud as they. If alliances occurred between a poor Saxon lord and a wealthy trader's daughter, probably the same reason was assigned for it as that which justified the marriage of a French marquis with the heiress of a golden farmer—"it will manure my poor land," said Monsieur le Marquis; and similar impertinences are said of similar unions in 'The Clandestine Marriage.'

Such alliances have been often laughed at, especially by those who would fain have formed the profiting party in such contracts, but who had failed in their suits. Who the early Saxons were who became merchant princes, it would be fruitless to conjecture; but in later times names occur in the Peerage of noble lords who would never have been peers but for industry, honesty, and great success in trade, or who handsomely regilt their coronets by being, if not traders themselves, sleeping partners of commoners who were. Look at the noble Earls of Coventry—of Aylesborough! Where would they have been but for their worthy ancestor, John Coventry, son of one of Whittington's executors, and a Cheapside mercer? Then, in Elizabeth's days, the mind's eye may see a London merchant, named Spencer, riding slowly over to Islington, watched the while by the captain of a Dunkirk privateer, who has a design to seize him, carry him down to the river, over to Dunkirk, and there yield him on ransom. Spencer is a man who lends money to the Bacons; and there is a William Lord Compton watching the daughter, as the Dunkirk pirate watched the father; but the merchant's daughter ran into the young lord's arms, and ultimately there followed all her merchant sire's riches, which helped to make so glorious a family of the Spencer-Comptons. We turn to London Bridge, and there see young Ned Osborne, the apprentice clothworker, founding the ducal family of Leeds, by saving his master's daughter from drowning. When founding that family he was in better plight than the Duke of Exeter, whom De Comines saw, a Lancastrian fugitive, worse off than a common pedlar, barefooted, and begging his bread in Holland. Great, again, as the ducal house of Norfolk has been, there was one of its members who, long before he dreamed of

being Duke, dealt largely in wine. In the male line, the Percys, or Smithsons, need not go far back before they come upon the physician whose son married the heiress of the Northumberlands. The first Norreys of Ockwells was cook to Queen Elizabeth. Among the Grevilles there are to be found traders. The father of the first Earl of Hardwicke was an attorney, which may, or may not, be considered as superior to a merchant. The founder of the Hollands of Foxley was certainly lower. Stephen Fox was but a bailiff, and occasionally did duty as parish clerk in his native village. The great ancestor of the Roseberys was James Primrose, who, in 1616, had licence to print (for twenty-one years) the tract 'God and the King,' in English and Latin, at home and abroad. Baptist Hicks kept a mercer's shop in Cheapside even after he was a baronet, and from him come the Viscounts Campden. The Earls of Craven are of similar honest descent; their ancestor drove pack-horses from Craven, in Yorkshire, to London. He saved money, kept a good character, served in a draper's shop, ultimately opened one of his own in Leadenhall Street, rose to be Lord Mayor, and died a Croesus and grandfather to the first Earl Craven, who was the reputed husband of the widowed Queen of Bohemia. In some cases, Peeresses, or at least daughters of Peers, have taken kindly to City tradesmen. The beautiful daughter of the first Earl Howard of Bindon married Frank Pannel, a Cheapside vintner. When she was the vintner's handsome widow, the Earl of Hertford was but too happy to make her his Countess; and when the buxom lady was a second time a widow, the Duke of Richmond shared his dual honours with her; and when she wore them as a dowager there was not a madder widow in all Christendom.

But the most remarkable of noble families that sprang from what may be termed a mercantile accident was that of the De la Poles, Dukes of Suffolk. When Edward the Third was at Antwerp, he was in sore need of money, and his need would not have been relieved but for the good luck of there being at that moment in the city a merchant of Kingston-upon-Hull, named William De la Pole, who was a man of substance and had been mayor of his native town. The Yorkshire merchant, hearing of the great king's necessity, opened his heart and his bags, and bade the sovereign to take according to his need, and not think of security. Edward was modest, and borrowed, or took, only a thousand pounds, which we may multiply by thirty to get at its equivalent in present coin of the realm. Instead of paying interest, or perhaps the principal, the king rewarded the Hull merchant by conferring on him very singular honours. Edward appointed him second Baron of the Exchequer, and, to enhance the appointment, created him a "banneret." The "merchant's thousand pounds" proved a good investment in some respects, a poor one in others. The consequences were of diverse quality. William's son, Michael, was put to the study of the law, which his father administered without study. The king made him an earl and Lord Chancellor, but he died attainted and in exile. The Chancellor's son, Michael, saw some gleams of good fortune, but he perished in camp before Harfleur. His son, another Michael, was slain at Agincourt. But there was a royal poet-warrior, the Duke of Orleans, captured in that battle, who resided long in England, in the custody of Michael's brother and heir, William De la Pole, whose numerous titles culminated in that of the Duke of Suffolk, whose highest dignity was that of Lord Chancellor, whose pretty wife, Alice, was Chaucer's granddaughter, and whose cruel fate

it was to be rudely beheaded at sea, with the gunwale of a boat for a slaughtering-block. But the princely merchant's family thrived again, in the person of William's son John, to whom Edward the Fourth gave his sister, Elizabeth Plantagenet, for wife. This brought them so near the throne that ruin came of it. Their son, John, looked upon himself as heir to his childless uncle, Richard the Third, and he fell, with that conviction, fighting at the battle of Stoke against Henry the Seventh. His father, the Duke of Suffolk, died of grief at the irretrievable wreck of the fortunes of his family. Henry the Seventh played with the son of him who fell at Stoke, as a cat might with a mouse. The mouse escaped in terror to Spain, but Spain basely delivered him to Henry, and that king had Edmund beheaded, because of his shadowy right to the throne. Edward left two brothers, Humphrey and Edward, whose earnest desire it was to inherit nothing but oblivion and safety. They withdrew to Cambridge, where, quiet but fearful students, they passed their days in poverty and scholarship, preferring, as it was said of them, to claim title to learning by their own rights, to being called lords by the courtesy of others. Humphrey passes away, no one can say when, or in what manner, or under what condition. Edward died a modest Archdeacon of Richmond, in that county wherein the founder of his family, William the Merchant, had been a mayor. The greatness which the merchant laboured to found, all crumbled away in a little more than a century. Within that time, his six lineal successors, who were peers, came each in his turn to disgrace, utter wretchedness, or to death on the scaffold. This was all that resulted from the thousand pounds lent by the princely Yorkshire merchant, at Antwerp, to Edward the Third. More of the scaffold than of the throne; ermine to-day, the axe and the saw-dust to-morrow!

Mr. Bourne, in his illustrations of English merchants, begins long before Athelstan. He opens at the very earliest opportunity, and treats of the commercial doings of the Ancient Britons. His introductory chapter is full of interest and information, but the bright and bustling part of his book begins with the De la Poles, whose history we have sketched after our own fashion. To understand it fully, and the moral of it, what the Hull merchants, the De la Poles, were before Edward the Third, and what their poor descendants were after the accession of Henry the Seventh, Mr. Bourne's chapter should be attentively read, for it is one of the most remarkable chapters in the romance and reality of princely-merchant history.

To further illustrate the history of British commerce by the lives of British merchants, their energy and wisdom, "very selfish energy, very worldly wisdom, now and then," the author sketches, shadows forth, or tells in good substantial detail, some three dozen biographies. Wherever a merchant of note presents himself, Mr. Bourne enters lucidly into his history, and when the reader comes to the end of all, he will probably be bewildered by his entertainment, the greatness and meanness, the triumphs and calamities, the splendour and the squalor, the heroism and the rascality, the self-sacrifice and the self-regard, the prudence which is often a mere self-care, the divine charity which is self-abnegation, the colossal fortunes, the crashing bankruptcies,—as all passes under his eye, or is suggested by the experiences of his memory, he will be as one who sits at a stirring drama, and has hardly breathing time to follow the rapid succession of incidents.

To the pages of these volumes every seaport town, every commercial city, and many secluded villages, contribute to the roll of British merchants who have been famous for the positions they have taken in the ranks of the great brotherhood. Among them, London contributes Whittington and the Greshams, the Myddletons and Middletons, North and Child, Barnard, Coutts, the Barings, Nathan Rothschild, and the Gurneys who came in with the Conqueror. Then Bristol glories in the Canynges, the Thornes, and Colston. Birmingham points to Boulton and his enterprising mates. Dumfries has the most eventful of tales in the history of Paterson, the founder of the Bank of England. Edinburgh gives us Geordie Heriot, the Woods, Smiths, and men like the Barclays, Hoares, Herries, and others who came up to London, and belong to metropolitan annals. The great Glasgow merchants, beginning with Elphinstone, come upon us in a crowd, among whom we greet the Buchanans and other tobacco lords, and James Ewing, with his life of good works, his good sense, and his large heart. Through the smoke of Leeds one may discern the Sykes and the Denisons, Gott, Marshall, and Sadler, for all of whom wool or linen wrapped up colossal fortunes not ill applied. So, in Liverpool, the mercantile figures pass by us of Johnson, Percival, Clayton, Cleveland, Norris, Blundel, Cunliffe, the Heywoods, Bentley, Rathbone, Ewart, Brown, and the Gladstones. Imposing edifices of fortune were built up by some of the Liverpool merchants of the olden time; but as Cooke the actor once told them, "every brick in some of those edifices was haunted by the blood of a slave." Manchester opens her record with the good name of Chetham, and there figure on it also the Peels, poor people once of Blackburn, the Potters, Watts, Rylands, and the Grants. We should not do justice to Plymouth if we were to omit all notice of the Hawkinses, whether old William or old John, who for pluck, daring, success, reverses, and little nicely touching means of growing rich, may claim to stand forth prominently; and we must say that Mr. Bourne renders full justice to every claim, not only of the Hawkinses, but of every merchant of note whom he has for his client on this special occasion.

Why the author should have left out of his list altogether the merchants of Ireland, we are unable to say. In doing so he has left unexplored one of the most productive of fields. For marvellous and exciting details, no chronicle of princely merchants can vie with that of the merchants of Ireland. It is often a grand romance, and the annals even of its rascality are full of fun. We may cite as a sample those almost royal merchants, the Callaghans of Cork. Dan Callaghan, the head of the firm, began life as a huckster, dealing in provisions, but in a very small way. But Dan had his weather-eye open, and always knew how to seize an opportunity, and this so successfully that in the last century the house contracted to supply the whole British navy with salt beef,—a breach of the contract on the part of the Callaghans subjecting them to a penalty of 20,000*l*. The astute Callaghans purchased every bit of salt beef in the market, stored it up with what they had got cured when the contract was signed, went to the Government with a complaint that the scarcity in the markets would compel them to withdraw from the contract, and, the penalty being enforced, they paid it accordingly. But the fleet must have beef immediately, and the Callaghans held it all. England, Ireland, and all Ireland (save their own) scarcely furnish a few hundred tons. There was a little competition, but the new

contract; but the Callaghans obtained it at prices which, after reckoning the penalty, gave them a profit of 60,000*l*., not half of which sum they could have acquired under the old agreement! The house was so wealthy that one of the sons could afford to expend 100,000*l*. in order to get into Parliament.

With the exception we have above noticed, these volumes are full of good, honest work, not only of important commercial history, but of capital illustrative anecdotal matter. In truth, they furnish new and interesting chapters in the history of England. We do not indorse every statement, nor agree in all the conclusions at which the author arrives; nevertheless, his work should be in the hands of all interested in a subject which has never before been so skillfully handled. To a man generally cognizant of mercantile history, the details will afford much novel matter; and to intelligent young fellows, with an appetite for something beyond novels and similar literature, we especially recommend these volumes, as infinitely more amusing than any fiction, and more profitable than any of the disquisitions in which youngsters of the present day seem to take most delight. It is not as the best sample of what this book contains that we select the following passage, but because it is most opportune at the present moment. We have only to premise that the trade of bill-discounting having begun to develop itself at the close of the last century, the Norwich Gurneys were induced to enter upon it:—

"About the year 1800 the house of Richardson, Overend & Co. was founded, the management being divided between him and John Overend, formerly chief clerk in the bank of Smith, Payne & Co. Simon Martin, an old clerk in the Norwich Bank, went to London to help build up the business and to watch its movements on behalf of the Bank, whence most of the money was obtained for investment. The enterprise thrived wonderfully from the first, one great source of its popularity being the change introduced by the new firm, which charged the quarter per cent. commission against the borrowers of the money, instead of the lenders as heretofore; and in 1807 John Gurney added vastly to its strength by introducing his son Samuel as a partner. About that time Thomas Richardson retired from the business. It was carried on under the name of Overend & Co., even after John Overend's death, until the secret of its connexion with the Norwich house could no longer be kept, and it assumed its world-famous title of Overend, Gurney & Co."

How the bank prospered, we thus learn:—

"Very soon after the time of Samuel Gurney's supremacy in it, it began to assume gigantic proportions, and it was, for some thirty or forty years, the greatest discounting house in the world, the parent of all the later and rival establishments that have started up in London and elsewhere. At first only discounting bills, its founders soon saw the advantage of lending money on all sorts of other securities, and their cellars came to be loaded with a constantly varying heap of dock-warrants, bills of lading, shares in railways and public companies, and the like. To do this, of course, vast funds were necessary, very much in excess of the immense wealth accumulated by the Gurneys in Norwich and elsewhere. Therefore, having proved the value and stability of his business, Samuel Gurney easily persuaded those who had money to invest to place it in his hands, they receiving for the same a fixed and fair return of interest, and he obtaining with it as much extra profit as the fluctuations of the money market and the increasing needs of trade made possible. He became, in fact, a new sort of merchant, buying credit—that is, borrowing money—on the one hand, and selling credit—that is, lending money—on the other, and deriving from the trade his full share of profits."

Gurney profited largely by the panic of 1825, and he piously set his little anxieties as equivalent to the sufferings of extreme poverty:—

"Several London banks failed, and at least eighty country banks fell to the ground, the Bank of England itself being only saved by the accidental finding of two million one-pound notes that had been packed away and lost sight of some time before. Even Joseph John Gurney, much more of a philanthropist than a banker, suffered from the pressure. 'Business has been productive of trial to me,' he wrote in characteristic way in his journal, 'and has led me to reflect on the equity of God, who measures out His salutary chastisement, even in this world, to the rich as well as the poor. I can certainly testify that some of the greatest pains and most burdensome cares which I have had to endure have arisen out of being what is usually called a "monied man."'

Is not this a case for a commentator to exclaim, "*Le pauvre homme!*"

Useful Information for Engineers. Third Series. As comprised in a Series of Lectures on the Applied Sciences; and on other kindred Subjects: together with Treatises on the Comparative Merits of the Paris and London International Exhibitions, on Roofs, on the Atlantic Cable, and on the Effect of Impact on Girders. By William Fairbairn, Esq., C.E. (Longmans & Co.)

READERS not initiated into the mysteries of mechanical science, and but slightly curious concerning the details of mechanical arts, no less than engineers, will find much that will interest them in these lectures on 'The Applied Sciences,' 'The Present State of Progress in Science and Art,' 'Labour: its Influence and Achievements,' 'Literary and Scientific Institutions,' 'First Principles, and the Thickness of the Earth's Crust experimentally considered,' 'Iron and its Appliances,' 'The Comparative Merits of the Machinery of the Paris Universal Exhibition, 1855,' 'The Machinery of the International Exhibition of 1862,' 'Iron Roofs,' and 'Experimental Researches on Insulation and other Properties of Submarine Telegraph Cables.' To those who have taken part in the controversy respecting the history of the locomotive, one fact recorded by Mr. Fairbairn will seem of peculiar importance. Special readers remember that the biographer of George Stephenson claimed for that useful mechanician the merit of inventing "the blast." The terms in which this claim was renewed are these:—"He (i. e. George Stephenson) then thought that, by conveying the eduction steam into the chimney by means of a small pipe after it had performed its office in the cylinders, and allowing it to escape in a vertical direction, its velocity would be imparted to the smoke from the fire, or to the ascending current of air in the chimney. The experiment was no sooner made than he found that the combustion of the fuel in the furnace was greatly stimulated by the blast," &c. In opposition to this story, the writer of the authorized 'Life of Robert Stephenson,' after showing that the influence of the blast in 1814 could have been nothing like so great as Mr. Smiles fancied, and drawing attention to the obscurity that covers the early history of the blast, conclusively proved that George Stephenson could not have been its inventor in the manner attributed to him. It now appears that George Stephenson confessed that his knowledge of the tendency of the blast did not follow from experiment, but was an accidental discovery. "Mr. Stephenson," says the deliverer of these lectures, "stated to the author that he introduced it into the chimney not from a previous knowledge of its properties as a blast, but to get quit of the nuisance." In another place Mr. Fairbairn observes, "George Stephenson, although the Father of Railways, could scarcely

be called an inventor, or a man of great intellectual capacity. He was, however, equally useful and equally successful in all its pursuits; and we have only to witness the result of his labours on the Killingworth, Darlington, and Liverpool and Manchester railways, to accord to him the merit of a hard worker, a distinguished engineer, and a man of indomitable perseverance, to whom we are indebted for the first successful railway worked by locomotives." Some years since, when the *Athenæum* exploded the ridiculous story that George Stephenson invented the locomotive, and relieved his honest fame of the romantic fabrications with which spurious biography had obscured rather than illustrated it, we encountered opposition and ungenerous misconstruction from writers who had accepted the fictions as true. That our statement of the case has, however, been adopted by persons best qualified to pass judgment upon it we see a satisfactory indication, in the fact that an engineer of Mr. Fairbairn's high position and unquestionable fairness does not hesitate to say that George Stephenson can "scarcely be called an inventor, or a man of great intellectual capacity."

Social Life in Former Days. Second Series.

Illustrated by Letters and Family Papers.

By E. Dunbar Dunbar, (late) Captain 21st Fusiliers. (Edinburgh, Edmonston & Douglas.)

THE success of Capt. Dunbar's first series of extracts from letters and papers illustrating our Social Life in former days has induced him to gather from his store of family documents the materials for another volume, which, though it may be less interesting and important than its precursor, contains many pieces of information and some strange pictures for which the antiquary and the collector of quaint stories will give him their thanks. Opening with an instance of the ferocity with which powerful families made war upon each other in the sixteenth century, the book makes us witnesses of the feud which raged between the Inneses and Dunbars, to the alternate amusement and consternation of their neighbours in the province of Moray. "On the 18th of October, 1577, John Innes, brother of the Laird of Innermarkie, with several accomplices, broke into the stables of the Deanery of Moray, with the intention of carrying off the horses. The Dean, Alexander Dunbar, disturbed by the sudden confusion, came out unarmed, 'except with his dirk, which he carried always,' and was immediately attacked by one of the party, who not only wounded him severely, but also most cruelly killed his daughter, Elizabeth Dunbar, a girl of thirteen years of age." Thus commenced a bloody quarrel that was brought to a close by the intervention of the Bishop of Moray and the heads of certain leading families of the district, who felt themselves constrained by Christian duty to check the belligerents, and interfere "for pecefing and satisfaction of slachtyr and slachters done be either of the parties." The comical verbiage of the deed by which this Dean of the church militant upon earth and his enemies empowered the peace-makers to arbitrate with respect to all matters in dispute, will remind playgoers of the absurdities of the reconciliation-scene in 'The Corsican Brothers.' The reader is next introduced to Sir Robert Gordon, the first of the Nova Scotia baronets, who paid for the distinction conferred upon him by Charles the First in 1625 "3,000 merks Scots, a sum equivalent to about 160*l.* sterling." From a letter written by this Sir Robert in 1626, wherein he says, "be the advyse of Baronet Strachan, Baronet Clunie, and Baronet Lesmoir," it

appears that the new title was formerly used in a manner that would occasion laughter at the present date. The chief interest of the volume depends upon the letters of this worthy gentleman's correspondents, who keep him informed of the world's doings by epistles equally characteristic of the writers and their period. When Sir Robert is at Paris, in 1620, he receives from his "Loving Cousin," the Duke of Lennox, a request that he will send to his Grace's quarters at Whitehall some articles of feminine apparel. "I must entreat you," writes the Duke, "to send me over some dozen of masks for gentewomen, which you must bespeak that they may be higher in the brow than the ordinary. You must send me also a dozen pair of such gloves as the gentewomen there do weare, and some working silk of dark colours." Sir Robert's most entertaining correspondent, however, is one Sir John Seton, of whom the editor can tell us nothing more than that he was a Gentleman of the Privy Chamber, and married a daughter of Sir William Hamilton, of Elistoun. A courtier in the earlier years of Charles the First's reign, suing for such royal favours as grants of land in Ireland and the recently-drained fens of Lincolnshire, Sir John Seton sided with the Parliamentarians in the Civil War, remaining in London whilst the King was at Oxford, writing to his friend in Scotland sharp words about "the Spanisch Jointo" and the other pernicious counsellors of his Britannic Majesty, and adopting an impressive tone of religious earnestness with respect to the course of public affairs. But though he wrote plentifully to Sir Robert Gordon, "att Gordonston in the North," Sir John Seton was a cautious scribe; and in order that his words, in case his letters should fall into the hands of royalists, might not be quoted at any future time to his disadvantage, he abstained from signing his name at the end of his epistles, concluding them with a mysterious "You know who I am." It is observable that Sir John Seton calls Sir Robert his "Honorable and worthy father," and always at the end of his letters makes some expression of filial duty, such as "your troulie affectionat frend and obediend sone," or "your affectionat sone and humble servand." Capt. Dunbar cannot say "why Sir John Seton called his correspondent 'Father';" but it is not unreasonable to infer that John Seton was a natural child of the Northern baronet. If they were really father and son, as the letters represent them, the correspondence is singular for its freedom from that coldness and formality which usually marked the intercourse of parents and children in the seventeenth century.

Turning over the papers we come upon signs of Cromwell's vigorous rule in the following passage given to an ancestor of that expert handler of the fowling-piece, Gordon Cumming, the lion-hunter:—"Suffer the bearer, Robert Cunnings, Laird of Alter, junior, to pas and repas about his negotiations, and to carrie a pistell for his personall defence, and to make use of a fowlingpeece for his recreation, providid he act nothinge prejudicial to His Highnes—The Lord Protector." Another document, a letter written in 1626, by a scholar who had acted as private tutor to the young Earl of Sutherland, enables us to estimate the value set upon the services of schoolmasters and pedagogues by the Scotch nobility of that time:—"I taught my Lord thrie yeirs in Suthirland," in a letter to the earl's guardian complains the ex-tutor, who seems to have been discharged from his post under circumstances of great injustice; "I nevir as yit got onie mor benefit bot one hundreth merks (your worship has my discharge on no

mor), so ther rests to me two hundreth merks for the workman is worthie of his byr. If your worship will not caus pay it now, I hop my Lord will sometyme consider it. My fyv yeirs attendance deserved a greater bountae." A far more noteworthy paper respecting scholastic matters, however, is the letter written by John Sharpe, asking Sir Robert Gordon to interest himself to place the writer's son upon the foundation of "Westminster Schoole." Writing in the January of 1629, Master John Sharpe says, "The first year (if I be rightlie remembered), as I was informed, he must be a Comoner or Probationer; as to that I am content if I may gett him preferred the next year following, for I will be at charges either to boord him in the schoolemaster's owne house or in some other house of my acquaintance. If you talk with the schoolemaster himself, your honor may tell him that he is about XIII yerees of age, that he hath learned all his Latine-gramer two or three times over, and doth understand the same. At this spring, by God's grace, I will enter him into his Greek. He doth learne, besid, Virgill and Terence, and some of Tullie's orationes." From this it would seem that the schoolboys of Charles the First's time were in some cases not so much younger than the schoolboys of the present day as we are accustomed to think. A boy who joins a public school in his fifteenth year is now-a-days thought to enter it at an advanced age.

The inventory of possessions generously given by the second Duke of Lennox's widow to her brother-in-law, the third duke, and his son, Lord Darnley, contains some notable entries, such as "7. My Lord's Collar of Esses, with a George of diamonds at it; three other Georges and Garters; which is all he had, excepte the one which is upon his Effigies at Westminster;" and "11. All my Lord's progresse stuff; a red bed, with chairs and stooles suitable to it; and hangings and carpetes for the bede-chamber and dining-chamber." Noteworthy also is the friendliness with which the Countess of Sutherland, widow of the thirteenth Earl, and daughter of the fourth Lord Elphinston, writes to her dress-maker. Her letter begins, "To my Richt Traist freind Johnne Hunter, tailzeor and burgess of Edinburgh. These: Traist Freind, —My heartlie commendationes remembred," and ends with "So, haifing no forder at this present, but expects ye will obey thir presents, I comit you to God's protectione, and rests your assured good freind, Annas C. Suthirland." Even those who have not the honour of her acquaintance may safely assert that the Duchess of Sutherland of our own day never addressed a London tailor or a court milliner as her "dear friend."

The following letter from Lady Jean Gordon, daughter of the fourteenth Earl of Sutherland, is such a delicious exhibition of feminine frankness, prudence, simplicity and craft, that the reader will thank us for giving him every line of it:—

"This for the Right Worshipfull Sir Ludvick Gordon, of Gordonstoune. In Cromerty.

"The 19 of Jany. 1637.

"Deir Cousing,—This gentillman, the berer heirof, has bein att me, making offer of himself and fortoun to me; and I, not being wholly att my owne disposing, has sent him to speek my father, and brother, and yourself, and Skibo, with any other freinds you think fit to meit therupon, hoping you will se to my good in it. His estat, as he says, is five thousand mark a yeir, and he offers me the half for my congeinie, which I think is very fair, considering the condission I ame in, for it is good taking an good occation whill offered. He does profes a great dell of love to me; for my owne part, I could led my lyff with the man, for he sims to be a very deserving gentillman, and one

I hop of a good disposition, and any thing he has in frise; so that, cousing, when ye have met with the rest of the freinds theranent, and tryd how much ye can se it tend for my good, then accordingly I expects ye will be my freind and his both, for he intends to putt it to a poynt as soon as possibly can be, and if ye that are freinds command him to goe Suth, to speek any of my freinds there, I belive he will obey. So leving this busines, cousing, upon you to befreind, as ye se fit for my good, who shall, for all your favours, indevor to approve myself, as becometh her who is your most obedient cousing, to serve you,

"JEAN GORDON.

"Cousing, if ye conclud on this busines or this beere return, I intret you move my brother to com this lenth to speek with me in business, for I know not how to get munia, and ther is an necessity of having it att such a tyme; for, what he ows me of my mentinance, he most of nesesity advance it befor hand, and more so if that be it goe on. I intret you to se what my Lord will doe; if ye could move him to tak me hom and match me out of his owne house, albit never so privately, for it will be a trubill to your mother to have it solemnised heir, albit never so privately. I hop for your answer theranent by this beere; he intends Suth, but he wold fain contract funst. Doe this as ye think fit (he, duties, will give you all content) so that ye deminish non of my fornemid portion, ogment it as they plea."

Amongst the contributions relating to matters funereal we come upon the letter of a Laird's widow, Jane Campbell, who, in her anxiety to secure an honourable interment for her husband's corpse, writes in 1663 to the Laird of Gordonston: "I doe lykweis humbely intreat your honour for the leine of your mort-clothe; for it is mor to his credit to have it nor the comone mort-clothe of Elgine, seeing we expek sinderie of his freinds to be heire." People of gentle birth and blood in the days of our ancestors habitually and without a struggle did things to which much humbler people could not stoop nowadays without reluctance. Thus in this record of old usages having in one page seen a lady write for the loan of drapery to heighten the display at her husband's funeral, we come in another page upon a Major Dunbar, a man of ancient lineage and good condition, who binds his son an apprentice to a ship-carpenter, as though there were nothing incongruous between the possession of gentle status and the pursuit of so humble a calling. Indeed, the Scotch noblesse seemed to have busied themselves in commercial pursuits long before the poorer members of our own aristocracy deigned to imitate their wise example. In 1688 George, Viscount of Tarbat, subsequently Earl of Cromartie, was the chief partner of a firm that for many years carried on a bottle-manufactory at "the new Glasse-hous in North Leith." Some seventy years later Lady Murray was a dealer in bug-poison, and advertised her "secret and infallible mixture" in at least one of the Edinburgh papers.

In illustration of the powers which, so late as 1747, every Laird, whose lands had been constituted a barony, exercised over the lives as well as liberties of offenders within the limits of his jurisdiction, Captain Dunbar gives from the archives of the Barron-Court, Gordonston, the account of the judicial proceedings against Janet Grant, who, being found guilty of burglary, was sentenced to death on August 25, 1679. "Whereupon," runs the record, "the judge gave sentence that she shall be conveyed from thence back to prison, and there to remaine till the morrow, being the 26th instant, and thence to be carried, betwixt 2 and 4 o'clock in the afternoon, to the Loch of Spynie, and there to be drowned under water till she be dead." It appears that in the barony of Gordonston criminals sentenced to death were

executed by immersion, instead of suspension. Of an old lord who met his end neither by water nor the rope, but by the headsman's axe, Captain Dunbar reminds us by publishing a very characteristic letter written by Lord Lovat when he was in his seventy-eighth year. "I take the cold bath every day," runs the postscript of this letter, "and, since I cannot go abroad, use the exercise of dancing every day with my daughter and others that are here with me, and I can dance as cleverly as I have done these ten years past." The amusing papers of this very entertaining volume comprise some epistles, the fun of which consists chiefly in the extravagant badness of their spelling. For instance, Lord Huntly, afterwards the second Duke of Gordon, writes to a friend: "And also to lett you know I had hard some notorius both rogs and lyers should have dun ther indevors to perswaid you I was not so mutch your frend as the rest of my predecessors had been to yours; all which I ashured you was fals." This was written in 1708, a date when gross ignorance had become disgraceful in good society.

The Vegetable World; being a History of Plants, with their Botanical Descriptions and Peculiar Properties. By Louis Figuier, author of 'The World before the Deluge.' Illustrated with Engravings, chiefly drawn from Nature. (Chapman & Hall.)

A careful perusal of this octavo volume suggests the suspicion that different minds have been engaged in getting it up. M. Faguet's full-page illustrations are admirable; but not a few of the engravings have been printed in a slovenly way, although the effect of the best drawing and carving is entirely dependent on the printing. As for the letter-press, the name of M. Louis Figuier is on the title-page; and the Preface is signed with the initials W. S. O. The first part of the book, on the physiology of plants, although it begins in a very old-fashioned and unmethodical way with a description of the roots, consists of good and well-translated compilation. The other three parts on the classification, the families and the distribution of plants, have been got together by spoliation, —an easier process than either compilation or translation. The part on the physiology occupies 192 pages; a meagre essay on the classification of plants fills up 30 pages, whilst 293 pages consist of an abridgment of the late Dr. Lindley's descriptions of his so-called Natural families. The essay on the 'Geographical Distribution of Plants' consists chiefly of extracts from such common sources as the publications of Alexander Humboldt, Charles Martens, Cosson, Auguste de St.-Hilaire, and Dr. Hooker. Dr. Lindley is no longer in this world to give or to withhold his consent to the publication of an abridgment of his descriptions of the Natural families; but most certainly botanists who already possess Dr. Lindley's views in his own works ought to be warned against paying for them twice over by buying this book; and beginners or amateurs, who wish to master Lindley's principles of grouping, ought to be told that the possession of this abridgment will not make it unnecessary for them to buy Lindley's system in Lindley's own expository of it.

As regards good elementary scientific treatises, British writers are too often parasites of French compilers. For example, the adjective *parasitical* is descriptive of the relations between Balfour's 'Botany' and Adrien de Jussieu's elementary work, of Patterson's 'Zoology' and Milne-Edwards's 'First Lessons,' and of Lardner's later compilations and the works of Arago, Pouillet, and others. The cause of this rela-

tion is patent. French *savants* are employed and paid by their government to prepare their excellent treatises; while British compilers or translators or bookmakers are employed by publishers to get up their catch-shilling publications. The French books are written to teach, the British are made to sell. The end in the one case is instruction, in the other trade.

M. Louis Figuier's book is a workmanlike performance. The French are well aware of their superiority: "We are the summing-up nation (*nous sommes la nation résumateur*)," they say of themselves. And M. Figuier has obtained distinction in a career in which his nation is eminent. Paris, or rather the slope on the bank of the Seine called the Latin Quarter, with its five academies and its free museums and menageries, libraries and lectures, gardens and comradeship, is indeed the best spot in the world for a man who wishes to learn the present state of a science. If master of the three tongues, French, German, and English, and able to add to his residence in the Latin Quarter a visit to Berlin or London, he must soon become acquainted with nearly everything worth knowing in the science which he studies, the recent discoveries, the results of discussions, the new instruments, the novel experiments, the marvellous specimens, the puzzling problems, the acquired facts. Such a man might, after a few years of acquisition, become a successful compiler. He would then be fit to sum up, and if apt to teach, he might contest the present superiority of the French. But they never can be rivalled by bookmakers, who put together books as builders run up houses, by contract. Yet our countrymen ought to be first in this very field. They acquire foreign languages more easily than the French. They travel far more. Although from their British shells, British birds, British ferns, British fish, they might be deemed the smallest people in their ideas among the nations called civilized, they are really the people who are most universally spread around the globe, whose sway is largest, and their language most read and spoken. No nation has equally vast collections of specimens of minerals, plants, or animals, although, perhaps, nearly all our great rivals have more accessible and available collections. And a Briton, more than a man of any other nationality, might, without treading any soil but that of the British empire, or seeking the protection of any other bit of silk than the Union Jack, voyage round the world and see with his own eyes a tolerably universal representation of the vegetation or floral vesture of the planet Earth.

These remarks arise from the perusal of a book which, to the extent of more than one-half of its contents and pages, is an English abridgment under the guise of a French translation, a hash-up of Dr. Lindley with the name of M. Louis Figuier upon the title-page. The illustrations, paper, print, and appearance of the volume are so attractive, that it is a real disappointment to find them marred by careless reading of the proofs, by showy but flimsy binding, and by the bad literary workmanship called book-making. For we should have been glad to have welcomed a really good elementary book on botany. On all sides the botanist is at present compelled to hear the study which yields him daily delight condemned as very dry; and he can only say this dryness comes from the way in which it is taught, and not from the science itself. A knowledge of stupes is a heritage of certain families among the savage tribes of Africa, Asia, and America, and the peasantry of Europe which produces lines of gardeners, herbalists, and apothecaries. In this way the science descends from sire to son, or from

mother to daughter; and young men of these families, who have had their first lessons in boyhood and their first difficulties removed in their homes, can profit by books and lectures and become botanists. But for the majority of people botany is a repellent science, as unattractive as a herbarium which has been attacked by caterpillars. Yet, a book of clear definitions, simple arrangement, and satisfactory illustrations which shall describe the life-circles of plants, and enable the student of average intelligence and perseverance to recognize with ease the principal groups of the vegetable world, and the wild and cultivated plants of his own country, is a production which ought not to be beyond the powers of our professors of botany, and which ought not much longer to be an unsupplied want of the age.

The Story of the Universities' Mission to Central Africa. By the Rev. Henry Rowley. (Saunders, Otley & Co.)

Christianity among the New Zealanders. By the Right Rev. William Williams, D.C.L., Bishop of Waiapu. With Six Illustrations. (Seeley, Jackson & Halliday.)

THE story of missions to Africa has a saddening influence on the mind. Great sacrifices have been made and a noble philanthropy displayed,—men, money, enthusiasm, patience, energy have not been wanting,—yet the beneficial effects have been small. Christianity and civilization tell slowly on the descendants of Ham, whose barbarism is of a type that almost compels the tender-hearted lover of humanity to sit down in despair.

In 1857, in consequence of Dr. Livingstone's appeal to the Church of England to occupy the field of missionary labour which his discoveries in Africa had opened up, the Oxford and Cambridge mission to Central Africa was founded,—the Universities of Durham and Dublin subsequently joining in the undertaking. The object aimed at was to establish stations, which should be centres of christianity and civilization, promoting not only religion, but agriculture and lawful commerce, as well as the ultimate extinction of the slave trade.

The mission staff consisted of laity as well as clergy, headed by a bishop. The party began to ascend the Zambesi on the 10th of March, 1861, thence up the Shire river, and took up their first station at Magomero, on the highlands, about 70 miles from the Shire. Here they remained for some time, and worked well, till famine and other causes obliged them to leave it, and come down to the river near Chibisa's village, where famine appeared after a time, and ultimately broke up the mission. Death had overtaken Bishop Mackenzie, the Rev. Messrs. Burrup and Scudamore, Dr. Dickinson, and Mr. Thornton. The writer, Mr. Rowley, had to come home to save his life, and is one of the two survivors of the clerical staff. It was afterwards determined to leave that part of Africa altogether, and establish the mission at Zanzibar, under Bishop Tozer.

The volume is a readable and interesting one. Mr. Rowley has told the whole story well, showing judgment, taste, and feeling. His book is much superior to ordinary missionary books. As to the conduct of the mission, we cannot see just cause for blame. The Bishop and his colleagues acted in trying circumstances as they thought best. Their motives were pure and upright. When they *did* interfere in the quarrels of the native tribes, it was for the best interests of the tribes. There is little doubt, however, that the part of Africa recommended as a centre of missionary operations and commerce was ill suited to the purpose. The noble band went out

to meet almost certain death, and that speedily. They were even so ignorant of the dangers and difficulties of the enterprise, as to expect the arrival of the bishop's sisters and other ladies, as soon as a settlement could be made.

While ascending the Zambesi, and obliged to stop for the repair of the engine, some of the boat's crew went in search of game, but brought with them several of the Landeen tribe instead.—

"They were magnificent fellows, but had the look of unmitigated savages. They wore a kind of kilt made of monkey-skins, and their loins were covered with strips of monkey-skin and buckskin alternately arranged. It is a far more picturesque attire than the bit of dirty calico I had hitherto seen worn by the natives. Their necklaces were made mostly of the horns of a diminutive antelope, strung through the roots, though one fellow, the medicine-man, had a forest of chips about his neck. He also had at least twenty bracelets of steel wire on each arm, and on the fingers of each hand were many rings of the same material. Their snuff-boxes were made of a section of bamboo or reed; they were about a foot long, an inch in diameter, and ornamented with elaborate carving, very skillfully executed. One man carried his snuff-box in a hole made in the lower lobe of his ear. They were well pleased with their visit to us, for Dr. Livingstone conversed with them freely, and gave them trifling presents. There was nothing servile in their bearing; indeed, they regard all the natives around as their servants and slaves. They do no work, but quarter themselves upon the tribes they have subjugated. Those who visited us were, with many others, living upon the villagers near to Shupanga, and they assumed the air and manners of lords and masters. They carry off the stalwart lads as recruits, and the young women as wives. The Portuguese are really unable to do anything with them. Once, when repelling an invasion of these people, they captured two of them, and carrying them to Quilimane, did their best, by flogging, &c., to subdue their spirit. But they only evoked threats of vengeance and defiance. Until death they breathed out threatening and slaughter against their captors. They were as little moved to supplication as the North American Indian."

The missionaries lived chiefly among the Manganja tribe, whose women

"wore the hideous lip-ring of which I have spoken when in the Rovuma, and most had shaved off their hair. The men were not disfigured, save by a triangular notch in their front teeth, and they wore their hair dressed in fashions often becoming. It seemed *their* glory, but the woman's shame. The perverted taste of woman never invented a more hideous adornment than this frightful lip-ring. Fancy the loveliest of God's creatures in this part of the world with her upper lip thrust two inches beyond her nose, and a bald head! I am no artist, but I have an artist's admiration for grace of form and beauty of feature, and treasure the remembrance of a beautiful face, whether of man or woman, as I do that of a beautiful passage in music or poetry. In England it is, perhaps, difficult to find a female face, unless expressive of wickedness, which it is not pleasant to look upon; but in Africa, wherever I took my walks abroad, I met with a feminine ugliness almost overpowering, and for which the possessor was alone responsible, for many of the women would have been really good-looking had they not disfigured themselves so vilely."

The following is an amusing account of a much-relished food:—

"There are several species of rat, and the bewa, the field rat, a harmless-looking creature, small in size, slender of form, and of the colour of lavender, is regarded by the natives as the best of all meat. At certain seasons of the year there is a regular rat harvest, the boys being the reapers. You see them coming home with dead rats on a reel like larks on a skewer. They dry them, smoke them, and hang them up in bundles, like sprats at Billingsgate, and eat one now and then as a dainty. One evening my boy Juma (one of the boys now with Dr. Living-

stone) came into my hut with his supper, a lump of Nsima, and something like a burnt sausage. 'What is that, Juma?' said I. 'Bewa,' said he. 'Is it good?'—'It is good. Better than sheep, better than goat, better than bird or fish, better than all other meat. Shall I roast one for you?' And he pulled out a fine rat from his bag, and held it up for admiration. I nodded assent, and off he ran delighted. He returned with the rat frizzled and black, cooked to a turn. Its odour was savoury—but it was rat, and I hesitated. 'Did you skin it, Juma?'—'No!'—'Did you take the entrails out, Juma?'—'No! They are the best of it—the fattest!' said he, in surprise at my want of power to appreciate what a rat was. I did not taste it, though I afterwards thought myself weak to allow prejudice to interfere with my taste, for I have no doubt the boy was right, and that rat was pleasant food, and the method of cooking it was no worse than our method of dressing snipe."

The volume has two maps, with a number of woodcuts, and photographic portraits of the worthy men who died in that unhealthy land. The beginning of the mission to Central Africa was marked by disaster, owing to causes which might have been foreseen by the persons who recommended the district chosen. Europeans cannot with safety live in such a climate, away from regular supplies by ship. Whether evil spirits had to do with the failure, we will not venture to say,—though the Bishop of Oxford, whose knowledge of them is greater than ours, thinks they had. Let us hope that Zanzibar will prove a better post, and Bishop Tozer a man more careful of his health than Mackenzie; more self-denying, zealous, and christian-minded he can hardly hope to be.

The second book is of less interest than that of Mr. Rowley, and by no means so well written. It has no map, and the reader cannot follow the narrative very easily. The author does not rise above the level of ordinary writers of missionary travels, and his reflections are commonplace. We observe that Satan bears a conspicuous place in them. But he and his fellow labourers are animated by a true spirit of christian zeal. It is evident that they are well fitted for their work, intrepid and bold, earnest and energetic: hence their labours have been followed by much success. It is in New Zealand much the same as in Africa: one tribe attacks another, with or without provocation, and carries off the booty. But there is this difference, that where Mackenzie laboured there was no cannibalism, whereas in New Zealand some of the prisoners were usually killed for that purpose.

The New Zealanders had no settled form of religion,—no deities to whom regular worship was paid; yet there were priests whose services were required on particular occasions, especially in times of sickness or war. They were supposed to possess the power of bewitching whom they pleased, and were therefore much feared. Here is the account which a young man, the son of a noted priest, afterwards a convert to Christianity, gave of himself:—

"Before I was yet born (said this young man) my father devoted me to the powers of darkness. As soon as I was able to struggle for my mother's breast, I was often teased by my father, and kept from it, in order that angry passions might be deeply rooted in me. The stronger I grew, the more I was teased by my father, and the harder I had to fight for nourishment. All this was done before I was old enough to notice the plants which are produced by the earth. When I could run about, the work of preparation went on more rigidly, and my father kept me without food that I might learn to thieve, not forgetting, at the same time, to stir up the spirit of anger and revenge which he had so assiduously endeavoured to implant in my breast. My father then taught me how to bewitch and destroy people at my pleasure; and he told me that to be a great man, I must be

a bold murderer, a desperate and expert thief, and able to do all kinds of wickedness, effectually. I remember while I was a child, my father went to kill pigs. I tried to get a portion for myself, but my father beat me away, because I had not been active in killing them. When the tribe went to war, and I was able to go with them, I endeavoured to fulfil my father's wishes by committing acts of violence; and when I succeeded in catching slaves for myself, my father was pleased, and said, 'Now I will feed you, because you deserve it; now you shall not be in want of good things.' I followed this course, firmly believing I was doing right, until Paratene Ripi came to visit us at Kaitake. He told us we must not work on the Sabbath-day, but pray to God and think of Him. Missionary visits now became frequent, but I still followed my own course. After a time I began to question whether it was right or not to proceed as I had begun under my father's tuition, and it was not long before I saw how exceedingly wicked I was, and I soon felt a hatred of my past life. My father, finding how matters were going on, separated himself from me, and is now living at a distance from Kaitake, in order that he may be out of the way of instruction."

Bishop Williams gives this curious account of a Taranaki chief:—

"A Taranaki chief, Horopapera Te Ua, having shown strong symptoms of insanity, his people considered that it was dangerous for him to be at large, and bound him with ropes. In a little time he contrived to gain his liberty. He was then secured with a chain, which was securely padlocked; but he broke the chain asunder, and was again free. 'The angel Gabriel,' he said, 'had appeared to him to give him his release.' The next achievement of Te Ua was still more marvellous. It is related that, in a fit of frenzy, he severed his child's leg with an axe; but when the people gathered around to pour forth their lamentations, they found the child playing before the door, with only a scar visible, showing where the amputation had taken place. From this time Te Ua was no longer regarded as a maniac, but as a great prophet, one who was raised up for their deliverance. He then related to his people a remarkable dream, which was interpreted to mean that victory was near at hand. Soon after a party of soldiers, under Capt. Lloyd, being out on a reconnaissance, their retreat was cut off by the natives, and some of the number, including that officer, fell into their hands. The report was at once circulated that this success had been achieved under the protection of the angel Gabriel; that the natives, only thirty in number, had been attacked by a large body of soldiers, and that without fighting, but only by the use of Horopapera's magic wand, the soldiers all fell before them. Horopapera then sent a letter to Tamihana Te Wāhoro, and to the New Zealand chiefs generally, instructing them to sheath the sword of war, 'that the Lord of Hosts has given to the natives the sword of Samson and of Gideon, the sword by which the Philistines and the Midianites were overpowered. This is Gabriel the archangel. He has come down like a mighty flood upon his people, and upon the ruler who is anointed to be over them. He commands you to stay the four winds of heaven, and that all the people shall take upon them the solemn oath (Kia tomo katoa tatou ki ana pooti). If you obey this command your God will come down upon this land. It is because he loves his people, and is about to restore you to your rock, which is Jehovah.' Here was a recognition of the Divine Ruler, but there was a strange admixture of fanaticism, and, in order to secure the adhesion of the people, it was necessary to give them a new system. Their case bore some resemblance to that of Israel of old, when the ten tribes having raised the standard of rebellion, Jeroboam made the golden calves for the people to worship, lest by going up to Jerusalem they should return to their allegiance. The Christian religion had taught them quiet submission to the powers that be, and under the instruction of the missionaries they had been accustomed to pray for the Queen, and to acknowledge her authority. The Scriptures therefore were to be laid aside, together with the books they had

received from the missionaries. They were directed to return to their native customs, including the tapu and polygamy, and a new form of worship was prepared."

Now that England is at peace with New Zealand, we trust that the civilizing influences of Christianity will change the inhabitants, and induce them to follow those peaceful occupations that conduce to their well-being. Those who have gone among them from European countries to preach the Gospel and instruct them in the arts of civilized life, are active in their work; but they should avoid coming in contact with one another on disputed dogmas. The reported discussion between a Romish priest and the author of the book, in the presence of a number of natives, could have led to no good result. If Christians show their divisions to barbarous tribes, the latter will not know which to follow, and may probably choose to continue in their old superstitions.

The book of Bishop Williams will encourage the supporters of missions to the heathen, by showing that their money is not all wasted. Good fruit is being gathered in a country which may hereafter prove one of the most important colonies of Great Britain. But we regret to remark that it resembles in strain and tone the diary of a man who chronicles ordinary events, appending to them such obvious remarks as come first into the mind. The descriptions lack life and vigour. In the interests of a hopeful charity, we would also express the belief that the phrase "*another brand plucked out of the fire*," which occurs here and there in relation to a convert, is figurative.

NEW NOVELS.

Only George: a Story. 2 vols. (Chapman & Hall.)

THE one merit of this novel is brevity; but notwithstanding its shortness, it is far too long. It is weariness, stupefying weariness, to turn over its loosely-printed pages of school-girls' English, every paragraph of which has come from a writer who never looked for thoughts until she had found her pen, and then looked for them in vain. Every sentence of the tale droops with a weakness suggestive of the difficulties which beset the inexperienced scribe whose chief concern after she has commenced a sentence is to bring it to a full stop without a grammatical blunder. It is a wondrously polite story about lords and ladies,—such lords and such ladies!—and to heighten the effect of her not sternly realistic descriptions of high life, the author not only declares herself "at home" in May Fair, but flourishes before the awe-struck reader her total ignorance of the topography of less fashionable quarters. She is sure that Doughty Street is in the City, somewhere east of Bartholomew's Hospital and Smithfield Market. Amy and Arthur Neville are described as leaving their home in May Fair and "rattling over the stones in a Hansom, through Holborn, past the deserted Smithfield Market, past Bartholomew's Hospital with its quiet square and its gardens surrounded by fine piles of stone buildings, on their way to Doughty Street." Perhaps this delightful assumption of ignorance on a point concerning which information would, no doubt, be very disgraceful, may produce the desired effect on a certain class of readers; but it is calculated to rouse in uncharitable minds a horrible suspicion that the author has ere now had dealings with the tradesmen of Gray's Inn Lane, and bought her bonnets in Lamb's Conduit Street.

Of course, Amy, or Amicia, Neville and her brother did not visit Doughty Street without a sufficient object. Their excuse for so adven-

turous a departure from the stronghold of fashion was a strong desire to see their old friends George—"only George"—Evelyn and his mother,—the son and widow of a Prof. Evelyn, who "had been well known to the scientific world, both in England and abroad, as a man of high intellectual culture and of immense research in all subjects connected with natural philosophy." Even at the outset of the story Amicia is in love with George Evelyn, a medical student of Bartholomew's Hospital, where his devotion to professional duties has "gained him the esteem and regard of all the physicians in attendance there." But though Amicia is a guileless and unselfish darling, she has worldly parents,—a papa "who had been called to the Bar as a young man, but soon took to literature, and added materially to his income by writing various sprightly tales and essays for the magazines"; and a mamma of whom the author says, with some obscurity, "Mrs. Neville had been disappointed in her own married life; and, alienated by the absolute selfishness of her husband, she had early taken refuge in friendship, and, as it were, took (*sic*) out in small change what she could not obtain in the solid piece." It is almost needless to say that the worldly papa and mamma, for whom Amicia is said to have "an immense affection," set their child free from her entanglement with the medical student, and, after the fashion of the papas and mammas of May Fair, give her in marriage to an elderly and frigid peer, "the grim Lord Chilworth." As Lady Chilworth, Amy endures several years of misery, when the grim earl dies suddenly of heart disease, leaving her at liberty to marry "only George," who, with the rapidity which usually characterizes the professional successes of romantic art, has, in the course of a few years, become an eminent physician as well as a man of large fortune. The marriage of the old lovers follows in due course; and in order that the wealthy physician may be rendered a fit husband for "a lady of quality," our fashionable novelist secures his elevation to the baronetage. "A serious illness," runs the last pages of the story, "in the royal nursery had brought George into consultation there, and with such fortunate results in the course that he pursued, that it caused no surprise amongst his colleagues when a graceful recognition of his services and skill was made by the offer of a baronetcy." Surely a lady who knows everything about May Fair ought to know that baronetries are not won by young physicians in this fashion. What becomes of the world-loving papa we forget; but Mrs. Neville, whose "naturally affectionate nature had been by suffering and trial drawn upwards by degrees to higher interests than those of May Fair," is described as rejoicing in her closing days "that Amy had at last married one whom she had herself been brought to love and reverence more than all the House of Lords, although he was 'only George.'" Thus ends a novel which deserves attention as a curiosity of foolishness.

Beating to Windward; or, Light and Shade: a Novel. By the Hon. Charles Stuart Savile. (Newby.)

CONCERNING the author whose numerous works bear on their title-pages the name of the Hon. Charles Stuart Savile, we have a theory to which our respect for literature and humanity inspires us to cling, as though it were for hard life. For its support we can produce no facts that are not drawn from his publications. Who the gentleman may be, whether he be old or young, rich or poor, whether his designation on the shelves of his publisher be his real name

or merely a *nom de plume*,—are questions that we confess ourselves totally unable to answer. We have never looked him up in the Peerage or Court Directory, nor have we any intention to do so. It is enough for us to know him from his own voluminous productions, the nerveless incoherence and languid verbosity of which, no less than their feeble egotism and uniform inanity, induce us to rank him amongst those mental invalids who mistake their intellectual imbecility for strength, and for the comfort of their nearest companions, as well as their own well-being, are recommended by their physicians to seek diversion in the pursuits of literature. Such patients are by no means rare, and it has been ascertained by medical experience that the best mode of treating them is to place at their command an unlimited supply of pens, ink, and paper, and permit them to write away to their hearts' content. More than once Mr. Charles Dickens has enlivened his readers with the picture of an amiable simpleton who is perpetually writing, as a schoolboy whistles, for want of thought. Mr. Dick is still at work on his memorial concerning the execution of Charles the First; Mr. Toots continues to address letters to F.M. the Duke of Wellington; and in like manner the Hon. Charles Stuart Savile finds peace of mind in composing romances which no sane man will ever read for pleasure's sake. In this latest addition to a long series of similar deliveries, the hero is a distinguished Cambridge man—the son of a baronet, the nephew of a duke, the brother of a man possessing five-and-twenty thousand a year—who is reduced to earn his living as a tutor in the family of a country gentleman. Having fallen in love with his employer's daughter, whom he rescues from the horns of a mad bull, and then from a watery grave, Mr. Henry Walton is on the point of starting for Australia, in search of fortune, when he is brought to trial on a charge of having murdered his wealthy elder brother. The investigation terminates in his acquittal; whereupon the liberated hero—no longer a poor tutor, but an opulent baronet—claims the hand of his beloved Edith, and carries her off to the South of Europe, in the hope that a milder climate will restore her broken health. But, alas, Sir Henry is doomed to disappointment. Edith's death is announced in the last chapter of the story; and even whilst she is on the gloomy border-land of death, her husband writes to a friend: "I found a few lines in a drawer this morning, for I am allowed to get up and move about the room. The poem is so very short, I will quote it at full length. There are only four stanzas. It is headed—

LINES BY A CONSUMPTIVE PATIENT.

They whisper that I'm dying,
As on tip-toe they creep;
And friends are deeply sighing—
They fancy me asleep.

They whisper that I'm dying:
Alas! is this the truth?
And is my spirit flying
In early morn of youth?

They whisper that I'm dying,
And yet I feel no pain:
Where is my own Charles crying?
There—there he weeps again.

Oh, now I feel I'm dying!
His tears prove all hope flown:
When in the grave I'm lying,
Charles will be left alone.

—Were the name of Charles altered to that of Henry, it would seem as if I had written the lines myself, for they so exactly describe my state and what is passing around me." This poem is the most musical, most suggestive, and in every respect the strongest piece of writing in the three volumes.

Masterpieces of Mulready. Memorials of William Mulready. Collected by F. G. Stephens. Illustrated with Fourteen Photographs of his most Celebrated Paintings. (Bell & Daldy.)

"Poor old Mul!" By this phrase was the late William Mulready spoken of, towards the close of his long career, when his fame had increased with his years, but his fortune had not augmented in proportion. What a quaint, kindly-hearted, slightly cynical, old-fashioned figure was his, when your eye fell on him as he stood in the centre of a drawing-room, where the somewhat sad solemnities of a *soirée* were being celebrated! He looked, in dress and bearing, a relic or last shadow of the times of the Regency. How pleasantly antiquated was the smile which now and then crisped up from above his white, rolling "neckcloth" and his lofty shirt-collars. He was the very picture of old gentlemanlike simplicity; and you longed to ask him why he would carry about with him, held close to his side, and among such gay throngs of fashionable people, that antique umbrella, to which he seemed to attach such importance. But every one had a tenderness for the gentle old man, a respect for the air of sorrowing which hung about and over him, and no question was ever put to him that carried with it the possibility of wounding his susceptibility. There might be a smile at the umbrella, when the smiler was out of sight of the bearer, but there was never a reference to it within the bearer's hearing. He would pull it up under his left arm, as you approached him, hugging it closer to his heart, as if it were a matter which only concerned themselves,—that is, heart, umbrella, and Mulready,—and, respecting the mystery, you talked of general things.

Pleasantly, yet languidly, the old man would talk as if general things were matters he had well-nigh done with, and he would occasionally look around with a sigh, as if at once gazing towards and sighing for the relief that was not then far distant. But, when the younger and gayer votaries were gone, and Mulready moved up towards the fireplace, stood with his back to it, winter or summer, and a group of good listeners or apt and discreet questioners gathered round him, how congenial, how sunny, how felicitous, how communicative became the old and ever gentle artist. The shadow of sorrow never altogether passed away from his face; it sometimes bore a sign of present pain; sometimes it seemed born of some old memory; but in the hour which he would always give to fitting audience the shadow never broke the sunniness which the occasion called forth. Brightness of enjoyment seemed then a tonic which he had no right to refuse. To him who had laboured assiduously and suffered much, a cup of mild pleasure was not to be dashed aside; and he seemed to have taken as a law of his life the injunction which Milton conveyed in his sonnet to Cyriac Skinner, who laboured overmuch, and thought the enjoyment of repose unworthy of a true son of labour—

For other things mild Heaven a time ordains,
And disapproves the Care, though wise in show,
That with superfluous burden loads the day,
And when God sends a cheerful hour, refrains.

One of the most remarkable features in Mulready was his Irish accent. That a man, born at Ennis, in county Clare, should have an unmistakable musical tone in his voice, not a bogue, but a certain rich, melodious accent, is a natural thing enough. When, however, we reflect that Mulready, born in 1786, left Ireland when he was little more than six years old, came to England, lived with English lads, and then with English men, and never returned

to his native country, the pertinacity with which the Irish tone hung on his eloquent tongue to the last, for seventy years and more, is remarkable. Most Irish children who come young from the Green Isle to England, and have fellowship with English companions, lose the native accent altogether, or can drop it when they please, and resume it when the humour prompts them. With Mulready it was not a matter of pleasure or caprice; the Clare melody hung on his lips, whether he would or no. That Clare ring—it is quite a silvery ring, which never sounds so witchingly as when it falls from the lips of a young, well-educated Clare girl—gave a zest to all Mulready's stories; and these he told, in his quiet, unaffected, charming way, by the score. Many of these stories Mr. Stephens repeats with excellent effect. One of them refers to the time when the three-year-old son of the Ennis leather-breeches maker was pursuing Art under difficulties, and, indeed, under something besides difficulties: "The discovery of his taste for drawing was made when his father came into the room where the child had been left—the family occupied only one room at that time, and had accustomed themselves to lock the child in while they were at work elsewhere—and found that little William had with a piece of common chalk made a tolerably successful copy of part of an engraving of St. Paul's, London, which hung on the wall of the chamber, and that for lack of a better panel, he had done so on the floor beneath the bed, beyond which a part of the cartoon extended. His father came suddenly into the room about the time when this architectural study was complete," and we may imagine "his surprise at seeing a pair of rosy and sturdy legs protruding from beneath the bedstead, the young owner of which had to back out before his work could be examined." Such was the commencement of a career during which the artist, after drawing on street walls, lecturing to children in a pleasant way who looked on at his work (a way which never left him, and which made him the delight of the students at the Royal Academy),—after illustrating cheap books, and painting panoramas, produced a series of masterpieces, including the 'Crossing the Ford,' 'The Wolf and the Lamb,' 'The Whistonian Controversy,' and ended only a year or two ago with the unfinished 'Toy-Seller.'

The fine old man died in harness. To complete that last of his efforts, he was before his easel at five o'clock on cold spring mornings; but his endurance was not equal to his resolution, and the picture was exhibited unfinished, at the Royal Academy, in the year 1862. At the last party at which he was a guest, at the house of his brother Academician, Mr. E. M. Ward, Mulready expressed his hope of completing this picture, in which young Wriothesley Ward stood for the child, but the hand of death was then weighing heavily on him; there was no gay leave-taking, as on similar occasions of old, but a feeling of the approaching end that "will come when it will come," but which, inevitable and necessary as it is, can never be thought of with smiles, nor be expected but with solemnity of feeling. The aged Irish artist went home to die. It was a home almost solitary, one in which there had been only the sunshine of Art triumphant, little or nothing of the glow of domestic happiness. Mulready accomplished an imperishable fame, but he made shipwreck of all besides; and though nearly blameless himself, wore through his later years that abiding shadow of grief which seemed to indicate, even in his cheerfulness, that self-reproach had something to do with his settled sorrow. Mr. Stephens touches lightly on these domestic matters, and we shall

follow such excellent example; but, looking on Mulready purely as an artist, Mr. Stephens describes him, with a generous and justifiable enthusiasm, as "one of the best-known artists of this age, independent, and thoroughly English" (on canvas), "a master in painting, a humorist, without spite or malice, an indefatigable student—a student all his life long—this man, with pathos or gaiety of feeling, imparted to the class of *genre* subjects that artistic completion of execution we generally seek in historical painting, and, by the truthfulness of all that he did, ennobled them in the process."

The merit of Mr. Stephens's brilliant volume does not lie altogether in the illustrations, nor in his commentary on them, nor in his general view of Mulready's life; the chief merit of this well-executed book is that it contains biographical matter of great interest, much of which is not to be found elsewhere, and some of which has been curiously overlooked by previous writers. We may add to this matter what we heard from Mulready's own lips, namely, that in the poor days of his Roman Catholic parents, he lived in Orange Court, Leicester Square (where Opie, and Holcroft too, once lodged); that he went to a boys' school in that court, and that he had for one of his schoolfellows little Edmund Kean. Mulready's own education was of a most miscellaneous character; he was alternately the pupil of Wesleyan ministers and Roman Catholic priests. This accounts, perhaps, for what happened in after-life—though, indeed, it also happens to most Irishmen who come to England in childhood. He did not precisely drift away from the Church in which he was baptized, but he ceased to have intercourse with its priests. He was a Christian, but of no special denomination, "rounding a long life," as Mr. Stephens says, "with half-unconscious heroism"; living well, in the main, "without demonstration or affectation"; working nobly from the time when his red, sturdy legs protruded from under the paternal bed, as he lay chalking St. Paul's on the floor, till the period when to look at the pleasant old man, and to fancy that he had ever had legs that might be called "sturdy," would seem an absurdity. He was, moreover, a more learned man than ordinary acquaintances would give him credit for. His knowledge of French, Latin, and Greek, he owed chiefly to self-instruction; and his modesty made the amount of that knowledge seem less than it really was. "From February, 1816, when he became an Academician, Mulready, to the day before his death, was an unfailing 'Visitor,' a most faithful member of the Council, and, as time went on, at last the depository of the traditions of the body, and in a way that was very different from that of the dull, obstinate, and ungenerous." On the 7th of July, 1863, the fine old Irish artist succumbed to a chronic spasmodic attack, and was, emphatically, at rest. On that day, David Roberts wrote in his diary, "7th. Died, at Linden Grove, William Mulready, R.A., aged 77. Poor Old Myl"—adding, "Went on the river in a small boat. Sketched the Tower." Roberts then seemed full of health, strength, and extensive purpose; but a brief year being over, he was the first Academician who took up his place in the Silent City after Poor Old Myl!

The First Man, and his Place in Creation, considered on the Principles of Science and Common Sense, from a Christian point of view; with an Appendix on the Negro. By George Moore, M.D. (Longmans & Co.)

Dr. Moore's book is a vigorous argument on the orthodox side, against the expressed views and the presumed inferences of Mr. Darwin and

his friends, in relation to the origin of the human race. In noticing Sir C. Lyell's 'Antiquity of Man,' we pointed out that upon such theories there could be no place for the popular Adam,—no first intelligent man; and this has since been seen by a multitude of readers, and contended against by a little army of authors and controversialists. To some of the authors we have already given space and attention, and we cannot, therefore, at present afford much space to another author and his argument on what is now regarded as a rather stale and unprofitable subject. It will not, indeed, die out; but the first shock against orthodoxy has been sustained, and men are recovering from its rude effects, and becoming callous, and, unhappily, very apathetic to the repeated imputation of ape origin. Even the great gorilla has had his day, and is no longer *ton*. We have been surprised to notice how few visitors pause to gaze at the two very grand gorillas in the Zoological Galleries of the Jardin des Plantes, at Paris, and the British Museum. Not long since they were surrounded by eager admirers. Alas for popularity! To-day not one of their imagined descendants bestows more than a moment's glance upon them. Any contemptible, chattering monkey throws them into the shade, and into oblivion.

Something, indeed, of the same kind may be said of Dr. Moore's book; for had it appeared when the controversy was at fever heat, when Darwin and Huxley, and Owen and Lyell were the names of the season, and when people of fashion took sides with primrose-coloured gloves, when ladies lisped Darwinism, and even dancing couples conversed upon natural selection, it might have secured a more extended reception. As it is, however, some passing novel, or Christmas picture-book, gift or child's book, will prove more attractive; and Dr. Moore must rest content with having done his best, and having found a select audience who will certainly listen to him with pleasure and gratitude. From his own stand-point he has unquestionably done well. Occasional passages are marked by a certain felicity of expression, and any reader will admit that the tone of the book is good. It is not scientific in form, but rather emotional, moral, and religious, and might prove a suggestive volume for young and religiously-disposed persons who care little for pure science, but who relish a moderate amount thereof embellished by flowing language. To such readers this volume would be the more acceptable because its author seeks to evolve the necessity of a first man, and a definite human creation from man's known emotional, moral, and intellectual characteristics, rather than from any anatomical distinctions. In so doing, however, he sometimes overstates his case as against Mr. Darwin, whose theory he styles "only a beautifully ingenious outrage to reason," and again, "In so far as it relates to man, it would subvert our moral standing in relation to God and our neighbour. It confounds the brutal nature which has no moral relations with man's nature, whose true dignity is all moral and spiritual. It links us with beasts and creeping things, not merely by creation, but by direct derivation of mental faculty, power, and affection."

In most writers of Dr. Moore's calibre one cannot avoid noticing and regretting their want of complete knowledge when they refer, however passingly, to the geological part of the controversy. In his prefatory remarks he says, "The subject of man's antiquity is not touched on in this volume," and then in the next page or two he does touch on it, but not so fully or fairly as he should if he treats it at all. His attempted fun about the presumed flint-making men who were "worse than wild beasts, and

ate one another, bones and all," is out of place; and surely as an M.D. he should know better than to write, "The state of the earth invalidates the notion that it has been inhabited by mankind for incalculable ages. Men ought certainly to have left the earthy matter of their bones behind them. We do not even find the required traces of phosphate of lime in the soil with flint hatchets, and the slight appearance of this material in soils in general is, by-the-bye, a fact rather opposed to the immense antiquity of man." Is it possible that Dr. Moore has ascertained that there is no phosphate of lime found together with the human-worked flints? Can he be ignorant of the fact that abundant bones have been found together with worked flints? Has he never seen the actual piece of a cave-floor, exhibited in one of our museums, in which bones and worked flints are embedded together? And does he for a moment conceive that the small portion of phosphate of lime derived from a casual settlement of men who, if they existed at all, existed many thousand years ago, would have pervaded a large district of gravel, or "soils in general," which may have undergone numerous geological and chemical changes? Here, perhaps, a little fun at the author's expense might not be out of place; but as we are out of space, we must let this pass, with an expression of satisfaction that Dr. Moore says no more on the subject. There may be some who hold in the main much the same views as himself, who nevertheless would feel much ashamed of such puerile remarks as those just cited. Neither would they relish the occasional stilted sentences which disfigure a few pages—and a few only. "The centre of each atom is the stand-point of Omnipotence, and all the forces are resolvable into the fixed experiences of the Will which produced them. As every force of matter acts from a centre, so also is it with the soul, and thus man is conscious of a centre in himself." Eccentric enough is this passage; we will quote no more of the same kind.

The last chapter of the book, entitled 'Work, Dominion, Worship,' is, perhaps, the best in it. The previous chapter on 'Man and Woman' will certainly be pleasing to the latter, if not to the former. How dear to the fair sex must an author be who exclaims, "To imagine man as not including woman is to imagine an impossible fact, a purposeless, unilateral humanity!"

The Treasury of French Cookery. A Collection of the best French Recipes arranged and adapted for English Households. By Mrs. Toogood. (Bentley.)

Mrs. Toogood's pretensions are humble, but her success is unquestioned. She does not profess to have done more than translate certain receipts for her own use, and to offer to the public what she herself has found of good service. There is certainly much more variety in her volume than in English works which cover a wider field, and are looked upon as indispensable. But this variety necessarily excludes completeness. She gives us new ways of cooking a multitude of things, but she does not attempt to give all possible ways, or even all known ways. One result is, that we miss some of our French favourites; and another is, that the book by itself is not a thorough companion to the kitchen. We must still supplement it by Miss Acton, or whichever of the existing manuals has our confidence. And even then, where is *potage à la bisque*? where *potage à la reine*? where the *turbot crème au gratin* that beguiles you into fearful excesses! where the *filets de sole à la Joinville*, and the *sole itself à la Voisin*? We are quite aware that

most of our readers will be as ignorant of this last dish as Mrs. Toogood's readers can be, and we are not sufficiently versed in writing receipts—fond as we are of reading them—to supply his deficiency. But the dish will be found in perfection at the *Café* which is its namesake, and the owner of which when asked the reason of the name will draw himself up proudly, and reply, "*Parceque, Monsieur, c'est moi qui a créé ce plat!*"

How far the receipts translated by Mrs. Toogood will answer in English houses is rather a difficult question. For some we lack the patience, for others the science, for others the materials. England is, no doubt, the richest country in the world, but all her sons are not equally well provided. Many dishes which are cheap and frequent on the Continent are inaccessible to small incomes in England. In one place Mrs. Toogood gives several receipts for creams, and tells us that a quart of good cream "is to be preferred." We have not the slightest doubt of it, and we believe it may be had in Paris; but as Mrs. Toogood tells us of shops where certain things are to be got, she might fairly have told us where cream is to be had in London. She might have told us where to buy brains at a price at all approaching foreign prices. Our only revenge is that in some materials we are better off than our French teachers. We need not lard our roast beef or baste it with butter, especially after the opening of the Christmas markets. And what would an alderman say to larding a haunch of venison and soaking it in oil for twenty-four hours? We do not want fat, if we are in want of brains; yet it is strange that the price of brains should be so high in England, compared with the price of them abroad, and that as a necessary consequence they should be used so much more in continental cookery. The little dishes of fried brains which are so common in Italy are scarcely ever seen on our tables. Mrs. Toogood, indeed, gives us receipts for brains; but the very words of the receipts drive us to despair. "Take three or four brains!" It has been said that the worst use to which you can put a man is to hang him; but if you can get three or four brains, you might surely do more with them than cook them. Then the brains are to be flavoured with the juice of a lemon, as if some such pungent seasoning was not often contained in them. But this is better than the other alternative—"Stir the sauce and make it thick enough to conceal the brains." The text is tempting, but we will not enlarge upon it.

There are certainly more tempting texts yet in Mrs. Toogood's book, as in most works on cookery. How can we read without emotion that an article to be braised is laid lightly on a seasoned layer as on a nourishing bed! What thoughts thrill through the bosom at the talk of veal "yielding up its gravy," and of thin bread being placed under snipes till it is "impregnated with their gravy"! Reading that "any game may be dressed by this receipt," we cannot fail to think of the French epicure's raptures over a sauce, "*Monsieur, avec cette sauce on mangerait son propre père!*" We feel the great responsibilities attaching to cooks when we are told that "*Béchamel sauces may be used with different dishes; judgment must be used in an appropriate choice of them.*" We learn with awe that in large kitchens it is necessary to be prepared with what is required without delay or failure. An experienced cook, we are told, will be guided by the laws of affinity. The utmost scorn is reserved for the incompetent ones who are not guided by such laws—"After the fish has been boiled in it, the liquor should not be thrown away, which is what ignorant cooks do." Scathing, indeed, if igno-

rant cooks could learn, or if some of them could read! But a loftier severity is shown towards those who so profoundly misapprehend the nature of thickening as to suppose it is used only to give sauces a substance and consistence. "This is a mistake. If the only object were to thicken, flour alone would answer that purpose. Thickenings are used to combine perfectly the different component parts of a dish without becoming predominant." Naturally, when the art of cooking is invested with such attributes of sublimity, even the passive agents take as much pride in being cooked as the active ones take in cooking. Mrs. Toogood has an admirable receipt for curing pond carp of the taste of mud—"it may be got rid of by making the living fish swallow strong vinegar. This brings out a dampness on the body, which may be removed when the scales are scraped off. The flesh becomes firm, and the taste of mud is not perceptible." Would not an English carp, brought up to believe in the liberty of the subject, revolt against such treatment? Yet the French carp swallows the strong vinegar in full anticipation of its gastronomical immortality. Dampness oozes out from it as the courage oozes out of the palms of Acres's hands: but it suffers in silence.

Perhaps in course of time this spirit of self-sacrifice may be imparted to English cooks and English fishes. The study of Mrs. Toogood's book will do much to help on this good time. At first, indeed, there will be some rebelliousness. Our less cultivated classes are suspicious of all things French, and it is too plain that Mrs. Toogood's receipts are of French origin. The translation is occasionally too stiffly literal. Not that we meet with such descriptions of dishes as "stewed at Marengo" and "jumped at the good woman,"—which the linguist of a French restaurant considered the right equivalent for *à la Marengo* and *sauté à la bonne femme*.

OUR LIBRARY TABLE.

Essays on Symbolism. By Henry C. Barlow, M.D. (Williams & Norgate.)

THE author of this volume writes on a very interesting subject—one connected with the highest conceptions which the human mind has expressed, and indicative of the characteristic ideas of peoples the most diverse. His treatment of the various topics is learned, instructive, ingenious, showing extensive reading, a philosophical spirit, a taste for Art, and a large acquaintance with forms,—temples, structures, and monuments. Those who wish to get good general ideas of symbolism cannot do better than study these pages, where much is compressed in a small space, but without obscurity. The author writes clearly and simply, like one who has studied well what he treats of, and is able to put his matter into fair shape and proportion. The first essay is the longest and best, in which it is shown that symbolical principles are derivable from the two great fundamental agents in nature, life and light; and that their influence through architecture, sculpture, and painting, as also through poetry, has descended from the most remote antiquity, in a tolerably connected series of representations, down to our own day. The only erroneous statement in it is the paragraph on the 22nd page respecting the doctrine of immortality in the Book of Job. The other essays are on the sacred tree, and on sacred trees. The last part of the last essay, entitled "Symbolical Correspondences," is full of ingenious thoughts, mixed with some questionable statements. The author is less at home when he enters into the region of theology. We commend the volume to our readers as highly suggestive, and congratulate the profound Dantophilist on his small but useful volume. The whole subject is worthy of his study; and should he undertake to treat it at length in a philosophical method, he might produce a valuable supplement

to the great work of Creuzer, even in its amplified French form by Guignaut.

Memoirs of the Confederate War for Independence. By Heros Von Borcke. With a Map. 2 vols. (Blackwood & Sons.)

WHILEST Confederate sympathy was active in certain sections of English society, Heros Von Borcke's descriptions of the American war were not without admiring readers; but we are inclined to think that they will meet with a less favourable reception from their former applauders, and with no acceptance at all at the hands of the great body of the English public, now that they have been gathered from the pages of the magazine in which they originally appeared, and are again offered to the world by the German officer who, besides acting as champion of the slave-owners, makes himself the "heros" of his title and his book.

Practical Essays on Popular Subjects. Written for the National Eisteddfod of Wales. By Mrs. Lewis Snow. (Day & Son.)

FOR the longest of the poor papers here offered to that much-suffering and sorely-abused creature the general reader, Mrs. Lewis Snow is proud to say that she received a prize of four pounds, and a silver medal, "at the national Eisteddfod held at Swansea, September, 1862"; and in thus receiving four sovereigns and a medal that cannot be worth, for the melting-pot, less than two florins, it is in our power to assure the fortunate Mrs. Lewis Snow that she received just about eighty-four shillings more than the worth of her whole book. Success seems to have made her unreasonable. Not content with the applause of the Eisteddfod and the prize-money, she now follows in the steps of Oliver Twist, and "asks for more." Apparently her solicitations have already in some cases met with the desired result; for she prefaces her sorry little volume with a list of subscribers, one of whom has actually gone the length of ordering thirty copies of the "*Practical Essays*."

Town and Country Sketches. By Andrew Halliday. (Tinsley Brothers.)

THOSE who have laughed over Mr. Andrew Halliday's "*Everyday Papers*" and "*Sunny-side Papers*" will not be disinclined to spend an hour over the same jovial and observant writer's latest budget of articles gathered from the columns of *All the Year Round*. In purpose, style, humour,—indeed, in every respect with the exception of the freshness which characterized the earlier essays,—"*Town and Country Sketches*" so closely resembles its precursors, that we are disposed to think the slight sense of dissatisfaction, which qualifies our otherwise favourable opinion of its contents, is attributable to want of novelty on the part of the book, rather than to any diminution of vigour on the part of the writer. "*Mr. Whelke's Amusements*" contains an excellent description of a music-hall, and much good may be said of the entire series of "*Whelke Papers*"; but notwithstanding the strength and merit of most of the sketches, we close the book with an impression that, if he wishes to retain his hold on public favour, Mr. Halliday had better make his next literary attempt in a new direction. Through incessantly working the same vein of pleasantry, and harping on one set of strings for the repetition of results already obtained, there is reason to fear that he may sink into a mannerist, and miss the rewards that are quite within the reach of his natural cleverness.

Handy Book of Rules and Tables for Verifying Dates of Historical Events, and of Public and Private Documents; giving Tables of Regnal Years of English Sovereigns, with leading Dates, from the Conquest to the Present Time, 1066—1866. By John Bond. (Bell & Daldy.)

No man could know much better than the Assistant-Keeper of Public Records the use of a book which will enable all who refer to it to ascertain the exact date of important events. The above title shows to what extent aid is given in this respect to the historical inquirer. We need only add, that the promise of the title-page is perfectly realized, and that the book not only deals with dates, but with interesting matters incidental to them. Thus, in allusion to the adoption in the last century, by Parliament, of the New Style, Mr. Bond

notices that a bill for the introduction of that style was read a second time in the House of Lords on the 18th of March, 1584-5, but was not proceeded with. This will be new to most readers, and so will many corrections of dates which have been long accepted as defining the exact period of certain events. Mr. Bond has worked independently, relied on no precise year, and fixed his dates according to the result of his own researches.

Geology for General Readers: a Series of Popular Sketches in Geology and Palæontology. By David Page. Second and Enlarged Edition. (Blackwood & Sons.)

HAVING commended the distinguishing merits of the first edition, we are glad to welcome the second of this work. This acceptance is another illustration of the truth that good geological books, however elementary, find an increasingly large number of purchasers; and every travelling geologist knows how often he is asked to name the best popular introduction to the science. We ourselves have had this inquiry addressed to us, this present year, amongst the Alps of Switzerland and the Alps of Wales; and we have before us, at this moment, a pamphlet relating to Wales, in which we read this sentence: "The little and poverty-stricken town of Montgomery, with its immediate neighbourhood, contains more than a dozen thoroughly-informed and deep-thinking geologists; whereas a traveller might visit a dozen towns of the same size in Leicestershire, Lincolnshire, or East Yorkshire, without meeting with a single geologist." Thus there are geologists where they are least to be expected; and, doubtless, such works as Mr. Page's get a footing in remote as well as popular places. This edition contains three new chapters,—one on Metamorphism, another on the nature and origin of Veins, and the third on 'What we owe to our Coal-fields.' The second and third of these are very slight and sketchy; but the first does more justice to its subject, which is one of high interest and of very recent investigation. In a few pages the author summarizes what may be popularly observed respecting the obscure processes by which every rock, whether shale, sandstone, limestone, coal, ironstone, lava, or greenstone, begins from its deposition to pass on to diverse and newer conditions by one or other of the agents of metamorphism. These are heat in its various modes of action, as by contact, by transmission, conduction or absorption, by the permeation of hot water, steam and other vapours; electric and galvanic currents in the earth's crust; chemical actions and re-actions; mechanical pressure, and new molecular arrangements by pressure and motion. Such agents are, either separately or conjointly, solidifying, hardening and crystallizing all formations. The oldest and longest-deposited rocks have suffered the greatest pressure and the completest metamorphism; and we reap the benefit economically from such rocks in the hardest building stones and the finest and most fissile slates. But we do not as yet know the full operations of this subtle and remarkable principle. So little has as yet been published in English respecting it that a clear, brief chapter like the one in this volume is a particular advantage to the beginner. In our notice of the first edition we entered into the course of argument taken in the last chapter of the book, entitled 'What of the Future?' Mr. Page has not enlarged this sketch, as he might so advantageously have done, and as we hope he will do if a third edition be demanded. Twenty additional pages on this head would not materially increase the bulk of the volume, and would very much heighten its interest to geologists, who, of course, find nothing new to them in the previous chapters, however pleased they may be to commend the work to general readers. Having now read several of the chapters a second time, we can confidently renew our expressions of approval, although Mr. Page may yet make improvements in another edition. We should be disposed to say that the distinguishing merit of this volume is an orderly arrangement of the most important elementary geological truths in flowing and often felicitous language, the whole being placed in the full light of present knowledge.

A Greek Primer for the Use of Schools, by the Rev. C. H. Hale, M.A. (Rivingtons), is an attempt to improve upon existing grammars by making use of the labours of German grammarians, particularly Kühner, than whom a better model could hardly have been chosen. We think it would have been better if he had been followed more closely. As it is, this Greek Primer, which is not without its good points, can scarcely be considered a useful practical book. There is a want of broad distinctness of outline in the arrangement, and an excessive complexity of detail, particularly in the treatment of the verbs, the tables of which are too numerous and puzzling for beginners. In our opinion, it is a mistake to require the pupil to master the personal terminations before learning a complete model verb. We object also to the omission of accents and the dual number in the body of the work; nor do we consider the evil remedied by the appropriation of an appendix to each subject at the end. Another serious deficiency is the total absence of any Syntax. There is no danger of Wordsworth's Grammar, or the forthcoming one, based upon it, being superseded by this, which is less serviceable than others already published.—The works hitherto issued in the Clarendon Series fully bear out its claims to special consideration; and *The Golden Treasury of Ancient Greek Poetry*, by R. S. Wright, M.A. (Oxford, Clarendon Press), is a worthy addition to it, being a superior selection, edited in a superior style. Choice passages are given from about forty authors, under the heads of Epic Poets, Lyric Poets, Dramatic Poets and Alexandrian Poets, and Epigrams, with a due prominence of those most distinguished and best fitted to serve as representatives of ancient Greek poetry. It is indeed a rich repository of thought and language for all who know how to use it. Appropriate headings are affixed to the various passages, to give some idea of the general subject, and, in cases of difficulty, brief notes are subjoined, to indicate the train of thought. The latter part of the volume is devoted to historical surveys of the different kinds of poetry, and annotations upon the text, in which no difficulty is left unnoticed or without satisfactory solution, if any is possible, while at the same time there is no waste of words. A master's hand is visible in the explanation and occasional translation of difficult passages. In the preparation of both text and notes the best authorities have been consulted and turned to good account.

The following books suitable to the present season lie on our table: *Our Own Fireside*, Vol. III., edited by the Rev. Charles Bullock (Macintosh),—*Awake or Dreaming? a Dog's Story*, written and illustrated by the Brothers Wagtail (Day & Son),—*Alice's Adventures in Wonderland*, by Lewis Carroll, with illustrations by John Tenniel (Macmillan),—*The Child's Natural History, in Words of Four Letters*, written and illustrated by A. L. Bond (Routledge),—*Tottie's Christmas Shocks*, by Nelsie Brook (Partridge),—*The Infant's Magazine*, Vol. I., by the Editors of 'The Children's Friend' (Seeley),—*The Children's Friend*, Vol. VI. (Seeley),—Vol. XII. of *The British Workman*, dedicated to the Industrial Classes by their sincere friend, the Editor (Partridge),—*The Band of Hope Review*, Vol. XI. (Partridge),—and *Stodare's Fly-Notes; or, Conjuring made Easy*, by Col. Stodare (Routledge).

BOOKS FOR CHILDREN.

DURING the last few days the publishers of literary toys have displayed such an increase of activity, that after all our anticipations of an unusually dull children's season the book-stalls will make a brave show of gaudy volumes for nursery and playroom during the Christmas holidays. The author of *A Christmas Tree, with Three Carols for Stems*, *Thirty-nine Songs for Branches*, and *One Thousand Lines for Leaves, set in a Papyrus Vase, complete, for One Shilling per Root* (Newby), commands his doggerel to the mercy of critics in the following terms:—

If in these thousand lines, but one,
O reader, should please thee,
Send us thy gracious benison,
Eftsoons, to deck our Tree.

Pardon the rest for the one Line
Here winning thy kind look:
If, by thy favour, one leaf shine,
No fear for all the book.

Encourag'd by the certain heaven
Awaiting that one smile,
Let burgeoon-room for all be given,
If that smile last the while.

Answering this appeal in a manner suitable to the author's style, we reply,—“Unfortunately for thee, O writer, we have perused the nine hundred and ninety-nine of thy lines that are execrably bad, and have not encountered the one line that thou didst hope would win our favour. Therefore, we cannot ‘send thee our gracious benison eftsoons’; and, if we were to comply with thy rather impudent request, we do not quite see how thou wouldst be able to put our gracious benison upon a tree.”—Messrs. Routledge & Sons have issued two excellent volumes for little children who are learning their letters, or, having learnt them, are endeavouring to master the art of reading “easy words.” Of these books—*The Child's Coloured Gift-Book*, with one hundred Illustrations, and *The Child's Coloured Scripture Book*, with one hundred Illustrations—the “gift-book” is by far the better. It begins with two series of coloured illustrations of the alphabet, each letter being impressed on the infant-pupil's mind by a comic illustration, and another picture not provocative of laughter. Some of the comic pictures are exquisitely ludicrous; and the easy reading lessons that follow the illustrations of the alphabet will be alike serviceable to children and teachers.—Without troubling himself to inform the public of the exact nature of his contribution to juvenile literature, Mr. William H. G. Kingston, in *The Fire-Ships: a Tale of the Last Naval War* (Low & Co.), reproduces in a single volume the novel which he published under the same title some four years since, and on which we then passed an unfavourable judgment. The book now issued bears on its title-page the words “Illustrated Edition,” but this announcement is not sufficient to put papas and mammas on their guard so that they may not throw away upon a poor novel the money which they would expend on a good story for the playroom. All our objections to ‘The Fire-Ships’ as a work for adult readers apply with tenfold force to the work now that it is offered for the diversion of little people.—*The Adventures of a Griffin on a Voyage of Discovery*, written by Himself (Bell & Daldy), is a vivacious and laughable narrative of naval adventure and perilous incidents; some of the illustrations which accompany the letter-press of the book are very spirited.—Another narrative of experiences in distant parts that will suit the taste of boys is E. Goodrich Smith's translation from Hildebrandt's German of *A Winter in Spitzbergen: a Book for Youth* (Gall & Inglis).—From the cold of the Arctic Ocean it is pleasant to pass to the parched and glaring scenery of an Australian Christmas, under the guidance of the author whose *Station Dangerous; or, the Settlers in Central Australia: a Tale Founded on Facts; and other Tales for the Young* (Nisbet & Co.), would be less open to objection if it were less largely surcharged with some of John Bull's most unamiable qualities.—*The Fountain of Youth*, translated from the Danish of Frederik Paludan Müller by Humphrey William Freeland, with Illustrations designed by Walter J. Allen (Macmillan & Co.), is a performance that reflects much credit on the translator who commends his volume to his countrymen in some stirring verses that close thus—

I love the land where still, 'mid laughter thrilling
Through joyous hearts that live but in applause,
With wit's light quiver Virtue's task fulfilling.
The listening thousands Holberg's genius draw.
I love the land where still, with tempests rolling
Around him, in a kingdom half o'erthrown,
Earth's mightiest sculptor stands, a world controlling,
Inspires all art, and breathes in living stone.
Go, little book! upon the conqueror's morrow
A true heart fawns not,—turns to fame more bright,
Where Denmark's genius o'er the realms of sorrow,
And Time's dark cloudland scatters golden light.

—To Mr. Thomas Miller, a veteran writer who some time since showed signs of failing energy, we tender our cordial congratulations on the recovery of power manifested in *My Father's Garden*, with forty Illustrations (Routledge & Sons),—a tale that describes a successful struggle against adverse cir-

circumstances in a lowly path of life. — *Hollondell Grange; or, Holidays in a Country House*, by George Manville Fenn (Routledge & Sons), sets forth in a sufficiently attractive manner the pleasures to which a London boy may look forward on preparing to spend his Midsummer holidays in the home of his country cousins. — Of Mrs. Eiloart's *Ernie Elton at School; and What Came of his Going There* (Routledge & Sons), we have already spoken in our notice of the serial in which it originally appeared. — Again we are able to commend the ingenuity of Miss Anne Bowman, who follows up her 'Original Double Acrostics' with *More Original Double Acrostics; with the Solutions to the First Series* (Routledge & Sons). — In another little book of the same class—*Heath and Gorse, One Hundred and Forty-one Double Acrostics* (Dublin, Hodges, Smith & Co.)—lovers of verbal puzzles may find plenty of amusement. — But the present season has brought us in this department of literature nothing more noticeable for misdirected ingenuity and solemn eccentricity than Mrs. Ogilvy's *Sunday Acrostics, selected from Names or Words in the Bible* (Warne & Co.). — Mrs. Henry Mackarness's *The Village Idol*, with Illustrations (Routledge & Sons), will not please young ladies the less because the author of 'A Trap to catch a Sunbeam' is a firm believer in the theory that a load of grief can be washed from the heart by a copious flood of tears. Women are universally found to be supporters of a theory which furnishes them with a decent apology for their proneness to those watery manifestations of grief, from which it is reasonable to suppose that they derive a certain sort of relief at moments of mental disturbance. — Of four children's books written with religious purpose, now lying on our table, the best is *The Children of Blessing*, by the Author of 'The Four Sisters,' with Illustrations (Routledge & Sons), a collection of eight stories upon the blessings uttered by the Saviour in his Sermon upon the mountain. — A similar work executed in a less satisfactory style is *The Lake of the Woods: a Tale illustrative of the Twelfth Chapter of Romans*, by A. L. O. E. (Gall & Inglis). The same author, giving us a poor sermon instead of a pleasant tale, and thereby doing no slight injury to her well-deserved popularity with children, inflicts upon us *The Wanderer in Africa: a Tale illustrating the Thirty-Second Psalm* (Gall & Inglis). Religious stories are seldom very entertaining or profitable productions; and from those of them that are written for children, it is not wonderful that boys and girls are apt to turn aside as they would from a dose of physic sparingly covered with jam. — *Golden Links*, by the Authors of 'The Babes in the Basket,' with Coloured Illustrations (Warne & Co.), may be recommended as a serviceable medicine; but when we are bent on purchasing a box of sweetmeats for our little ones, we cannot thank the dealer who bids us change our mind, and buy a bottle of Gregory's Powder. The publishers of 'Golden Links' may, however, be thanked for two capital picture-books—*The Three Little Friends*, Twenty Pictures, by Oscar Pietsch (Warne & Co.), and *Little Folks*, Twenty Pictures, by Oscar Pietsch (Warne & Co.). — For such mere trash as *Sketches and Incidents; or, Summer Gleanings of a Pastor's Vacation*, by John Todd, D.D. (Gall & Inglis), a bare announcement is too much attention. — The author of *Roundabout Rhymes and Roundabout Stories, with Squareabout Pictures*, by C. H. R. (Dean & Son), is herewith reprimanded for sending us old material without any intimation concerning its antiquity. — Our notions of pleasant and healthy boyish feeling disagree with those of the author of *The Three Little Piggies and the Old Oak Tree* (Dean & Son), who in language of approval represents three young gentlemen as thoroughly enjoying the task of mercilessly flogging three little pigs that have strayed from their sty. The rhymester concludes his account of the pig-hunt thus:—

The lads with their sticks now went away;
But many a day,
A laugh had they

About the young piggies, so lively and gay,
Who stole to the common, to gobble and play;
Of the famous hunt, and the jolly good fun,
Of whacking them well in the course of the run.

Parents who wish to teach their children to delight in torturing animals may as well buy 'The Three Little Piggies.' — The story that gives its name to the volume is the longest and best of the five uncommendable stories contained in *Grace Harvey, and other Tales* (Edinburgh, Nimmo). — The misleading title of *Memorable Wars of Scotland*, by Patrick Fraser Tytler (Edinburgh, Nimmo), is imperfectly explained by a Preface, which says — "The following accounts of the Memorable Wars of Scotland, during the period of that country's history embraced between the years 1249 and 1603, are taken from Patrick Fraser Tytler's 'History of Scotland, from the Accession of Alexander III. to the Union,' which work has been universally acknowledged by the most eminent critical authorities as the ablest and most comprehensive one on the subject which has yet been published." The descriptions thus drawn from another work relate to the battles of Largs, Stirling and Falkirk, Bannockburn, Harlaw, Flodden, Pinkie, Homildon Hill and Langside, the siege of Edinburgh and the battle of Glenlivet. — According to his wont at Christmas-time, the scribbler who trades on Samuel Goodrich's *nom de plume*, and persists in calling himself Peter Parley, sends us a volume for boys whom he doubtless thinks himself peculiarly qualified to inspire with love of fair play, and with generosity to dead men, who can no longer preserve their own reputations from injury. This year the incorrigible literary personator writes about *Heroism of Boyhood; or, What Boys have done*. The man's book is full of foolish blunders; and many of his brief sketches of eminent men have no relation whatever to the subject indicated by his catchpenny title. His sketch of George Stephenson—comprising several of Mr. Smiles's retracted blunders, and other errors for which the appropriator of Samuel Goodrich's name must be held personally responsible—is a droll exhibition of ignorance and literary incompetence.

LIST OF NEW BOOKS.

Babington's Hidden Sense, Seek and Find, 12mo. 1 s. 6 d.
Biddle's The Fortune of Fairmount, 3 vols. post 8vo. 21 s. 6 d.
Biglow Papers, Second Series, 12mo. 3 s. 6 d.
Blanchard's Yesterday and To-day in India, 4 vols. 8vo. 10 s. 6 d.
Bourne's English Merchants, Memoirs of, 8 vols. cr. 8vo. 34 s.
Budge's Life of Coal, or Faces from the Fire, roy. oct. 42 s.
Campbell's A Woman's Confessions, 3 vols. post 8vo. 21 s. 6 d.
Carpenter's Penny Readings, Vol. 16, 16 s. 6 d.
Cassell's Devout Christian's Help, 12mo. 2 s. 6 d.
Cassell's Christmas Tales in Verse, 2 vols. 1 s.
Christie's Book of Revelation, 8vo. 7 s. 6 d.
Claribel's Christmas Book of Sacred Songs, 4to. 3 s. 6 d.
Cobb's Hours of Work and Play, 8vo. 6 s. 6 d.
Doppe's Sandwich Islands, 12mo. 2 s.
Duckens and New Friends, 12mo. 1 s. 6 d.
Emsell's Meta's Letters, a Tale, post 8vo. 10 s. 6 d.
Fairy Land and Fairies, from Sketches by E. S. A., illus. 4 s.
Floral Decorations of Village Churches, 12mo. 1 s.
Foster's Our Premier, or Love and Duty, 8vo. 3 s. 6 d.
Gardner's The Cloud and the Beam, 12mo. 1 s. 6 d.
Glover's Short Treatise on Sin, based on Work of Muller, 3 s. 6 d.
Herbert's (Lady) Impressions of Spain in 1665, imp. 8vo. 21 s.
Hodgkin's Narrative of Journey to Morocco, imp. 8vo. 21 s. gilt.
Hunt's Modern Arithmetic, 12mo. 3 s. 6 d.
Latham's Dictionary of English Language, Vol. 1 (2 Parts), 4to. 70 s.
Lodge's Peasage and Baronage, 1807, royal 8vo. 51 s. 6 d.
Macdonald's Unspoken Sermons, 12mo. 5 s.
Martin's Statesman's Year-Book, 1867, 8vo. 10 s. 6 d.
Martineau's Endeavour after the Christian Life, 8vo. 7 s. 6 d.
May and her Friends, by E. M. E., illus. 8vo. 7 s. 6 d.
Meredith's Victoria, 3 vols. 8vo. 21 s. 6 d.
Modern Culture, its True Aim, &c., by T. Mann, 8vo. 8 s. 6 d.
My Sister Dagmar, a Tale, by O. A. M. W., 3 vols. post 8vo. 21 s.
Original Double Acrostics, by A. A. W., 12mo. 2 s. 6 d.
Peyton's The American Crisis during Civil War, 2 v. post 8vo. 21 s.
Pulpo's Metems, Anecdotes and Falling Stars, post 8vo. 6 s.
Progress of England, a Poem, 12mo. 3 s. 6 d.
Raymond's Art of Flirting avoiding Ordealy, 8vo. 8 s. 6 d.
Richard's (Rev. Samuel) Selections from Sermons, 8vo. 8 s. 6 d.
Sadler's Emmanuel, or the Incarnation of the Son of God, 8vo. 10 s.
Savage Club (The) Papers, edited by Halliday, post 8vo. 12 s.
Schaffner's Noddy's Paragonage, 2 vols. post 8vo. 21 s.
Scott's Poetical Works, Globe Edit., fcap. 8vo. 3 s. 6 d.
Shaw's Leaves from the Book of Life, 8vo. 7 s. 6 d.
Smith's Hymns of Christ and the Christian Life, 12mo. 6 s.
Southgate's Meetings about Heaven, 8vo. 7 s. 6 d.
Streeton's The Gires of Burnet, 2 vols. post 8vo. 21 s. 6 d.
Thomson's Institutes of Laws of Ceylon, 2 vols. 8vo. 42 s.
Thompson's Swiss Scenery, illus. by photos, fello. 42 s.
Thorburn's Treatment of Tedious Labour, 12mo. 1 s. 6 d.
Three Little Friends, 3 illustrations by Pietsch, imp. 8vo. 2 s. 6 d.
Tyndale's Holy Sermons and Falling Stars, post 8vo. 6 s.
Walton's Peaks and Valleys of the Alps, sm. folio. 8 s. 6 d.
Webster's Woman Bold, and other Poems, 8vo. 7 s. 6 d.
Weld's Florence the New Capital of Italy, post 8vo. 12 s. 6 d.
Whitfield's The Word Unveiled, 8vo. 8 s. 6 d.
Without a Friend in the World, 8vo. 2 s. 6 d.

THE REV. EDWARD HINCKS, D.D.

On Monday, the 3rd of December, the Rev. Dr. Hincks died after a short illness. He was the son of the Rev. Thomas Dex Hincks, LL.D., pastor, at the time of his son's birth, of a Presbyterian congregation in Cork, and subsequently Professor of Hebrew and other Oriental languages in the Belfast Academical Institution. Dr. E. Hincks

was born in August, 1792, and was therefore seventy-four years of age at the time of his decease. After receiving a careful education under his father's care, he entered Trinity College, Dublin, at a very early age, and obtained a fellowship before he was twenty-one, being *facile princeps* of all the candidates. The examination for this honourable place turns mainly on mathematics, in which science he was at home. Having taken orders in the Church of England, he became rector of Ardrea, one of the College livings, whence he was promoted to Killyleagh, in the diocese of Down, where he spent the last forty-one years of his life. His talent for deciphering texts in unknown characters and languages was wonderful. It was applied to the study of Egyptian hieroglyphics, and to the inscriptions in the cuneiform character found in Persopolis, Nineveh, and other parts of ancient Assyria. In this field especially he laboured for years with great perseverance and success, having been the first to ascertain the numeral system, and the power and form of its signs by means of the inscriptions at Van. He was one of the chief restorers of Assyrian learning, throwing great light on the linguistic character and grammatical structure of the languages represented on the Assyrian monuments. Living in a remote country village, with very limited means at his command, he had to contend with great difficulties. In London, beside the British Museum, he would have accomplished more than he did.

Most of his publications appeared in the *Transactions of the Royal Irish Academy*. He also read several papers at meetings of the British Association, wrote articles in the *Journal of Sacred Literature* and letters in the *Athenæum*. He was, besides, the author of a Hebrew Grammar.

This profound and original philologist, whose name will ever be associated with the names of Rawlinson and Oppert, was highly esteemed on the Continent, especially in Germany, where his judgment, caution and conscientiousness in deciphering inscriptions were duly appreciated by such scholars as Roediger and Ewald, the latter of whom spoke of him to the present writer in laudatory terms.

This is not the place to mention his opinions on ecclesiastical matters or the question of national education—subjects on which he wrote with a courage and independence that hindered his promotion in the Church. Nor can we enumerate the principal essays in which his rare learning is conspicuous. With all his attainments, he was simple-hearted, good, upright, honourable, and kind; a man loved, as well as admired, by those who knew him. Ireland may well mourn his loss. As she reckons up her scholars, the name of Edward Hincks cannot be forgotten as long as learning, genius and goodness live in their influence upon future generations.

THE WESTMINSTER PLAY.

THE 'Andria' is of all the plays of Terence that which goes off with most spirit, when it is represented by an efficient company of comedians. It is a play which is said to act itself. Forty years the 'Andria' was famous at Westminster, for the splendid acting of the boy who was intrusted with the part of *Pamphilus*. He was intended for the Church; but the rapturous applause of the competent judges of that day—it was at the close of the seventeenth century—waited him on to the stage. Long after Barton Booth had created the part of *Cato*, Westminster continued to talk of his *Pamphilus*, and to allude to the great representative of the part in prologues and addresses. Steele took the 'Andria,' and from its framework, pulled to pieces, constructed the very best of his comedies, 'The Conscious Lovers.' He not only did this in order that the old Westminster boy, Booth, might act the anglicized *Pamphilus*, namely, *Young Bevil*, but expressly for the sake of the great quarrel-scene in the fourth act between *Young Bevil* and *Myrtle* (played by Wilks), corresponding to, yet only in the faintest degree resembling, the one in the 'Andria' between *Pamphilus* (Mr. E. C. Bovill) and *Charinus* (Mr. W. J. Dixon). In Steele's comedy this scene used to be listened to with breathless attention,—a compliment which must have been won by the acting, for the language

is commonplace enough; far inferior to that of the scene in the Latin play, which was so well delivered by the two gentlemen named above that if Dr. Busby could have been in front of them they would have taken place among those especial favourites of his whom he used to call his "White Boys." Taken altogether, the piece was most creditably acted. If there were strong characteristics of the *amateur* in some, a restlessness which now and then marred admirable conception, in others there was a repose, finish, perfect self-possession and as perfect enunciation, which are not invariably found in the professional actor. In this respect Mr. Bickmore (*Simo*) distinguished himself, his natural qualities helping him to that end. Again, the by-play of *Davus* (Mr. S. H. West) showed the earnestness with which he went into a part, throughout which there was good comic acting; and if it appeared a little over-acted to some, it was (when not on the stage with *Simo*) perhaps because of the under-acting of some of his comrades, who fell back into private life, as it were, as soon as they concluded each particular speech. Then the *Chremes* of Mr. L. Shapter was inferior only in stage importance to Mr. Bickmore's *Simo*. Of the women *Mysis* (Mr. E. Bray) was very good; old *Leobia* (a little bit played by Mr. C. F. Maude), wonderfully effective.

We must add, too, that even Archbishop Whately, could he have been present, would not have had to renew his protest against the Westminster plays. He once said that he would be content to have a translation of Terence placed in the hands of English mothers, and to abide by the decision at which they would certainly arrive. A translation of the play as it is represented would win an adverse verdict neither from English mothers nor daughters. The stage will never fail, we hope, to be annually built up in the dormitory. There has always been a love for it; and the endowment of those boys who were once called "*Bishop's boys*," was founded by Bishop Williams, a great lover of plays himself, one who saw no harm in having them acted before him in his own palace at Buckden. Such a play as the '*Andria*' need not have offended the matrons who first heard it at the festival of Cybele; and as it is given at Westminster, if they might find it a little drier than of old, they would have been charmed with the earnestness of manner which marked the delivery of all the moral maxims and good proverbial sayings, on the part of our ingenuous youth. In the "*Ne quid nimis*" of *Sosia* (Mr. H. E. Wright), there was as much meaning as you might look for in a sermon on happiness, and not find it.

Compared with the "Exercises" with which the opening of the School used to be celebrated, the Comedies of Terence, which illustrated the periodical close of its last term in the year, are instructive exhibitions. Parson Adams said of '*The Conscious Lovers*,' that it was as good as a sermon; and so are parts of its prototype, the '*Andria*,' if you choose to apply them. There is sharp truth in the cynical sayings of *Simo*, but there is a fine eulogy of fidelity in *Pamphilus*, while *Charinus* dissects society as keenly as Polonius does; and a man might go home with something less calculated to help him on smoothly in life than what he will find in the counsel of *Byrrhia* (Mr. H. R. Du Pré).—

— *Charine, quoniam id fieri quod vis non potest, Velle id quod possit.*

There was nothing half so wise as this in the Exercises spoken by several young noblemen and gentlemen at Westminster, in January, 1731. The poetical thesis consisted of a parallel between the Ancients and Moderns, in which, we are told, "were handled many notable subjects," among others, the royal hunt at Windsor, organs, heraldry, actors, architecture, wit, poetry, ladies of Elizabeth's time, law, Heydegger's entertainments, love, and tobacco. The young nobleman who delivered the lines on tobacco, praised it in leaf or powder, as "*The old man's solace, and the student's aid*," as "*the dear concomitant of nappy ale*," and, finally, addressing the plant, the reciter exclaimed, "*In smoke thou'rt wisdom, and in snuff thou'rt wit*." The Hon. Mr. Vane had lines to deliver in which he laughed at learning, and talked of himself and Pitt tossing obnoxious persons in a blanket.

Another young gentleman proved the existence of the Ancients in verses which ended, not much in Terence's "*manly, pleasant strain*," with declaring—

The case beyond dispute is clear,
Or else how came the Moderns here!

How long these "Exercises" continued to be delivered annually, we are unable to say; but they had in them all that was objectionable in Terence, with nothing of his wit, his wisdom, his depth, or his brilliancy.

THE REGISTRATION OF COPYRIGHT.

"A Publishing Agent" calls attention to the defective and unfair system of "original registration" at Stationers' Hall. It is certainly very original. But here the blame is attributable to an oversight of the legislature, and not to any misconduct of the registrar. Under the Copyright Amendment Act, he is entitled to a fee of *five shillings* for every entry of a work in the register. The person claiming the copyright fills in and signs the requisite printed form of certificate, requiring the registrar to make entry in the register of the particulars under written. These are, the title of the work; name of publisher and place of first publication; name and place of abode of the proprietor of the copyright; and date of first publication. This certificate upon the part of the alleged proprietor of the copyright is handed to the registrar, with his fee, and it thereupon becomes his duty to enter the particulars therein contained, without any alteration. No affidavit, no declaration of the truth of the alleged proprietor's claim to the copyright is requisite. Any person claiming to register is registered as a matter of course. Thence it is that numerous instances exist of persons being falsely registered at Stationers' Hall as the proprietors of copyrights. For this the registrar is, of course, not responsible. It is the inherent vice of the existing system.

Besides this, as our Correspondent the "Publishing Agent" justly complains, whereas the certificate of the alleged proprietor of a copyright "is generally presented at the office by the clerk of a publisher or agent, no memorandum of the fact remains," or of his having paid the registrar's fee. "If you ask for any such memorandum, you are told you can have one on paying another 5s." That is to say, the registrar will furnish you with a certified copy of the entry you have just made, and for which copy he is, under the Act, entitled to another 5s. Practically, it therefore stands thus: every proprietor of a copyright must either himself attend at Stationers' Hall, and register his copyrights, or he must incur the double risk of fraud or negligence upon the part of the person who receives the fee for registration at Stationers' Hall, or the messenger he sends to pay it there. His only alternative is to obtain a certified copy of the entry at the time it is made. By adopting this course with all his entries, each would cost him 10s., instead of 5s. It is clear this was never contemplated by the legislature. Even the mere cost of the entry is practically found prohibitory by some publishers. In the music-trade, for example, suppose a house only publishes five hundred works during the year, to enter them at Stationers' Hall would cost 125l., at 5s. each. The entry is not essential to the *validity* of the copyright in a work first published in the British dominions; it only becomes imperative before the proprietor can "maintain any action or suit at law or in equity, or any summary proceeding, in respect of any infringement of such copyright." The practical result is, that thousands of small copyrights are never registered, because the proprietors thereof elect to run the risk of infringement of their rights rather than incur the cost of registering at 5s. each.

The mischiefs to which we have pointed are so great, and the amount of property at stake is of such extensive proportions, that the present system of registration at Stationers' Hall cannot be allowed to remain unreformed. In considering what is best to be done in the matter, we must protest against the excessive cost to which the proprietors of copyright works first published in the British dominions are exposed, when compared with those works which are first published abroad, and then registered here under the *International Copyright Acts* and Her

Majesty's Orders in Council. For the latter, each entry at Stationers' Hall costs only *one shilling*, which, we submit, is amply sufficient. But, whatever the amount of the fee, it is clear that it ought to be made compulsory upon the part of the registrar to give a receipt for the amount; or, better still, an office copy of the entry. If that were done, perhaps 2s. 6d. might not be deemed unreasonable for each entry.

In considering this question of cost, let us ask why has registration been made imperative under the Copyright Amendment Act, before the proprietors of a copyright can proceed for an infringement of their rights? More for the protection of the public interests than for those of the proprietors of copyrights. Instead of allowing the old common law or unlimited period of copyright, a limited term has been substituted. For literary and musical works, that term is the author's life and seven years afterwards, or forty-two years from the first publication of the work, whichever may prove the longer period. After that, consequently, the copyright becomes *public property*. Therefore it is not alone for the protection of copyright proprietors' interests, but for those of the public, that it becomes very important the exact day when every work was first published should appear upon the register.

For the public interests, it is likewise of importance that proper indexes should be prepared of all works registered during, say, the last fifty years; and especially that such indexes should contain, in alphabetical order, as to every work entered, the name of the author (if any given), the title, the name of the publisher, and also of the proprietor of the copyright.

In any reform of the existing system, we submit it would be a mistake and injustice not to lower the present charges upon registration. As it has been made imperative, prior to litigation, and chiefly for the purpose of protecting the public interests, surely it is but equitable that the expense of the requisite establishment for registration should be mainly borne by the public.

Finally, we would suggest, that all the old registers of copyrights, down to the commencement of the present century, should be deposited in the new Record Office. They contain a journal of great interest to students of the history of English literature; and surely they ought to be in the safe custody of the Master of the Rolls rather than of the Stationers' Company.

"LITERARY PIRACY"—COPYRIGHT.

Ludgate Hill, Dec. 30, 1866.

WE are so well pleased with the fact of an American house addressing itself to the want of an International Copyright, that we will not take exception to the form in which Messrs. Beadle & Co., in their letter appearing in your impression of the 15th inst., under the title of "*Literary Pirates*," have thought fit to express their views upon the subject.

Those gentlemen proclaim their indignation at the circumstance, not of our giving in the columns of our paper a tale which appeared in *Beadle's Monthly*, but of our introducing certain modifications into the text, necessary, in our opinion, to render it acceptable to English readers. In the present case these alterations are few in number and slight in character. We suppose Messrs. Beadle & Co. will concede that what is fair in this direction on one side is fair on the other. It is unquestionably not agreeable to publishers to see their property appropriated on the other side of the water, and hashed up to suit the variations of taste which exist between the two countries. And to this mortification we ourselves have been compelled to submit again and again; but, inasmuch as all this is done according to law, it never once entered our minds to protest against the alterations which have been introduced by American publishers into tales appropriated from our columns, much less to accuse the principals in these acts of discourtesy, or to suggest that they were worthy of censure.

Messrs. Beadle & Co. very truly remark, that the appropriation by American publishers of the works of writers in Great Britain is carried on after a "wholesale" rate—that British publishers only "occasionally" return the compliment.

Let us hope that an International Copyright will exist before long, and that Messrs. Beadle & Co.'s letter will arouse new attention to the subject; and that so they may have the gratification of regarding their comments as a contribution to an object the accomplishment of which is desired by publishers of respectability and judgment in both countries. At such a consummation none would rejoice more heartily than ourselves, who lose infinitely more than we gain by the present state of things.

CASSELL, PETER & GALPIN.

18, Norfolk Street, Strand, Dec. 17, 1866.

Messrs. Beadle & Co. do not seem to be aware that the appropriation and mutilation of American stories, of which they justly complain, is systematically pursued by the compilers of the lower class of cheap periodicals. Three out of four of the so-called "original" tales in the penny journals are reprints of American novels, slightly, and in some cases very insufficiently, altered. An amusing instance of carelessness on the part of the nominal "author" of one of these stories recently came under my notice. "Hastings" had been duly substituted for "Saratoga," the "Thames" for the "Hudson," "pence" for "cents," and so on; but the heroine was represented sitting at her window watching the sunset behind the "Surrey hills" (originally the Catskills), and listening to the hum of the *mosquitos* and *cicalas*, which it was suggested ought in consistency to become cockchafers and "daddy-longlegs." The journal in which this occurred has a circulation of sixty thousand, and its calibre may be fairly estimated from this specimen of editorial supervision.

The injustice of this contemptible pilfering is double-edged, and felt at home as well as abroad, since, besides injuring the American author, whose works are garbled and disguised, it prevents writers of original fiction from obtaining a fair price for their productions, as it is so very much cheaper to steal—

Convey, the wise it call—

old stories than to purchase new ones.

So much for the rule in a certain class of publications. In the case cited by Messrs. Beadle there must, I think, be some mistake, as the well-known high character of Messrs. Cassell, and their unceasing efforts to provide genuine novelties for their readers, seem to render it impossible that they should stoop to such "discourtesy." Writers have been known to sell their works twice over, themselves making such modifications as were supposed to adapt them to an audience on either side the Atlantic; and it is possible that this may be an instance. Another benefit would result from an International Copyright Act, inasmuch as it would impede, if not prevent, the circulation in England of vast quantities of pernicious trash in the shape of "sensational" stories,—full of morbid sentiment and objectionable incident, and calculated to cause much class prejudice and ill feeling amongst their uneducated readers, by almost invariably making the rich villains and the poor victims,—which the lower class of publishers can now afford to re-issue at a nominal price, as they cost them nothing for copyright.

I have confined my remarks to what has been well called "kitchen-literature"; but what authors of note on both sides of the Atlantic have suffered for want of an International Copyright Law is matter of history. Leigh Hunt, I believe, never received a penny for any one of the numerous editions of his works in America. How grievously he felt this injustice his letters show; and he is but one instance out of hundreds that might be cited. It is to be devoutly hoped that ere long the subject will engage the serious attention of the Legislature; and the *Athenæum* can do much in promoting so just and righteous an object. Many English authors must remember with gratitude Thomas Hood's keenly witty letters on Copyright which appeared in its columns. Have we no writer now who will do for an Anglo-American Copyright Law what Hood did for the English?

S. R. T. MAYER.

LIFE IN SPAIN.

Cádiz, December, 1866.

THE approach to Cadiz from the sea in autumn is something to be ticked as a red-letter night in your diary—a blazing hot sun lighting up every hole, corner, crevice, and crack of rock and shore. You try in vain for a shady side; and but for the awning over the deck, you would be roasted alive. Sol's shadows may be under the sea; certainly they are not to be found above it. One wonders if the fish really feel the heat, and fan one another with their fins. A deep purple sea surrounds you; the blue, cloudless vault of heaven covers you; the horizon as clear as a set scene on the stage; the slow, measured plash of the paddle throws up a lazy, creamy foam, which marks your course for a time, and then is slowly lost in the deep purple. You are rocked to and fro tenderly, like a first child in a cradle. Byron, of course, has said all this poetically; but the simple prose is a piping hot day. The lateen sail idly flaps against the mast of the *faluca*. Perico lies on his back, with hand on the tiller, smoking, of course—it is far too hot to work—waiting for the breeze. At a distance Cadiz rises slowly, as if by magic, from the sea,—a city of marble palaces. The tide curls and eddies over the hogback reef; the sea is too lazy to make a noisy splashing; and the white-crested foam moves to and fro over the half-hidden rock like an impatient beauty's pearly slipper over a purple carpet. Once inside the hogback rock, you have a closer view of the city. Down goes the anchor, with a run and a splash. The health-boat comes alongside, and the officer in charge eyes you with an eagle's glance: you tremble in your shoes, fearing he may instruct the captain to hoist the yellow flag, which means quarantine. This time he is merciful; and in due and proper course the passengers are allowed to land. The mole, or landing-place, is somewhat insignificant; and you begin to have grave doubts touching the marble palaces you have imagined to exist. The gates are passed; and you are not called upon by the *carabineros* to turn out your pockets. By treating them *francly*, all difficulties formerly disappeared. Once within the city walls, you are free to roam wherever your erratic fancy leads you.

High Jinks, here, there, and everywhere, seem the order of the day. The Villa de Madrid has cast anchor in the bay, on this [blank] day of November, 1866, and without committing myself to any discussion as to the right or wrong of the Chilean dispute, the crew and officers of this same Villa de Madrid have proved themselves worthy of all admiration and honour: they fought bravely against disease, starvation, and the Chilean forts. Shot, shell, and disease cleared out half the crew. The survivors for weeks kept body and soul together upon rice, a shade of junk, and water. Yet not a murmur, not a man punished for insubordination. I am afraid our Wapping Jacks would hardly have been content to fight upon rice flavoured with a sensation of junk, and cold water for tipple. Cadiz is tremendously excited. My Lord Mayor, mace-bearer, and all the pomp and circumstance of civic imperialism, are alive, and kicking up an immense shindy. They receive on their landing at the mole the officers and crew of the said Villa de Madrid. Amid shouts and waving of lily kerchiefs, they proceed to the Cathedral, there to chant a *Te Deum*. That over, a luncheon followed,—eating and drinking naturally resulting in extra enthusiasm. On the following night a bespeak at the Theatre Royal; then a dinner, toasts and all. Next night a ball at the Casino; and as ladies are in this case, I must pray for a little space to report all I saw touching the mazy dance.

The rooms of the said Casino are constructed to hold about one hundred and fifty human beings. Tickets for seven hundred are issued, the result being a jam of which you soon have *satís*. The decorations are tasteful and pretty. The air is heavy with the perfume of roses. Flowers and flags meet you at every turn. Of course, everyone knows all about Byron's

— Cadiz,

Where every Gaditana dark or fair a melting maid is.

The time named upon the "pasteboard" is ten

o'clock. Soon after that hour carriages arrive at intervals; but the bulk of beauty, male and female, walks; and as you may traverse Cadiz nearly all the year round, night and day, in white satin slippers, without risk of soiling them, no wonder that Dolores prefers to walk rather than crush her tarlatan into a stuffy box upon wheels. The electric light dazzles the Plaza San Francisco, and Dolores' eyes and her mother's diamonds answer flash for flash—the smart craft in all cases under close convoy of parent or duenna. The girls are singularly simple in their dress; but the Señoras out-Herod Herod. Jewels and lace are only allowed to married ladies. One, I hear in a whisper, has a tunic of "point" worth hundreds of golden guineas. Her sisters are dying of envy; but somehow the brave mariners don't seem struck all of a heap by the "point"; so women dress as much for women's envy as men's admiration. Every light in the ball-room flashes an echo on the jewelled neck, arm, or hand of some Gaditana with a wedding-ring. As a rule, beauty is a scarce commodity; but bright eyes, neat dresses, and graceful movements meet you everywhere. The sprinkling of uniforms, naval and military, has a charming effect. A quadrille is attempted, but is a failure, so that the crush is a walking, gossiping crush, and not a dancing one. The supper is excellent, and so is the wine. As the small hours chime one after the other, Young Spain finds the champagne exhilarating, and sings, and declares everybody to be the best fellow he ever knew; and so home to bed, and up to breakfast with a headache.

Cádiz is singularly deficient in antiquities. There is a museum and a picture-gallery. In the latter you find a "Murillo," and some undoubted Zurbarans, evidently portraits of Carthusians from the monastery at Jerez, now decaying. At last an effort is being made to revive pictorial art in its old home. A prize of 250*l.* is annually given by a Cadiz society for the best picture of a given subject, and Young Spain is earning it honourably and well. You trace French teaching; but here and there genius interprets for herself, and becomes anti-academical. As yet, the taste for collecting pictures the work of living artists does not exist to any extent in Spain. The subjects of the three prize pictures now hanging on the walls of the "Museo"—the result of three annual competitions—are, 'The Fall of Murillo from the Scaffold in the Capuchinos,' 'The Capture of Cadiz by Alfonso el Sabio, in 1262,' and, lastly, 'The Final Expulsion of the Moors from Andalucía.' The first is decidedly the least meritorious work; the second is well conceived and fairly executed, boldly drawn and coloured with a free hand; the whole treatment of the last subject shows artistic judgment. The Moors pursued to their galleys by the Christians, in the hurry and confusion of battle, are extremely well rendered; but you are reminded of Horace Vernet's treatment of kindred subjects. Bearing in mind, however, that all these are the work of a young artist scarcely twenty-four years of age, it is only reasonable to be hopeful that Spain will again assert herself in that art she once so much adorned.

High Jinks would be manifestly incomplete without a bull-fight; and so one is given in honour of our brave marines. I am sorry to say a large sprinkling of the fair sex was present; but Jills will go where Jacks go, when they have the opportunity, and Dolores must be forgiven. She is, as a rule, opposed to these exhibitions, and, like the Queen and Court, only attends as a State necessity. In fact, the proverb which says—

Before—Bulls, bulls, bulls, about the excited crowd;

After—Balls, bulls, bulls, but not half so loud—

may be accepted as a true statement. Respectable ladies and respectable gentlemen do not patronize the sport. The common people and the young bloods compose, as a rule, the audience; and the showmen say it is hardly a paying business now. The bulls were lively; and a favourite Espada called for by the audience, and who, in compliance with the call, appeared in the arena in a black coat and trousers, killed his Bull in style, amid immense enthusiasm.

F. W. C.

OUR WEEKLY GOSSIP.

M. Victor Hugo is engaged in writing a new romance, of which the scene will be laid in England.

Among the Bills that are to be presented to Parliament next session are six which propose the establishment of tramways in the interior suburbs and omnibus routes of Islington, Kennington, Brixton, Camden Town, Holloway, Clapham, and Whitechapel. The number of Railway Bills to be presented to the House is comparatively moderate, being not more than 171, whereas last year it was 450; the year before the last, 415; in 1864, 360; and in 1863, 280. Subsidiary works of this class are on an equally reduced and proportionate scale.

The Trustees for the Johnson Memorial Prize have given notice that all Essays in competition for the prize on the subject proposed in March, 1865, namely, 'A Discussion of Recent Investigations relating to Solar Parallax,' must be sent in to the Registrar of the University of Oxford on or before the 31st of March, 1867.

We are informed that the Danish sculptor, Prof. Jerichau, is at present in Rome engaged in executing in marble three groups, all of which are destined for England. The first, the bridal gift of the large landowners of Denmark to the Princess of Wales, and a cast of which is at Marlborough House, represents Adam awakening and finding for the first time Eve by his side; the second, Women surprised while Bathing, has been ordered by the Princess of Wales; and the third, a Huntsman attacked by a Panther whose Cub he has taken, by Sir Francis Goldsmid. A cast of this work of art was exhibited in the Exhibition of 1851.

A new novel, by M. Le Fanu, will be commenced in the February number of *Temple Bar*.

Here is a hint to the editors of Bishop Percy's 'Reliques':—

"British Museum, Dec. 18, 1866.

"In the Preface to the ballad of 'The Jew's Daughter,' Bishop Percy remarks, apropos of the first two lines of the poem,

The rain runs down through Mirry-land toun,
Sae dole it doune the Pa,

'As for Mirryland Toun, it is probably a corruption of Milan (called by the Dutch Meylandt) Town; the Pa is evidently the river Po, although the *Adige*, not the *Po*, runs through Milan.'—The ballad, however, is far better in its geography than Bishop Percy; since the *Po* is four times nearer to Milan than the *Adige*, which is nearly a hundred miles off. This extraordinary error affords an instructive instance of the looseness and carelessness of Bishop Percy's literary character. One who could thus correct the book he was editing without the commonest care to be himself correct wants the most elementary features of the scholar. I send you this note in the hope that Mr. Furnivall will see it, and learn still greater caution in dealing with Percy in the publication of the ballads from the original manuscript, and that others may be on the look-out for similar blunders, which may probably be found without much seeking, and may communicate them to Mr. Furnivall. But the subject has another aspect. Here is a book published originally a hundred years ago, and I know not how often since, and containing a blunder which would disgrace a schoolboy. Who were the editors of these very numerous editions (including the last, the Rev. George Gillsan), and who the readers, during this century, that the former have never corrected, nor the latter pointed out, the error?

"RUSSELL MARTINEAU."

In the 'Pearl Byron,' Mr. Murray has added to the triumphs of typographical art, as well as to the illustrations of cheap literature. This edition is complete, and the price is only half-a-crown.

Mr. Collier has issued the second part of his reprint of Davison's 'Poetical Rhapsody,' completing that important work.

We understand that the *Churchman's Family Magazine* has passed into the hands of Messrs. Houlston & Wright, and that the next number is to commence a new and improved series, wherein

we are promised features of deep and peculiar interest.

An anonymous correspondent, who used to listen to Mr. H. Phillips a quarter of a century since, when he was the principal English basso, sends us a cheque for 2*l.*, and inquires where subscriptions are to be paid.

An advertisement, which would have startled our fathers, and is outlandish enough to trouble the graves of our grandmothers, appears in one of the London morning journals. This notification states that a certain West End firm of dealers in eatables is now able to supply not only Narbonne honey but French frogs, which are spoken of as "delicious rarities," obtainable in the "original packages."

A new census having been obtained of the population of the City of London and the "Liberties," the results are very well worth noting. The total day population is, it appears, 283,520; that of the night not more than 113,387. Non-residents, but daily occupiers, amounted to 170,133; these entered and left the City during the day. Of customers, clients, and others, there were 509,611 persons who resorted in one day to the metropolitan centre. The persons frequenting the City daily in twelve hours, from 6 o'clock A.M., to 6 o'clock P.M., were 549,613; in sixteen hours, from 5 o'clock A.M., to 9 P.M., 679,744; and in twenty-four hours, 728,986. As the total British army, without commissioned officers, is 125,473 men, some notion may be got of the vastness of the multitude which flows in and out of "the City" daily. A population exceeding by 6,000 that of the entire county of Hereford, which is about 107,000 persons, remains behind in London city during the night,—being the "still water" of the enormous tidal wave. The day people of London exceed in numbers those of the entire county (extra-metropolitan) of Surrey by more than 10,000. A population about equal to that of Oxfordshire (171,283) flows in and out of the "walls" during the day. The "customers" of London in sixteen hours exceeded by 22,000 more than double the number of the whole population of Manchester (244,000) in 1861. For comparison's sake, take the numbers of the people of several large English cities and towns in 1861—Birmingham, 212,621; Liverpool, 269,742; West Derby, 225,845; Bolton, 130,269; Bradford, 198,475; Leeds, 117,566; Sheffield, 128,951; York, 59,909; Newcastle, 110,968.

Under the odd title of 'The Holy Land, Egypt, Constantinople, Athens, &c. &c.,' Messrs. Day & Co. have issued a volume of Mr. Bedford's photographs, illustrating the Eastern journey of the Prince of Wales. Mr. W. M. Thompson supplies a foolish commentary on the pictures, forty-eight in number. Of course, these photographs are selected from the series already published.

Among the Almanacs and Year-Books which we have not yet announced are—Messrs. Letts & Co.'s 'Diary, or Bills Due Book,' an excellent handbook for the man of business; the same publishers' 'Pocket Diary and Almanac,' and 'Rough Diary and Scribbling Journal'; the 'Boy's Own Pocket-Book,' issued by Messrs. Routledge & Sons; 'The Engineer's Office Sheet'; Messrs. Parker's 'Church Calendar'; 'The Catholic Calendar and Church Guide'; and 'The Licensed Victualler's Almanac.'

Mr. Chappuis has published a mirror for the Christmas holidays under the title of 'Grotesque Reflections,' by F. E. G.: a small convex looking-glass mounted as a pocket-book. You turn the title-page and find a distorted image of yourself; yielding, as you turn the book about, a singular variety of comic expressions. 'Grotesque Reflections' will amuse children of all ages.

It is proposed to establish a Public Free Library and Reading Rooms in Lambeth.

A Leamington Philosophical Society has been inaugurated. Lord Leigh, Lord-Lieutenant of the county, patron of the Society, occupied the chair, supported by Mr. H. C. Wise, Member for the county, Vice-President. The opening address was delivered by the President, Dr. O'Callaghan. We understand that a School of Art has been formed under the auspices of this young society, which is already in a flourishing condition.

The charming papers entitled 'Passages from the Note-Books of the late Nathaniel Hawthorne, which have appeared in the *Atlantic* periodical, are about to be published in two volumes by Messrs. Ticknor, of Boston. The notes are brought down to within a very short time of Mr. Hawthorne's death.

The quinquennial census of Paris has just been published. In 1861 the population of the city amounted to 1,696,141; that of the arrondissement of St. Denis to 133,434; and that of Sceaux to 122,085. According to the recent returns, these numbers have severally increased to 1,825,274, 178,359, and 147,283. Thus, in five years, the population has increased 197,256; the increase in Paris being 129,133; in St. Denis, 42,725; and in Sceaux, 25,398. The mean rate of increase during the last five years has been 10.09, and that of the preceding quinquennial period 13. The official statistics further state that during the last five years 16,515 apartments have been destroyed and 20,311 constructed.

The Paris Academy of Sciences has elected Captain Richards, of London, a corresponding member in the section of Geography, in the place of the late Admiral FitzRoy.

The Paris papers state that the temperature of the waters flowing from the great artesian wells at Grenelle and Passy has increased from 82° to 85° Fahrenheit.

It is very seldom that the great continental bells publish the statistics of their gains and losses. Recently, however, the gambling establishment at Spa, which, greatly to the disgrace of Belgium, still flourishes, has sent forth a kind of official balance-sheet, by which it appears that during the past year (1865) the sum won at roulette was 932,952 fr., against 101,380 fr. lost—being nine to one against the public. At trente-et-un, the amount gained by the establishment was 1,194,492 fr., and that lost 560,657 fr., the chances here being three to one against the player. Of the total gains, 32,500 fr. were set apart for the maintenance of the public walks, bands, &c.

The Leipzig papers announce that the library of Luigi Manini, the last Doge of Venice, will be sold by auction in that city in January next. Although this last of Venice's Doges was entirely unequal to maintain the dignity of the Republic, he amassed a large library containing various works illustrative of the palmy days of Venetia. The catalogue of that portion of the library about to be sold enumerates 2,358 works, many of which are of great historical interest.

The library of the late historian, Dr. Lappenberg, of Hamburg, will be sold by public auction, at Leipzig, on the 28th of January, 1867. The Catalogue, which has just appeared, under the title of 'J. M. Lappenberg's Bücherchatz,' comprises 6,105 numbers, and contains a great variety of the most important works of German, English, and Scandinavian literature. The writings in the Low German dialect are very numerous, and, among them, those referring to the fables of Reynard the Fox, and Tyll Owlglas may be called next to complete. English history is largely represented, as well as the *Hamburgensis*, and the Goethe and Schiller literature.

The Austrian Meteorological Society, first set on foot in 1863, was definitively constituted, and recognized by the Imperial Government at the close of last year, and is now working with praiseworthy activity. In the list of members we notice the names of the leading scientific meteorologists of Austria and Germany, and the favour of the State is shown by the Minister of Commerce, Baron von Wüllerstorff-Urbair having enrolled himself among the number. The Society, whose head-quarters are at Vienna, seeks to co-operate with observers in all parts of the world, and the better to utilize its endeavours, has commenced the publication of the *Zeitschrift*, a fortnightly journal, in which, besides reports of its own proceedings, papers on various meteorological subjects, with notices of weather phenomena, are given, and the relation of these to other branches of science is set forth. Profs. C. Jelinek and

Hann are the editors of this new periodical, of which the first volume is now nearly complete. With its diversified surface and varied climate, the Austrian empire presents a highly-interesting field for meteorological inquiry, which the Society will, no doubt, carefully explore.

Prof. Unger, the eminent Viennese botanist and paleontologist, has been recently examining the bricks used by the ancient Egyptians in the construction of the Pyramids, and more particularly those of the Pyramid of Daahour. He has discovered that the mud of which they were made contained not only a quantity of animal and vegetable matter, but also fragments of many manufactured substances, leading to the conclusion that Egypt enjoyed a high degree of civilization upwards of five thousand years ago.

A Committee has been formed at Coburg for the erection of a monument to the memory of Friedrich Rückert, who spent the last thirty years of his life, with but few interruptions, near that town, on his little property, Neuses. A colossal bust has been contemplated, for which a model has been placed at the disposal of the Committee, which was executed in 1844 by the sculptor Herr Conrad, of Hildburghausen, and which has been pronounced a faithful and excellent likeness by the relations and friends of the late poet, whose own full approval the bust had the good fortune to meet with.

A lively controversy has arisen in the German papers on the genuineness of the inscriptions on the Nennig excavations, mentioned in a late number of the *Athenæum*. Prof. Brambach, of Bonn, first pronounced his opinion that they were forged; and after a brisk debate on both sides, the matter was placed before Prof. Mommsen. This scholar, who has just returned from a journey to Hungary and Dalmatia, undertaken for epigraphical purposes, at the meeting of the Archaeological Society, at Berlin, of the 6th of November, in which the excavations at Nennig formed the foremost topic, declared the inscriptions to be forgeries. After minutely stating his reasons for believing them such, Prof. Mommsen pointed out the intended mystification as a "silly student's joke, which no one would be inclined to deal with very seriously, if it were not played on excavations conducted by Government, and carried out by public means. In the interest of German science, and of the honourable gentlemen who were interested in these remarkable excavations, it would be desirable to find out the forger,"—an opinion in which the Society concurred. The declaration of Herr Pinder, that the necessary steps had been taken to prevent further unlawful interference with the Roman structures lately brought to light, was received with general satisfaction.

INSTITUTE OF PAINTERS IN WATER COLOURS.—EXHIBITION OF SKETCHES AND STUDIES. OPEN from Ten to Six, at their Gallery, 24, Pall Mall (opposite Marlborough House).—Admission, 1s.; Catalogue, 6d. JAMES FAHEY, Secretary.

SOCIETY OF PAINTERS IN WATER COLOURS.—THE WINTER EXHIBITION OF SKETCHES AND STUDIES by the MEMBERS is NOW OPEN. 5, Pall Mall East.—Admission, 1s. Ten till Five. Lighted by gas on dark days. WILLIAM CALLOW, Secretary.

WINTER EXHIBITION.—THE FOURTEENTH ANNUAL WINTER EXHIBITION OF PICTURES, the Contributions of British Artists, is NOW OPEN, at the French Gallery, 120, Pall Mall.—Admission, 1s.; Catalogue, 6d. LÉON LEFEVRE, Secretary.

THE SECOND ANNUAL EXHIBITION OF WATER-COLOUR DRAWINGS is NOW OPEN to the Public, at T. McLean's New Gallery, 7, Haymarket, next the Theatre.—Admission, 1s. R. CLOTHIER, Hon. Sec.

MR. ARTHUR TOOTH'S FIRST ANNUAL WINTER EXHIBITION OF WATER-COLOUR DRAWINGS is NOW OPEN to the Public, at the Fine Art Gallery, 5, Haymarket, from Ten till Six.—Admission, 1s., including Catalogue.

MR. MORBY'S COLLECTION OF MODERN HIGH-CLASS PICTURES is ON VIEW at the Royal Exchange Fine Arts Gallery, 24, Cornhill. This Collection contains examples of Leslie, R.A.—D. Roberts, R.A.—E. M. Ward, R.A.—Holman Hunt—J. Phillip, R.A.—T. Ead, R.A.—E. R. A.—Frith, R.A.—Bosch Bonheur—Henriette Browne—Goodall, R.A.—Cooke, R.A.—Creswick, R.A.—Pickersill, R.A.—Calderson, A.R.A.—Sant, A.R.A.—Le Jeune, A.R.A.—Ansdell, A.R.A.—Frost, A.R.A.—Pettie, A.R.A.—Yeames, A.R.A.—P. Nasmith—Linnell, sen.—Dobson, A.R.A.—Cooper, A.R.A.—Gale—Marks—P. Hardy—John Pead—Fraser—Rusper—Liddardale—George Smith—Dunbar—Peter Graham, &c.—Admission on presentation of address card.

ROYAL POLYTECHNIC.—CHRISTMAS HOLIDAYS.—The strongest Programme ever presented.—The New Scientific Entertainment, by Professor J. H. Pepper, on the Eidoscope, will include the Deceitful Head Speaking, and a new modification of the Illusion, called the Cherub, in which 'Ariel,' in a beautiful Star, will appear to float in the Air.—First exhibition of a most astonishing figure, called the Automatic Lizard, & a Frankenstein.—A narrative of the popular story, entitled 'The Christmas Carol,' by F. Damer (Ape, Esq.)—The New and Intensely-funny 'Vestibular' Entertainment, by Mr. G. W. Jester.—Entirely New Musical Entertainment, by George Buckland, Esq.—Admission to the favourite story of 'Whittington and his Cat'—Admission to the Whole, 1s. Open from 12 to 6; 7 till 10.

STODARE'S THEATRE OF MYSTERY, Egyptian Hall, Piccadilly. "WHO'S HE?"

STODARE (Madame), Widow of the late Colonel Stodare, will present the Sphinx, Marvel of Moors, and Bucket Trick, assisted by Mr. Fitzbank Burton, Pupil of Colonel Stodare, in Colonel Stodare's Royal Entertainment of Magic, at the Theatre of Mystery, Egyptian Hall, every Evening at Eight, Wednesday and Saturday Mornings at Three.—Admission, 1s. and 2s.; Stalls, 5s.; School-children half-price. See a second at the Box-office from 11 till 6; and at Mitchell's, 31, Old Bond Street, Mr. JAMES WEAVER, Manager.

SCIENCE

SOCIETIES.

ROYAL.—Dec. 13.—W. Bowman, Esq. V.P., in the chair.—The following papers were read:—'On Poisson's Solution of the Accurate Equations relating to the Transmission of Sound through a Cylindrical Tube, and on the General Solution of Partial Differential Equations,' by Mr. R. Moon.—'Abstract of the Results of the Comparison of the Standards of Length of England, France, Belgium, Prussia, Russia, India, Australia, made at the Ordnance Survey Office, Southampton, under the direction of Col. Sir H. James, R.E.,' by Capt. A. R. Clarke.

ASIATIC.—Dec. 17.—Sir E. Colebrooke, Bart., M.P., President, in the chair.—Sir H. Ricketts, the Rev. Dr. Clarke, and Mr. B. Quaritch, were elected Resident Members, and Mr. T. W. H. Tolbert a Non-Resident Member.—Dr. S. Birch read a paper 'On some Rubbings of an Ancient Inscription found by the Rev. J. Edkins at Pekin, in the South-East Quarter of the Chinese city, dating from the Ken Dynasty, about 700 years from the present day.' It was found on an octagonal stone, seven sides of which are covered with a Buddhist inscription in the Devanagari character, and the eighth side with a Chinese inscription. This last records the foundation of the temple of Hwa yen chò, at the time of the Han dynasty, and its subsequent repairs and alterations, till the fourth year of Hieng che, of the Ming dynasty, A.D. 1489. Another Chinese inscription, found at the end of the Sanscrit or Palli one, records that this last was set up in the fifth year of Teenhevang, of the Ken dynasty, A.D. 1123, and that it had been handed down by persons intimately acquainted with Buddhist formulae. These rubbings had been transmitted to Europe by Mr. A. G. Goodwin, in the hope of procuring a translation, and engaging the attention of Sanskrit scholars.

BRITISH ARCHEOLOGICAL ASSOCIATION.—Dec. 12.—J. R. Planché, Esq. V.P., in the chair.—The following Members were elected:—Messrs. J. Rae, T. H. Cole, —Main, and J. Whitmore.—Mr. G. R. Wright exhibited an illuminated pedigree of the Montague family, proceeding from Sir Robert and Sir Stephen Browne, sons of Sir Anthony Browne, temp. Richard the Second, and drawn by the Rev. E. H. Browne, a descendant of the family.—Mr. Wright also exhibited a seal belonging to Mr. Fitch, of Norwich.—The Rev. U. S. Simpson then laid before the meeting a series of Roman relics discovered within the last fifteen years at the Roman station of Chesterfield.—Dr. Kendrick exhibited some fragments of gold enamel mosaics from the roof of the mosque of St. Sophia, at Constantinople.—A communication from Dr. Pears, of Repton, was read, describing the discovery of a mediæval tile-kiln, near the site of Repton Priory.

ARCHEOLOGICAL INSTITUTE.—Dec. 7.—O. Morgan, Esq. M.P. V.P., in the chair.—A fine series of paintings on panel, from chapel screens in the church of Bunbury, Cheshire, a few encaustic tiles, together with sketches and photographs of the church, and of some remarkably incised monumental slabs, were exhibited by the Rev. William Lowe, who gave an account of the church, and the

works in progress there.—Mr. J. Yates gave an account of the discovery of what appeared to be a Hebrew "charm," in connexion with a crucifix that had belonged to the Priory of Gisborne, in Yorkshire. In the stem was a cavity, in which was a slip of parchment, with the Hebrew word *agla*, several times written. This is supposed to be a kind of anagram of a sentence, "Thou art great for ever, O Lord."—Brigadier-General Leffroy, R.A., called attention to the more remarkable of the specimens of rifles and other firearms exhibited.—Mr. J. Henderson called attention to a beautiful collection of Oriental arms and armour, comprising Persian shields and helmets of steel, richly damascened in gold; battle-axes, Persian and Mahrattic; Kuttah daggers; a spear-head; bi-forked Japanese sword, of great beauty; Belodches or Afghan knife and poniards.—Mr. B. Smith also exhibited a number of rare and beautiful oriental daggers, &c., all of remarkable workmanship, and many of them of early date.—Col. A. L. Fox exhibited a leaden heart-case, with heart inclosed, found in Christ Church, Cork.—Mr. J. Yates exhibited a Romano-British urn, found at Goldstone, Norfolk. It was of large size, remarkably thin,—not thicker than Greek or Etruscan vases, though of coarser material, and with a rougher surface. Its form approaches the globular, and on the rim at the top is a simple ornament, impressed by the potter. It had been found in the foundation of the chancel of the church, when under repair; and it was suggested that it might be evidence of the church having been built on the site of a heathen temple, as was certainly done in other cases. Roman interments had been found in the immediate neighbourhood.—The Chairman drew attention to a fine and early specimen of church plate, which he exhibited by the favour of the Rev. H. W. Jermyn, rector of Nettlecombe, Somerset. It was a chalice and paten belonging to that parish, and was the second earliest piece of English plate known.—Among the other objects exhibited may be specified, a lady's fruit-knife, of the seventeenth century, found in Kings-ton House, Bradford-on-Avon, with a richly-decorated handle.—A large carriage watch, of Viennese make, date about 1712-1715, exhibited by the Rev. J. B. Deane.—Two leaves of a triptych, attributed to Mabuse (the property of W. Luard, Esq.), exhibited by Mr. W. Burges.—Elui, of perforated brass, in form of a knife-sheaf, containing two instruments of doubtful use; and knife, in sheath of steel, chased with figures of Judith (?), and foliage, temp. Henry VIII., exhibited by Mr. B. Smith.—Japanese bowl, of the pre-Christian period, exhibited by the Rev. H. A. Walker.—Portrait of Chaucer, a sixteenth-century copy of the well-known miniature, exhibited by Mr. J. F. Nightingale.—Enamelled locket, dated 1737, exhibited by Miss Estridge.—Flint arrow-head found on the coast of Canada.—Tiles from an old farm-house in Kidwelly, and a fossil piece of buck-horn found in the Thames Embankment works, Whitehall, exhibited by Mr. E. Richardson.

NUMISMATIC.—Dec. 13.—J. B. Berge, Esq., in the chair.—Mr. T. Jones exhibited some coins found in Egypt and Palestine. Among those from Thebes were Alexandrian coins of Diocletian, Maximian, and other small brass coins of the later emperors. Among those found at Samaria were some Cufic coins, and one probably of John Hyrcanus or Alexander Jannæus.—Mr. Evans exhibited a specimen of the silver medal of Elizabeth, with the legends "Unum a Deo duobus sustineo—afflictorum conservatrix, 1601," of which no satisfactory interpretation has been offered.—Mr. Evans read a paper communicated by S. F. Cockran, Esq., 'On two Gold Medals of Queen Elizabeth.'

INSTITUTE OF ACTUARIES.—Dec. 17.—C. Jellicoe, Esq., President, in the chair.—The following gentlemen were elected Members, viz.:—Fellow, Mr. H. G. Hubson; Associates, Messrs. A. H. Browne, B. Woods, N. Hanhart, and L. H. Greaves.—A communication from Mr. J. Meikle, 'On the Arrangement of the Data of Life Assurance Offices,' and a paper by Mr. T. B. Sprague, M.A., 'On the Limitation of Risks,' Part 2, were read.

STATISTICAL.—Dec. 14.—Mr. F. Hendriks read a paper 'On International Coinage in connexion with the Monetary Convention between France, Italy, Belgium, and Switzerland.'

Dec. 18.—Col. Sykes, M.P., V.P., in the chair.—The following gentlemen were elected Fellows: Messrs. G. Senior, T. Heywood, F. H. Harper, T. Tully, and R. H. I. Palgrave. The paper was read by Mr. J. Waley, 'On Combinations and Strikes with Reference to the Rate of Wages.'

ZOOLOGICAL.—Dec. 13.—J. Gould, Esq., in the chair.—The Secretary read a letter announcing the shipment to the Society of a monkey from the island of North Lena, near Hong Kong, supposed to be of a new species, and proposed to be called *Inuus Sancti Johannis*.—Mr. P. L. Selater exhibited a small bundle of feathers of a species of Cassowary, supposed to be those of *Casuarus australis*, which had been taken out of a native hut in northern Queensland, and were of great interest, as being the only portion of this bird ever brought to Europe.—Mr. Gould exhibited, on the part of Sir W. Jardine, Bart., a specimen of a new species of Honey-eater, of the genus *Ptilotis*, from Victoria, Australia, proposed to be called *Ptilotis cassidix*, together with some other rare Australian species, amongst which was a skin of the rare Finch, *Emblana pictum*, from Northern Australia.—Dr. A. Günther read a memoir on the Fishes of Central America.—Mr. St. George Mivart read the first of a series of memoirs, entitled 'Contributions towards a more complete Knowledge of the Skeleton of the Primates,' of which the present portion related to the "appendicular skeleton of the Orang (Simia)."—Mr. A. Murray read a paper on the diminutive *Galago murinus* of Old Calabar, and pointed out its distinctness from *G. Demidoffii*.—Two communications were read from Dr. W. Peters, being 'Notes on a Collection of Mice,' made by Capt. A. C. Beavan, in India, in 1865, amongst which was a new species, proposed to be called *Mus Beavani*; and a notice of a Bat from the Azores, which was referred to the European *Vesperugo Leisleri*.—A communication was read from Prof. W. Lilljeborg relating to the geographical distribution of the Narwhal (*Monodon monoceros*).—Mr. P. L. Selater and Mr. O. Salvin communicated some additions to the Catalogue of Birds collected by Mr. E. Bartlett on the river Ucayali, in continuation of a former paper on the same subject.—Mr. P. L. Selater also read some additional notes on the Caprimulgidae, relating principally to certain American species, of which one was characterized as new to science under the name *Antroctonus ornatus*.—Communications were read from Capt. G. E. Bulger on some Birds observed at Wellington, in the Neilgherry Hills, and from Mr. E. P. Ramsay on the most frequent foster-parents of the Bronze Cuckoos in the neighbourhood of Sydney.—A paper was read, by Mr. A. G. Butler, 'On some Species of Butterflies belonging to the Genus *Catagramma*.'—A communication was read from Dr. J. Kaup, containing descriptions of two species of Insects of the genus *Bacillus*.—Dr. J. Murie read a notice of the occurrence of *Extrus taramidina* reindeer in the Society's Garden, and made some remarks on the summer dress of the Llama and Alpaca as exhibited in the Society's Gardens during the past summer.

SOCIETY OF ARTS.—Dec. 12.—G. G. Scott, Esq., R.A., in the chair.—The paper read was, 'On Old London: its Streets and Thoroughfares,' by Mr. J. G. Craze.

INSTITUTION OF CIVIL ENGINEERS.—Dec. 18.—Annual General Meeting.—C. H. Gregory, Esq., V.P., in the chair.—The Annual Report was read. After the reading of the Report, Telford Medals and Telford Premiums of Books were presented to Messrs. R. P. Williams, J. Grant, and E. Clark; a Telford Medal to Sir C. T. Bright, M.P.; a Telford Medal and the Manby Premium in Books to Mr. R. Manning; and Telford Premiums of Books to Messrs. W. Humber, G. R. Burnell, W. Ridley, T. A. Rochussen, and W. H. Mills. The following gentlemen were elected to fill the several offices on the Council for the ensuing year:—J. Fowler, President; J. Cubitt, C. H. Gregory, T. Hawksley, and J. S. R. Vice-Presidents; J.

Abernethy, W. H. Barlow, J. F. Bateman, N. Beardmore, J. Brunlees, T. E. Harrison, G. W. Hemans, J. Murray, G. R. Stephenson, and C. Vignoles, Members; and Lord Richard Grosvenor, M.P., and C. Lucas, Associates.

SYRO-EGYPTIAN.—Dec. 13.—Sir C. Nicholson in the chair.—Mr. Ainsworth read a paper 'On the Valley of Achor.' He identified the valley with the Wady Debir, or Dabur,—the border of Benjamin, going up from Gilgal by Beth-Hogla, Beth-Arabah, and Gellilath—Gal i' Lut, or Reejum el Lut (the heap, or cairn, of Lot), at the head of the Dead Sea (Josh. xviii. 17), to the stone of Bathan, which Mr. Ainsworth identified with the venerable monolith, called Hadjar Isabah, at the entrance of the Valley of Achor; and then to Debir, (now Tur ed Debir) before the going-up to Adummim (the Red Khan, or Khan of the Good Samaritan) and "the border passed toward the waters of En Shemesh" (Mountain of the Sun, now called that of the Apostles); and "the goings-out thereof were at En Rogel" (Well of Nehemiah).

MATHEMATICAL.—Dec. 13.—Prof. Sylvester, President, in the chair.—The Rev. D. Thomas and Messrs. W. H. Besant, W. H. Corfield, J. D. Davenport, and H. Macneile were elected Members.—Prof. Cayley exhibited and explained some geometrical drawings relating to focal curves, systems of conics, &c.—Mr. G. C. De Morgan read a paper 'On a Method of Developing a Certain Class of Functions.'—Prof. Hirst presented to the Society some models of surfaces, of the fourth order and fourth class, illustrative of Prof. Plücker's new theory of complexes.

MEETINGS FOR THE ENSUING WEEK.

THURS. Royal Institution, 3.—'Chemistry of Gases' (adapted to a Juvenile Auditory), Prof. Frankland.
SAT. Royal Institution, 3.—'Chemistry of Gases' (adapted to a Juvenile Auditory), Prof. Frankland.

FINE ARTS

GIFT-BOOKS.

UNDER this head we class a large number of volumes, all of which are more or less splendid, and some beautiful.

Wayside Posies (Routledge & Sons) comprises, with wood engravings, a set of poems selected, with care and taste, by Mr. R. Buchanan. Let us first write of the poems, next of the pictures that illustrate them. 'The Bit o' Garden,' a homely poem of domestic shame and grief, has a very subtle and tender point in the line—

'Tis weary now with over-love, and all for Lizzie's sake, and is itself a capital poem. There is a brilliant point, of small size, in 'Shadow and Substance,' to which Mr. G. J. Pinwell has not added much of wit or bulk by means of his "odd" sketch of a damsel and her image as reflected in smooth water. We fear the forms of the shadow and substance in this drawing would not bear scientific testing. There is great sweetness as well as a happy knack of versifying in 'Afloat on the Stream.' 'School' is a broadly-treated, well-finished, pleasant and thoughtful composition, with some choice fancies in it, and a sort of "tag" that is not over new. Mr. J. W. North's drawing to 'On the Shore' is a poor thing; the poem itself is as pleasant a piece of Art as the melancholy theme allows. Mr. Pinwell's illustration to 'The Swallows' lacks solidity; the figures are but ghostly, a common defect in works that are stopped at the stage of sketching, and achieve little that is worth the name of study: see 'The Journey's End,' by this artist. Of sketches, poetical as well as pictorial, there are, as might be expected, many in this book. It is, withal, wonderfully cheap. Mr. J. W. North's drawing to 'Spring' is very good, and brilliant with tender sunlight. It is somewhat ungainly in its arrangement of forms. 'King Pippin' is capital. Has not

the writer of 'By the Dove-cot' taken a little liberty with the word "enchanted" in rhyming it with "haunted"? A pretty, pleasant verse, 'The Visions of a City Tree,' has one of the quaintest as well as most original themes among its class, here or elsewhere; the rural tastes and memories of a house-environed tree are related with much spirit and picturesque power in versifying. Among which the following, after describing the daily woes of the tree, is noteworthy:—

But in the night-time I am blessed
With many a lovelier vision
Than ever soothed a maiden's rest
With dreams of lands Elysian.
Lo, pale Capella and red Mars
Crown me with diadem of stars:
I watch the sunset's latest dart
Pale in the clear, cool even,
Till the white moon becomes the heart
Of the violet of heaven:
And then I watch this glorious flower
Grow lovelier through each silent hour.

Mr. North's landscape illustration to this poem, although thin, is full of nature of the simplest kind. The best and most carefully-wrought interior view in this book is that which illustrates 'Norlan Farm,' by Mr. Pinwell. This is richer in tone than any other; the figures, as is common here, are not very well drawn. 'Summer Storm,' both verses and picture, the latter by Mr. Pinwell, is one of the best of this series. 'The Heath' shows an excellent landscape by Mr. North, which is not the less good for being of very simple character.

The Spirit of Praise (Warne & Co.) comprises hymns, old and new, a noble gathering of noble verses, with illustrations and decorations of the illuminating sort. The illustrations comprise some unusually well-drawn, but occasionally tame, figure-pictures, with gold grounds, by Mr. J. Burlison; these tend towards Germanism in their style. Here are also landscapes, some of which are excellent,—as the sunny drawing to Doddridge's hymn, "How swift the torrent rolls," by Mr. J. W. North, and the night effect, by Mr. T. Dalziel. The figure-subjects are much less valuable than the above; this is due to the lack of severe study amongst us.

Of *Two Centuries of Song*, edited by Mr. W. Thornbury (Low & Co.), we are of opinion that the producers have erred in overloading every page with marginal decorations that are not beautiful in themselves and much too large for their places. This does not apply to the finely-cut border that encircles an extra title-page. The designs of figure-subjects are unusually good in execution and conception. Among those of this class which are especially worthy of praise is a very spirited composition, 'Chamber Music,' by Mr. T. Morten; 'Phyllis,' by Mr. G. Leslie; 'Colin and Phebe,' by Mr. W. Small, with a cleverly-drawn landscape background. Mr. Thornbury's duty of selecting poems for this book has been performed with taste, diligence and learning. His treasures comprise some of the most famous as well as beautiful old and modern poems, the work of authors who lived between the times of George Wither and our own, the object being to include occasional pieces of the brighter order, with special reference to the individuality of each immortal writer.

Art and Song (Bell & Daldy) contains many of the choice verses of recent and old poets, from Spenser to Mr. R. Browning. These have been adapted to certain vignettes of landscapes and figures. Of these the finest are from originals by Turner: 'Tynmouth,' engraved by W. Miller; 'Folkstone Beach,' engraved by J. Cousen; 'St. Agatha's Abbey,' engraved by the same; and 'Lake Nemi,' engraved by E. Goodall; also 'Whitby' and 'The Abbey Pool,' 'St. Agatha's Abbey,' &c.

rendered by the graver of J. Cousen, needs not a word from us to obtain admiration. Here we have 'Charity,' by Stothard, engraved by Mr. L. Stocks, and 'Kenilworth Castle,' engraved by W. Finden. Not very fortunately combined with the above are some examples of the dexterity and ability of Messrs. H. Bright, T. Uwins, D. Roberts, H. Corbould, and others. In merit and value between these somewhat antipathetical classes are exquisite engravings from drawings by J. Martin, J. M. Wright, W. Collins, &c. The higher qualities of some of the old Annuals re-appear in this superb volume.—*The New Table-Book*, illustrated by Frederick Eltze, and edited by Mr. Mark Lemon (Bradbury, Evans & Co.), is essentially a modern book; a young lady's book, with prettily-conceived drawings and spirited little poems, and blank pages for whimsicalities yet to be written.

To the illustrations of Douglas Jerrold's immortal *Story of a Feather*, as published with a new edition by Messrs. Bradbury, Evans & Co., we have already briefly alluded. Mr. Du Maurier has entered into his task with perfect spirit. Few sketches of their sort are better than that which shows how "the Earl handed his Countess to her carriage." The irony of the humorist writer is fairly echoed by the tact and clear perception of the designer, who does not shrink from depicting the pathetic and even the bitter points of his subject. For careful drawing, see the figure of the kneeling woman at prayer in Part IV.; for humour, the shop-scene in the same section of the text. The sketch of Miriam Jacobs and Jack Lipscomb when "Ha! Miriam, what a pity it is you're a Jew!" was said, is first-rate in spirit. 'The Stolen Watch' is rather commonplace; not so the death-bed scene of the young earl, which is what it should be: we cannot say more.

Another famous text is illustrated by a modern English artist in Messrs. Routledge's new edition of *Longfellow's Poetical Works*, with designs by Mr. J. Gilbert. This volume contains 'Tales of a Wayside Inn,' &c. The illustrations depart from Mr. Gilbert's well-known manner, inasmuch as they display less of his peculiar *bravoure* and dash, but not more than is common with him. The change of style to which we have alluded is, probably, due to the illustrator's sense of fitness and just desire to suit himself to the text he had in hand. Unfortunately, the effort to adapt himself to a novel class of poems has cost Mr. Gilbert some of his proper characteristic spirit, so that the result is less effective than is usual with him. Of course there are many pleasant drawings where to restraint was called for—e.g., the building in unlight to 'Birds of Passage.'—*Flower de Luce*, by the same Author (Boston, Ticknor & Fields), is a pretty little volume, with five moderately good illustrations of unimportant character, of which the best is the nicely-drawn frontispiece, which shows iris-flowers, with a forest background. The text of this book we have already examined (*Athen.* No. 2038).—The illustrations to *The Vision of Sir Launfal*, by Mr. J. R. Lowell (Boston, Ticknor & Fields), are generally weak: see the vignette on the title-page and the figure of the knight musing. The book contains some bright little landscapes. The whole of the drawings are the work of Mr. S. Eytinge, jun.—*Maud Muller: a Poem*, by Mr. J. G. Whittier, with illustrations by Mr. V. J. Hennessy (Boston, Ticknor & Fields), is very simple and beautiful poem, the echo of one thought that is broadly and delicately expressed, with a sense of Art that is above the how of design. The illustrations are admirable, with the exception of one or two unfortunately drawn faces which, as we are inclined to sus-

pect, may have been spoilt in the process of engraving: see that of the heroine meditating her love and hopes of fortune. Generally, few sets of designs of this kind are better than those which so aptly illustrate this text: see Maud Muller in her poor home,—a contrast to that of her hopes,—and the same seated by the spring. This is a charming book.

Off Land's End, Homeward Bound, by Walter Bird, illustrated by John Proctor (Griffin & Co.), contains a series of short tales that are supposed to have been related on Christmas Eve, and at the end of a homeward voyage from Australia, by passengers on board the ship *Oberon*. These stories are varied in their incidents, manner, and subjects; they are neatly and carefully written, so that they will surely amuse many a leisure hour. The engravings are eight in number, and, although rather sketchy, rich in feeling for character and expression; in these qualities they are perfectly suited to the text.—The last text is in prose; that which comes next on our table is in verse, being *Leaves from a Christmas Bough*, by E. Boyd, ornamented by A. L. Bond (Routledge & Sons). This is, in its way, a very pleasantly illustrated work; the "ornaments" consist of initials and borders, some of which are very well executed, others are commonplace, none are objectionable.

Among the splendid gift-books of the season none is more magnificently decorated in gold, silver, and colours, or more admirably printed, than a new edition of Lord Byron's *Prisoner of Chillon*, which is illuminated by Messrs. W. & G. Audsley, and published by Messrs. Day & Son, Limited. The chromo-lithographs are by Mr. Tynms, and consist, for the most part, of borders, which inclose the text in a singularly gorgeous manner. The Messrs. Audsley, who are already favourably known to us as the performers of similar tasks, have been most fortunate in this case; their taste is thoroughly well trained for designing in the right manner; their work has been superbly reproduced. Some vignettes, which form the minor illustrations to this work, are less happy in execution than the above-named examples. The binding is extremely well designed.—*Voices of Joy and Thanksgiving*, compiled and illustrated by C. E. B., is another of Messrs. Day & Son's handsome productions. The text consists mainly of hymns of simple and pious tone, selected to suit the principal festivals of the Christian year, and decorated with initials and figure-pictures, both of which are commendable, although their style is rather that of an amateur than an artist.

—*Illustrations of Poetic Imagery from 'The Christian Year'*, published by Messrs. Day & Son, Limited, is dedicated to the memory of Keble by Mary Fyler, and decorated with vignettes, borders, and coloured initials, the floral portions of which are finely wrought and well designed; the figures and landscapes are, although generally satisfactory, not equal to their adjuncts.

AN EXHIBITION AT LEEDS.

It is proposed to have an Exhibition of Works of Art and Industrial Products at Leeds, in the year 1868, to be held in the New Infirmary, a building which has been designed for charitable purposes, and is intended to occupy, ere it is completed, in the manner so fortunately developed at Manchester in 1857. Leeds being ambitious of rivaling her great neighbour, the authorities of the former town called a meeting of the principal inhabitants in September last, in order to consider the matter. This meeting was largely attended by the most influential personages of the borough, and presided over by the Mayor of the town, who, in the course of his address, said that there had been a deficiency in the funds for completing and furnishing the new infirmary, and it had been

thought desirable to hold the Exhibition for the purpose of increasing them. This proposal was received with cordiality. It was originally intended to raise a guarantee fund, of not less than 50,000*l.*; those who put down their names as guarantors not being supposed to be bound until that sum was raised. More than 110,000*l.* has since been subscribed by guarantors. The deficiency in the infirmary account is about 25,000*l.*, to make up which the building itself will be appropriated temporarily to an Exhibition—a purpose for which it is admirably adapted. Exteriorly will be an exhibition of machinery in motion. A structure to be erected for this use will have no very costly character. The town of Leeds has now the advantage over Manchester in 1857, inasmuch as the structure for the Exhibition is already paid for and erected. Mr. W. B. Denison stated the perfect adaptability of the building, defined the arrangements which are proposed to ensure success, and compared the opportunities of Manchester with those of Leeds, concluding therefrom that there is a fair prospect of making a considerable profit. So well has this proposition been received, that ere the conclusion of the week following that in which the above-mentioned meeting was held, the guarantee fund was subscribed to the amount of 55,000*l.* A meeting of the Committee which had been appointed to work the scheme was held early in October last. The Executive Committee is composed of Messrs. J. Kitson, W. B. Denison, A. Fairbairn, J. D. Luccock, I. T. Dibb, T. W. Stanfield, and J. Rhodes. H. Oxley, Esq., Mayor of Leeds, and J. Kitson, Esq., are appointed Treasurers for the Exhibition; Mr. J. B. Waring has been appointed General Manager; Mr. W. B. Denison, Chairman of the Executive Committee. The London Committee consists of Lord F. Cavendish, as Chairman, Viscounts Nevill and Milton, Messrs. W. H. Dixon, A. W. Franks, R. Redgrave, J. C. Robinson, G. Scharf, B. B. Woodward.

FINE-ART GOSSIP.

THIS year's distribution of medals to Royal Academy students was as follows. For painting from the living models, Mr. V. Crome; for a copy of a picture from the Dulwich Gallery, 'A Cardinal blessing a Priest,' Mr. S. Spanton; for a drawing from the living model, Mr. F. T. Goodall; for a model from the same, Mr. J. Griffiths; for a restoration, in the round, of the 'Theseus,' Mr. H. Montford; for measured architectural drawings, Mr. M. Glover and Mr. R. Grooms, two medals; for drawings from the antique, Mr. Symonds and Mr. W. W. Oulless, two medals; for a model from the antique, Mr. C. H. Maybey; for drawings in perspective, Mr. F. Hammond.

We are glad to learn that nearly half the sum, 2,000*l.*, that will be required for the new Architectural Museum in Bowling Street, Westminster, has been subscribed. It is desirable that no delay should take place in the matter. The buildings must be ready for occupation in May next. The Committee does not feel itself justified in beginning the works until a larger fund has been promised.

Pictures intended for the General Exhibition of Water-Colour Drawings at the Egyptian Hall must be sent to the Gallery on the 7th and 8th of January next, between 10 A.M. and 10 P.M. The Exhibition will open to the public on the 4th of February next.

The Report of the Committee of Common Council has been agreed to, which recommends the adoption of a design by Mr. Haywood, the City architect, for the viaduct at Holborn Hill. According to this plan, there will be a clear width of footway on each side of the bridge of 17 feet 9 inches; the carriage-way being 46 feet wide, the length of the bridge 116 feet. Beneath these will be three arches, the headway of each to be 20 feet 9 inches in the centres; at the sides 15 feet 6 inches in the clear. The bridge will stand upon columns of polished red granite, the bases being of polished grey granite.

According to our custom in such cases, we are glad to publish, as requested, the name of Mr. J. Morfett, Upper John Street, Fitzroy Square, who executed the decorations on the exterior of Mr. F. T. Palgrave's house at York Gate, Regent's

Park, to which we alluded last week. Mr. Palgrave was his own designer.

Messrs. Day & Son (Limited) have just published a very handsome volume, which is styled 'Marmor Homericum,' and contains an excellent series of photographs by Mr. S. Thompson, from the work in marble-inlay by Baron H. de Triqueti, which was placed in the cloister of London University, Gower Street, by Mr. Grote. With these photographs is a text, consisting mainly of passages from Homer, translated by Mr. Philip Stanhope Worsley. Having already criticized the originals of these transcripts we have now but to testify that the latter are eminently fortunate and faithful in reproducing the designs of Baron H. de Triqueti.

The first part of a superb work, 'Examples of Chinese Ornament,' has been published by Messrs. Day & Son (Limited). This contains admirably-drawn and splendid chromo-lithographs from objects in the South Kensington Museum and other collections, the work of Mr. Owen Jones, twenty examples in all, without a text. If this publication is continued in the manner of the part now before us, it will supply a want that has long been felt in this country, and be invaluable to designers, artists and amateurs in oriental art. We can hardly praise it too highly.

The Assistant-Secretaryship of the Institute of British Architects has been filled up by the appointment of Mr. C. L. Eastlake.

The Exhibition of Architectural Designs to be sent to Paris is now open at the South Kensington Museum. This collection possesses considerable professional attractions, though small novelty; it can hardly be said to represent the state of architectural art in this country. Of course, most of its items are already well known to our readers.

The award of gold medals to students of the Art Department this year has been as follows. Of the Lambeth School, Mr. P. Ball, for a model from the life; and Mr. E. T. Haynes, the figure from the antique. The first-named gentleman had been successful in a former competition; his companion on two such occasions. To the South Kensington School the distribution of honours of this kind was equal in respect to numbers. Thus: Mr. W. Mackness obtained a medal for "applied design," and Miss M. Mason, who has twice before been successful, received the same distinction. For the Warrington School the number of medals equalled these: Mr. W. Jenkin, for a "group in colour," and Mr. C. Middleton, for "applied design." Of the Birmingham School one student obtained a medal: Mr. T. Cox, for "architectural design." Of the Bloomsbury School, Miss A. E. Manby was rewarded for flower-painting. Of the Glasgow School, Mr. W. Orr was distinguished for "applied design." In addition, Miss M. Mason, who is mentioned above, obtained an Alexandra Scholarship of 25*l*. These scholarships were founded to have the respective values of 25*l*. and 11*l*. "for two students, who, being females, have taken the highest prizes of the year in the competition of all the Schools of Art." Miss A. E. Manby, before named, obtained the inferior scholarship. It is not generally known that funds for the institution of these rewards were obtained through the exhibition of the jewels of the Princess of Wales at South Kensington not long since. Besides the above, twenty silver and fifty-one bronze medals have been distributed; also thirty-three prizes of books.

Mr. Theed's bust of the late John Gibson, sculptor, has been placed in the church at Conway.

Arrangements are being matured for the Second Exhibition of National Portraits at South Kensington. We understand that a supplementary gathering to that of the present year will not immediately take place, but be deferred for an opportunity to be in itself comprehensive of whatever it may be found advisable to add to the contents of the entire series of gatherings. This may accompany the final collection, or be itself distinct. The number of portraits to be displayed next year will not be so great as before; about 100. It will probably be the limit in this respect for the coming display.

The period then to be illustrated by portraiture is that which elapsed between 1680 and the beginning of the current century. The Committee will be glad to be informed soon of the existence of accessible portraits of famous personages who lived in the period above defined. Many works of the highest interest are promised. While we acknowledge not only the great obligations of the public to those who gathered and disposed the contents of the first exhibition of national portraits, but the extreme difficulty of the task, which was, on the whole, admirably performed, we cannot forbear to remark that it is most desirable that the chronological arrangement of future displays should be stricter than before; and, above all, that all the portraits of individuals should be grouped, not as before disposed, at such distance from each other as rendered comparison, which means verification also, almost impracticable. A striking example of another sort of objection to the recent mode of arrangement is afforded by the portraits of the first and second Devereux, Earls of Essex. Thus Robert, the second earl, stood as No. 253, while his father, Walter, the first earl, was displayed with the number 263. Three portraits of the former stood thus: Nos. 253, 296, and 355, the last being more than 100 numbers lower down than the first. Two portraits of Robert, the third Earl of Essex of this family, stood respectively as Nos. 504 and 629. The proper chronological arrangement of each individual's portrait, i.e. according to his advance in life, was frequently neglected. Queen Elizabeth's portraits ranged between the numbers 170 and 363.

Mr. Street has been commissioned to restore the old portion, and design and superintend the erection of the new nave to Bristol Cathedral, to which, as desirable for the completion of the ancient structure and in contemplation, we alluded some weeks since.

The old Chantry Chapel at Kidderminster—a very interesting relic in its way—has been restored by Mr. Hopkins, at the expense of the Earl of Dudley.

MUSIC AND THE DRAMA

ST. JAMES'S HALL.—MR. HENRY LESLIE'S CONCERT FOR CHARITABLE PURPOSES, on SATURDAY EVENING, January 5. Madame Lemmens-Sherrington, Madame Sainton-Dolby; Mr. W. H. Cummings, Mr. Sautley, M. Sainton, M. Lemmens, and Mr. Henry Leslie's Choir. For this performance the gratuitous services of the distinguished Artists who appear have been most kindly given.—Tickets, 6*s*. 3*s*. 2*s*. 1*s*. at L. Cook, Addison & Co.'s, 63, New Bond Street; Keith, Prowse & Co.'s, 48, Cheapside; Austin's, 28, Piccadilly; and all Music-sellers.

SACRED HARMONIC SOCIETY.—Yesterday week's performance of 'Elijah' was, in many respects, a very fine one. Contrasted with anything of the kind to be heard in Paris, London's superiority is amazing. The beauty of orchestral and choral sound, and the thorough enjoyment of every one co-operating, could not but be felt. As to the poem, in spite of the disdain of the Germans, who exalt 'St. Paul' as its superior, for no earthly reason that we have ever been able to divine, save and except that 'Elijah' was written for England, and 'St. Paul' not,—what new is there to be said in its praise?—what need again to state the conviction that it is one of those monuments of Art over which Time and Fashion have no power? As long as Handel's 'Hallelujah' lasts will last also the wilderness-scene in 'Elijah,' culminating in the 'Sanctus' of angels. As a separate, distinctly characterized part, *Elijah* ranks with Handel's *Saul* or *Jephtha* or *Samson*. If qualifying remark has to be made, it is that the female interest of the oratorio is too much divided into scenes and episodes. Yet how excellent is each one of these, considered by itself; and that criticism would be poor and pedantic which demanded precisely the same groups and effects in every work,—which would ignore the power of the book of 'Fidelio' because the tenor is not on the stage till the first act is over (as fine an example of the force of mystery and curiosity as could be named),—which would insist on the presence of angels, no matter what the situation, to retard every biblical story under pretext of contrast,—which would spoil every opera by a final *rondo*, because of the examples in 'La Cenerentola' and 'La Sonnambula.' The part

of *Elijah* (to return from general to special remark) cannot be more nobly delivered than by Mr. Sautley; and this we say, distinctly recollecting the noble singing in it of its first representative, Staudigl. Madame Lemmens-Sherrington sang her best, as usual. We cannot recollect her ever singing carelessly. She is less mannered, and therefore more welcome in her expression than formerly. Her voice is sterling; her execution, very true. Mr. Hobler leaves us no choice save to say that, at present, he is obtrusively inefficient, without the slightest apparent self-mistrust. Really, before presenting himself in an oratorio, it would be not amiss for a raw recruit, such as he is, to study Oratorio singing. Make-believe in art and gracious condescension in manner, however captivating they be to the public of a second-rate Italian theatre now-a-days (brought low by long famine), are no stock-in-trade for one who professes to present what such thorough artists as Brahms and Mr. Sims Reeves (and latest, Mr. Cummings) have been entrusted with to their own and their composers' credit.

MISS GLYN'S READINGS AT ST. JAMES'S HALL.—In each successive Reading Miss Glyn gives new proofs not only of the force of her genius, but of its ample range. The play of 'King John,' read on the 14th instant, is remarkable for a group of prominent characters as happily contrasted as they are powerfully drawn. The mind that can represent these various individualities with such discernment and power as Miss Glyn evinced must have the true dramatic inspiration—a faculty not to be confounded with that displayed by some actors, who can paint tolerably well such characters—and only such—as fall in with their own peculiarities. An actor of this kind is apt to subordinate his author to himself; indeed, we have before now seen Shakspearean representations in which the true order of things was totally inverted, the poet being evidently regarded as a person existing simply to furnish means of display to the performer, who had no idea that his or her individuality should be lost sight of in embodying dramatic conceptions. In Miss Glyn's case it is quite otherwise. With the sympathy which denotes the true artist, she forgets herself in the characters which she assumes, and, thoroughly identifying herself with their feelings and modes of thought, gives to both their natural and special expression. The cruel and deceitful John, not without that strain of chivalry which Shakspeare has somewhat ideally assigned to him as a Plantagenet,—Faulconbridge, with his shrewd brain, and the overflow of physical energy which not only makes him delight in strife and action, but gives a humorous zest even to his perception of the selfishness of mankind,—Arthur, with his filial devotion and his princely gentleness—the bud that should have expanded into knightly manhood,—Hubert, with his better nature under a forbidding surface,—all these were presented by Miss Glyn with an impartial truth and vigour which made it impossible to say in which character she was most at home. Those portions of the play which are most effective on the stage were, to an intellectual taste, still more effective in a reading throughout which one nobly endowed mind shed its illustrative light equally upon all the persons engaged. The scene in which figure the Kings of England and France, Austria, Faulconbridge, the Pope's Legate, and Constance, was a model of varied and animated delivery. King John tempted Hubert to Arthur's death before an audience that sat hushed in interest while the wicked purpose of the monarch was gradually developed; and the pleadings of Arthur with Hubert to spare his sight were irresistible in their pathos. We thought, indeed, that in the early part of this last scene something of the terror of the situation, so far as it relates to Arthur, was lost in the gentle sweetness of his remonstrance; but this defect, if it were one, disappeared before the close, the affecting power of which could not have been surpassed. We have reserved the mention of Miss Glyn's Constance till now, because it was the central triumph of the night. Finding the mainspring of the character in maternal affection, Miss Glyn still kept steadily

view the fact that Constance is herself a princess, and the mother of a rightful king. Accordingly, her passion in its utmost intensity is still regal. Her denunciation of Austria is that of a high-born woman, who, in a chivalric age, holds up to the raitor the ideal of knighthood to which he has been false. Her grief is deep and overpowering, her passion fiery and scathing; but she is never merely violent. By a majestic largeness of treatment, and by a spontaneous truth of emotion, whether in grief or anger, Miss Glyn produced in Constance an effect rare indeed in these times. Her expressive face was in itself a vivid commentary on the text, while from her lips the passionate imagery which Constance employs seemed as natural as an everyday utterance. At the end of the third act a refined and critical audience were roused into enthusiasm, nor were their demonstrations less fervent at the close of the reading. The next play on Miss Glyn's list is 'Othello,' which will be given on the 18th of January.

MUSICAL AND DRAMATIC GOSSIP.

The following is, with some condensation, quoted from the *Orchestra*.—"It appears that the present state of the Royal Academy of Music has caused dissatisfaction to a not altogether unknown or influential portion of the musical profession, some of whom have been connected with this institution, but the majority not so. A memorial has been drawn up and numerously signed, as under:—
"Understanding that the Government and the Royal Commissioners of the Art Exhibitions are being petitioned to contribute still further to the maintenance of the Institution called the Royal Academy of Music, we the undersigned professional musicians, residing in England, realizing the fact that the Royal Academy of Music has failed to promote the highest interests of Musical Art—that the Government grant has simply prolonged its existence, but not extended its usefulness; and feeling, moreover, assured that any further repetition of such attempt can only end in a similar failure, and prove equally discreditable to the country and wasteful of its funds—do hereby respectfully advise the establishment of a New School of Music, in which every advantage may be offered to musical students, to be presided over by competent professors, appointed by the State, and responsible to it for the efficiency of the Institution. Connected with such an Academy, we would further advise, if possible, the establishment of an English National Opera, believing by such agencies a genuine and useful impulse might be given to the development of musical genius in this country, and ultimately redeem it from the disgrace of being the only European nation that fails to cultivate its own national music. (Signed) Thérèse Tietjens, M. Lemmens Sherrington, Sims Reeves, C. Santley, W. Harrison, Rokitsansky, W. Ganz, G. Paque, F. Lablache, Sydney Pratten, T. H. Wright, Handel Gear, C. Schubert, J. W. Thirlwall, V. Collins, H. Wylde, Mus. Doc., Alfred Mellon, Ludwig Straus, Tom Hohler, J. F. Barnett, J. Pittman, M. Barret, René Favarger, W. Beavan, H. Holmes, J. B. Ciabatta, W. H. Hann, F. Griesbach, C. Harper, J. Carrodus. And about 100 others."—The above, it will be seen, is a virtual repetition, with numerical emphasis, of what we have been saying for twenty years past, and of the arguments adduced by Mr. Henry F. Chorley in the paper by him presented before the Society of Arts seven years ago; the result of which has been the recent stir in the matter, the fruitless and partial hearing of evidence by the Society of Arts, and, for the present, the patching of "the old coat" which is, it seems, to find a shelf in the South Kensington Museum.

'Alexander's Feast' was repeated at the *Crystal Palace* on Saturday last. Will it be credited that our notice of this superb work (*ante*, p. 685) on its former performance at Sydenham has absolutely, by a contemporary, been represented as an interested attempt to 'dethrone' Handel and Dryden, in favour of Mr. Benedict's 'Legend of St. Cecilia' and the maker of its words? The force of deliberate misrepresentation can go no further.

Mr. Sullivan's first Symphony was performed the

other evening at Mr. Halle's weekly concert at Manchester, with its usual success. It will possibly, we hear, be taken in hand by M. Pasdeloup at Paris, and should be at Leipzig, if the authorities of the music-school there take any pride in their best pupils. Meanwhile, we understand that some, if not all, of Mr. Sullivan's scores are about immediately to be published.

At Tuesday's *Soirée* of the *New Philharmonic Society*, a Violin Quintett, by Mr. Henry Holmes, was brought forward.

It is now said that Mr. Mapleson's operatic designs on the centre of Leicester Square have been prematurely announced,—and are virtually so many air-castles.

Mr. Oakeley, the Reid Professor, has, at last, delivered his Inaugural Address at Edinburgh.—Mr. G. A. Macfarren will give six lectures on Harmony, at the Royal Institution, early in the year that is to come.

By way of postscript to past notes on operas now running in Paris, mention must be made of the performance of Mozart's 'Don Juan,' in which the original text and order of pieces are more largely followed than has been the fashion in London. The *Donna Elvira* (Mlle. Mauduit)—a prize-pupil from the Conservatoire—impressed us most agreeably. Her voice is sympathetic. Though her style is not complete, her vocal method is good. Her presence is elegant, as compared with those of Madame Sass—a stout and vulgar *Donna Anna*,—and Mlle. Batta—an over-dressed *Zerlina*, with an acrid voice and a hard face. The *Don Juan* (M. Faure) is now the best on the stage. The *Don Ottavio* (M. Villaret) is wondrously fat and doleful; and, though this revival was meant to be costly and splendid, protest cannot be too strong against the interpolated *ballet*, made up out of Mozart's quartetts, which furnish no dance-music. The Turkish *Rondo*, from a *Sonata* which had already done duty as an *entr'acte*, at the Théâtre Lyrique, when 'Il Serraglio' was revived there, was the only rhythmic scrap calculated to inspire "the mirth of feet" (as old Campion put it).

M. Reyers is said to be at work on a grand opera, which is to be given at Paris after Signor Verdi's 'Don Carlos.'

M. Offenbach is about to present another three-act opera, 'Robinson Crusoe,' at the Opéra Comique.—M. Pessard, this year's Laureate, has been commissioned to write an opera for the same theatre.

Mlle. Carlotta Patti's tour in the French provinces is said to be thoroughly successful.

'Sardanapalus' has been set as an opera by the Baroness le Maistre. There is some talk of its being tried at the Grand Opéra: a hazardous experiment. The last of the kind made there was the production of Mlle. Louise Bertin's 'Esmeralda,' in 1836. No woman till now has taken a real hold of the musical stage, nor produced anything in opera analogous in merit to the tragedies of Joanna Bailie and Miss Mitford. Such total absence of fresh invention is as strange as it is noticeable.

There is to be a monument at Hal to Servais.

Every scrap of Mozart's music bids fair now to be brought before the public.—At the Fantaies Parisiennes of Paris the management is promising 'L'Oca del Cairo,' overlooking the fact that only a few complete numbers of the score exist.—At Frankfurt a musical society has been performing the choruses to 'King Thamos.' Two of these, far finer and more serious than most of Mozart's service-music, in their adapted form as Motetts, have been long stock-pieces at our musical festivals.

German papers announce a biblical opera on the story of Saul, by Herr Volckmann, as among coming novelties.—'The Fabii,' an opera by Herr Langert, has been successfully given at Coburg.—Herr Albert's 'Astorga' has been produced at Carlsruhe.

The Whitsuntide Lower Rhenish Musical Festival will next year be held at Aix-la-Chapelle, to be conducted by Herr Julius Riets.

Mr. Vernon Rigby, who has been studying for some time at Milan, is about to commence his career on the Italian opera-stage, by singing as *Lindoro* in 'L'Italiana,' in the Italian opera com-

pany at Berlin, with Mlle. Grossi. The opera being Signor Rossini's, is one of those in which a singer, as distinct from a bawler, can favourably assert his accomplishments.

"During the first days of December (writes a friend from Naples) 'Il Trovatore' and 'La Fida-zata Corsa' have been given in San Carlo. Both have gone off heavily. M. Gounod's 'Faust' is promised, though no time is fixed. Meantime, 'La Vestale,' of Mercadante, and 'La Muta di Portici' have been in course of rehearsal. The great novelty of the season, however, was the new opera of Maestro Serrao, which was brought out, on Saturday night, at San Carlo. The *libretto* of 'La Duchessa di Guisa,' by Signor Piave, is taken from Dumas' drama, 'Henri III.'; and the subject of the opera is the same as that of 'Caterina di Guisa,' by the celebrated Felice Romani, and of Maestro Coccia, now Director of the Chapel of Novara. It was a double imprudence, therefore, to follow in the steps of two composers who had already won their laurels in the same path. Though 'La Duchessa di Guisa' has been performed only once, though it may be premature to express a decided opinion on its merit, it may be recorded that some of the best judges here pronounce it to be a work weak in inspiration and deficient in melody and harmony. The *largo* in the *finale* of the second act, and the *duettino* of the soprano and the tenor, which precedes the *cabaletto* in the *finale* of the fourth act, pleased the audience; but the rest of the new opera elicited little or no applause. Signor Stigelli, the tenor, contributed much towards saving the music from a decided *fiasco*. La Palmieri (English), the soprano, and Signor Pandolfini, the *basso*, made no figure, and were not once applauded. La Montebello, the second soprano, was below mediocrity, and, in spite of her graceful figure, produced little or no impression. In brief, if the opinion we have heard expressed be correct, 'La Duchessa di Guisa' will have its run of three or four evenings, and be forgotten."

What a tale of dearth and destitution is conveyed in the above notes!—but the news from Milan is not brighter than from Naples:—"I have little news for you (writes our Correspondent), as theatres are busily preparing for the Carnival season. La Scala closed on the 8th inst., with 'L'Africana' and 'La Devadacy.' 'Polinto' made an immense *fiasco*, the artists being all incompetent. It was withdrawn after the first performance. The Carnival season commences on the 26th inst., with 'Don Sebastiano' and 'La Devadacy.' 'L'Africana' will also be given."

Pantomime gives note of preparation. Mr. E. L. Blanchard, as usual, will supply that at Drury Lane, adopting the fairy legend of 'Number Nip'; and Mr. Gilbert à Beckett does the same service for Covent Garden, adopting the subject of 'Ali Baba.' It seems we have not yet done with the Forty Thieves. The Surrey pantomime is entitled, 'A, Apple Pie'; Astley's, 'Hush-a-bye Baby on the Tree Top'; and Sadler's Wells, 'The Golden Cask.' Burlesque also asserts claims. Mrs. Wood will make her appearance in burlesque at the Princess's in 'The Invisible Prince'; and at the Adelphi a new burlesque by Mr. Andrew Halliday, entitled, 'Mountain Dhu,' will give a new reading to Sir Walter Scott's poem of 'The Lady of the Lake.' There will also be a new burlesque at the Strand on the subject of 'Guy Fawkes.' Pieces of a more novel description will be attempted at some houses; for instance, a new *comedieta* at the Haymarket by Dr. Westland Marston, and entitled, 'A Mere Child,' in which Miss Rebecca Powell will make her *début*. The Prince of Wales's announces 'A Christmas Comicality,' by Mr. H. J. Byron, to be called 'Pandora's Box.' Mr. Fechter, at the Lyceum, promises to produce on Christmas Eve a new drama, entitled, 'Rouge et Noir,' in which he will himself act a part. At the St. James's a lyrical eccentricity is underlined, called 'Dulcamara,' founded on Donizetti's opera of 'The Elixir of Love,' and produced by Mr. W. S. Gilbert, the artist and contributor to *Fun*.

MISCELLANEA

Lake Dwellings.—In reply to my paragraph on Lake Dwellings in the *Athenæum* for November 24, your number for December 15 contains two very interesting letters, one from Col. Yule, who writes from Sicily, the other from Mr. G. Henry Kinahan, who, in all probability, dates from Ireland. Col. Yule tells us that there are numerous districts in the far East (not only in Burmah, and other out-of-the-way places, but in our own English India), where people live on piles, as a rule, at the present day. Some curious ethnological suggestions are thrown out in Col. Yule's letter; and it would seem not improbable that in the East—that sultry droning region, where the laws alter not—the custom of living on piles may in some instances have survived its original cause, and become quasi-normal in particular races. Mr. Kinahan, from another region altogether, gives us the practical information that in Ireland lake habitations existed more than 2,000 years after the time of the Pæonians of Lake Prasias mentioned by Herodotus. It is not in the slightest degree improbable that the Pæonians, like the Irish, may have been Celts; and there is no reason why these two branches of the same race should not, by Celtic (or, more probably, purely human) instinct, have constructed similar habitations in widely distant parts of the world. But, for myself, I yearn for facts. Will Mr. Kinahan tell us whether the Irish lake-people lived on piles, and whether the remains of their habitations may yet be found? If they only lived on islands, and built on the ground, Mr. Kinahan's information will be of less value. In the mean time, I am somewhat amused to find that, while two Correspondents write from distant lands to corroborate my modest hypothesis, there is no champion at present who stands forward to advocate the theory of the indefinite and undisputed antiquity of lacustrine habitations. A. R.

Cut or Uncut.—"A Great Reader," in your last, asks for much; although, without irony, I wish he may get it. In demanding "books and periodicals ready cut," he invites booksellers to relinquish an obvious advantage, in palpable evidence of newness, which they are not likely to relinquish in deference to any such abstraction of civilization. Let us rather "go in" for the compromise exemplified in an early issue of the *Handy Shakspeare*, but since (*quoad* my experience) abandoned. Give us a clean shave of lateral edges, leaving the needful test—and less than half of the present obstacle—at top. My humble benison on him who shall first lay down such rule, and—stick to it.

A DISCURSIVE.

Lunar Observations.—It may interest your readers to know at once that there is confirmation of Herr Schmidt's observation on the Lunar Crater *Linné*, alluded to in the *Athenæum* of December 8, in connexion with the labours of the Moon Committee of the British Association. On Thursday evening, December 18th, I spent a couple of hours with Mr. Birt and Mr. Talmage at Mr. Gurney Barclay's Observatory at Leyton, examining the spot with Mr. Barclay's very fine telescope of 16 inches aperture. During this time the moon was constantly covered by a fine veil of cloud; but Beesel and its shadows were very distinctly visible. No trace of *Linné* was to be seen. Our impression was that *Linné* ought certainly to be visible under the circumstances, which allowed such very distinct observation of the neighbouring Beesel. I have this morning a note from Mr. Talmage to inform me that after Mr. Birt and myself had left the Observatory, under the impression that all further chance of observation was gone, the clouds suddenly cleared quite away, giving him an unexceptionable opportunity of examination. He then found that a spot he had previously taken for *Linné* was *Sulpicius Gallus*, and that no trace of *Linné* was visible, but that where it should be there was a faint circular cloud-like spot ("petit nuage blanchâtre" of Herr Schmidt). Mr. Talmage was enabled carefully to verify the fact that the "cloud" occupies the exact position that the crater *Linné* should hold.

ROBERT JAMES MANN, M.D.

TO CORRESPONDENTS.—E. F. C. A. R. W.—W. G. J.—E. J. L.—received.

THE ILLUSTRATED CHRISTMAS GIFT-BOOK

"Two Centuries of Song" goes far to redeem the credit of 1866 for Christmas books. The ambrosic borders to the beautifully-toned pages are in exquisite taste, and of high typographic merit. Of these there are sixteen patterns. Larger full-page illustrations are not wanting, and the sides, glittering in all the glory of green and gold, are secured by a handsome class of *Requies*.

"Two Centuries of Song" is a collection of lyrics, madrigals, sonnets, and other occasional verse of the English poets of the last two hundred years. The gathering begins with George Withers' famous poem, "Shall I, wasting in despair, and ends with Mr. Walter Thornbury's 'I send thee but a simple gift.' The latter poet has made the collection, and it is a good one, embracing pieces from the works of more than a hundred various authors, from Browning and Brummell, to Waller, Wordsworth, and Alaric Alexander Watts. The poems are illustrated by engravings from equally various hands, and are generally of a bright and lively kind. All the engraving in this book is good; indeed, that is one of its chief merits."—*Pull Moll Gazette*.

"Solidly bound in green and gold cloth, which looks so like morocco as not to disgrace the metal clasp which holds the covers together. Mr. Walter Thornbury's 'Two Centuries of Song' or, Lyrics, Madrigals, Sonnets, and other Occasional Verse of the English Poets of the Last Two Hundred Years, recommends itself as a volume pleasant in its contents, and charming in its illustrations. Many of the landscapes are very beautiful; the age pieces are generally good; the type is clear, the paper tinted, the borders handsome, the illustrations are generally good, and some of them are by artists who seldom appear as illustrators."—*Guardian*.

"The book is good as well as handsome. Literature and Art here alike well represented in it."—*Examiner*.

"A book of which any drawing-room table may be proud."—*London Review*.

Secretary—W. J. L. HERIOT, Esq.

PROSPECTUS.

The object of this Company is to carry out the concessions granted by the Municipal Council of Brussels, in concert with the authorities of the province of Brabant and the Belgian Government, for the drainage and coincident improvements of the capital of Belgium.

The concession—for the due execution of which 50,000*l.* caution money has been lodged on behalf of the Company—comprises the construction of an underground channel for the river Senne (at present an open main sewer) running through the city, together with a broad thoroughfare or boulevard above that course: a complete system of main sewers and important branches above, through, and below the city: the rectification of the river channel, and an outfall station for exhaustion of the sewage: it provides also for the erection of an exchange, a market-place, a monumental fountain, and such works as may be necessary in connexion therewith.

The concessions also give the exclusive valuable right to the sewage for a period of sixty-six years, subject to the maintenance of the decantation works in connexion therewith.

The magnitude and value of these concessions will be understood by the fact that they include subsidies to be received by the Company in cash and annuities of the value together of 26,000,000*l.*, or 1,040,000*l.* sterling, which have been voted by all the authorities and sanctioned by the Crown.

The caution money will be repaid to the Company in proportions as the works progress.

The concession also gives the right confirmed by royal decree of expropriation along a belt embracing frontages on both sides and in the vicinity of the proposed new boulevard; and, in addition, the free grant (fee simple) of all town and suburban land derived from diverted streets, open public places, and closed river courses that are included within the limits of the concession.

The value of these stipulations will be readily discerned from the fact that (apart from the land, not to be paid for at all, being received as free gift), the town blocks to be purchased and cleared are at present mostly occupied by very indifferent buildings, whereas the site will become at once the most important boulevard for traffic, business and residential purposes, opening up as it does a direct road between the North and South Railway Termini, and the land will become saleable by the Company at the largely enhanced anticipated value.

The many thousands of our countrymen who have recently visited Brussels cannot but have observed the scarcity of unoccupied dwellings; in addition to the existing want of accommodation, it should be considered as affecting the appearance of the town blocks in such eminently

desirable situations that the works alone will, it is estimated, displace upwards of 1,200 families.

After a long course of laborious official inquiry, extending over several years, as to the most effectual sanitary plan to be adopted, the Belgian Government finally accepted that upon which the present concessions are based, upon the Report of a special Government deputation commissioned to make a personal examination of the important sewage and main drainage works of London and the suburbs.

The original estimates for the principal part of these works were examined and verified by Mr. J. W. Bazalgette, Engineer-in-chief to the Metropolitan Board of Works of London, under the sanction of that body; and these estimates have been further tested by months of minute and careful revision on the part of contractors and their respective engineers.

The contracts for the execution of the whole of the main drainage works, and the formation of the boulevard, have been concluded with experienced and responsible Belgian contractors, approved by the Belgian authorities, and who have placed at the disposal of the Company sufficient guarantees for the due performance of their engagements.

It is intended that the whole of the works shall be completed within four years.

The importance of the undertaking is evidenced in the protracted official debates in the Brussels Municipal Council, and also in the Belgian Chambers and Senate, on the subject, and by the special Report thereon from Lord Howard de Walden, Her Majesty's Minister Plenipotentiary at Brussels, transmitted by the Earl of Clarendon, through Sir George Grey, to the Metropolitan Board of Works in London, and recorded in their Minutes under date of May 18, 1866, an extract of which is annexed to this Prospectus.

The late distinguished monarch, Leopold I., to whose wisdom and sagacity Belgium is so deeply indebted, always manifested the warmest interest in these projected works; and the reigning sovereign, His Majesty Leopold II., after earnestly forwarding every stage of the negotiation from its inception, has further testified his conclusive approval by having expressed his desire to inaugurate the works by laying the first stone in state ceremony, which is fixed to take place at Brussels on Wednesday, the 22nd of January next.

It will be at once seen by this brief description of the concession that it is one of no ordinary character, whether it is considered in the importance of the work to be done—the Governmental identification with its success—the national character of its object—and the Directors believe they may fairly add, without entering into details (which in a public statement they cannot do), from its prospect of financial success.

The capital of the Company is fixed at 350,000*l.*, in 35,000 shares of 10*l.* each, divided into 25,000 A Preference Shares, and 10,000 B Deferred Shares.

The Preference Shares represent the capital to be subscribed by the public for working out the concession; and the deferred shares are accepted by the concessionaires, in consideration of the assignment by them to the Company of the concession.

The privileges attached to the respective share capital are as follow:—

The A Preference Shares are to be redeemed out of the assets of the Company by drawings by lot, and each share paid off at 15*l.* per share, being a bonus of 5*l.* per share. The drawings will take place on the following dates, viz.:—

| | | |
|-------------------------------|------------------|------------------|
| On the 22nd of January, 1870, | 6,250 Shares, or | 62,500 <i>l.</i> |
| " " 1871, | 6,250 " | 62,500 <i>l.</i> |
| " " 1872, | 6,250 " | 62,500 <i>l.</i> |
| " " 1873, | 6,250 " | 62,500 <i>l.</i> |

Total shares..... 25,000 or 250,000*l.*

until so drawn and paid off, each share to bear interest at the rate of 8 per cent. per annum, payable half-yearly, on the 1st of January and the 1st of July in each year, for which interest warrants will be attached to the shares.

On repayment of the shares at 15*l.* each, the shares will have to be given up with all interest warrants attached thereto that have not become due, and the shares so paid off are transferred for the benefit of the B Shareholders. Should the realization of the concession permit, the Directors reserve to themselves the right of making, at their discretion, either earlier or larger drawings, but in such case the 5*l.* bonus per share is still to be paid, notwithstanding such earlier or larger redemption of share capital.

Reckoning the redemption at the rates and at the bonus named, the investment will pay subscribers a rate of interest as follows:—Those shares which are drawn, and thus are to be paid off on the 22nd of January, 1870, will have received 8 per cent. interest and at the rate of 16½ per cent. bonus, or total of 24½ per cent. per annum on amount of investment for the period of three years. Those to be paid off on the 22nd of January, 1871, will have received 8 per cent. interest and at the rate of 12½ per cent. bonus, or total of 20½ per cent. per annum on amount of investment for the period of four years. Those to be paid off on the 22nd of January, 1872, will have received 8 per cent. interest and at the rate of 10 per cent. bonus, or total of 18 per cent. per annum on amount of investment for the period of five years. Those to be paid off on the 22nd of January, 1873, will have received 8 per cent. interest and at the rate of 8½ per cent. bonus, or total of 16½ per cent. per annum on amount of investment for the period of six years.

These A Preference Shares are now offered to the public for subscription. The payments are to be made as follows:—

| | |
|--------|---------------------------|
| £2 0 0 | per share on application; |
| 3 0 0 | " on allotment; |
| 2 10 0 | " on March 1, 1867; |
| 2 10 0 | " on July 1, 1867; |

£10 0 0

or all may be paid up at once, either on application or allotment, at option of subscriber—interest accruing from day of payment in all cases.

The Directors do not pledge themselves to make an allotment to every applicant, nor to allot the whole of the shares, it being their desire to place this small capital in the hands of *bond fide* investors.

The B Deferred Shares represent the concessionaires' interest in the Company. These shares will not be entitled either to payment of any interest or capital until the whole of the Preference Shares have received their capital back, with the interest and bonus before referred to; therefore the Deferred Shares become practically and virtually a guarantee to the Preference Shares.

The concessionaires having thus expressed their willingness to indorse substantially their opinion of the value of the concession, it follows that the Deferred Shares will only receive the surplus, whatever it may amount to after the redemption of the Preference Capital, the concession and property then remaining will belong to the Deferred Shareholders alone.

No purchase-money for the concession and no promotion-money will be paid, and the expenses will be strictly limited to the actual preliminary disbursements necessary to acquiring the concession and the establishment of the Company—the Crédit Foncier of England (Limited) receiving their profit entirely from the B Deferred Shares.

As the A Preference Shares are intended to be paid up in full, as before mentioned, no further liability after such payments will exist, and power will be taken to incorporate the Company according to the Belgian law as a Société Anonyme, with a view to having the shares issuable to bearer.

Every information can be learnt by applying to the Solicitors, both as to the concession, plans, articles, and memorandum of association, &c.; and it is the wish of the Directors applicants should inform themselves on any point they desire information.

Applications for shares may be made in the annexed Form, which must be accompanied by the payment of 2*l.* per share deposit, without which no application will be considered. Should a less number of shares be allotted than are applied for, the deposit will, so far as required, be applied towards the payment due on allotment. Should no allotment be made, the amount paid will be at once returned without deduction.

Prospectuses, which contain a copy of the memorandum of association, and forms of application for shares, and memorandum and articles of association, may be had of the Bankers, Brokers, Solicitors, or of the Secretary, at the offices of the Company, St. Clement's House, Clement's Lane, London, E.C.; also of the Crédit Foncier of England (Limited), Clement's Lane, E.C.

Form of Application for Shares.

(To be retained by the Bankers.)

To the Directors of "The Belgian Public Works Company (Limited)."

Gentlemen,—Having paid to your bankers, Messrs. Smith, Payne, and Smiths, the sum of £ , being a deposit of 2*l.* per share on A Preference Shares in the above Company, I hereby request that you will allot me that number, and I agree to accept such shares or any less number you may allot to me on the terms of the Prospectus, and I agree to pay the deposit on allotment, and to sign the memorandum and articles of association of the Company, as duly registered, when required, and I authorize you to insert my name on the register of Members for the number of shares allotted to me.

THE BELGIAN PUBLIC WORKS COMPANY (Limited).

Extracts from Minutes of the Metropolitan Board of Works of 18th May, 1866, and referred to in Prospectus.

52.—The Clerk laid before the Board the following communication:—

May 14, 1866.

"Sir,—I am directed by Secretary Sir George Grey to transmit to you, for the information of the Metropolitan Board of Works, a copy of a despatch from Her Majesty's Minister at Brussels, respecting some important improvements which are about to be made in that city, and which have been contracted for on the part of the English Crédit Foncier and Mobilier Company.—I am, &c.,

(Signed) "H. WADDINGTON.

"The Chairman of the Metropolitan Board of Works."

(Enclosure.)

"Brussels, May 4, 1866.

"My Lord,—A great public work in Brussels of remarkable extent and proportions has just been contracted for on the part of the English Crédit Foncier and Mobilier Company. The object is to arch over the river Senne, which runs through the lower part of the city, and is in fact an immense open drain, receiving the greater part of the sewage of the town, which is at present most dangerous to health, and often the cause of destructive epidemics.

"The plan combines lateral drains to intercept the sewage, reservoirs outside of the town for deodorizing and collecting for manure, and works to

prevent inundations. An extensive boulevard is to be run over the vaulted course of the Senne, quite through the town. The houses on each side, which are now of the most inferior class, are to be pulled down; new ones of a superior character, on a widened way, are to be erected all along the new boulevard, with great facilities for lateral access to it on either side. A building, which is to unite halls for an exchange and galleries for artistic exhibitions, is also to be constructed.

"The estimated cost of these works is 26 millions of francs. The amount is contributed by the town of Brussels, by the province of Brabant, and by the State, in the following proportions:—The town, 16 millions; the province, 3 millions; the Government, 7 millions.

"I inclose herewith a copy of the Report presented to the Chamber of R. R., on the part of the Central Section, which explains fully the nature and importance of this projected transformation in the lower part of Brussels.

"As an engineering work the plan is one of the highest interest, from its extent and projected effects as combining ornamentation and facilities of intercourse throughout the whole of the lower quarter with incalculable benefits in point of healthy action on at least half of the population of Brussels.—I have, &c.,

(Signed) "HOWARD DE WALDEN AND SEAFORD.

"The Earl of Clarendon."

NATIONAL MANUSCRIPTS.

FAC-SIMILES OF NATIONAL MANUSCRIPTS,

FROM WILLIAM THE CONQUEROR TO QUEEN ANNE;

Selected under the direction of the Master of the Rolls, and Photo-zincographed by command of Her Majesty Queen Victoria.

By Colonel Sir HENRY JAMES, R.E. F.R.S., Director of the Ordnance Survey.

With TRANSLATIONS and NOTES.

Published by Authority of the Lords Commissioners of Her Majesty's Treasury.

This series of PHOTO-ZINCOGRAPHIC FAC-SIMILES of some of the most interesting of our NATIONAL MANUSCRIPTS, copied by order of Her Majesty's Government by Colonel Sir HENRY JAMES, R.E., Director of the Ordnance Survey; with TRANSLATIONS and INTRODUCTORY NOTES by W. BASEVI SANDERS, Esq., Assistant-Keeper of Her Majesty's Records; consisting of Royal Charters and Grants, and the Letters of Royal and Eminent or Remarkable Persons, has been selected under the direction of the Right Hon. LORD ROMILLY, Master of the Rolls, by THOMAS DUFFUS HARDY, Esq., Deputy-Keeper of Her Majesty's Records; and includes some of the most remarkable Original Documents deposited in Her Majesty's Record Office, together with a few from other repositories, including the most perfect Original Copy of Magna Charta now extant. They are not only of the highest historical interest, but at the same time illustrate the changes which have successively occurred in our language and writing from the reign of William the Conqueror to the reign of Queen Anne. The Fac-similes are arranged chronologically, and the Translations are interleaved so as to appear opposite to each page of the Fac-simile of the Original Manuscripts.

The Series will be published in Four Parts, price 21s. each Part.

PARTS I. and II. are now ready.

London: EDWARD STANFORD, 6, Charing Cross, S.W.,

Fourth Annual Publication.

The STATESMAN'S YEAR-BOOK:

a Statistical, Genealogical, and Historical Account of the States and Sovereigns of the Civilized World, for the Year 1867. By FREDERICK MARTIN.

The Work contains—in addition to a vast amount of Political Information, description of the Population, form of Government, Revenue, Public Debt, and, in short, all facts calculated to furnish a picture of the actual condition of the various States of the World—the most abundant Commercial Statistics, showing the Trade of all Nations with each other and with the United Kingdom, the whole after Official Returns.

"The great merit of 'The Year-Book' is that its matter is so clearly and systematically arranged; the statistics of any one state or nation may be easily referred to, or those of two or more may be compared with each other without difficulty. It fully merits the support it claims from all who have an active interest in politics or commerce."—*Times*.

DORE'S ILLUSTRATED MILTON. 5l.

"If the reader has seen the Engravings, he does not want them described; if he has not seen them, such a brief sketch as this will convey little idea to his mind. But our remarks may be productive of one advantage—they may induce some persons to procure Messrs. Cassell's splendid tribute to our great poet, and examine it for themselves."—*Times*.

"The book of the year."—*Saturday Review*.

"One of the finest monuments that typography and the art of book decoration have ever furnished to the honour of one of the greatest—perhaps the greatest but one—of our English poets."—*Illustrated London News*.

CASSELL, PETTER & GALPIN, Ludgate-hill, London, E.C.

One Halfpenny per Page, Large Size,

CASSELL'S CHORAL MUSIC.

Edited and Marked by HENRY LESLIE.

In Weekly Numbers at Twopence, and in Monthly Parts at One Shilling.

No. I. ready January 9th, 1867; Part I. ready January 30th.

It is proposed to issue regularly, every week, a serial of carefully selected and marked Part Music, with occasional New Part Songs by the most eminent Composers of the day, and to publish it at such a price as will place it within the reach of every individual member of every Choral Society throughout the kingdom.

CASSELL'S CHORAL MUSIC will be printed in the clearest characters and on good paper, so that it may be read in choirs with perfect ease; and this advantage of full-sized music will be secured to chorists at the very low price of One Halfpenny per Page.

The Work will include the most celebrated compositions of the English Glee and Madrigal Schools, Motets by the great Italian and German masters; and in addition to this, the Publishers have the satisfaction of announcing that they have secured the co-operation of Messrs. Benedict, Halton, Henry Leslie, G. A. Macfarren, Pinsuti, and Henry Smart, who have undertaken to contribute original Part Songs, composed expressly for this Work.

The special distinguishing feature of CASSELL'S CHORAL MUSIC is, that the publication will be edited by and contain the Copyright Marks of Expression of Mr. Henry Leslie. The reputation—not only English, but European—of the famous Choir of which this gentleman is the leader, sufficiently attests the value of those expressional marks by which such marvellous choral results have been obtained.

"Prospectuses for distribution will be supplied by the Publishers on application."

CASSELL, PETTER & GALPIN, Ludgate-hill, London, E.C.

In Penny Weekly Numbers and Sixpenny Monthly Parts,

THE ILLUSTRATED BOOK OF PRAISE.

Messrs. Cassell, Petter & Galpin have much pleasure in announcing a New Serial Publication, under the title of THE ILLUSTRATED BOOK OF PRAISE, which will consist of a comprehensive collection of Hymns, Sacred Songs, and Poems by standard and living Authors. The Work will be printed on toned paper, and the greatest care will be taken to produce the Engravings in a style worthy of the sacred themes they illustrate.

No. I. price One Penny, ready January 16th; Part I. price Sixpence, ready January 30th.

CASSELL, PETTER & GALPIN, Ludgate-hill, London, E.C.

In Monthly Parts, with Portraits, price Sixpence,

CASSELL'S BIOGRAPHICAL DICTIONARY.

Edited by T. TEIGNMOUTH SHORE, M.A.

PART I. ready JANUARY 30.

In the treatment of a Work which in its nature is of so ample a range, it is intended, while embracing the greater celebrities of all times and nations, to exercise a judicious discrimination in selection and condensation; so that, while it is hoped no name of importance will be omitted, economy of space will be insured, thus making the work comprehensive in its scope and moderate in its size and price.

Several eminent writers, under the able Editorship of Mr. Teignmouth Shore, have undertaken to contribute, amongst whom may be mentioned—

The Right Hon. Joseph Napier, D.C.L., Ex-Lord High Chancellor of Ireland.

The Rev. Canon Payne Smith, D.D., Regius Professor of Divinity, University of Oxford.

Aurelio Saffi, late Professor of Modern Languages in the University of Oxford.

J. F. Waller, LL.D., Vice-President of the Royal Irish Academy; Author of a Life of Swift, Goldsmith, &c.

Col. Meadows Taylor, Author of 'Tara,' 'The Confessions of a Thug,' &c.

D. F. McCarthy, Author of 'Translation of Calderon's Dramas,' &c.

Dr. E. P. Stewart, Professor of Music in the University of Dublin.

Dr. Doran, F.S.A., Author of 'Their Majesties' Servants.' Walter Thornbury, Author of 'Haunted London.' John Short, LL.D., Barrister-at-Law.

"A separate Portrait, well printed on toned paper, of one of the Subjects of biographical notice will be given with each Part."

CASSELL, PETTER & GALPIN, Ludgate-hill, London, E.C.; and Broadway, New York.

CASSELL'S CHRISTMAS VOLUMES.

Illustrated by GUSTAVE DORÉ.

DORE'S MILTON ("The book of the year."—*Saturday Review*.) ... £5 0 0

DORE'S DANTE ... £2 10 0 DORE'S CROQUEMITAINE ... £1 1 0

DORE'S DON QUIXOTE ... 1 10 0 DORE'S BARON MUNCHHAUSEN ... 1 1 0

DORE'S BIBLE, Vol. I. ... 1 0 0 DORE'S WANDERING JEW ... 0 15 0

The *Saturday Review* says: "Messrs. Cassell have devoted themselves to the work of giving the English book-buyer Gustave Doré, in all the profusion of his prodigious pencil. This year, at any rate, may be pronounced to be the Doré year. We read the too obvious solicitations of a sorry joke, but we hope it will be a golden year to those enterprising publishers, who send us the 'Bible,' with Doré illustrations, 'Dante,' with Doré illustrations, 'Paradise Lost,' 'Don Quixote,' 'Munchausen,' 'The Wandering Jew'—all from the same dashing and vigorous artist. Here are seven most sumptuous volumes, all handsomely printed, and with paper and type 'de luxe,' and all from the same artist and entrepreneur. They may be proud of each other."

CASSELL, PETTER & GALPIN, London, E.C.; and Broadway, New York.

Now ready, price Twelve Shillings,

CASSELL'S ILLUSTRATED EDITION OF FOXES' BOOK OF MARTYRS.

Edited by the Rev. W. BRAMLEY-MOORE, M.A.

MUSINGS ABOUT MEN,

Compiled and Analytically Arranged from the Writings of the Good and Great.

By HENRY SOUTHGATE.

"Every man is a volume, if you know how to read him."—*W. Ellery Channing*.S. O. BEETON'S PERIODICALS AND SERIALS
FOR THE NEW YEAR.THE ENGLISHWOMAN'S DOMESTIC
MAGAZINE.

ONE SHILLING MONTHLY.

THE ENGLISHWOMAN'S DOMESTIC
MAGAZINE for JANUARY (now ready) contains—

1. TWO COLOURED FASHION PLATES of Ladies' Evening Dresses, Walking, Toilet, and Children's Dresses.
2. COLOURED BERLIN PATTERN in the New Campana Mode for Ottoman or Settee.
3. FULL-SIZED PATTERNS for Cutting out the New Militaire Jacket or Vest.
4. FOUR LARGE DESIGNS for Window Curtains, for Couverture, for Little Girl's Muff and Cape, and for Cushion.
5. FORTY BEAUTIFUL ENGRAVINGS, with full Descriptions of New Modes: Peplum Capelines, Opera Cloak, Bodices, Jackets and Vests, Hats, Bonnets, Head-dresses, Collars, Cuffs, &c.
6. CHILDREN'S FASHIONS—Little Girl's Dress, Little Boy's Frock, Little Boy's Paletot, Little Boy's Costume, Little Girl's Bonnet, Child's Crocheted Hood.

10. THE PARIS FASHIONS, by Madame Goubard.—*Forfaits for the New Year*—*The Englishwoman's Conversation*, &c.

THE YOUNG ENGLISHWOMAN.

SIXPENCE MONTHLY.

The New Volume begins with the JANUARY Number (now ready).

The YOUNG ENGLISHWOMAN contains 56 pages of good paper, and an extra Diagram and Pattern Sheet, equal to a further 32 pages—in all 88 pages. It will be illustrated by the best Needlework Illustrations, done in Germany, France, and England.

A New Coloured Fashion Plate, especially adapted for Young Ladies, is included in each Monthly Part.

The YOUNG ENGLISHWOMAN'S Literature is of the purest. The Tales written and chosen for the Magazine are of that character that they may be with advantage placed in the hands of Young Girls. Altogether, such a high tone is observable in the pages of the YOUNG ENGLISHWOMAN as will render it the Book to present to a Young Lady; and in such a Magazine a very great want is provided for, long felt by Mothers and all persons of either sex who have the care of, or are responsible for, the bringing up of the Youthful Feminine Population of these Islands.

During the year will appear in the YOUNG ENGLISHWOMAN:—A Summer in Leslie Goldthwaite's Life. By the Author of 'The Gay Worthies'—Beautiful Pictures from History's Page—Letters from Dear Old Granny—Cleopatra's Needle: a Story of Woman's Devotion—The Four Seasons—Loveliest Words. A Collection of the most exquisite Lines written in the English Language—Our Drawing-Room. To which we invite, in all frankness and kindness, all who have anything on their minds, either to ask or to say.

With the JANUARY Number is presented one of these favourite Pictures:—*Minding Baby*—*Dressing for the Party*—*Spring Pictures*—*Autumn Fruits*—*Pretty Puss*—*God Save the Queen*—*The Writing Lesson*.

Bookellers will receive a Coloured Picture with each Number, and Subscribers will be able to choose their Picture if sufficiently early in their application.

London: WARWICK HOUSE, PATERNOSTER-BOW.

THE BOY'S OWN MAGAZINE.

Edited by S. O. BEETON.

SIXPENCE MONTHLY.

THE NEW VOLUME of the BOY'S OWN
MAGAZINE begins with the JANUARY NUMBER.

Now ready. A beautiful COLOURED PLATE of 'King Hal and the Cobler' is included in the January Number.

The New Volume will comprise, in the course of the year, besides other interesting matter, the following subjects:—

1. Historical Tale by Francis Davenant—EDWARD CLAYDON: a Story of the Days of Agincourt. Illustrated.
2. PRINCE JACK OF FIGLI. (Continued and Concluded.) By the Author of 'Wild Sports of the World'. Illustrated.
3. THE WORLD'S WEAPONS; and other Papers on Subjects in Natural History and Science. By the Rev. J. G. Wood.
4. THE THREE SCOUTS: a Tale of the Great American Civil War.
5. THE RED PLOT. By the Author of 'King of Trumpe', &c.
6. GREAT TRAVELLERS. With Portraits and other Engravings.
7. MIDSHIPMEN AFLOAT and ASHORE. Illustrated by Commander Walter W. May.
8. NEW BALLADS and OLD. With Full-Page Engravings.
9. FRESH STORIES of SPORT with WILD ANIMALS.
10. THE AMATEUR MECHANIC; and other Practical Papers. With Explanatory Diagrams.
11. THE STRONG PLACES of the EARTH. With Views of Great Fortresses and Strongholds.
12. NEW PUZZLE PAGES.

and so. and so. and so.
 The February and March Numbers will contain most highly-finished Steel Engravings of some of the principal Contributors to 'The Boy's Own Magazine'. Among these are—W. H. D. Adams, H. Coxwell, W. Dalton, F. Davenant, Captain Drayson, R. Dudley, J. Greenwood, The Editor, W. H. G. Kingston, W. H. Northcott, Rev. J. Pycroft, Captain Mayne Reid, W. B. Stevens, J. G. Thomson, W. Thornbury, J. Tillotson, T. W. Wood, and Rev. J. G. Wood.

A new plan of paging 'The Boy's Own Magazine' will give our Subscribers Two Perfect Books at the end of the year: one, 'The Boy's Own Volume'; the other, a complete story, 'The Three Scouts'. Moreover, the type throughout will be uniform, and present a handsome appearance.

THE BOY'S MONTHLY MAGAZINE.

TWO PENCE MONTHLY.

Forty-eight Pages, Engraved Frontispiece, and illustrated in the Text.

THE NEW VOLUME begins with the
JANUARY NUMBER, and during the Twelve Months of
1867 will appear:—

**MR. TROLLOPE'S NEW WEEKLY
SERIAL STORY,**

**THE LAST CHRONICLE
OF BARSET.**

Illustrated by GEORGE H. THOMAS.

"Mr. Trollope is trying an experiment in the publication of this work to which every novel-reader will wish success. Discarding the old monthly serial as too slow for the pace of the age, he is issuing this story in weekly parts, at half the old established price. . . . The story will come, like the weekly paper, on a fixed day of the week, and will be expected like it. Mr. Trollope very wisely begins his experiment on his old ground, Bassetshire, and among our old friends, the Proudis and Grantlys and Crawleys,—people of whom those who have studied them no more get weary than they do of news about their own kinsfolk, or criticisms on their neighbours."—*Spectator*.

"The Last Chronicle of Basset' is an innovation on the customary style of serial publication, appearing in sixpenny weekly numbers, instead of monthly parts. We are inclined to augur favourably of an experiment so much in harmony with the spirit of an age of rapid reading. There is no innovation in any other respect. Most of Mr. Trollope's personages are old friends of ours, and his pathos is as deep, his humour as jovial, his knowledge of the world as consummate as ever."

Illustrated London News.

"Mr. Trollope is in his old country, and the new fiction, as far as we can judge, will not be the least interesting of his productions. The story opens well, and we shall anticipate the numbers to follow with a keen relish, imparted by the first course."—*London Review*.

"It is the conclusion of the 'Warden' Series, and its readers will renew their acquaintance with Archdeacon Grantly, with poor Mr. and Mrs. Crawley, who appear in very unpleasant circumstances, and with sundry other persons who have already taken their stand among the classic characters of English fiction. . . . Upon the whole, judging from what we have already read, we incline to the opinion that 'The Last Chronicle of Basset' will be no unworthy companion of 'Framley Parsonage.' It certainly promises at its opening to be the best of Mr. Trollope's more recent novels."

 SAM SLICK'S AMERICAN HUMOUR.

The New Volume, just published, comprises

CHRISTIAN'S MISTAKE.By the Author of
'JOHN HALIFAX, GENTLEMAN.'
Illustrated by SANDYS.

"A more charming story, to our taste, has rarely been written. Within the compass of a single volume the writer has hit off a circle of varied characters all true to nature—some true to the highest nature; and she has entangled them in a story which keeps us in suspense till its knot is happily and gracefully resolved; while, at the same time, a pathetic interest is sustained by an art which is would be difficult to analyze the secret. And if tried by the standard of the Archbishop of York, we should expect that even he would pronounce 'Christian's Mistake' a novel without a fault."—Times.

HURST & BLACKETT, 13, Great Marlborough-street.

 Geo. Spencer Smith, Esq.
 W. Foster White, Esq.
 Col. Wilson, Ald.

FIRE DEPARTMENT.
 FIRE INSURANCES due Christmas day should be paid within fifteen days from the 25th inst.

The Directors are ready to receive proposals for insuring property generally at equitable rates. All losses promptly and liberally settled.

LIFE DEPARTMENT.
 This Office combines every advantage offered by any Assurance Company. Its great and large capital afford perfect security; the Premiums are very moderate, and the Bonuses distributed have been unusually large. At the last septennial distribution, the profits divided gave a Bonus of Two Pounds per cent. per annum on the sum assured during that period; a result seldom equalled by any Company.
 The calculations for the next Division of Profits will be made up to June, 1867; and Insurances effected before the 31st inst. will participate in the ensuing Bonus.
 CLEMENT J. PHILAM, Secretary.

December, 1866.

MUTUAL LIFE ASSURANCE SOCIETY,
39, KING-STREET, Cheapside, A.D. 1834.
Invested Capital, £200,000. Sum assured, £2,000,000.
Annual Income, £20,000.
Assurances effected within the present year will have the advantage of one year in every Annual Bonus.
CHARLES INGALL, Actuary.

UNIVERSITY LIFE ASSURANCE SOCIETY.
EXTENSIONS TO FOUNDATION SCHOOLS.
Additions in 1865 at the rate of 14 per cent. per annum.
CHARLES McCABE, Secretary.
24, Suffolk-street, London, S.W.

THE GUARDIAN FIRE AND LIFE ASSURANCE COMPANY.
Established 1831.
No. 11, LOMBARD-STREET, LONDON, E.C.
REDUCTION OF FIRE INSURANCE DUTY.
Subscribed Capital—TWO MILLIONS.
Total Invested Funds, upwards of £3,730,000
Total Income, upwards of £291,000.
NOTICE IS HEREBY GIVEN, that FIRE POLICIES, which EXPIRE at CHRISTMAS must be renewed within Fifteen Days at this Office, or with the Company's Agents, throughout the Kingdom, otherwise they become void.
All Insurances now have the benefit of the Reduced Duty of 1s. 6d. per cent.
For Prospectus and other information apply to the Company's Agents, or to
T. TALLEMACH, Secretary.

EIGHTH DIVISION OF PROFITS.
ROCK LIFE ASSURANCE COMPANY.
Established A.D. 1806.
ACCUMULATED FUND £3,161,253 4s.
The next Division of Profits will be made in 1868.
Assurances effected during the current Year will participate therein.
ASSURANCE OF PROSPECTIVE BONUS.
The Assured may, without immediate delay, secure the accruing Bonus at this Office, or with the Company's Agents, 15, New Bridge-street, London, E.C.

SUN LIFE ASSURANCE SOCIETY,
THREADNEEDLE-STREET,
AND
CRAIG'S-COURT, CHARING CROSS, LONDON.

The attention of persons desirous of making a provision for their Families, by means of Life Assurance, is directed to the paramount importance of resorting for that purpose to an Office of established credit.
Among the advantages offered by this old-established Society to persons effecting insurances, may be mentioned—
Low rates of premium, especially for young lives, payable annually, half-yearly, or quarterly.
Participation in 80 per cent. of the profits.
A Bonus every five years, apportioned to Policies on which three or more annual premiums have been paid at the period of division, and receivable in cash, or applied in augmentation of the sum assured or reduction of the premiums, at the option of the Policy-holder.
N.B. Proposals are now received and Assurances may be effected at the Office in Craig's-court, as well as at the Chief Office in Threadneedle-street.
JAMES HARRIS, Actuary.

"EVENING AND BALL DRESSES."
SEWELL & CO.'S NOVELTIES IN BALL and EVENING DRESS, for Christmas and the New Year, are ready.
The PEPLUM in every style and material to match.
COMPTON HOUSE, Fifth-street and Old Compton-street, S.W.

HUNTING COATS of Scarlet Milled Cloth; also of Milled and Treble Waterproof Devon and Melton Cloth.
OVERCOATS for DRIVING of Milled and Treble Devon and Melton Waterproof Cloths. These Coats are made with double-stitched edges and seams, in a new form with great style and neatness.
WATERPROOF DRIVING APRONS of Milled and Treble Devon Cloth, very handsomely finished, and lined either with Cloth or Fur.
OVERCOATS for the PROMENADE or Demi-Dress of light, warm, fine, soft Cloths, lined throughout with Silk quilted in Swans-down.
OVERCOATS, WRAPPERS for Evening or Travelling, of Waterproof-milled Pilot and Cheviot Cloths.
KEEPING JACKETS of their CELEBRATED Water-proof PORTSMOUTH PILOTS.
HUNTING BREECHES, Riding and Walking Trowsers of Buckskin, and Angoras in great variety.
MORNING and EVENING SUITS for Dress or other special purposes.
OVERCOATS of WATERPROOF TWEED ONE GUINEA. Overcoats of Milled Melton, or Pilot Cloth, two, three, or four Guineas. For every article one fixed and moderate price is uniformly charged for cash payments. In each department garments are kept ready for immediate use, or made to order at a few hours' notice.

THE OCEAN ST. LEGER of 1866.—What Lord Lyon was to his Owner was the Taping to her Captain, viz. winner of the race, having distanced all Competitors, as the EAST INDIA TEA COMPANY have invariably done in their choice and sale of teas. A new season's teas, now selling at importers' prices.—Warehouses, 9, Great St. Helen's Churchyard.

THE BEST CHRISTMAS BOX.
BARTLETT'S PATENT SEWING MACHINE, nicely boxed, and complete for use. Sold by Drapers, Hosiery, and Haberdashers. Everywhere, at about one-third the price of any other Machine doing so large a variety of work.

BARTLETT'S PATENT SEWING MACHINE runs both ways, and sews equally well, making no stitches in the change. This may account for its universal adage, and still leaving it true—that "the best is the cheapest."

WHY IS BARTLETT'S PATENT SEWING MACHINE THE CHEAPEST AND BEST? Because it does as many kinds of work as any machine, and is so simple that any one can operate it perfectly, after a few moments' perusal of the directions accompanying each machine; while there is no complex mechanism to get out of order.

BARTLETT'S PATENT SEWING MACHINE occupies but a small box, which can easily be taken by hand or cheaply sent by express, and is a wonderful favourite wherever known. Sold by best Drapers, Hosiery, and Haberdashers. Everywhere.

FOR CHRISTMAS BOXES get the best and the cheapest. Such you will find BARTLETT'S PATENT SEWING MACHINES. Sold Everywhere.

DO NOT FAIL TO EXAMINE BARTLETT'S PATENT SEWING MACHINES before purchasing either for a present or practical use. To be seen at all Drapers, Hosiery, and Haberdashers. Remember the name—BARTLETT'S.

FIELD'S PRIZE MEDAL PARAFFINE CANDLES

THE PERFECT SUBSTITUTE FOR SILVER.
—The REAL NICKEL SILVER, introduced more than 20
years ago by **WILLIAM S. BURTON**, when PLATED by the
patent process of Messrs. Elkington & Co., is beyond all com-
parison the very best article next to sterling silver that can be
employed as such, either usefully or ornamentally, as by no
possible test can it be distinguished from real silver.

A small useful set, guaranteed of first quality for finish and
durability, as follows:—

| | Fiddle of Old Silver Pattern. | Bead Pattern. | Thread Pattern. | King's or Shell and Thread. |

IMPORTANT CAUTION.—Beware of the many unavailing
and more than sloppy imitation to which, without authority,
Baron Liebig's name is most audaciously attached.

**ANOTHER CURE OF COUGH BY
DR. LOCCOCK'S PULMONIC WAFERS.**
"I can myself testify that they have relieved me of a most
severe cough, so bad that I was unable to lie down, and I shall do
my best to recommend them."—W. M. NICHOLAS.
They give instant relief to asthma, consumption, coughs, colds,
and all disorders of the breath, throat, and lungs. Price 1s. 1/2d.
per box. Sold by all Druggists.

**MR. HOWARD, SURGEON-DENTIST, 62,
FLEET-STREET** has introduced an ENTIRELY NEW
DESCRIPTION OF ARTIFICIAL TEETH, fixed without
springs, wires, or ligatures. They so perfectly resemble the natu-
ral teeth as not to be distinguished from the originals by the
closest observer; they will never change colour or decay, and will
be found superior to any teeth ever before used. This method does
not require the extraction of roots, or any painful operation, and
will support and preserve the natural teeth, and is guaranteed
to restore articulation and mastication. Decayed teeth stopped
and rendered sound and useful in mastication.—62, Fleet-street.

PHILOSOPHY OF THE MIND AND LOGIC.

UNIVERSITY COLLEGE, LONDON.
Professor CROOM ROBERTSON, M.A.—TUESDAY, WEDNESDAY, and FRIDAY, from 10 to 11 A.M. The Course will commence on Tuesday, January the 8th next, and be continued until the end of the Session. Philosophy of the Mind on Tuesday and Friday; Logic on Wednesday. Either Subject may be taken separately, at the option of the Student.—Fees for the whole Course, 3*l*. 12*s*. 6*d*.; for the Subjects taken separately, Philosophy of the Mind, 2*l*. 12*s*. 6*d*.; Logic, 1*l*. 12*s*. 6*d*.
The requirements of Students preparing for the Examinations of the University of London, and the Indian Civil Service, will be specially considered.
A Prospectus of the Course may be obtained on application at the Office of the College.

CH. CASSAL, LL.D., Dean of the Faculty of Arts.
CHAS. C. ATKINSON, Secretary to the Council.

December 22, 1866.

UNIVERSITY COLLEGE, LONDON.

FACULTY OF ARTS AND LAWS.

The LECTURES to the Classes of this Faculty will be resumed on TUESDAY, the 8th of January, 1867. Such a Division is made in most of the Classes as enables Students to enter advantageously at this part of the Course.

Prospectuses may be obtained at the Office of the College.
CH. CASSAL, LL.D., Dean of the Faculty.
CHAS. C. ATKINSON, Secretary to the Council.

December 26, 1866.

UNIVERSITY COLLEGE, LONDON, SCHOOL.

Under the Government of the Council of the College.

Head Master.

THOMAS HEWITT KEY, M.A. F.R.S.

Vice Master.

E. R. HORTON, M.A., Fellow of St. Peter's College, Cambridge.
HENRY MALDEN, M.A., Professor of Greek in the College, has charge of the highest Greek Class.

The SCHOOL will RE-OPEN TUESDAY, January 15th, for new Pupils, at 9.30 A.M. All the Boys must appear in their places on Wednesday, January 16th, at 9.30. The hours of attendance are from 9.30 to 4.45. Of this time one hour is allowed for Recreation and Dinner. The Playground is spacious, and contains a Gymnasium and Five Courts. The School Session is divided into three terms. Fee, 7*l*. per term, payable in advance. Gymnastics and Fencing extra.

JUNIOR DEPARTMENT.

CLASSES FOR YOUNG BOYS.

These Classes are for Pupils between the ages of Seven and Nine, who are kept separate from the Boys of the Upper School. They have the use of the Playground, but the hours of Lessons and Recreation are so arranged as to differ from those of the older boys. Fee for each Term, 6*l*. 2*s*. 6*d*., payable in advance.

The hours of Attendance are from 9.30 to 4.30, of which time two hours altogether are allowed for Recreation and Dinner. Discipline is maintained without Corporal Punishment. A Monthly Report of the Progress and Conduct of each Pupil is sent to his Parent or Guardian.

The School is in the Gower-street Station of the Metropolitan Railway, and within a few minutes' walk of several other Railway Stations.

Prospectuses and further particulars may be obtained at the Office of the College.

CHAS. C. ATKINSON, Secretary to the Council.

December, 1866.

THE BRITISH MUSEUM will be CLOSED on the 1st, and RE-OPENED on the 8th of JANUARY, 1867. No Visitor can possibly be admitted from the 1st to the 7th of January inclusive.

T. WINTER JONES, Principal Librarian.
British Museum, December 26, 1866.

CANCER HOSPITAL, London and Brompton. Offices, 167, PICCADILLY (opposite Bond-street).

Form of Legacy.—To those benevolent persons who desire to become benefactors by will, the following form of legacy is recommended:
I give and bequest unto the Treasurer for the time being of the Cancer Hospital, London, situate at No. 167, Piccadilly, and also in the Fulham-road, Brompton, Middlesex, the sum of £—, to be paid out of my personal estate, not charged on land, to be applied towards carrying on the charitable designs of the said Institution.

By order, W. J. COCKERILL, Secretary.
N.B. The Hospital is freehold.

BOROUGH OF LIVERPOOL, SEFTON PARK COMPETITION.

TO LANDSCAPE GARDENERS AND OTHERS.

The Council of the Borough of Liverpool offer Two Premiums for the BEST PLANS for LAYING OUT THE SEFTON PARK, viz.:—A First Premium of 300 Guineas. A Second Premium of 150 Guineas.

The Conditions of the Competition, together with a Lithographed Contour Plan of the Site, will be sent to any address on receipt of Post-office Order for One Guinea, which letter will be returned if Plans are received according to the Conditions.

Application to be made to Mr. E. R. ROMSON, Architect and Surveyor, Town Hall, Liverpool.
The time for sending in Plans has been extended to Tuesday, the 30th of March.

THE COMMITTEE of the KENT ASSOCIATION of INSTITUTES have much pleasure in offering PRIZES of TEN POUNDS for the Best, and FIVE POUNDS for the Second-best TALE, the object of which shall be to induce Young Men, and Especially Working Men, to avail themselves of the Advantages offered by Literary and Mechanical Institutes.
For particulars, send a stamped and directed Envelope to the Secretary, Kent Association of Institutes, Faversham.

HEAD MASTER.—The Office of HEAD MASTER of the BIRMINGHAM and EDGBASTON PROPRIETARY SCHOOL will become VACANT at the end of the current quarter, in consequence of the appointment of Dr. BADHAM to the Chair of Classics, in the University of Sydney.

147, HOUNDSDITCH.

EDUCATION in PARIS.—Madame RAIM.

BAULT and Miss GALLOWAY, 278, Avenue de Neuilly, RECEIVE YOUNG LADIES desirous of perfecting themselves in the French Language and the Accomplishments.—Prospectuses on application to Madame Raimbault's Brother-in-law, Monsieur A. HAYET, Director of the Scottish Institution, Edinburgh.

MR. CURT, Dealer in Coins, REMOVED

to 85, GREAT PORTLAND-STREET, where he will continue at the order of Numismatists, as heretofore, since 1838.

DRAWING and PAINTING.—A Young

Lady, who gives LESSONS in DRAWING, and in Flower Painting from Nature, wishes for a few more PUPILS, in Schools or Private Families.—Terms moderate.—Address L.A., 1, Shaftesbury terrace, Hornsey-rose, N., or St. Beaumont-street, W.

A LADY, the Wife of a Member of the Civil

Service, young, but an experienced Governess, having no Family of her own, wishes to BOARD and EDUCATE Two little Boys or Girls. Residence in a healthy locality, 15 miles from town. Every home comfort, and the most conscientious care and attention will be given.—Terms 50*l*. a year each.—Address C.S., Post-office, 183, Strand, W.C.

PUBLIC SCHOOLS.—A Cambridge Graduate in Classical Honours, experienced in Tuition, who prepares a few Pupils for the above, has TWO VACANCIES at CHRIST-CHURCH, Terms, 70s. per annum under twelve, 80s. above that age. References to John Brand, Esq., F.R.S., Nash Mills, Hemel Hempstead, and other Parents of Pupils.—Address RUGBENSIS, Salcombe-hill House, Sidmouth.

TUITION.—A Gentleman desires to obtain for his Family the services of a NON-RESIDENT TUTOR, who must be able to prepare the Sons for a Public School.—Address H., Post-office, West Derby, Liverpool.

PRIVATE EDUCATION in PARIS.—Maison de la Tournele, Parc des Princes, Bois de Boulogne. Miss PYLE, assisted by a French Lady of high attainments, OFFERS to a LIMITED NUMBER of YOUNG LADIES the advantages of a superior Continental Education, with the comforts and privileges of an English Home. Her educational experience at home and abroad enables her to combine the peculiar advantages of the English and Continental systems of Education, and it is her aim to bring her experience to bear on the mental, moral, and religious training of her Pupils. Circulars, with the highest references, may be had in London, at Messrs. Hatchard & Co.'s, 187, Piccadilly, W.; and at Messrs. Nisbet & Co.'s, 21, Berners-street, W. Until the 31st of January next. Letters may be addressed to Miss Pyle, Emdaleigh, Streatham, S. London, December 14, 1866.

EDUCATION FOR THE SEA.—Parents intending to send their Sons to SEA are invited to secure the best possible TRAINING for them, Classical and Nautical, by applying for the same to Capt. H. M., 59, Camden square, N.W.—Highest references given.

A RESIDENT MASTER IS REQUIRED in the COLLEGE, Chester. A Graduate of Cambridge, Oxford, or London, preferred.—Also, a GENTLEMAN (Resident or Non-Resident) to teach Drawing, especially Perspective, and Engineering.—Address THE REV. ARTHUR RICE, Chester.

EDUCATION on the CONTINENT.—At Vilvorde, near Brussels, there are Two excellent French Educational Establishments, one for YOUNG GENTLEMEN, under the Direction of M. Michaux-Portels, the other for YOUNG LADIES, Conducted by Mesdames Vanderwerff. Terms very moderate.

BEDFORD COLLEGE (for Ladies), 48 and 49, BEDFORD-SQUARE. LENT TERM will begin on THURSDAY, January 17, 1867. Two Annual Scholarships, giving Free Admission for Two Years to Five Classes, will be again awarded at the beginning of next October. Prospective, with particulars respecting Scholarships, Boarding, &c., may be had at the College. JANE MARTINEAU, Hon. Sec.

THE GRAPHOTYPING COMPANY (LIMITED).

The attention of Artists wishing to publish their Drawings or Sketches is invited to the New Process, which produces a perfect fac-simile, for Printing at Type Press, at one-half the cost of Engraving by any other method. Materials for trial, with all necessary instructions, may be had on application free of charge. Successful Artists will find plenty of employment.—7, Garrick-street, W.C.

TO PROFESSORS AND AMATEURS of the VIOLA and VIOLIN.—Just published, MORCEAU DE SALON, for Viola and Piano-forte, by M. Charles Severyn, many years Member of the Royal Italian Opera, Covent-garden, &c.; with an Adaptation for the Violin by J. B. Zerlini, consisting of an Andante and Polonaise. The work is most brilliantly and effectively written; and the elevated character of the composition cannot fail to procure numerous admirers, and necessarily insure a large circulation.—Published by Messrs. AUGER, 88, Newgate-street, London. Price 5s.

GORHAM'S POLYTROME.—The Polytrome is an amusing and instructive Instrument, showing the fundamental laws of the harmonious combination of colour, by a series of eighty-five rapidly-revolving discs. ELLIOTT BROTHERS, Opticians, 440, Strand.

SHORTHAND.—PITMAN'S PHONOGRAPHY.—Phonography is taught in Class, at 7s. 6d.; or Private Instruction given, personally or by post, for 12s., the Perfect Course of Lessons. London: 50, Paternoster-row, E.C.

DR. DRESSER, Architect, Consulting Ornamentist, and Practical Designer, has AN OPENING in his Office for one or two articled Pupils.—North End, Fulham, S.W.

THE LITTLE MODELLER.—How to Make the Cardboard Models.—A Model Village, beautifully coloured, and six others, 25s. Engravings, post free for 14 stamps.—H. G. CLARKE & Co. 252, Strand.

THE MAGIC DONKEYS.—Roars of Laughter.—These wonderful Animals go through their extraordinary Evolutions, daily, at 252, Strand, from Ten till Six. The pair sent post free for 14 stamps.—H. G. CLARKE & Co. 252, Strand.

NEW DESCRIPTIVE and ILLUSTRATED CATALOGUE, Sixpence, post free.

MAGIC LANTERNS, APPARATUS for DISSOLVING VIEWS, and First-class SLIDERS, in great Variety, on Sale by JOHN J. GRIFFIN & SONS, Chemical and Philosophical Instrument Makers, 22, Garrick-street, Covent-garden, W.C., removed from 119, Bunhill-row.

THE CHADBURN LANTERN, for projecting enlarged Images upon a Screen (similar to the Magic Lantern) from opaque objects. This Instrument supplies a great want in scientific and amusing illustrations; by it Coins, Medals, Moving Mechanisms (interior of watches), Minerals, Fossils, Drawings, Book Illustrations, Photographs, &c. are shown in all their colour and detail,—thus rendering paintings on glass needless.—To be had direct from C. H. CHADBURN & SON, Opticians and Instrument-Makers to H.R.H. the late Prince Consort, Liverpool.

BOOKBINDING—in the MONASTIC, GROlier, MATOLI and ILLUMINATED styles—in the most superior manner, by English and Foreign workmen. JOSEPH ZAEHNSDORF, BOOKBINDER TO THE KING of HANOVER, English and Foreign Bookbinder, 30, BRYDGES-STREET, COVENT-GARDEN, W.C.

THE UNITED LIBRARIES, 307, Regent-street, W.—Subscriptions from One Guinea to any amount, according to the supply required. All the best new books, English, French, and of every kind, immediately on publication. Prospects, with List of New Publications, gratis and post free.—*A Clearance Catalogue of Surplus Books offered for Sale at greatly reduced prices may also be had free, on application.—Booth's, Cutlers' Hall, Holborn, and SACRISTY & ORRY'S United Libraries, 307, Regent-street, near the Polytechnic.

HARRISON & SONS', Booksellers to Her Majesty and H.R.H. the Prince of Wales. ANNUAL BOOK-LIST is now ready, containing Gustave Doré's Works and all the Illustrated Books of the Season, at the full discount from the published price.—59, Pall Mall, S.W., opposite Marlborough House.

BOOKS BOUND in MOROCCO, CALF, and ILLUMINATED STYLES, by HARRISON & SONS', Bookbinders and Booksellers to Her Majesty and H.R.H. the Prince of Wales, 59, Pall Mall, S.W., opposite Marlborough House.

CHILDREN'S BOOKS.—See HARRISON & SONS' ANNUAL BOOK-LIST to be had free on application.—59, Pall Mall, S.W., opposite Marlborough House.

J. & R. MCCRACKEN, 38, QUEEN-STREET, J. LONDON, E.C. (late of 7, Old Jewry). General and Foreign Agents and Wine Merchants, beg to inform their Patrons that they continue to receive and forward Works of Art, Baggage, Wines, &c. to and from all Parts of the World. They solicit particular attention to the following Wines:—Inglaterra's Pale Virgin Port, 24s. per dozen; Quarter casks, 11s.; Domesque, Duff Gordon's, and other Sherries, 30s. to 70s.; Croft, Taylor's, and other Ports, 35s. to 100s.; Claret, 90s. to 160s.; Hennessy's 1847 Pale Brandy, 60s. per dozen case.—Very rare ditto, 30 years old, 44s. per dozen case. Champagne, Cocks, Moelles, Burgundies, Liqueurs, &c. Samples on application.—Terms cash.

CHEMICAL HANDICRAFT: A Classified and Descriptive CATALOGUE of CHEMICAL APPARATUS, suitable for the performance of Class Experiments, for every process of Chemical Research, and for Chemical Testing in the Arts. Accompanied by copious Notes, explanatory of the Construction and Use of the Apparatus. By JOHN J. GRIFFIN, F.C.S. In large 8vo. vol. of 472 pages. Illustrated by 1,600 Engravings on Wood, price 4s. bound in cloth, postage 7d. An Edition on this paper for Teachers, 16s. per dozen, postage 13s. Published by JOHN J. GRIFFIN & SONS, Chemical and Philosophical Instrument Makers, 22, Garrick-street, Covent-garden, removed from 119, Bunhill-row.

AEROLITES.—Gentlemen interested in the Study of Aerolites are informed that they can procure a SPECIMEN of METEORIC IRON or STONE for 2s. and upwards, from BRYCE WRIGHT, Mineralogist, who has a fine Collection, numbering in all sixty specimens, and containing forty different falls. The Collection can be seen on application.—90, GREAT RUSSELL-STREET, Bloomsbury, London.

THE LONDON SCHOOL of PHOTOGRAPHY IS NOT REMOVED from the Pantheon, but the Business will be transferred to the SOHO BAZAAR in the course of a few weeks, when due notice will be given. Portraits of Ladies and Children taken daily, as usual.

PORTRAITS of LADIES and CHILDREN taken daily at the PANTHEON Branch of the LONDON SCHOOL of PHOTOGRAPHY (in the Picture Gallery of the Pantheon, Oxford-street); also at 103, Newgate-street: 5s. Cheap-side, &c. Prices: one portrait for 2s. 6d.; twelve for 12s.

ANTIQUITIES.—A Choice COLLECTION of OBJECTS of ART and ANTIQUITIES (Antique, Medieval, Renaissance, and Modern) of all descriptions may be had wholesale of Dr. SCHNAPPEL, Royal District Surgeon, Marktlach, Mittelfranken, Bavaria.

TO PRINTSELLERS, PUBLISHERS, and ARTISTS' COLOURMEN.

For Sale by Private Bargain.

THE GOODWILL and STOCK-IN-TRADE of the late ALEXANDER HILL, Printseller and Publisher to Her Majesty the Queen, His Royal Highness the late Prince Consort, Artists' Colourman to the Royal Scottish Academy, &c. The STOCK, which consists of well-known Works of Art, and a complete and most judiciously selected assortment of artists' materials, has been carefully inventoried and valued.

Mr. Hill's prominent position as a Publisher of High Art in Scotland is well known, and the long-established and successful character of his business, and his secure high co-operation of many of the principal English Houses, both in regard to his own and their publications; and the exhibition of Pictures in the course of publication formed a special and valuable feature in his business.

Combined with, and as a department of, the Printselling Business, Mr. Hill carried on an extensive business as a Carrier and Glider, and the GOODWILL and STOCK-IN-TRADE of this BUSINESS will be DISPOSED of along with the other.

The LEASE of the present PREMISES, No. 67, PRINCES-STREET, Edinburgh, which are spacious and suitable, situated in the most fashionable and best business thoroughfare in the city, and in which the business has been conducted for many years, does not expire till Whitsunday 1869.

It is rarely so important a Fine Art Stock, or so desirable an opening for a person of moderate capital and energy, is offered for the successful establishment in Edinburgh of a Printseller and Publisher's business of the highest order.

Further particulars regarding the business and conditions of Sale will be furnished on application to Mr. J. M. WATSON, S.S.C., 45, York-place, Edinburgh, agent for Mr. Hill's Executors.

Sale by Auction

Library of the late GEORGE LILLIE CRAIK, Esq., Professor of History and General Literature in Queen's College, Belfast.

THE ART-JOURNAL.—Commencement of

a New Volume.
The JANUARY PART, now ready, price 2s. 6d., contains:—
Line Engravings, Floriated and Perfidia, after C. R. Leslie, R.A.;
The Signal, after J. Philip, R.A.—The Spirit of Love and Truth,
after J. Edward, Literary Contributor; The Knights of the
Middle Ages, by Rev. E. L. Cotts, B.A., illustrated—Production
of Natural Colours by Photography, by A. Claudet—Modern
Painters of Belgium, Guillaume Koller, by J. Dafforne, illus-
trated—A Memory of the Rev. Sydney Smith, by Mr. and Mrs.
S. C. Hall, &c.
London: Virtue & Co. 26, Ivy-lane, Paternoster-row.

THE PARIS EXHIBITION.—An ILLUSTRATED CATALOGUE of the most beautiful and suggestive Works will be issued during the year 1867, in association with the ART-JOURNAL, the price of which will not be increased.

Each Monthly Part will contain about 100 Engravings, from the Productions of the most renowned Art-manufacturers of the World. The work will be dedicated, by gracious permission, to the Emperor of the French. It will be edited by Mr. S. C. Hall, F.S.A., who edited the Illustrations Catalogues that were issued with the Art-Journal in 1861 and 1862.
London: Virtue & Co. 26, Ivy-lane, Paternoster-row.

THE ART-JOURNAL.—Each Monthly Part

will contain two Line Engravings from Pictures by renowned British Artists, engraved expressly for the Art-Journal, and about 120 Engravings on Wood. The Letter-press, contributed by eminent writers on Art and Art-Manufacture, will be largely increased.

London: Virtue & Co. 26, Ivy-lane, Paternoster-row.

The ART-JOURNAL continues to be the only Work issued in Europe that adequately represents the Fine Arts, and the Arts of Industry and Manufacture. It is published to contain Intelligence concerning every Topic connected with Art that can inform the Artist, the Amateur, the Student, the Manufacturer, and the Artisan, and to convey to the General Public such information as may excite interest in Art, in all its manifold ramifications; the aim of its Contributors being to produce, not only a beautiful Work for the Drawing-room, but one that shall be a valuable aid in the Studio and the Workshop.

London: Virtue & Co. 26, Ivy-lane, Paternoster-row.

Re-issue on toned paper, sixpence, post free.
MEDIO-POLLITO. From the Spanish of Fernan Caballero. With 21 Illustrations by M. S. Clark. The Special Christmas Supplement of the SOUTH LONDON CHRONICLE.—Also, Proof Sheets of the Engravings, for Framing, sixpence, post free.

DIE WOCHEN-AUSGABE DER KÖLNISCHEN ZEITUNG

beginnt mit dem 1. Januar ihr 2. Quartal.

Abonnementpreis: 5 Schilling per Quartal, portofrei ins Haus. Seit der kurzen Zeit des Erscheinens hat sich das Blatt in England bereits einen grossen Leserkreis erworben und dürfte sich bald bei jedem Gebildeten, der sich über die deutschen Verhältnisse unterrichten will, Eingang verschaffen. Leitartikel über die Vorkommnisse der Woche, in freisinniger und lehrschaffender Weise abgefasst, gediegene Original-Korrespondenzen, ein Feuilleton, welches die ersten Namen der deutschen Novellistik zu seinen Mitarbeitern zählt, wissenschaftliche Artikel, Reise-Beschreibungen u. a. w. bieten einen reichhaltigen Stoff.
Das Blatt wird in England samstags ausgegeben.
Bestellungen nehmen entgegen:—

NEW GIFT-BOOK.

Now ready, in fcap. 8vo. with Illustrations, 2s. 6d. cloth.
BAREFOOTED BIRDIE: a Simple Tale for Christmas. By T. OT. Edited by CHARLES FELIX, Author of 'Velvet Lawn', &c.

"We cannot recommend a better present than 'Barefooted Birdie,' a simple Tale for Christmas."
"We can give this tale our very highest praise."
Church Review.
"The whole story is like a gleam of bright sunshine and summer weather just stealing in upon the cold fogs and winds of Christmas, and telling of brighter days to come in spring and summer, and of brighter seasons still in the far-off golden land, where 'they need no candle nor light of the sun,' to which 'Birdie' and her little brother Stevie won their happy way."
Standard.
"We have had nothing so good since Andersen's 'Little Match Girl,' of whom 'Birdie' reminds us."
Herald.
London: Saunders, Otley & Co. 66, Brook-street, W.

THE SCHONBERG-COTTA SERIES of BOOKS for CHRISTMAS PRESENTS.

The Fourth Annual Publication.
THE STATESMAN'S YEAR-BOOK: a Statistical, Genealogical, and Historical Account of the States and Sovereigns of the Civilized World, for the Year 1867. By FREDERICK MARTIN.

The Work contains—in addition to a vast amount of Political Information, description of the Population, form of Government, Revenue, Public Debt, and, in short, all facts calculated to furnish a picture of the actual condition of the various States of the World—the most abundant Commercial Statistics, showing the Trade of all Nations with each other and with the United Kingdom, the whole after Official Returns.

"The great merit of 'The Year-Book' is that its matter is so clearly and systematically arranged, the statistics of any one state or nation may be easily referred to, or those of two or more may be compared with each other without difficulty. It fully merits the support it claims from all who have an active interest in politics or commerce."—*Times*.

MACMILLAN & Co. London

PUBLISHED BY HER MAJESTY'S GRACIOUS PERMISSION.

24. THE LIFE BOAT (after Dibdin).
25. GOOD NIGHT!

PALL MALL GAZETTE.

"A practice has sprung up of late of writing down in an album a list of one's favourite tastes and habits. Of course such a catalogue, honestly drawn up, might afford a curious insight into the character of the person under confession.....For those, however, who indulge in this amusement, Messrs. Bradbury & Evans publish a handsome Table-book, with pages prepared for the enumeration of 'my favourite king, queen, hero, poet, &c.,' with illustrations by Mr. Eltze."

ILLUSTRATED LONDON NEWS.

"The illustrations designed by Mr. Eltze are somewhat in the humorous vein of the late John Leech, with a similar kind of subjects, but quite original in their conception."

SPECTATOR.

"Mr. Eltze is not without a certain humour and vivacity, and a sense of female and infantine beauty."

ATHENÆUM.

"A young lady's book, with prettily-conceived drawings and spirited little poems, and blank pages for whimsicalities yet to be written."

BRADBURY, EVANS & Co. 11, Bouverie-street.

In Shilling Monthly Parts,
MR. SHIRLEY BROOKS'S NEW NOVEL.

Now publishing,

"SOONER OR LATER."

By **SHIRLEY BROOKS.**

Illustrated by **G. DU MAURIER.**

ATHENÆUM.

"Month by month we shall watch with eager eyes for the yellow cover that will bring in its tribute of mirth and mystery. As yet we have not seen the heroine, of whom we have heard so much; and until the Queen of Hearts comes on the scene, how could any one pretend to pry into her destinies? 'Sooner or Later' opens lightly and brightly, and we wish it every success."

ILLUSTRATED LONDON NEWS.

"We gladly welcome Mr. Shirley Brooks back to a field in which he has made brilliant successes, and to which, if we may draw inferences from a first instalment, he is likely to add another."

EXAMINER.

"As to its character, this is an excellent beginning of a novel of our own day, already awakening pleasant interest without extravagance of style or incident, yet free from platitudes. Mr. Shirley Brooks here writes in his own person pure natural English, flavoured with a humour of his own."

GLOBE.

"All readers of 'Aspen Court' and 'The Silver Cord,'—all who recognize and relish Mr. Shirley Brooks's sparkling style in periodical literature,—will rejoice to find him beginning a new novel in monthly numbers. His stories are peculiarly fitted to be thus published, since every chapter is full of interest, from the easy flow of the writing and the natural gaiety of the dialogue."

SCOTSMAN.

"Mr. Brooks writes with the firm hand of a conscientious artist; every brick in this first round of the fairy fabric he is building for us out of his ready brain is well set in its own place, and touched and dressed off as by a master of the craft. A critic feels a fellow-tradesman's pride and pleasure in such thorough and satisfactory work."

No. III. is ready this day at all Booksellers' and Bookstalls.

BRADBURY, EVANS & Co. 11, Bouverie-street.

"ONE OF THE CHOICEST GIFT-BOOKS OF THE SEASON!"

THE STORY OF A
FEATHER.

I Leave the Undertaker, and am Promoted to a Monkey's Cap. 44. I again Meet with Patty Butler—Her Marriage—Conclusion.

ILLUSTRATED LONDON NEWS.

"One of the most characteristic productions of Douglas Jerrold is presented to a fresh generation of readers, with the advantage of Mr. Du Maurier's very clever and effective illustrations."

ATHENÆUM.

"This exquisite tale—so full of wit, of poetry, of pathos—has been lovingly treated by Mr. Du Maurier, who has made about seventy pictures of the 'Feather's' adventures....The irony of the humourist writer is fairly echoed by the tact and clear perception of the designer."

SPECTATOR.

"The initial letters are characterized by much quaint invention; and the drawing of the Bow-street officers breaking into Patty Butler's garret bed-room, and discovering the stolen watch, displays touches of Hogarthian power. Patty, indeed, is charmingly treated throughout; and her beauty and innocence are well contrasted with the coarseness and brutality of the wretches with whom she is brought in contact. Mr. Du Maurier may be congratulated upon having caught the spirit of the text. His illustrations will attract new admiration to the book; while its old friends will certainly not like it the less for its present ornate appearance."

BRADBURY, EVANS & Co. 11, Bouverie-street.

NEW WORKS.

Dedicated, by special permission, to H.R.H. the Duke of Cambridge.

Lord Minto. Le Misérables. By V. Hugo. Barbara's History. By Miss Edwards. Life of Edward Irving. By Mrs. Oliphant. St. Olave's. Sam Slick's American Humour.

The New Volume, just published, comprises

CHRISTIAN'S MISTAKE.

By the Author of 'JOHN HALIFAX, GENTLEMAN.' Illustrated by SANDRS.

"A more charming story, to our taste, has rarely been written. Within the compass of a single volume the writer has hit off a circle of varied characters all true to nature—some true to the highest nature; and she has entangled them in a story which keeps us in suspense till its knot is happily and gracefully resolved; while, at the same time, a pathetic interest is sustained by an art of which it would be difficult to analyze the secret. And if tried by the standard of the Archbishop of York, we should expect that even his would pronounce 'Christian's Mistake' a novel without a fault."—Times.

HURST & BLACKETT, 13, Great Marlborough-street.

Toned paper, 4to. cloth, gilt edges, price 31s.

THE AUTOGRAPHIC ALBUM. A Collection of Four Hundred and Seventy Fac-similes of Holograph Writings of Royal, Noble, and Distinguished Men and Women of Various Nations. With Biographical Notices and Occasional Translations. By LAWRENCE R. PHILLIPS, F.R.S. Lithographed by F. G. Nethercliff.

London: Robert Hardwicke, 129, Piccadilly, W.

Now ready, on a large sheet for hanging, price 2s.; or folded for the desk or pocket, price 2s. 6d.

THE ENGINEER'S and ARCHITECT'S OFFICE SHEET, and ALMANACK for 1867, containing Memoranda relating to Standing Orders, Railway Construction Regulations, Mensuration, Data and Formulae for Wrought-Iron Girders, Steam-Engines, Railways, Cranes, Rooms, Mill Gearing, Hydraulics, Weight of Iron, &c. Here are forty-eight well-filled pages of that kind of matter which is in most constant reference by engineers and contractors, spread out upon a sheet about 30 in. by 25 in. in extent. Its character may be expressed by a comparison with, although it is in no respect an appropriation from, 'Molesworth's Pocket-Book, spread out upon a single sheet.'—Engineering.

London: Lockwood & Co. 7, Stationers' Hall-court, E.C.

Now ready, roan tuck, gilt edges, price 6s.

WEALE'S ENGINEER'S, ARCHITECT'S, and CONTRACTOR'S POCKET-BOOK for 1867. Considerably improved, with many Additions. Besides the usual vast mass of Rules, Formulae Tables, &c., will be found a Diary of Events and Data, a General Calendar, a Gas-Engine's Calendar, Obituary of Engineers, &c., 1845-6; List of Members of the Institutes of Civil Engineers and of British Architects; Tables for the Reciprocal Conversion of British and Metric Weights and Measures, &c. With Eight Copper-plates.

London: Lockwood & Co. 7, Stationers' Hall-court, E.C.

Now ready, 12mo. strongly bound in cloth, price 4s.

WEALE'S BUILDER'S and CONTRACTOR'S PRICE-BOOK for 1867, revised by G. R. BURNELL, Esq. C.E. This book is the universally recognized arbitrator in the settlement of disputed accounts. Not being printed from stereotype plates year after year, as is the case with other books of the kind, errors are not perpetuated, and the opportunity is taken in every reprint to introduce current prices and other desirable improvements.

London: Lockwood & Co. 7, Stationers' Hall-court, E.C.

A NEW BOOK OF DOUBLE ACROSTICS. This day is published, price 3s. handsomely bound in white cloth extra.

HEATH AND GORSE, One Hundred and Forty-one DOUBLE ACROSTICS.

THE HIGHLANDS OF VENETIA. By Dr. Ecroyd.
BERTIE GRIFFITHS: a Sketch. By the Author of 'Archie Lovell.'
ADRIPT IN THE ANTARCTIC. Conclusion.
BEAR-HUNTING IN THE HIMALAYAS.
AMONG THE OLD MASTERS.
THE RITUALISTS.
A FEW DAYS AT THE ISLAND OF TABOGA. By J. K. Lord, F.Z.S.
STRAIGHT ACROSS DARTMOOR.

COMPLETION of the LIFE of CHARLES JAMES FOX. By the Right Hon. EARL RUSSELL, K.G. Vol. III. Crown 8vo. 12s.

"Fox is presented to us as a refined gentleman, a profound scholar, a patriot who was, perhaps, too much addicted to find fault with his country and its government, and to over-praise foreign lands. The period embraced in the present volume was most eventful."—*Athenæum*.

IMPRESSIONS of SPAIN. By the Right Hon. LADY HERBERT OF LEA. Royal 8vo. with 16 Full-page Illustrations, 21s.

LIVES of ENGLISH MERCHANT PRINCES, from the Earliest Times to the Present Day. By H. R. FOX BOURNE. 3 vols. 8vo. 24s. 40 Illustrations.

"Full of capital anecdotal matter, furnishing new and interesting chapters in the history of England. The author, in his illustrations of English merchants, begins long before the time of Athelstan. Wherever a merchant of note presents himself Mr. Bourne enters lucidly into his history, and when the reader comes to the end of all he will probably be bewildered by his entertainment, the greatness and meanness, the triumphs and calamities, the splendour and the squalor, the heroism and the rascality, the self-sacrifice and the self-regard, the prudence which is often a mere self-care, the divine charity which is self-abnegation, the colossal fortunes, the crashing bankruptcies—as all passes under his eye he will be as one who sits at a stirring drama, and has hardly breathing time to follow the rapid succession of incidents."—*Athenæum*.

THREE PHASES of CHRISTIAN LOVE. By the Right Hon. LADY HERBERT OF LEA. 8vo. 12s.

"This is an exquisite book; and men and women of all sects and shades of religious faith will thank Lady Herbert for her labour of love. It is a pure offering at the shrine of humanity, to show the world how divine a thing human nature may become when it is interpreted by the gift of charity, transforming and restoring it to the image of Him in whose likeness it was at first created. It is a charming gift-book."—*Athenæum*.

The THIRD and CONCLUDING VOLUME of the HISTORY of the AMERICAN WAR. By Lieut.-Col. FLETCHER, Scots Fusilier Guards. Demy 8vo. 18s.

"Of the many books already written upon the late American War, Col. Fletcher's narrative must be placed in the very foremost rank by virtue of its scrupulous impartiality, its artistic delineations of military movements, its highly suggestive comments, and its clear, fluent and vigorous style."—*Globe*.

ENGLISH ECCENTRICS and EC- CENTRICITIES. By JOHN TIMMS, Esq. F.S.A., Author of 'A Century of Anecdotes,' 'Club Life of London,' &c. 3 vols. crown 8vo. 21s.

COMPLETION of the HISTORY of ROME to the FALL of the REPUBLIC. By Dr. THEODOR MOMMSEN. Translated by Professor PICKSON. Vol. IV. In Two Parts. Crown 8vo. 16s.

The HEAVENS: an Illustrated Hand- book of Astronomy. By M. AMÉDÉE GUILLÉMIN. Edited by J. NORMAN LOCKYER, Esq. F.R.S. A New Edition. Royal 8vo. 300 Illustrations, 21s.

The INGOLDSBY LEGENDS. A New Illustrated Edition, containing all the Illustrations of LEWIS, CRUICKSHANK, and TINKER; with New Illustrations by DU MAURIER. Crown 4to. 21s.

CURIOSITIES of CLOCKS and WATCHES, from the Earliest Times. By EDWARD J. WOOD. In large post 8vo. 10s. 6d.

NODDEBO PARSONAGE. From the Original Danish. By the Translator of 'The Guardian,' &c. 2 vols. post 8vo.

GLUM-GLUM: a Fairy Romance for Children. Good and Bad, their Pretty Aunties and their Sen- sible Papas. By HERACLITUS GREY. In small 4to.

RICHARD BENTLEY, New Burlington-street,
Publisher of 'The Athenæum.'

HURST & BLACKETT'S NEW WORKS.

NEW AMERICA. By William Hep- worth DIXON. 2 vols. 8vo. With Illustrations. [In the press.]

A BOOK ABOUT LAWYERS. By J. C. JEAFFRESON, Barrister-at-Law. 3 vols. 8vo. 30s.

From the *Times*, Dec. 6.—"A Book about Lawyers" deserves to be very popular. Mr. Jeafrerson has accomplished his work in a very creditable manner. He has taken pains to collect information from persons as well as from books, and he writes with a sense of keen enjoyment, which greatly enhances the reader's pleasure. He introduces us to lawyerdom under a variety of phases. We have lawyers in arms, lawyers on horseback, lawyers in love, and lawyers in Parliament. We are told of their salaries and fees, their wigs and gowns, their jokes and gaieties. We meet them at home and abroad, in Court, in chambers, and in company. In the chapter headed 'Mirth' the author has gathered together a choice array of anecdotes from the days of More down to Erskine and Eldon."

THE LIFE of JOSIAH WEDGWOOD. From his Private Correspondence and Family Papers. By ELIZA METEYARD. Edited and illustrated by Hon. W. E. GLADSTONE. Complete in 2 vols. 8vo. embellished with Por- traits and above 300 beautiful illustrations, 42s. bound.

"The author has achieved a work not less creditable to herself than it is indispensable to all who wish to know anything about English ceramic art and its great inventor. The volumes are marvels of decorative and typographical skill."—*Saturday Review*.

LODGE'S PEERAGE and BARO- NETAGE for 1867. Under the Especial Patronage of Her Majesty, and Corrected by the Nobility. 36th Edition. 1 vol. with the Arms beautifully engraved, handsomely bound, gilt edges, 21s. 6d.

"A work which corrects all errors of former works. It is a most useful publication."—*Times*.
"A work of great value. It is the most faithful record we possess of the aristocracy of the day."—*Post*.
"The best existing and, we believe, the best possible Peerage. It is the standard authority on the subject."—*Herald*.
"Lodge's Peerage must supersede all other works of the kind, for two reasons: first, it is on a better plan; and, secondly, it is better executed. We can safely pronounce it to be the readiest, the most useful, and exactest of modern works on the subject."—*Spectator*.

A WINTER with the SWALLOWS. By M. BETHAM EDWARDS. 8vo. with Illustrations, 15s.

"A bright, picturesque, artistic book, full of colour and sunshine, and replete with good sense and observation."—*Post*.
"A pleasant volume. A genuine graphic record of a time of thorough enjoyment."—*Athenæum*.

MY PILGRIMAGE to EASTERN SHRINES. By ELIZA C. BUSH. 8vo. with Illustrations, 15s.

"The reader follows the author with equal pleasure, whether through the glowing fancies of fiction or the bright and humorous the grave and realistic interpretations of things as they are in this world of London."—*Post*.

THE NEW NOVELS.

TWO MARRIAGES. By the Author of 'JOHN HALIFAX, GENTLEMAN,' 'A Noble Life,' 'Christian's Mistake,' &c. 2 vols. 21s. [Jan. 4]

MADONNA MARY. By Mrs. OLIPHANT, Author of 'Agnes,' &c. 3 vols.

"'Madonna Mary' is written with evenness and vigour, and overflows with the best qualities of its writer's fancy and humour. The story is thoroughly original."—*Athenæum*.
"'Madonna Mary' is a book of great power and beauty—a perfect work of its kind."—*Morning Post*.

LEYTON HALL, and other Tales. By MARK LEMON. 3 vols.

"We commend 'Leyton Hall' most heartily to our readers. The story is an extremely good one, and the bright and humorous the grave and realistic interpretations of things as they are in this world of London."—*Post*.

CHRISTIE'S FAITH. By the Author of 'No Church,' 'Owen,' 'Mistake,' &c. 3 vols.

"This story is well worth reading for other things than mere amusement."—*Athenæum*.
"The interest of this story is so enthralling, that it holds the reader enchained during its progress, and the purpose of the story is so admirable, that the best among us may justly consider the time well bestowed that is occupied by its perusal."—*Sun*.

A WOMAN'S CONFESSION. By LADY CAMPBELL. 3 vols.

ANNALS of a QUIET NEIGHBOUR- HOOD. By GEORGE MAC DONALD, M.A. 3 vols.

"The charm and value of Mr. Mac Donald's work need not be sought. They present themselves unasked for in the tender beauty of his descriptions, whether of nature or of life and character; in his almost supernatural insight into the workings of the human heart and in his unerring fertility of thought and happy exactitude of illustration. Whoever reads the book once will read it many times."—*Pull Mall Gazette*.

KINGSFORD. By the Author of 'SON and HEIR,' 3 vols. 21s.

"A well-written, clever, and artistic novel."—*Post*.

Tinsley Brothers' New Books, At all Libraries.

NOTICE—A NEW HISTORICAL WORK BY J. HENEAGE JESSE.

Author of 'The Court of England under the Stuarts,' &c.

LONDON, SATURDAY, DECEMBER 29, 1906.

LITERATURE

Spanish Papers and other Miscellanies, hitherto Unpublished or Uncollected. By Washington Irving. Arranged and edited by Pierre M. Irving. 2 vols. (Low & Co.)

THE portion of the scattered writings of Washington Irving contained in these volumes consists exclusively of illustrations of the wars of the Spaniards and Moors, in three books. First, 'The Legend of Pelajo' includes, of course, narrative of that champion's victory over the Moors, in the valley of the Covadonga, in the Asturias, where the arrows and javelins of the infidels turned round and flung themselves against the hearts of their old masters! If the title be among the things forgotten by our readers, the name of it must at least be familiar to them. The Covadonga was the name of the Spanish vessel which the Chilians gallantly captured in the late war with Spain. If the church of Oviedo still possesses the banner said to have been carried by Pelajo at Covadonga, Chili has a more cherished possession than not only the flag of the Spanish ship so named, but of the Covadonga itself.

The second chronicle, now published for the first time, is that of "Count Fernan Gonzalez," another of those sword-and-buckler heroes who, when dying, hoped that all men would live in peace and amity, and leave off that wicked business of fighting. The Count's standard, a gigantic cross, is preserved in the convent of Arlanza, where he was buried. In his grave, his martial ardour survived. When Fernando, the royal saint, repaired thither, after capturing Seville from the Moors, the bones of Fernan Gonzalez rattled in the count's sepulchre, to intimate the state of jubilation into which they were thrown at the approach of another of the demolishers of the children of Mahound.

The third chronicle is that of this same "Fernando the Saint," and is perhaps the best of the three. There are other Spanish and Moorish legends in the book, with a number of biographical sketches, reviews and miscellanies, which Mr. Pierre Irving thinks may have been forgotten, and must therefore be worth reprinting. The unpublished papers would have made a neat, portable, single volume, and would have commended itself to Washington Irving's admirers as being new. As it is, the greater part of this collection is old matter. In the latter, there is this of interest, that remarks made by the author many years ago have little or no applicability now. Thus, in a lecture on Thomas Campbell, Irving spoke of America being so far distant from Europe as therefore representing, in some sort, a passionless, discriminating posterity: "We have no private friendship nor party purpose to serve by magnifying the author's merits; and, in sober sadness, the humble state of our national literature places us far below any feeling of national rivalry." This judgment has ceased to have any basis, and the Republic of Letters includes many an American name which England honours as that of a brother in intellect. The only other passage in the biographical sketches to which it is necessary for us to allude is one in the notice of Capt. James Lawrence, the gallant but unfortunate captain of the Chesapeake. Washington Irving says of Capt. Lawrence's equally gallant adversary, Broke (of the Shannon), that he "fought merely for reputation." The challenge, so chivalrous and dignified, which Broke sent to Capt. Lawrence, and which the latter accepted in the national spirit (on his side) with which it had been dictated,

is enough to prove that Broke thought nothing of himself nor of his reputation, but solely of the honour and triumphs of the country, of which he was one of the most simple-minded and knightly-hearted of sons.

Our impression, after reading the new chapters on the Moors in Spain, is, that Washington Irving pretty well exhausted all interest in the subject in his 'Conquest of Granada.' The legends in these volumes are like songs all to the same tune. The music is not without grandeur of harmony and simplicity of melody; but it is old music, and the ear has been a little too often charmed or vexed with it. Then, why is it, although the tellers of the legends are always Christians, that our sympathies are invariably with the Moors? The reason probably is, that the latter always fight at great odds, to their disadvantage. When we find a heavenly cavalry always charging with the Spanish chivalry, and supernatural influences turning the weapons of the Moors against the breasts of those who wield them, it is impossible to withhold admiration at the gallantry which often overthrew the Spanish hosts, in spite of their alleged celestial auxiliaries. That among the Castilians themselves there was no steady belief in the miraculous recruits who swelled their ranks is manifested by the desertion even of Catholic bishops to the armies of the Moslem. Occasionally, these deserters and renegades betrayed the new masters whom they affected to love and to serve. On the other hand, the Moor, if he was induced to cast in his lot with the Spaniard, served him faithfully,—often to the injury of him who rendered such true service. Even if we turn from the military to the civil aspect of this question, the infidels somehow shine in a purer light than the orthodox Spaniards. The latter were for ever assailing one another as vigorously as they ever assailed the invaders, and less justifiably. The prince who had power rode over and plundered his Christian neighbours who had nothing better to authorize them in possessing what was their own than their right to do so. The law was uncertain, its fountains were polluted, superstition and ignorance were paramount, and a gentleman was sufficiently educated if he knew how to cut an enemy's throat, make love to a lady, and address a prayer to any one of his patron saints. Among the Moors in Spain, we find an effective police, the prevalence of public baths, the establishment of schools in every town, and a rigid assertion of the unity of God as taught by Mohammed His Prophet. Considering the long course of centuries during which the Moors maintained themselves in Spain, the Saints who fought for the Spaniards visibly were but poor auxiliaries. This seems to have puzzled the Christian historians of the war. In the 'Chronicle of Fernando the Saint,' for instance, a Christian hero who was a rebel against his father had little legitimate right to the crown of Castile, and who fought and flourished at the beginning of the thirteenth century, we find him burning alive a number of Moors who had taken refuge in the Tower of Jaen, or mercilessly slaughtering those who leaped from it, but, says the pious chronicler whom Irving follows,—"Notwithstanding the burnt offering of this tower, Heaven did not smile upon the attempt of King Fernando to reduce the city of Jaen." The Christian King, aggravated by the ingratitude of Heaven, "consoled himself by laying waste the country."

Now and then a touch of poetry and tender humanity arrests our attention amid the din of war and the gallantry of warriors. Such presents itself in the narrative of the battle between Fernando and Aben Hud, on the banks of the

Guadalete, with Santiago himself acting as General of Cavalry on the part of Fernando. There were two brothers-in-law who were at mortal feud, Diego Perez and Pero Miguel. The former, who had given cause of offence, sought out Miguel, "and asked his pardon for that day only; that in a time of such mortal peril there might not be enmity and malice in their hearts." But Miguel rudely refused to be a partner in even such limited charity as this. He went into the fray with malice in his heart, and no man ever knew what became of him: whereas the brother who was willing to defer fraternal hatred, malice and uncharitableness for the day, had his arm so strengthened that with only the stout branch of a tree he smashed so many Moorish skulls as to gain for ever the name of Diego Machacha, or Diego the Smasher, a surname which was proudly inherited by many of his lineage. After all, and with Santiago to boot, Fernando had well-nigh lost the battle; but, bethinking him of 500 Moorish prisoners he held, he ordered them to be massacred, and this meritorious service seems to have propitiated the celestial crusaders, and Santiago, King Fernando and the Smasher ultimately carried the day.

Aben Hud came to a bad end for an orthodox and temperate Moslem. He had Christian renegades about him, who served him ill, and when tarrying at Almeria he took to drinking, at the suggestion, it is said, of his especial favourite, Aben Arraim; but whether the latter was a pure or only a renegade Moor, we are not told. When the great chief was helplessly and ingloriously drunk, his favourite tumbled him into a horse-trough; and when Aben Hud was found in it, drowned, orthodox foes covered the disgrace and the murder by pronouncing a verdict of "death from apoplexy." His death led to the loss of a great trophy. It enabled Fernando to recover the city of Cordova, and, therewith, the famous bells which had been carried off, three hundred years before, by the Moors, from the church of Santiago, in Galicia. The Moors had placed them in the grand mosque at Cordova, turned with their mouths upwards to serve as lamps, and remain shining mementos of the victory of Al Hajab Almanzor. Moorish captives were compelled to carry them on their shoulders to the church whence they had been taken by the infidel.

Perhaps one of the most memorable of the Moorish contemporaries of Fernando was Aben Alhamer, the founder of the Alhambra; but if he was often too much for the Spanish chivalry, Spanish ladies were occasionally too much for him. When this proud king beleaguered the Castle of Martos, the countess who held it, and lacked men, dressed all her duennas and damsels as men, armed to the teeth, and sent them on the battlements. It says little for the judgment, but something, perhaps, for the courteous gallantry of the tawny King of Granada, that he refrained from storming the place,—till he lost the opportunity. Poor Alhamer had no such resources and bodies of reserve in celestial storehouses as his Christian antagonists had. Thus, when Pelajo Correa was smiting the Moors of the Sierra Morena hip and thigh, till it grew too dark to see who remained to be smitten, he simply cried out to the Virgin, "Santa Maria! detén tua dia!" *Holy Mary, detain thy day!* As the day happened to be consecrated to the Virgin, the prayer was immediately granted, and a liberal allowance of sunshine was scattered over the skies, till there were no more infidels to be massacred! The religious chronicler thinks it possible that some sceptical persons may doubt this miracle; but, to prove it, he relates another more wonderful

still, wherein Pelajo Correa strikes a rock with a lance, and gives of the water that rushes forth to his thirsty and grateful soldiery. The Master of Santiago, as Correa was styled, was thus elevated to an equality with Moses.

The unhappy race that claimed Moses for their kinsman experienced far more humane treatment at the hands of the Moors than at those of the Spaniards. When Fernando captured Seville, after a siege of eighteen months, and the Moors had delivered the keys of the city, the Jews came tremblingly forward to make surrender also of the key of the Jewry, or Jewish quarter of Seville. This key was notable for its curious workmanship. It was formed of all kinds of metals. The guards of it were wrought into letters bearing the following signification, "God will open"; "The King will enter." On the ring was inscribed, in Hebrew, "The King of Kings will enter; all the world will behold him." This key, we are informed, continues to be preserved in the Cathedral of Seville, "in the place where repose the remains of the sainted King Fernando." As a sample of the contempt in which the Jews were held by the Spaniards, the author states, on the authority of Zuniga, that "in Castile, whenever the king entered any place where there was a synagogue, the Jews assembled in council, and paid to the Monteros, or bull-fighters, twelve maravedis each, to guard them, that they should receive no harm from the Christians; being held in such contempt that it was necessary they should be under the safeguard of the king, not to be injured or insulted."

Soon after the king Fernando had captured Seville, he fell ill of a dropsy, of which he died. At his funeral, in the Cathedral of Seville, there was not only unusual pomp, but unusual circumstance. The singers happening to cease for a moment, the heavenly song, we are told, was taken up by a heavenly host, and choirs of angels were actually heard by all present, chanting celestial hymns of praise in the skies. And when the body of saint and hero was lowered into the sepulchre, angels renewed the song in praise of him, all that was mortal of whom was then being entombed. To the tomb wherein Fernando lay the most splendid of his adversaries, Alhamer, King of Granada, sent courteous homage. He had already, throughout such dominion as was left to him, ordered general mourning for the death of his old enemy, the King of Castile and Leon; but he continued to send yearly to the altar tomb of Fernando "a number of Moors with a hundred wax tapers to assist at his exequies, which ceremony was observed by his successors until the time of the conquest of Granada by Fernando the Catholic."

Granada was the last kingdom and refuge of the Moors, and they kept it long, despite all assailants,—from 1238 to 1492; but the people were not finally banished till 1610, when nearly a million were expelled from Spain by Philip the Third. We shall afford some idea of the quality of their civil government by stating that in Cordova alone there were nine hundred public baths and eighty free schools. Prescott might well exclaim that "Moorish works and Spanish faith were all that were necessary to make a good Christian."

Physical Geography. By Prof. D. T. Ansted. (Allen & Co.)

PHYSICAL geography has of late years occupied a more definite position as a science than aforetime; and the topics which it may fairly comprehend, its direct line and its general limits, are now more clearly understood. This

clearer definition and intelligence, together with the new light in which old subjects now present themselves, and the rapid accumulation of fresh facts and observations, render a new treatise on the science highly desirable. With the exception of Mr. Page's 'Advanced Text-Book of Physical Geography,' published in 1864, and then noticed in this journal, no very recent work has come before us in English. The newer editions of Captain Maury's 'Physical Geography of the Sea' and of Mrs. Somerville's 'Physical Geography' are only partial exceptions; the former work being by its plan limited to the ocean, and the latter, however interesting, being deficient in some things which should be added in any future edition.

There is, therefore, a distinctly vacant place for such a volume as that before us; and although the best work of this kind must be merely judicious compilations, yet a thoroughly capable writer will, by his superior knowledge, throw light upon obscure topics and invest his compilation with varied attractions, and give a pervading unity to the manifold details with which he has surrounded himself. His selection of examples, too, will be choice and appropriate, and his grouping such as to strike the uninformed reader, and so to win his continuous perusal. Common industry can gather an immense array of results from innumerable observers, but uncommon sagacity is necessary to perceive which are the most important and the most illustrative of the subjects in hand. On the whole, Prof. Ansted has displayed much of this pervading unity, has selected illustrative facts, has written with perspicuity and simplicity, and has arranged the vast mass of observations which every physical geographer must have around him in clear and orderly sequence.

His plan is simple enough, and comprehends six chief divisions, of which the first is introductory, and relates to the Earth as a planet, to the physical forces, which are well explained, and to the succession of rocks. The second chief division is assigned to the Earth in respect of its land, mountains, hills and valleys, plateaux and low plains. In the third division, we have whatever is said upon Water, namely, the ocean, rivers, lakes, and waterfalls; together with a chapter on the phenomena of ice, and another upon springs, which appears rather out of natural sequence. Air claims the fourth division—that is, the atmosphere, winds and storms, dew, clouds and rain, climate and weather. Volcanic phenomena and earthquakes constitute the fifth division, entitled Fire; and Life, which forms the sixth part, comprehends the distribution of plants and animals over the earth and in relation to time and space. The concluding chapter treats of the effect of human agency on inanimate nature.

This brief statement of the plan and contents of the work at once enables the reader to perceive the author's idea of the scope of his science, and it shows that he includes some few topics not commonly comprehended in previous manuals. The treatment, however, of each topic is the true test of excellence, and on this we may now make some observations founded upon a perusal of certain selected chapters of the volume.

In those chapters which treat of what may be termed the stock subjects of Physical Geography, as, for example, Mountains, Rivers, Lakes, and Springs, we find a fair summary of what is known, so far as the prescribed space in each chapter allows, and nearly what we expected; while in some other chapters, such as those comprising Physical Forces, the Phenomena of Ice, Climate and Weather, we have a more skilful and competent epitome of

what has been generally propounded on those topics respectively. In chapters of this latter class, paragraphs occasionally occur which scintillate for a moment with thought and eloquence, and we then experience pleasure at being lifted, however slightly, from the long dead level of sententious and paragraphic commonplaces. Yet, if quoted and taken out of their places, they would probably scarcely support our praise, which is in part due to the high relief with which they appear to stand out from their systematic level. We may, however, select and transcribe one passage as an example of what we mean. Towards the conclusion of a chapter on Climate and Weather, the author observes, in his highest style:—

"It is impossible to consider, even in a very slight degree, these phenomena of weather in their direct relation on the one hand to the sun and moon, and periodic changes in the constitution of these distant bodies, and, on the other hand, to ourselves as representing the highest form of organization with which we are acquainted, without being struck with the mutual dependence that exists between the material and immaterial parts of the great system of creation. Distance and time seem annihilated when we watch the action of these mighty and mysterious influences; and we may almost recognize the reality of an existence unhampered by material impediments when we find an instantaneous response of our innermost senses and sensations to a material stimulus applied within the burning atmosphere of the sun. Who is there who has not felt the influence of climate and weather cheering up or obscuring his intellectual faculties? We attribute this, perhaps correctly, to an indirect action through the state of our health; but who can say how much of it may not be due to some direct action hitherto unknown, proceeding from the great source of motion and force in our system? It would not be wise, nor, indeed, is it safe, to carry speculation far in such a matter; but perhaps some of those peculiarities of constitution that have puzzled and distressed many persons of high nervous organization really owe their origin to a more ready sensibility to real but undefinable natural forces."

Winds and storms occupy too little of our author's attention. Ten pages certainly cannot contain even an outline of their most important phenomena. They might indeed be more appropriately assigned to Meteorology, and as hastily dismissed by Prof. Ansted; they might as well be altogether omitted. If he will refer to Mr. Page's 'Advanced Text-Book of Physical Geography,' a much smaller and less pretending book than his own, he will find that Mr. Page has done far more justice to this subject. To dew, clouds and rain, on the other hand, nineteen pages are here assigned, although, as respects full treatment, these obviously belong to Meteorology.

Volcanoes, volcanic phenomena and earthquakes are copiously discoursed upon, and the entire sixth division, entitled 'Life,' is likewise very fully treated. It will be apparent to any reader of Prof. Ansted's previous books that, even when writing on another science, his confirmed geological bias and already accumulated stores of information incline him to give too great a preponderance to all that is akin to geology and palæontology. Much as a reader, himself addicted to geology, may delight in that science, yet he would not expect to find it overrunning its due limits in a treatise on Physical Geography. He will, probably, admit that the third chapter in this volume, 'On the Succession of Rocks,' has but little affinity with its main subject; and that the twentieth chapter, 'On the Distribution of Plants and Animals in Time,' which occupies no less than forty-two pages, strictly speaking, appertains to a treatise on another science.

This strong geological and palæontological bias in the author has led to a disproportionate

allotment of space which impairs the harmony of parts in the present volume, while it has allowed for a copious treatment of the favourite subjects. It is too apparent where the pen has run on most freely and rapidly, and where it has halted and hesitated. And this leads us to notice the many slovenly sentences in this book. Who, for instance, would suppose that the eye of Prof. Ansted had rested critically upon the following sentence?—"All rivers of any magnitude are due to the running together of numerous streams, and it is often a matter of accident, rather than intention, which of them, by bearing the name of the lower part, or that which enters the ocean, shall be regarded as the principal." A careful re-perusal, however, will secure the correction of such errors in a second edition.

As this volume is apparently designed to be a manual of the science, we may, in conclusion, point out how great would be the advantage of a series of references, at the end of each chapter, to the fuller sources of information to which a student might desire to have recourse. It is true that an accomplished reader who knows the science, also knows the books to which the author has been indebted; but a fresh student would have to spend much time in discovering them. Mr. Page has made a few references in the little book we have previously cited, and he has there shown a better appreciation of the elementary student's wants than more lengthy and systematic writers. Prof. Ansted gives nothing but his text, and a very rare note or two.

Not a single woodcut or map adorns the present work. In place of these the purchaser is assured that Mr. Johnston's 'Physical Atlas,' either the larger or smaller edition, will supply every pictorial and illustrational want. This being entirely a book seller's and a book buyer's question, we content ourselves with stating the fact. But if this volume is to form a text-book to either Johnston's or Berghaus's 'Physical Atlas,' or either atlas an illustrative companion to this book, then, we fear, the reader will soon discover how many subjects in the one are not illustrated in the other, or *vice versa*.

We must add, that a fuller index would be very desirable for a volume of 443 pages, including a vast number of details on a great variety of scientific topics. A good glossary would be a further boon to the student. With such revision, such additions, and such improvements as consideration and vigilance will suggest to author and publisher, the present manual or treatise might occupy the position which, at the commencement of this notice, we showed to be attainable by a competent and careful writer on this important and comprehensive branch of science.

Half-Hours with the best Letter-Writers and Autobiographers; forming a Collection of Memoirs and Anecdotes of Eminent Persons.
By Charles Knight. (Routledge & Sons.)

In the tract called 'England Waits,' written in James the Second's time, among the articles proposed for taxation were letters. This must have been in addition to the cost of carriage; and the announcement threatened to check the soft intercourse of soul with soul, and arrest the sighs ready to be wafted, on paper, from Indus to the poles. In spite of all obstructions, letter-writing has been the favourite and dangerous amusement of the greater part of mankind. Letters are often little chapters in autobiography, and they are quite as often history written through the coloured glasses of prejudice. There are few letters in which may not be traced a consciousness on the

part of the writer that he is inditing, not for one person, but for a public. When Cicero addressed his notes to his friends, crisp, brief, and not over-amusing as they are, he probably addressed them, in some part, to that far-off correspondent who never replies—posterity; and kept a little Ciceronian rotundity in the phrases, for the sake of his reputation. If in Pliny's Epistles there is less majesty of phrasing, there is more amusement; and though Pliny was not to his time what Walpole was to his, there is a great amount of graceful, lively gossip in his epistles, and very happy passages—now of description, anon of expression—which will always lend them freshness and make them popular. Now that doubt is made applicable to everything, and that it is even suspected that Caesar did not write his own 'Commentaries,' perhaps some ingenious person may deny that the letters of Cicero and Pliny are genuine or authentic. They are not, however, so assailable as those letters of Phalaris, which were accepted for genuine, and proved to be authentic by Boyle, Atterbury, and Aldrich, till slashing Bentley, with more sense and scholarship than all his adversaries, tore the whole batch to tatters, and scattered the Epistles, and those who supported them, in utter confusion. It requires the finest taste, the most unerring tact, and the strongest memory, for a man to write what we may call simulated letters,—'The Letters of a Provençal,' for instance, by Pascal. Popular as they have been, they want the *véraisemblance* which should be essential to popularity; and, clever as they are, they betray the cleverness and personality of the real writer. Linguet has not ill described these letters, in which it was once thought that no trace of Pascal himself was to be found, by remarking of them that "they flatter so agreeably the malignity of human nature!"

There was a Queen in this country who was a notable letter-writer in her day, Margaret of Anjou,—specimens of some of whose epistles we laid before our readers when the small and unique collection of them that exists only in copy was published by the Camden Society. Why more letters of one who loved to write them have not survived, is easily explained. When York occupied the seat of Lancaster, it was made a capital crime for any one to possess a letter written by Margaret. This excites our indignation, since, from the little that remains, we may guess at the abundance of social and political illustrations of her period that we have lost. There was a gossiping vein in the virago, as her enemies called her, (and she was a strong-minded woman) for she wrote her own letters; and even gossips, when they dictate, fall into dullness. It is worse when a secretary or chaplain of the old times is left to express his master's wishes after his own fashion. A few years ago, we recovered a numerous collection of letters, supposed to be written by, but really written for, the first Prince of Wales. They reveal something, indeed, of the times, and the men that were unknown to us before; but *how little!* A rub or two with a Bishop, a want expressed, a gift, or a complaint drily made, is almost the sum of the whole. Could Edward have written his own letters, they would doubtless have been full of what they almost altogether lack—personal incidents and anecdotes. As it is, these seem to be always impending, but they never fall into our lap.

Of mere gossip one may have too much: witness dear old Mrs. Delany's maundering, but well-meant, effusions. In her autobiography, she is what an autobiographer can scarcely help being—amusing; but her letters were poor things, as a whole; and yet what touches of the life of her times there are in them, of

which we should have had some conception, doubtless, but no clear picture, and not so many lively little sketches, but for her. What a contrast between the letters of Lord Chesterfield and those of the above loyal old lady! How pocomurante, and affected, and laboured, and unnatural, are many of my Lord's; not easy, but evidencing much labour to make them appear so. How off-hand, sincere, thinking of nothing beyond the minute and its purpose, are the letters of Mrs. Delany; if they are dull, they are genuine; and the old lady's character is clear, happy, busy, and homely—never to be mistaken in them all. Walpole, we may observe, is no great favourite of Mr. Knight's; but we should not forget our obligations to a letter-writer but for whose industry in that capacity, joined with rare grace and power, we should have lost some of the best pictures ever drawn of the social life of the last century.

Mr. Knight begins his series of eighteen chapters with extracts from the letters of James Howell, written in the reigns of James and of Charles the First. "Our earliest collection of familiar letters," says Mr. Knight, "is that of James Howell"; but here he overlooks the earlier, gossiping, personal, familiar letters of Chamberlayne and Carleton, both of whom were busy in the communication of small-talk, as well as of serious news, in the days of Elizabeth. Mr. Knight begins with a good man, although he be not the first of his amusing dynasty. Howell hits off a foreign or home scene with great effect, and without effort; D'Ewes makes love in the very stiffest of embroidery; and Pepys shows how it was made by bashful youth and ingenuous maiden under the happy writer's furtherance. The earnest conjugal affection of Roundhead Lucy Hutchinson runs side by side with the love as earnest for her Cavalier husband of Lady Fanshawe. Gray, West, and Walpole reveal to us the men, scholars, and fine gentlemen of their times. Bewick, in his manly letters, shows how he conquered fortune, hated cities, and loved the fields and the rivers, and all that therein is. Mrs. Delany and Fanny Burney paint quaint Court pictures, in which their own figures are conspicuous; and a few chapters connected with the curiosities of literature are to be found in the correspondence between Byron and Dallas, who saved the noble poet's 'Childe' from being consigned to the paper-basket. Then, for chronological order is not observed, the sturdy old naval chaplain Henry Teonge tells how, in the second Charles's reign, orthodoxy and an honest life were compatible with a condescension to very good drinking. Teonge was an original, whom the next letter-writer on Mr. Knight's list, Sterne, would have taken to his heart. For Sterne Mr. Knight has a justifiable measure of regard. Yorick has been too much considered in the broad light of his affections, errors and vices; but he had merits which are beginning to be acknowledged, and his letters prove that a sentimentalist is not, necessarily, a merely selfish fellow. Anon, with a "by your leave, fair seal," we get deep in the Platonic tenderness of Walpole and the Miss Berrys; and do not care much for Shenstone, who widened his walks and narrowed his fortunes. The letters of Steele and his wife read like an old epistolary romance, only they are more amusing, being brimful of real character; but for real, English, brave, common-sense character, this cannot be better illustrated than in the letters between Sir Thomas Browne and his son. Fielding and Thackeray are coupled together as travelling novelists; and school-days at Westminster, Christ's Hospital, Bath, Eton, and Rugby, are

well depicted in letters from Cowper, Coleridge, Lamb, Hunt, De Quincey, Capel Loft, Præd, and Tom Brown. Lady Mary Wortley Montagu could not be forgotten in such a collection, and full justice is rendered to her; while a score of epistle-inditers in what are called "Inter-chapters," illustrate the life, manners, morals, way of thinking and of expression of the respective periods in which they wrote. This work is, of course, for young readers, and for the older folk who cannot get at the collections from which the extracts are made. To this especial public, a more valuable or amusing volume could not have been presented. It may properly come under the head of "compilation" and "book-making"; but such work is ennobled when executed by a gentleman so experienced, so painstaking, and so judicious as Mr. Charles Knight.

The History of Rome. By Theodor Mommsen. Translated, with the Author's Sanction and Additions, by the Rev. William P. Dickson, D.D. Vol. IV., in Two Parts. (Bentley.)

AFTER a delay of three years, Dr. Dickson has completed his translation of Dr. Mommsen's 'History of Rome' as far as the original extends. The fourth volume, in two parts, now before us, comprises the period from the death of Sulla to the battle of Thapsus, the last struggle in the revolutionary conflict which brought about the subversion of the republic and the establishment of the empire. The interest of Dr. Mommsen's work, which was greater in the last instalment of the translation than at the commencement, here reaches the highest point,—partly, no doubt, from the momentous character of the crisis it describes, but partly also owing to the skill of the author in marshalling and grouping his facts and reflections in such a manner as to present an effective picture of the closing scene in the great drama. In no previous portion of his history does his sagacity in detecting the tendencies of events and the influence of persons appear to greater advantage. The various steps in the onward advance towards the final consummation are distinctly marked, the significance of every act, and the bearing of every occurrence correctly estimated. But the interest is more philosophical than sensational. As we have before observed, Dr. Mommsen's history is philosophical and constitutional, rather than pictorial and popular,—intended to explain rather than to describe events,—to exhibit their mutual connexion as forming one complete chapter in the life of humanity, rather than simply to narrate them as they occurred.

That part of his work here translated treats of the same period as most of Mr. Merivale's first two volumes, and it is impossible to compare the two works without feeling that for ordinary English readers Mr. Merivale's has decidedly the advantage. This may be partly owing to the fact that Dr. Mommsen's is a translation; for, excellent and readable as Dr. Dickson's version is, it cannot have the same natural ease and character as an original. The phraseology may be correct English, and yet the turn of thought foreign. Dr. Dickson confesses that, in order to reproduce as much as possible of the form and manner of the original, he has, in some instances, ventured to deviate from English idiom. But we think other reasons may be given for an English reader's preference of Mr. Merivale's history, besides the graces of style and expression, which are, undoubtedly, powerful agencies in this case. Mr. Merivale appears to us to have a more correct idea of the proper function of history. Dr. Mommsen says it is "nothing but the develop-

ment of civilization attained," and sets himself to discover the rationale of events and show their national influence. Mr. Merivale, on the other hand, with ample learning and no lack of philosophical insight, aims at effective narration, in which he is decidedly successful. By the skilful introduction of telling detail, he brings before the mind the event he is relating, with all the force and life of reality. His accounts of the crossing of the Rubicon, the battle of Pharsalia, the banishment of Cicero, and the death of Cato quite throw Dr. Mommsen's into the shade; while his chapters on Gaul, besides being more interesting in narration, contain a much fuller ethnological description of the inhabitants.

In discussing the significance of Caesar's victories in Gaul, Dr. Mommsen rejects with indignant scorn the notion that Gaul was a mere "parade-ground on which Caesar exercised himself and his legions for the impending civil war." He maintains that Caesar's object was to regenerate the Roman state by obtaining a new home for the citizens, to erect a rampart against the inroads of barbarians, and establish a vast "Italo-Hellenic empire with two languages and a single nationality." In his opinion, Caesar's victories in the West postponed for four hundred years the overrunning of Europe by hordes of migratory barbarians.

As a matter of course, Caesar is by far the most prominent figure in these pages. What Shakespeare put into the mouth of Cassius is here literally true. Caesar does indeed stride the world like a colossus, and all the rest of his contemporaries walk under his huge legs. Caesar is everything, and nobody else is anything. Dr. Mommsen is an enthusiastic worshipper of successful force. Sulla and Caesar are his idols; Pompey, Cicero, and Cato—especially the latter two—the butts of his ridicule and contempt. It will be strange if the Emperor of the French does not make more use of Dr. Mommsen's assistance in the concluding portion of his *Life of Caesar* than in what has already appeared. Certainly he could hardly wish for a more zealous and able coadjutor in the attempt to glorify his hero. Dr. Mommsen does, it is true, point out Caesar's occasional errors of judgment and minor faults of character, but with so gentle a hand as rather to enhance the value of the praise he bestows, by disclaiming for the object of his adoration a superhuman perfection. The pointed way in which he calls the reader's attention to Caesar's inferiority of position and advantage to Pompey on several occasions, only serves to make his subsequent success all the more striking. These few touches of shade bring out the light in the picture all the more vividly by force of contrast. Dr. Mommsen's portrait of Caesar is painted in strong colours, as will appear from an extract or two:—

"Gifts such as these could not fail to produce a statesman. From early youth accordingly Caesar was a statesman in the deepest sense of the term, and his aim was the highest which man is allowed to propose to himself—the political, military, intellectual, and moral regeneration of his own deeply decayed nation, and of the still more deeply decayed Hellenic nation intimately akin to his own. The hard school of thirty years' experience changed his views as to the means by which this aim was to be reached; his aim itself remained the same in the times of his hopeless humiliation and of his unlimited plenitude of power, in the times when as demagogue and conspirator he stole towards it by paths of darkness, and in those when, as joint possessor of the supreme power and then as monarch, he worked at his task in the full light of day before the eyes of the world. All the measures of a permanent kind that proceeded from him at the most various times assume their appro-

priate places in the great building-plan. We cannot therefore properly speak of isolated achievements of Caesar; he did nothing isolated. With justice men commend Caesar the orator for his masculine eloquence, which, scorning all the arts of the advocate, like a clear flame at once enlightened and warmed. With justice men admire in Caesar the author the inimitable simplicity of his composition, the unique purity and beauty of the language. With justice the greatest masters of war of all times have praised Caesar the general, who, in a singular degree disregarding routine and tradition, knew always how to find out the mode of warfare by which in the given case the enemy was conquered, and which was consequently in the given case the right one; who with the certainty of divination found the proper means for every end; who after defeat stood ready for battle like William of Orange and ended the campaign invariably with victory; who managed that element of warfare, the treatment of which serves to distinguish military genius from the mere ordinary ability of an officer—the rapid movement of masses—with unsurpassed perfection, and found the guarantee of victory not in the massiveness of his forces but in the celerity of their movements, not in long preparation but in rapid and bold action even with inadequate means. But all these were with Caesar mere secondary matters; he was, no doubt, a great orator, author, and general, but he became each of these merely because he was a consummate statesman. * * A born ruler, he governed the minds of men as the wind drives the clouds, and compelled the most heterogeneous natures to place themselves at his service—the smooth citizen and the rough subaltern, the noble matrons of Rome and the fair princesses of Egypt and Mauritania, the brilliant cavalry-officer and the calculating banker. His talent for organization was marvellous; no statesman has ever compelled alliances, no general has ever collected an army out of unyielding and refractory elements with such decision, and kept them together with such firmness, as Caesar displayed in constraining and upholding his coalitions and his legions; never did regent judge his instruments and assign each to the place appropriate for him with so acute an eye. He was monarch; but he never played the king. Even when absolute lord of Rome, he retained the deportment of the party-leader; perfectly pliant and smooth, easy and charming in conversation, complaisant towards every one, it seemed as if he wished to be nothing but the first among his peers. * * Such was this unique man, whom it seems so easy and yet is so infinitely difficult to describe. His whole nature is transparent clearness; and tradition preserves more copious and more vivid information regarding him than regarding any of his peers in the ancient world. Of such a person our conceptions may well vary in point of shallowness or depth, but they cannot be, strictly speaking, different; to every not utterly perverted inquirer the grand figure has exhibited the same essential features, and yet no one has succeeded in reproducing it to the life. The secret lies in its perfection. In his character as a man as well as in his place in history, Caesar occupies a position where the great contrasts of existence meet and balance each other. Of the mightiest creative power and yet at the same time of the most penetrating judgment; no longer a youth and not yet an old man; of the highest energy of will and the highest capacity of execution; filled with republican ideals and at the same time born to be a king; a Roman in the deepest essence of his nature, and yet called to reconcile and combine in himself as well as in the outer world the Roman and the Hellenic types of culture—Caesar was the entire and perfect man. Accordingly we miss in him more than in any other historical personage what are called characteristic features, which are in reality nothing else than deviations from the natural course of human development. What in Caesar passes for such at the first superficial glance is, when more closely observed, seen to be the peculiarity not of the individual, but of the epoch of culture or of the nation; his youthful adventures, for instance, were common to him with all his more gifted contemporaries of like position, his unpoetical but strongly logical temperament was the temperament of

Romans in general. It formed part also of Cæsar's full humanity that he was in the highest degree influenced by the conditions of time and place; for there is no abstract humanity—the living man cannot but occupy a place in a given nationality and in a definite line of culture. Cæsar was a perfect man just because he more than any other placed himself amidst the currents of his time, and because he more than any other possessed the essential peculiarity of the Roman nation—practical aptitude as a citizen—in perfection; for his Hellenism in fact was only the Hellenism which had been long intimately blended with the Italian nationality. But in this very circumstance lies the difficulty, we may perhaps say the impossibility, of depicting Cæsar to the life. As the artist can paint everything save only consummate beauty, so the historian, when once in a thousand years he falls in with the perfect, can only be silent regarding it. For normality admits doubtless of being expressed, but it gives us only the negative notion of the absence of defect; the secret of nature, whereby in her most finished manifestations normality and individuality are combined, is beyond expression. Nothing is left for us but to deem those fortunate who beheld this perfection, and to gain some faint conception of it from the reflected lustre which rests imperishably on the works that were the creation of this great nature. These also, it is true, bear the stamp of the time."

This is undoubtedly strong writing. The only question is, whether it is not too powerful, whether it can be substantiated by the testimony of authentic history. Be this as it may, there can be no question that Dr. Mommsen's treatment of Cato and Cicero is more like the bitter hostility of a violent partisan than what might be expected from an impartial, not to say philosophical, historian. Such phrases as "the pedantically stiff and half witless Cato," "the unbending dogmatical fool, Cato," "this young and shallow pedant," "the Don Quixote of the aristocracy," are scarcely in keeping with the dignity and moderation of sober history. Of Cicero, Dr. Mommsen gives a slashing sketch, partaking more of caricature than faithful portraiture.

We are accustomed to speak and hear of the triumvirate of Cæsar, Pompey, and Crassus, as if there were only one; but Dr. Mommsen calls attention to the fact that there were two such coalitions—one formed in the autumn of B.C. 71, by which the constitutional innovations of Sulla were annulled and the old democratic institutions restored; and the other eleven years later, usually termed the First Triumvirate. The motives which induced the confederates to form these coalitions, their positions in relation to each other, and the contrast between those of Cæsar and Pompey at the two periods, as well as the consequences which resulted, are ably delineated by Dr. Mommsen. He also gives a striking picture of the anarchy which prevailed in Rome at the close of the Republic, comparing it to "a London with the slave population of New Orleans, with the police of Constantinople, with the non-industrial character of modern Rome, and agitated by politics after the fashion of Paris in 1848." Even if he does not carry on his history so far as he originally contemplated, he has already accomplished a work which will command the respect of the learned, and indeed all students of ancient history.

NEW NOVELS.

The Draytons and the Davenants: a Story of the Civil Wars. By the Author of 'Chronicles of the Schönberg-Cotta Family.' (Nelson & Sons.)

THE Author of the 'Chronicles of the Schönberg-Cotta Family,' as a writer of agreeable and harmless fiction for girls, has won, and deserves to hold, a place in public estimation considerably above the rank and file of our ordinary pro-

ducers of readable tales. If she cannot be credited with originality and distinctiveness of thought, she at least chooses her own guides, and exercises private judgment in deciding as to the way in which she ought to regard whatever subject she writes about; her purpose is always womanly and commendable; and hitherto she has not given us a story that lacks signs of honest labour. It is therefore with no ordinary reluctance that we utter an adverse verdict respecting 'The Draytons and the Davenants,' a work in which Mrs. Charles is found dealing with a subject that is altogether beyond her powers, as, indeed, it would prove beyond the capacity of the majority of our living novelists. If we put aside the indiscretion of this choice of subject, the failure may be fairly described as the result of causes over which the lady could not, in the nature of things, exercise any adequate control. She appears to have prepared herself conscientiously for her task by reading the orthodox authorities of these later days on matters pertaining to the great struggle for civil and religious liberty in the seventeenth century; and having gleaned a sufficient quantity of information from historians and biographers, she has reproduced it in a form that will not be acceptable to any numerous body of readers. Here and there the book is marked by cleverness; a tone of feminine simplicity and goodness pervades every part of it; but notwithstanding its redeeming points, this tale of two families who espoused opposite sides in the struggle betwixt despotism and law,—the Draytons being a gentle Puritan family, and the Davenants a house of Royalists and courtiers,—is tedious, unreal, and in no respect entertaining. The story has to be picked out of the diaries of the two heroines, Lettice Davenant and Olive Drayton, who maintain a close friendship, notwithstanding the political differences of the families, and their own want of unanimity on questions relating to public matters; and these diaries are so burdened with digressions into the history of the period, and with reflections upon the conduct of parties and leaders, that it is by no means easy to keep the thread of the romance in sight. Neither in thought nor style are the journals satisfactory reflexions of the epoch. The young women who kept them are not such damsels as danced at Whitehall, or prayed God to bless the patriotic endeavours of Colonels Hampden and Cromwell, but young ladies who have read Carlyle and Walter Scott, Constitutional Histories and 'The Christian Year.' At the outset of the book, the author endeavours to imitate the stiffness and antiquated phraseology of commonplace seventeenth-century prose; but long before the wearisome volume is drawing to a close, her attempts at verbal simulation are discontinued, and save that she occasionally uses "wondrous" as an adverb, or violates some petty rule of modern literary style, she makes her young ladies write away, just as young ladies are trained to write in Brighton boarding-schools. Here is a specimen of Olive's flowing sentences: "Still throughout that dreary winter negotiations went on between the Parliament and His Majesty at the Castle of Carisbrook. More and more hopeless, as more and more men became mournfully convinced of the King's untruth. Until, in April, 1648, when, from the upper windows of our house, I could see on the one side the trees bursting into leaf in St. James's Park, and on the other the river gleaming with a thousand tints of green and gold, as it reflected the wooded gardens of the palaces and mansions from Westminster to the Temple; when the fleets of swans began to pass by on their way to build their nests in the reedy

islets by Richmond or Kew, the news came from all quarters that, amidst all this sweet stir of natural life, the country was stirring with fatal insurrections from Kent to the Scottish Borders." The reader of pages upon pages written in this style finds it difficult to imagine himself perusing a diary kept by an English lady in the seventeenth century.

Philip the Dreamer: a Novel. 3 vols. (Newby.)

It would be difficult to find a much more confused or incoherent novel than 'Philip the Dreamer.' It is altogether foolish, and made up of sensational ingredients, ill put together. Two dwarfs, twin-brothers,—a bewitched but faithful serving-man,—a wilful and weak young hero, who has periodically-recurring dreams, one in particular about griffins,—a mother, who has married a scoundrel, to save her brother, who has qualified for the gallows,—an old farmer and his wife, who rush up to London to save her from unknown dangers, though they have only heard of her once in six whole years. There is a house called Epides House, inhabited by the martyr-wife, the demon husband, and his familiar, a Dr. Flindorf,—himself a mystery; also, there is a mischievous beauty, who at first seems destined for the hero's destruction, but in the end is his guardian angel. There is of course a mystery, which those who list may unravel. The book is written with a foolish familiarity of tone, which does not tend to please the reader. In fact, the book is foolish; but there is no particular harm in it, except entailing a waste of time and attention to try to master the windings of the labyrinths of the plot, which leads all the characters to an end suited to the author's views of poetical justice. For such readers as care for sensational scenes, without a vestige of sense, 'Philip the Dreamer' might have attractions.

The Imperial Bible-Dictionary. Edited by the Rev. P. Fairbairn, D.D. 2 vols. (Blackie & Son.)

THIS is the fourth Biblical Dictionary which has appeared within these few years in Great Britain. We may hope, therefore, that the field is pretty well exhausted, at least from the point of view they have all taken; for there is another which can hardly fail to be occupied sooner or later. It is not easy to find out from the Preface the precise want which the editor intended the work to meet, or the reason for its publication along with the similar dictionaries of Smith and Kitto. We learn that it was projected twelve years ago, when Kitto's was the only English work of the kind; that it aims at the instruction of an intelligent class of persons, who, without any professional study of the Bible, possess sufficient culture to profit by Biblical works if they are not overloaded with learning; and that it is designed to promote "sound principles" of Scriptural interpretation in an age highly speculative, like the present one, when the foundations of truth are undermined and the teaching of the word of God is perverted. As far as we are able to judge, the latter object appears to have been the chief one. If so, the Bible Dictionary of Cassell, Petter & Co. resembles it closely.

The work proceeds from the atmosphere of the Free Church of Scotland, and reflects the tone of belief prevalent in that body. It is edited by a Free Churchman, and the writers belong to the same denomination or to churches harmonizing with it in their doctrinal standards. A few authors belonging to others are only exceptions to the general rule. The whole number of contributors amounts to forty-three.

The zoological department is well written.

The same remark applies to the botanical. The topographical articles are marked by ability, comprehensiveness and accuracy. Thus the discussions of Kadesh, Kerioth, Keziz, Kibroth-hattaavah, Kibzaim, &c., prove that the author had a firm grasp of his subjects, and had mastered all that was known respecting them. The biographical articles are fairly written; but those on the manners, customs, rites and ceremonies of the Bible, especially such as relate to Jewish matters, are scarcely up to the standard of excellence which might have been expected.

In the topics embraced under Biblical Criticism and Introduction, the Dictionary is of inferior value. This part is the least satisfactory of the whole, because the writers lack competent knowledge and a capacity for criticism. All the books of the Old Testament are badly treated, with one or two exceptions, such as Proverbs. Those of the New Testament are a little better, but are still of a mediocre stamp. Thus the articles on the Books of Samuel, Kings, Chronicles, Canticles, Habakkuk, Jonah, and the prophets generally, are of a weakly character, showing persons who tried to compile their materials from various sources with a timid avoidance of the best critics who have handled them, or perhaps with ignorance of them. The German scholars who treat of the Old Testament, and appear authorities in the eyes of the contributors, are Keil, Kurtz, Delitzsch, and the like, second or third rate men, who are properly estimated in their own land, not in Scotland. The articles 'Hebrew Language,' 'Old Testament,' 'New Testament,' 'Ancient Versions of the Bible,' &c., are of small value, being behind the present state of knowledge.

With respect to the New Testament books, much cannot be said in praise of the articles upon them. No masterly discussion is shown in them. Too often prejudice supplies the place of knowledge, and contradiction, of reasoning. The literature of the subject, which is very extensive, has not been read, and mistakes are numerous.

The volumes will never take a high place in the rank of Bible dictionaries. Had they furnished the sure results of criticism, they might have been useful to intelligent readers; but they do not. It was to be expected that the work would uphold the harmony of Genesis, &c., with astronomy and geology, for "the days of creation must be taken in an extended sense." But even a Free Church Dictionary should give something better than this at the present day: "The Gospel of John," to quote from Horne's Introduction, "is alluded to once by Clement of Rome, and once by Barnabas; and four times by Ignatius, Bishop of Antioch, who had been a disciple of the Evangelist, and had conversed familiarly with several of the apostles. It was also received by Justin Martyr, by Tatian, by the churches of Vienna (*sic*) and Lyons, by Irenæus, Athenagoras, Theophilus of Antioch, Clement of Alexandria, Tertullian, Armonius, Origen, Eusebius, Epiphanius, Augustine, Chrysostom, and in short by all subsequent writers of the ancient Christian church." It should also avoid statements so notoriously incorrect as that "the testimony of Papias constitutes a foundation upon which to rest the authenticity of the Gospel of Mark," and that Leviticus xviii. 18 "does not warrant the successive marriage of sisters to the same man." But it is needless to point out the errors that are easily found in the pages of a work which cannot be compared in excellence with Smith's or Kitto's. The writers are unknown for the most part in Biblical literature. They also move in a restricted

circle of their own. Their principles of interpretation may be sound, as they themselves think, though that is questionable; but they are badly applied. Had they written a quarter of a century ago, they might have been listened to with respect; now they are of the past. It is a pity that the editorship is so poor, so unscholarly, so narrow; for it has had an effect on the range of the contributors, perhaps on the nature of their contributions. Some of them might have done better, since they have occasional glimpses reaching further than the editorial. But the whole consists of a uniform mediocrity, interspersed with good articles on topography, natural history, and botany, and spiced with the old flavour of a theological creed which paints the justice of God in stronger colours than His love, and speaks of the eternally damned with self-complacency.

Supplemental Descriptive Catalogue of Ancient Scottish Seals. By John Laing. (Edinburgh, Edmonston & Douglas.)

IN this handsomely-printed and well-illustrated volume, Mr. Laing continues and concludes his excellent catalogue of Scottish Seals. The services which have been rendered to history, archaeology, and art by those painstaking and erudite heraldic antiquaries who have given their lives to the study of ancient armorials, are noteworthy in many generations, and in none more strongly than our own. From no hands have those services been more welcome to the student than from those of Mr. Laing, who, deeper than his contemporaries, has extended his researches into the rich mine which is offered by Scottish seals, sigilla and secreta, and in doing so exercised that taste which distinguishes the archaeologist from the mere dry-as-dust antiquary. The man who appreciates the beauty of an old thing, and values it in a logical manner, is to be distinguished from that other who adores a relic simply because it is old, and on that account will not reject antiquities, however worthless in execution they may be, or however entirely they may violate the principles of Art or the scientific laws of archaeology. Violations of the latter are, from the very nature of the study, more frequent in heraldry than any other branch of medieval knowledge; still more often do such things occur in secreta, which, having purely personal references, were subject to all sorts of whims on the part of their owners. Again, carelessness of the strict heraldic law, especially after the breaking up of Art in the early part of the fifteenth century, was by no means uncommon on seals. Thus George Douglass, Queen Mary's "George Douglass," c. 1560, used a signet on which the piles of his shield were so inaccurately cut that it requires some faith to accept them as representing anything else than the line "indented." Can we wonder that such an inaccurate gentleman as this came to grief? Aberdeen, too, was subjected to a frightful heraldic indignity when the Lyon himself, Sir C. Erskine, granted or confirmed to the ancient city the right to use "insculped" on the reverse of its common seal, "St. Michael standing in the porch mitred and vested proper with his dexter hand lifted up to Heaven praying over three children in a boyling Cauldron of the first, and holding in the sinister a crossier, or." The poor Lyon erred horribly in his jargon, but atrociously in describing St. Michael the Archangel with the attributes of stiffnecked St. Nicholas of Myra, the tutelary of Aberdeen, whose peculiar emblem of the resurrection of three children from a pickle-tub one might fairly expect would be recognizable even by a herald of Charles the Second's time. Your

"Lyons" have been very torpid kings-at-arms, but undeniably Sir C. Erskine was more ignorant than his fellows.

Mr. Laing forms in every sense a noble contrast to this wonderful official, in no manner more powerfully so than in his good taste and logical sense of propriety.

Mr. Laing, in the course of researches for this book, visited the Record Office in London, and thus describes his experiences:—He "made a careful examination of all the seals remaining, and had photographs taken of the greater number, of which the negatives are preserved, but from bad light and other causes they are not in general very satisfactory." We trust that red-tapism has not intervened in this case to prevent due use being made of these invaluable records by so competent an observer as Mr. Laing, and that the "bad light and other causes" of which he complains were due to arrangements now obsolete, but which were at one time of the most vexatious character. It would be preposterous indeed if these treasures were preserved at a vast expense, and yet rendered inaccessible to intelligent students, one of whose prime offices would be, by publishing faithful transcripts from them, not only to extend the sphere of their usefulness, but to obviate frequent necessity to recur to the originals. With regard to the nature of these stores of antiquity of which Mr. Laing availed himself, it appears that a large and most interesting portion belongs to what he calls "that unfortunate period" following the death of Alexander the Third, when the ambitious designs of Edward the First of England were prosecuted with an energy and sagacity well calculated to ensure success, but which ultimately proved futile. In this portion are found many of the Deeds of Homage which an unscrupulous king extorted from a distracted people. They are mostly drawn up in Norman-French, in a most correct and cautious form of phrase, and attested by the seal of each one giving the homage. Not content with receiving the homage of the magnates, Edward insisted on that of the commonalty of the burghs, counties, or districts; giving homage collectively, with the attestation of their respective seals. Here are deeds containing two or three hundred names of the inhabitants of certain districts, comprising many that are extraordinary, and offering a rich field for ingenious speculation to all who are fond of the study of surnames. Among them are many still known and common after a lapse of six centuries, while others have quite disappeared. Some of these homages were probably taken from corporate bodies. "To one of these," says Mr. Laing, "are still appended nearly one hundred seals, while many have dropped off from it. Some of these seals are very quaint indeed; many are merely devices, not armorials proper, such as that of William Arlesay (No. 48 of this Catalogue), where a lion appears coiled at the foot of a tree, a hare plays on a tambourine, and a fox (?) plays on pipes. As these sigilla are dated from the best period of Gothic Art, there must be among them many beautiful as well as curious examples. To the Art-value of many of the objects here reproduced, to their logical and apt character as specimens of design rightly applied, we shall presently call attention. Mr. Laing speaks of the invasion of Edward the First as a patriot rather than as an antiquary; otherwise he would surely say a good word for the monarch whose "vigour" obtained from so many Scottish worthies this inestimable treasure of seals and signatures. No English monarch of the Plantagenet race did half so much for the antiquaries of the present age as Edward the First. His ambition put the nation

to many rude trials, but he did one good thing, which northern antiquaries ought not to forget: by hammering, he welded the race well together, and did more for the consolidation of Scotland than all her own kings during many generations could manage to achieve.

This Catalogue comprises some English seals of nobles who held lands in Scotland, or were donors of English lands to religious houses. No doubt these articles are rightly included; there could be no necessity for Mr. Laing's ultra-patriotic apology on their account. Besides these, and the regal and baronial seals of the northern kingdom, we have a host of the most valuable and interesting memoranda in this appendix to the author's great text-book on the subject, comprising ecclesiastical, municipal, diocesan, episcopal, and official seals. There is bad news for the Scottish burghs in this unchallengeable record. It appears that of all the burghs bearing arms, only nineteen are recorded in the register of the Lord Lyon, and that any of the others carrying insignia are doing so without legal authority. We heard a good deal about the treatment of the Scottish lion, and many indignant protests have been made on his behalf. Who could have believed that so many honourable Scottish cities and towns would be heraldic impostors, capable of taking no end of liberties with bearings that, if they do not—which is improbable—belong to others, are at any rate none of theirs who appropriate them?

A few words are due to the artistic merits and extraordinary beauty of countless examples among those now before us, no less than with regard to the class of sigilla and secreta in general. During the best periods of mediæval Art, that is, about the reign of our Edwards First and Second, these articles almost invariably display profound knowledge of right design in the manner with which they have been made to receive ornaments and armorials. The shape of the seal—be it round, vesica-formed, with sharp points, or with the points reduced to a less acute contour—constantly dictated this disposition of the decorations and insignia. This was always filled up with the greatest aptitude and care. Some of the most intricate patterns, many of them models of richness and symmetry, as in the secreta of John, Lord Bardolf, c. 1340, Margaret, Queen of Edward the First, &c., among the English series, and among those of Scottish origin, Nos. 5 and 8, Plate vii; 145 (Isabella de Bruce), 759, 407, and most of the equestrian baronial seals. Generally speaking, the seal-engraver's art of Scotland seems inferior to that of England; both exhibit endless wealth of design.

The Poetical Works of Valentine Verity: containing 'The Shade of Byron,' and other Poems. Edited by S. W. Leonard. Vol. I. (Printed for the Author.)

THE trash before us, which occupies a bulky volume, is intended as a continuation of 'Don Juan' from the point at which its author left it. Of the wit, the fancy, the pathos, and the licentiousness which characterized Lord Byron's poem, the present writer has only the last. He has, to some extent, cultivated the art of tickling his reader's ear by droll and unexpected rhymes, and he can run the sentimental into the comic with tolerable ease. Both these accomplishments may be rapidly acquired. A poet like Byron stoops to them in sport, or gives value to them by the presence of higher qualities; with the author before us they are the total stock-in-trade—name them; and you have the inventory of his mental possessions. If bound to give evidence in support of our censure, we

tender four stanzas, which are so far superior to many of their companions that the only objection to them is their stupidity:—

Hail, tuneful nine! sweet patrons of the Bard,
Historian, fiddler, dancer, and astronomer,
Singer, and rhetorician!—is't not hard,
While Tragedy, and Comedy, and Orator
Receive your favors, of the painter's card
(Who represents them all, ye take no more
Notice than if the Art were not the sister
Of all the others—How is it ye've miss'd her?
Surely the "Sister Art," is no misnomer:
Why is she treated like a mere attendant?
A Raphael, or Correggio, like Homer,
Must on your inspiration be dependent:
Some of ye surely might afford to go more
To our fam'd Royal Academy transcendent:
(At least to see fair play!—Now do, pray go;
Teach Watts, MacIise, and Turner how to paint a
rainbow.

Poor fellows! they ne'er studied "Brewster's Optics,"
Or they would not expose to public gaze
Such gross absurdities as their catoptries
Of late betray.—Whisper the great R.A.'s,
Dear Ladies, tell them how to use their chopsticks
When they would imitate your heavenly rays.
Just visit them, and while you're there, in pity
Look in upon that sage "hanging committee."
Tell them they might as well be hang'd themselves,
As put our eyes to the angle of reflexion,
To look at pictures the sad bungling elves:
And, if they must still have that dark annexion
Called "Octagon," model for condemn'd cells!
Put Turner's splashy daubs there, in connexion
With Etty's waxy skins and dirty faces—
Take, for a specimen, last year's "Three Grades."

It is likely enough that "Valentine Verity" will impute our strictures to resentment at the sarcasms which he has levelled at his critics in advance. The intellect which could produce his invectives is precisely of the kind which could believe they would sting. We must not deny him an example:—

An' if ye cavil when we coin a word,
Or put a syllable or two too much in;
Or when a bizarre rhyme may chance be heard;
Or, leaving rhyme, when we would be more touching,
We choose some "clumsy cuttings" though absurd
They may be christen'd by some rev'rend urchin;
Know ye, it suits our purpose, or caprice—
We care not for the cackling of geese.

We, however, object to it, and shall quote no further.

On Sherman's Track; or, the South after the War. By John H. Kennaway, M.A. With Illustrations. (Seeley, Jackson & Halliday.)

Books about America after the war are growing plentiful. Not very many weeks have passed since the appearance of Mr. Skinner's 'After the Storm' and Mr. Ferguson's 'During and After the War'; and now another English tourist who visited the States in the autumn of last year gives us an entertaining and thoroughly readable record of his journeyings, experiences, and observations within the lines of Cousin Jonathan. Had Mr. Kennaway been earlier in the field, he would have found us in the humour to receive his book with a flattering measure of attention; but as he tells us nothing that savours of novelty, we can do little more than pay him a just compliment on the liberal temper and satisfactory style of his narrative. After a run through Canada, the author entered the States, and made the more important part of his trip *via* Chicago, St. Louis, Louisville, Cave City, Nashville, Chattanooga, Atlanta, Augusta, Savannah, Charleston, Wilmington, Petersburg, Richmond, Baltimore, and New York, to which city he returned to embark for the homeward voyage, after an excursion to Philadelphia and Washington. With regard to the social aspects of the Southern States, he agrees on all important points with Messrs. Skinner and Ferguson. Concerning the negroes, he encountered the conflicting statements of violent partisans for or against the African race, and of moderate men who spoke at the instigation of hope or fear, but prudently refrained from committing themselves to final judgments on the questions in dispute until something had been done

to raise the intelligence and morality of the darkeys to the ordinary standard of free men. Upon the whole, Mr. Kennaway's view of the freedman's future is despondent, and though he does not distinctly adopt it as his own, he shows decided respect for the opinion or those who predict that fifty years hence the Africans will have disappeared from the face of the Union, in which case the result of the conflict between liberty and slavery will be just this, that an inferior people, through inability to hold their own in the struggle for life, will have disappeared before men of better stuff and stronger will, and the offspring of the present generation of Southern whites will not be depressed and morally injured by the peculiar institution which had so deleterious an influence on their forefathers. An interview with General Sherman was sufficient to inspire the tourist with respect for the soldier's manliness and simplicity; and as soon as he came upon the line of the famous march Mr. Kennaway met with an abundance of pathetic and terrible testimony to the magnitude of the commander's operations, and the misery with which they had been attended. Instead of attempting to palliate the hideous nature of his devastations, Sherman himself frankly observes, "I know I have been a scourge"; to which admission, however, he appends the reflection, "But how much better for the South that it was I rather than Butler, or some one of that school!" Not only in Sherman's track, but wherever he placed foot in the South, Mr. Kennaway saw the doleful consequences of the struggle—in the silence of ruined mansions, the neglect of fine plantations, the impoverishment of gentle families, the total destitution of men and women who before the war had enjoyed a noble affluence drawn from ancestral estates. In a house where fifty servants had been maintained and lavish hospitality exercised until Jefferson Davis unfurled the flag of secession, Mr. Kennaway found a mournful and embittered family of gentlemen and gentlewomen, grinding their teeth in futile rage over the irremediable past, and making no effort to conceal the straits to which they were reduced. In the stables a few mules, requisite for agricultural purposes, occupied the stalls that had been formerly filled with "fifteen carriage-horses, besides riding horses for every one that came." At table the guests and their entertainers dined off squirrels, and drank whisky poured from a broken decanter. The lady of the house, surrounded by her three daughters, received the visitors "in a room of good size, but scantily and poorly furnished. The carpet was worn out; the paper, once gilt, was faded and old; and the only ornaments, a small bronze clock which had stopped, and some piece of plate on the table in the middle of the room. The ladies were sitting around in the plainest cotton dresses, and two little boys, in a sort of Confederate uniform, were playing in front of the great log fire. They all welcomed us, or tried to do so; but they could speak of no subject but the war; and there was a settled grief, a heart-broken depression about them, that was most painful. One of them laughed once—a hard, bitter laugh—when she spoke of the Alabama and Shenandoah. And how their eyes flashed, and they ground their teeth, when they mentioned the name of a Yankee! 'You seem to have a very bad opinion of us,' said a Federal officer to one of them, the other day. 'If you want my opinion, I think you the meanest of the mean,' was the reply."

Here is a graphic picture of the state of things as they existed in South Carolina in the December of last year, taken from a private letter of that date:—

"I doubt if you have any idea of the poverty of the people. The land may be restored, but where can its ruined owner procure money to pay taxes, erect buildings, and hire freedmen? Our young men are gone to work in earnest. We are proud to see them engaged in teaching, ploughing, waggoning, keeping grocery-stores; in short, doing anything, and doing it cheerfully. Ours is a poverty of which no one is ashamed, and of which very few complain. We are willing to bear it, and its universality makes it more tolerable. When I know that the most refined and intelligent women in the State, deserted by their deluded servants, are doing all kinds of housework—sweeping, dusting, making beds, and even in some cases cooking and washing—it is much easier for me to iron the towels my little son has washed, while I turn occasionally a laughing eye towards the fire-place, where an invalid gentleman (son of a former Governor) is engaged in churning! I must confess that his attempt furnished us with more amusement than butter. For, believing this state of things to be only temporary, we make merry over it, compare notes with our friends, and boast of our success in these untried fields. Many refugee ladies feed their families by exchanging the contents of their wardrobes for articles of food. 'How are your sisters?' said I last summer to a young man who had left home to become a tutor. 'Their complexions look badly,' was the reply; 'but that is not surprising, when you consider how long they have been eating old frocks.'—'Have they any lights?' was my next query. With perfect gravity he replied, 'No; when the moon does not shine, they go to bed by lightning.' But matters are mending. In this very family light wood has superseded lightning in the chambers, and in the parlour a small petroleum lamp (price one dollar) diffuses light and happiness around. But there are cases over which no one can laugh. I know of a family whose property was counted by hundreds of thousands, who have not tasted meat for months. A gentleman of high scientific attainments, formerly professor in a college, is literally trying to keep the wolf from the door by teaching a few scholars, one of whom, a girl of sixteen, pays a quart of milk per diem for her tuition! Innumerable widows, orphans, and single women, whose property was in Confederate bonds, are penniless, and are seeking employment of some kind for bread. On the whole, our people are bearing their trials bravely and cheerfully; but so wide-spread is the ruin, that, even if the new system works well, it will take at least half a century to put us where we were. Georgia will recover much sooner."

The sight of the Southerners in their distress softened Mr. Kennaway somewhat overmuch. There are occasions when it is far more difficult to be generous to the triumphant than generous to the fallen.

OUR LIBRARY TABLE.

The Savage Club Papers. Edited by Andrew Halliday. (Tinsley Brothers.)

Nor many weeks since the daily papers announced the death of a young and promising artist, who had met his end under circumstances calculated to rouse a lively emotion in the circle of his private friendships, and to create strong sympathy for the girl who through her husband's departure had made sudden acquaintance with the grief of widowhood. To raise a small fund for the poor lady, thus plunged into a sea of many sorrows, several writers and artists, to whom the particulars of her misfortune were affairs of personal concern, resolved to contribute from their folios and desks the materials for a Christmas volume, which should be offered for sale at this time of kindly emotion and benevolent action. Of this determination the present book is the result; and we have much pleasure in drawing to it the attention of those hundreds of opulent buyers of Christmas gift-books who are laying in stores of literary and artistic toys for distribution during the holidays, and who will not hesitate to spend a brace of five-shilling pieces on 'The Savage Club Papers,' when they reflect that by doing so they will give assistance to a helpless

woman, who, through no fault of her own, is steeped in desolation and distress. The object ensures the success of the undertaking; but, in justice to the gentlemen who have exerted themselves to do a righteous service to a fallen comrade's widow, we should observe that the volume contains not a little of the good wine which is said to need no bush, and that apart from its object there are various and sufficient reasons why it should be largely bought as an ornament for drawing-room tables. Some of its pictorial illustrations are excellent. Gustave Doré's 'Oh, Mother!' and 'Our Tail-Piece' possess the strength and vigorous humour which qualify even the most trifling works of his pencil. Mr. Grist's clever trifle, entitled 'Reeling,' exemplifies his fun and adroitness; and amongst the other artists to whose skill the collection owes much, if not the larger part, of its attractiveness appear several of our ablest draughtsmen and engravers. The Literature is contributed by such spirited and popular writers as Messrs. Andrew Halliday, John Oxenford, Arthur Locker, Artemus Ward, Charles Sketchley, Walter Thornbury, Henry Leigh, H. J. Byron, and Thomas Archer. Hoping that the book may achieve the special purpose for which it has been produced, we present assurances of our distinguished consideration to the clever gentlemen who have done in fitting manner with pen and pencil a work that well befits a Christmas season.

The Art of Fishing, on the Principle of Avoiding Cruelty. By the Rev. O. Raymond, LL.B. (Longmans & Co.)

THE author of this little work is, we have no doubt, a humane man, and would handle his bait-frog far more tenderly than old Izaak Walton, who tells us, in his immortal book on fishing, to use him as though you loved him—that is, harm him as little as you may possibly, that he may live the longer. All field and water sports undoubtedly entail more or less suffering on animals; but it is certain that the latter is less cruel than field sports, and that angling can be pursued with equal success, and, at the same time, with more mercy to fish, than they commonly meet with from anglers. With this view Mr. Raymond, who is a veteran in the gentle art, in a few chapters gives a series of rules for fishing, the result, as he informs us, of sixty years' practice. The great object of these is to inculcate mercy. Live baits are in all cases discountenanced; indeed, it is the opinion of Mr. Raymond that more fish may be captured by judiciously prepared dead baits than by the former. Even the live May-fly is, in our author's opinion, less deadly than the artificial lure, an opinion which will not, we apprehend, meet with general indorsement. Besides the "merciful rules," Mr. Raymond gives various hints respecting fishing-tackle, &c.; but we do not find anything novel in these, all information respecting an angler's outfit having been exhausted long ago.

The Parable of the Prodigal Son. With Notes by James Hamilton, D.D., and Illustrations by H. C. Selous. (Nisbet & Co.)

THE illustrations to this rather ponderous enlargement of the world-famous parable are not worthy of detailed examination here; they have been, however, executed with care. If the faces are vulgarized in their expressions, and the contours are faulty, it is, on the other hand, true that some of the limbs are wrought with considerable skill and so much attention as is rare indeed in "illustrations" to books of this class. Neither this care nor the partial success which has attended it are constant in the plates before us. The best of the drawings is that entitled 'Thy Brother is come.' The text of this book consists of a series of discourses, which may be styled sermons, on the matters directly and indirectly illustrated and illustratable by the parable in question. These sections are written in a commendable spirit; withal, in a manner which is so ornate, and in a style that is somewhat affected, that the reader is apt to lose patience with Dr. Hamilton, who has not wisely mixed his theology with statistics, so that the reader is not a little alarmed when materials are presented to him by means of which he may ascertain how many per cent. of the sons of "ministers and deacons turn out badly." There is a "cast-iron" style about Dr. Hamilton's

intensely commonplace lucubrations that may serve the tastes of some, but pleases not us. Nevertheless, he has brought together much wealth of illustrative reading, and, with keen insight for analogies, done his best to enforce his purpose and interest his readers. We do not like his book, but we respect him very much.

Hugh Bryan: the Autobiography of an Irish Rebel. (Trübner & Co.)

NEARLY five hundred closely-printed octavo pages, constituting a novel, in which is professed to be given the autobiography of an Irish rebel, is almost "too much of a good thing" just now. The topic is so stale that Fenianism itself has become an intolerable bore, and plays with Whiteboyism for a subject are matters that audiences have ceased to find pleasure in. Nevertheless, this romance, which begins in the Valley of the Blackwater, and ends with a couple, who have supped sorrow in their time, going to America (a *résumé* which to the initiated tells the whole tale), may not be unacceptable to those to whom the subject has some touch of novelty. The author of 'The Sham Squire' has so shown up the "rascally" of the tragic comedians who have acted the drama of Irish Rebellion, that the heroes of romance have become as auspicious characters as those of the reality. In the last century some of the most prominent of the "patriots" were in the pay of Government. There is reason to infer that the same case now exists. One consequence is, that when we meet with a rebel hero in fiction we speculate upon the question of his being a Government agent, and whether he has received a retaining fee in the lump, or is set down for a life annuity, like his prototypes in 'The Sham Squire.'

Letters from Hell. By M. Rowel. 2 vols. (Bentley.)

IT is not said that these letters are translated, but we have reason to believe that the originals have been published in Danish. They are morbidly fanciful, but they are not so hideous and blasphemous as the books for children by Furniss and Pinamonti on the same subject, in which a God of Mercy disappears altogether, and the greater sway, greater might, greater kingdom are given altogether to Satan, who is made the Judge of all mankind. This book is rather a curious book, but it is like a very bad dream, from which the disturbed sleeper is glad to awake. There is little comfort in any part of it. The reader, indeed, who desires to escape the experiences of the supposed writer is told to repent and believe the Gospel, but he is little encouraged by the information that "not only are there several respectable persons to be found here," (in hell) "but they actually form the greater proportion, just as they did in the world." It is singular how all writers who discuss this diabolical subject seem to delight in insisting upon the almost impossibility of any human being escaping damnation. They presume to point out where and how every man will be bound in eternal torment, forgetting what the Master said to his disciples: "To sit on my right hand and my left is not mine to give, but it shall be given to them for whom it is prepared of my Father."

Twigs for Nests; or, Notes on Nursery Nurture. Illustrated. (Nisbet & Co.)

THE author of this book, although he takes up the seemingly reasonless subject of nursery management, and begins with a treatise on that almost entirely untouched theme, "Babies' Crying," is eminently a reasonable and well-meaning man. As, with the late Sir Peter Laurie, who declared that suicide should be "put down,"—it is clear that there is more in the author's meaning than meets the eye when he tells us that "there is a great amount of crying among babies that is criminal,"—the crime he judiciously ascribes to the babies' teachers, or non-teachers who should be teachers. "Babies' crying," he tells us, "is a matter which demands investigation; the sooner it is acknowledged to be criminal, and treated as such, the better." There is enough in this statement to rouse wrath in the bosoms of all ill-conditioned mothers, whose training he rebukes with all his heart. By "babies" is meant old crones, who snarl in easy chairs, nagging young and middle-aged

folks as well as other family nuisances who have not left the cradle. From the one to the other the matter is simply one of growth; nothing can be clearer than this. From these premises he proceeds to show how infants can cease to be such as soon—which is very soon—as they know what they are about. From this point of view the subject is of tremendous importance, and is well worthy of the attention of nursery philosophers; to these wits there appears much wisdom in the axiom, "An infallible remedy for 'babies' crying' is to let it alone," provided always that the nuisance is known to be unjustifiable. We commend the counsel of our author to all who may be concerned; his tale of an hilarious clergyman who devised a quaint rhyme, and chanted it to the rebel on trying occasions, is a very wise one indeed. A similar genial, but quaint and firm, spirit rules the second essay, 'On Family Prayer.' The writer, who is evidently devout in the most earnest way, is also a genuine humorist, has written a capital "commonsensical" book, which we heartily commend to readers for its breadth and simplicity of style, its clearness and firmness of reasoning, and rigid abhorrence of cant of all sorts, especially home cant,—this but one of the names of self-indulgence. The illustrations, which have been executed by the graphotype process, are rather "scratchy,"—a common defect in the works of those who are beginners in a new mode of engraving, but decidedly the best of their kind; one by Miss Helen A. J. Miles, on page 60, is capital: also see those by Mr. H. W. Petherick.

A Treatise on the Law and Practice of Benefit Building Societies and Freehold Land Societies, with an Appendix of Rules and Forms. By William Whittaker Barry, Barrister-at-Law. (Cox.)

THE substance of the present volume has already appeared in the columns of the *Law Times*. The author's aim is to place before the reader, whether lawyer or layman, a succinct account of the law and practice of the Benefit Building Societies and Freehold Land Societies, which are now so numerous, and are exercising such an important effect on the social life and character of the people of this country. The writer has performed his task with ability, and generally in a business-like way. Occasionally, indeed, he indulges in little flights about "independence and self-reliance," and "the power and dignity of labour," which in a book of this kind show like feathers in a Quaker's bonnet. These, we suppose, are addressed to the lay reader, and may afford him satisfaction; and they are not so numerous as to exasperate greatly a legal reader of fair average temper. The book is in a small compass, and contains much information, which is arranged conveniently in numbered paragraphs. There is a good table of contents and index; and we think it will prove the most handy book on this subject that has yet appeared.

New Zealand Exhibition, 1865. Report and Award of Jurors. (Dunedin, Printed for the Commissioners.)

THE interest which attaches to this Exhibition is very different from that which is excited by any similar undertaking in England. In an Exhibition at London or Manchester we see the march of industry and progress of ingenuity; but from the records of this Colonial Exhibition we learn the extent and value of the resources of the country itself. The more interesting portions of the present Report will be found to be those that treat of Mining and Mineral products, Agricultural produce, and Vegetable substances used in manufactures, especially the second section, which relates to wood. The most important fact is stated in this Report—namely, that coal is widely distributed throughout the colony, and that probably extensive deposits exist in localities where their presence is not suspected, but which progress will reveal.

We have on our table *Natal Sermons*; a series of Discourses preached in the Cathedral Church of St. Peter's, Maritzburg, by the Right Rev. John William Colenso, D.D. (Trübner).—*The Finding of the Saviour in the Temple*: an Exposition of Luke ii., 46—51, based upon, and explanatory of, Holman Hunt's great sacred picture, by the Rev. Richard Glover, M.A. (Hunt).—*The Acts of the Apostles*

and the Epistles of Paul arranged in the form of a Continuous History, with Notes Critical and Explanatory, a Gazetteer of Places, and Questions for Examination, by Thomas Morrison, M.A. (Nelson).—*The Treasure-Book of Devotional Reading*, edited by Benjamin Orme, M.A. (Strahan).—*A Selection from the Sermons of the late Rev. Samuel Rickards, M.A.* (Mozley).—*The Monthly Packet of Evening Readings for Members of the English Church*, Vol. I. (Mozley).—*The British Association for the Advancement of Science, Nottingham Meeting, August, 1866: Report of the Papers, Discussions, and General Proceedings*, edited by William Tindal Robertson, Esq., M.D. (Hardwicke).—*Nature and Art*, Vol. I. (Day & Son, Limited). Also New Editions of *The Toilers of the Sea*, by Victor Hugo, (authorized English Translation, by W. Moy Thomas,) with Two Illustrations by Gustave Doré (Low).—*Half-Hour Lectures on the History and Practice of the Fine and Ornamental Arts*, by William B. Scott (Longmans).—*Guesses at Truth*, by Two Brothers (Macmillan).—*Palestine Revisited, and other Poems*, by the Rev. Thomas Mitchell, M.A. (Simpkin & Marshall).—*Glimpses of the Unseen: Poems*, by A. L. O. E. (Edinburgh, Gall & Inglis).—*Sparks from the Anvil*, by Elihu Burritt (Partridge).—*Constitutionalism of the Future; or, Parliament the Mirror of the Nation*, by James Lorimer (Longmans).—*Married Beneath Him*, by the Author of 'Lost Sir Massingberd' (Chapman & Hall).—*St. Patrick's Eve*, by Charles Lever, illustrated by Phiz (Chapman & Hall).

ILLUSTRATED CHILDREN'S BOOKS.

The Prince of the Fair Family. By Mrs. S. C. Hall. (Chapman & Hall.)

Bright Thoughts for the Little Ones, with Prose and Verse. By Grandmamma. (Cassell, Petter & Galpin.)

Lightsome and the Little Golden Lady. By C. H. Bennett. (Griffith & Farran.)

Washed Ashore; or, the Tower of Stormont Bay. By W. H. G. Kingston. (Jackson, Walford & Hodder.)

Three Hundred Aesop's Fables. Translated by the Rev. G. F. Townsend. (Routledge & Sons.)

The Princess Ilse: a Fairy Tale. (Saunders, Otley & Co.)

Mrs. S. C. Hall's latest publication is a very pretty and rather whimsical story about little people—we can hardly call them fairies, according to the popular notion, which requires something different in description from minute men and women, who live in, among, and under flowers and leaves, using them as men employ houses, and having the senses, limitations and passions of mere men. To say this much in respect to the shortcomings of this charming story is but to declare that the author whose work is now before us has failed exactly where ninety-nine out of every hundred fairy-tale writers have done likewise. We know no modern fairy story of this kind, and having the pretensions of this one, which surpasses it either as regards spirit, prettiness, or piquancy of treatment, richness of incident, or carefulness in imparting "local colour" to the book which tells how a noble Queen Foam, of South Wales, whose tiny people and lazy royal husband were seated near Tenby, a watering-place to which Mrs. Hall seems to have taken an overwhelming fancy, had a son, Prince Ivor, who, being pressed by his imperious mamma to marry a certain beautiful Princess of Pembrokeshire, flatly refused to do anything of the sort, and preferred banishment and transformation, nay, even loss of the privileges of "fairy," and to incur the defeats of mortality rather than wed the Princess Gossamer, daughter of King Bulbul. The story further relates how the Prince was banished and transformed,—what were the pranks he played on earth (these are rather trivial in the order of their invention),—how he got rid of some of that freakishness which Mrs. Hall, in common with all fairy-tale tellers, ascribes to the little people,—how he fell in love with an earthly damsel,—what took place upon the last event (the political consequences of which do not appear to have been calculated for by Queen Foam),—how he returned home, and what then took place. We have all this, with a "moral" of the good, sound

sort, which, of course, we shall not impart; neither relate the termination of the story in the fate of the little Prince. Let the reader learn it for himself, and, in so doing, appreciate at his best the manner of the writer, whose ornate fancy revels in "pretty" rather than in potent matters,—whose conception of "fairy" lacks vigour quite as much as it comes short in invention,—whose ideas savour of the operatic style, and whose book is by no means free from affectation. The considerate reader who knows not only the rarity of first-rate fairy tales, but the immense difficulty which besets their writers, will know how well our author has succeeded, notwithstanding the shortcomings we are, in no unkindly spirit, compelled to point out. As to the illustrations before us in this volume, they are thoroughly in keeping with the text. The immemorial hand of Mr. Kenny Meadows has contributed a larger number than that of any other artist. These suit the story wonderfully. Of sounder work and better Art are several well-executed landscapes from drawings by Messrs. E. M. Wimperis and W. S. Coleman. Mr. W. J. Allen is a very happy contributor of vignettes and tail-pieces.

'Bright Thoughts for the Little Ones' is a book for infants, the novelty of which consists—so far as we see, the notion is a new one—in the fact that little pieces of verse are made to alternate and proceed from little pieces of prose. Both classes of the text are pleasantly, perhaps a little too pleasantly, written; all the boys and girls behave themselves as they should, obediently, lovingly, and with a wonderful show of forbearance. The illustrations, which are by Mr. John Proctor, are good enough for a commonplace purpose, but not good enough to be of the better class; sounder workmanship, or at least more of refinement in execution, is desirable for them. Many are spirited. There is nothing to challenge in the book, unless, indeed, it be a recommendation to see 'General Tom Thumb.'

'Lightsome and the Little Golden Lady' is a capital child's fairy-story, with just the slight defect of a rather dull beginning. To create such beginning is, on the part of the author with Mr. Bennett's aim, a great mistake, and almost fatal to his hopes of obtaining a hearing from children whose standard is not above that of his book; once he gets the little ones by the ear, we have no doubt that they will be more than thankful to him. The event of the scorpion that attacked Skambel whenever he was envious, and did so with a clasp as of the tumbling down of ten sets of fire-irons and the looking up of fifty street-door locks, is very much to our minds. Grim Hoddiddo the hunter has a family resemblance with which we are not unfamiliar, as he supports the reputation of his awful race; he is not the worse for that; in fact, one rather likes to meet him here, for the sake of the old days when, breathless, we came upon the great beanstalk with our brave but surely temerarious friend Jack. There is some poverty of invention shown in the repetition of the method by which Lightsome cuts off the tails of the bulls; moreover, it is incredible that the same thing should happen more than once. The history of the scales that weighed everything into gold, which runs through the book, is very well told. The illustrations are rather heavily drawn, but not without spirit; they are the work of the author.

'Washed Ashore' is a tale of the coast and the sea, of an old captain who lives in an ancient fortress, his son, who, mixing with smugglers, comes to grief and suffers a sort of honourable transportation, of a life-boat adventure with a wreck, a storm, of two saved from its violence. One of these is a dashing midshipman, who tells a young lady—a very young lady—that Man Friday was not a black, whatever Defoe might have written. There is also a very good blind pedlar, a hard-hearted magistrate, and abundant adventures with smugglers, seamen, and such like materials for a boy's story. That it is a little over-laboured may be no deterring matter for juvenile readers, especially as a considerable amount of local colouring is applied to descriptions of southern islands and the manners of their inhabitants. The discovery of the long-lost son of the old sea-captain who lived in the ancient tower, and

the narrative of that son's adventures, make up a sort of Robinson Crusoe story that is well worthy the attention of the readers for whom the book is written.

'Three Hundred Æsop's Fables' purports to be a new literal translation from the Greek, the work of the Rev. George Fyler Townsend, who supplied "new applications, morals, &c." to an edition of Croxall's old version, which we not long since reviewed. Croxall's production is almost universally known in this country, and is one of the old-fashioned, ornate sort of translations from the classics, which obtained favour when the severe, simple manner of such originals was little appreciated among us. The new translation now before us is decidedly clearer, purer in style, and infinitely terser than its predecessor; it contains, also, a much greater number of fables than was comprised in the edition to which we have just referred, and more, we believe, than are to be found in common editions. As a literary production, the present is creditable to the editor and translator; it is, however, rather bald, and somewhat deficient in that terse word-painting which gives life to a literal translation. The illustrations, which are the work of Mr. Harrison Weir, are very unequal in quality; some are good, as 'The Fawn and his Mother,' 'The Crow and the Pitcher'; others are not at all commendable: see those which contain human figures. The worst of the book, as a whole, is that their author has not the slightest sense of the Æsopian humour; here, as in other respects, no one of modern times has approached the happiness of Thomas Bewick in his old age.

'The Princess Ilse' is a fairy-story, of which the producer of the book before us, be she translator or author, has no mean opinion. It begins with an account of the Deluge and drying-up of the earth, and gives a rather fantastical description of the process of the latter by the hands of angels, with "huge beams made of the wind, and enormous brushes composed of sunbeams." One of these angels, being rather tired with the "cleaning up," sits down on the top of a lofty mountain,—"alpine peak" our writer styles it,—and meditates on the terrestrial and moral prospect before him, much in the manner of a serious and "highly-respectable" young lady in a drawing-room. This angel is spoken of as male; his notions are those of neither one sex nor the other,—which is orthodox, no doubt, although the effect on the reader is rather depressing. In short, the story is not otherwise describable by us than as "namby-pamby"; worse than that is the fact that it is a namby-pamby allegory, and an example of a style which has our peculiar abhorrence. Tried by its own standard, there is, however, ample evidence of care, and even of delicacy, in writing on the author's part; she has carried out her intentions with exactness, neatness and precision. The illustrations to this work are by M. Froment, and are thoroughly in keeping with the text; that is, they are cleverly but too prettily drawn—have a good deal of daintiness, and not enough of strength.

Our collection of minor children's books comprises many that are brightly, and some that are gaudily coloured. *Merry Conceits and Whimsical Rhymes*, by Mr. C. H. Ross (Routledge & Sons), seems to aim at the same success in producing nonsensical fun that attended Mr. E. Lear's capital 'Book of Nonsense.' When we say that no sort of humour appears in this text, and that some of its illustrations are vulgar, we have done all that can be required at our hands.—*The Surprising Adventures of a Clumsy Boy Crusoe*, by the same author (Griffith & Farran), are less coarse than the above, but not more funny.—*Aunt Friendly's Coloured Picture-Books* (Warne & Co.) tell the old legends of 'The House that Jack Built,' 'Cinderella,' &c. in the tersest terms, and are capably illustrated in colours.—Mr. Nimmo publishes *John Gilpin*, illustrated very spiritedly by Mr. C. A. Doyle; also, a series of six "Juvenile Tales," each with eight coloured illustrations, of a capital sort in their way, except so far as relates to the colouring, which, with some exceptions, is hideously crude.

LIST OF NEW BOOKS.

Alice Thorne, 12mo. 3s. 6d. gilt.
Bernard Palissy, 18mo. 1s. 6d.

Braithwaite's Retrospect, Vol. 54, cr. 8vo. 6s. 6d.
Burke's Peerage, 1867, roy. 8vo. 38s. 6d.
Calm Hour (The), by L. M. M. cr. 8vo. 4s. 6d.
Goldsmith's Widow, and other Stories, 18mo. 1s. 6d.
Hannah's Home, 12mo. 1s. 6d.
Mackay's Clifford Castle, 12mo. 3s. 6d.
Moncrieff's Martyr Shepherd, 18mo. 1s. 6d.
North's Yes or No, 12mo. 3s. 6d.
Race for Gold, &c., 18mo. 1s. 6d.
Thomson's Sketches of Scripture Characters, cr. 8vo. 5s. 6d.
Why the Mill was stopped, 18mo. 1s. 6d.

FOR THE BLACK COUNTRY.

(From the German of Ferdinand Freilgrath. †)

Surrounding the fire,
We cheerily throng;
The yule log is blazing
The red coals among.
The chamber is decked
With the festal bough;
The fir sheds its fragrance,
The hollies glow.
The mistletoe beckons
From rafter and beam;
White-berried, it glistens
With roguish gleam.
In festive tankard
The ale foams high;
We pledge our dear ones,
And drain it dry.

And hand claps hand,
All care laid aside;
We all are as brothers,—
'Tis Christmas-tide.

Now pile up the fire,
More fuel on throw,
Let the dry logs crackle,
The coals deeply glow!

The coals! Oh horror!
A shadow, see!
Strides suddenly darkening
Our Christmas glee.

A giant shadow,
And black as the tomb,—
The news of the fire
In earth's dark womb.

The army of Labour
At work in the mine,—
That our hearths may burn brightly,
Our revelry shine,—

The army, toiling
In gloom and night,
In shaft and level
Has lost a fight.

Daily and hourly
Their fight is the same,
With the powers primeval
Of Steam and Flame.

At morn they descended
In health glowing red;
They have been vanquished;
They all lie dead!

Hundreds and hundreds
Dead, dead, dead!
Throughout the Black Land
Goes the cry of dread.

And the widow weeps,
And the orphans cry,
And the mother wails
For her only boy.

And the bride is gazing
In speechless woe
On him who once kissed her
'Neath the bright mistletoe.

Oh thou valorous band
Whose toil cheers our hearth,
How thy death glooms over
Our Christmas mirth!

For the Black Land, alas!
No yule shall be lit;
Its Christmas fire
Is the blazing pit.

Mourns city and hamlet
Throughout the land,
We mourn, the Germans
On Britain's strand.

Then, stirring the coals,
Let each open his hand
For the widows and orphans
In the Desolate Land!

K. F.

ANNE GILBERT.

THE last of "the Taylors of Ongar" has gone to her rest. On the 20th inst. died, at Nottingham, in her 85th year, the above-named lady, the widow of the late Rev. Joseph Gilbert, but who was better known in literature as Anne Taylor of Ongar. Anne Taylor was a member of an essentially literary family. She was the daughter of the Rev. Isaac Taylor, of Ongar, whose wife was the author of works that were popular in the last century. Her uncle, Charles Taylor, was the learned editor of *Calmet*. Her brother Isaac was the well known author of the 'Natural History of Enthusiasm,' and numerous other philosophical and religious works. Her second brother, Jeffrey, was the author of many anonymous productions, the chief perhaps of which was 'The Apostolic Age in Britain.' Her sister Jane shared with her the authorship of a very celebrated little work, older than the century in which it still lives, 'Original Poems for Infant Minds.' One peculiarity respecting this work is, that while poetry much more pretentious, but once popular, has perished, these original poems continue to be republished. From the period of their first appearance down to the present year they contributed a handsome annuity to the authors,—of late years to the survivor of the two. This work was among the first on which Anne Taylor was engaged, and her last labour was devoted, as the readers of the *Athenæum* will remember, to the emendation of a verse in the most popular poem of the whole collection, 'My Mother.' Anne Taylor married, in 1813, the Rev. Joseph Gilbert, author of 'The Christian Atonement, its Basis, Nature, and Bearings,' and member of a Lincolnshire family that contributed two officers to Captain Cook's expeditions, one of whom has left in manuscript his account of the voyage of the *Resolution* and *Discovery* (1776—1780) in search of a North-West passage. Although the Taylors of Ongar have now all passed away, the literary spirit of the family survives. Mrs. Gilbert's son Josiah is, with Mr. W. Churchill, the author of the work on the Dolomite Mountains, of which we had recently to speak with much commendation. Another son, Dr. Henry Gilbert, is known by his 'Elucidations of Agricultural Chemistry'; and her nephew, the Rev. Isaac Taylor, has taken literary rank by his 'Words and Places.' Few whole families have so completely belonged to literature as that of the aged lady of whose death we make record. The daytime of her life was one of varied and useful labour; with labour, rest, and recreation heartily enjoyed, and an exercise of abounding hospitality in as pious and gay a home as ever illustrated the bright cheerfulness of a religious and intellectual life. The evening of such a life was, most appropriately, the calm evening of a long day of sunshine and of shade, blending so quietly with the night that it was hardly possible to say when the one ended or the other began. In the loving memories of her family and friends Anne Taylor will not die.

LITERARY COPYRIGHT.

3, Serjeants' Inn, Dec. 24, 1906.

WILL you permit me to add a few words to the valuable correspondence now going on in your journal on the subject of registration of copyright? I had a good deal to do with the drawing and settling of the late Copyright Bill brought into the House of Commons by that able, honest, and industrious copyright reformer, Mr. Black, then M.P. for Edinburgh. By a clause in that Bill, the whole present system of registration was to be altered and to be transferred from Stationers' Hall to the Registry of Designs Office. That clause originated thus: Mr. Black submitted his Bill to the Law Amendment Society, and it was there fully discussed in a committee, which included Mr. Black himself, another M.P., Mr. Webster, Q.C., and many more persons conversant with patent and copyright legislation. All being strongly against the present system of registration, one of the committee suggested the change from Stationers' Hall to the Designs Registry Office. The notion was received with acclaim, and was at once inserted in the Bill: moreover, on further inquiry, it was

found that the matter could be very easily arranged, as the Designs Office was admirable for its systematic regularity, experience and knowledge, and, what was also important, it was not then over-burdened with work. Mr. Black's Bill went, in the House of Commons, as far as a committee, and was there deemed not complete in some respects, but, through its whole course, I never heard a dissentient remark with regard to the transfer of registration to the Designs Office. And why should not this be forthwith accomplished? It could be so, in the next session of Parliament, by a short special act relating solely to the amendment and transfer of the registration as now established. No greater boon could be granted to a literary public. At the Designs Office men would be found who, beyond acting merely officially, could give the parties registering directions and information which, in many cases, might save a world of litigation. And then there would be always the control which the public have over a government office, either through the superior authorities or the House of Commons. The Stationers' Company is an independent body, and should they not remedy any obstinacy or delay at their registration office, where can any redress be found? As to talking of a *mandamus*, what private individual would go to the expense, anxiety, and doubt of that legal course? Indeed, the threat of a *mandamus* is as likely to frighten the people at the present registration office, as the threat of a bill in equity for a specific performance would a cabman refusing to take a fare to the proper destination. In fine, however other copyright amendments may be discussed, there can be but one opinion, among all disinterested persons, as to the absolute necessity of the registry of copyright being a government office.

PETER BURKE, Serjeant-at-Law.

PERCY'S RELIQUES.

3, Old Square, Dec. 22, 1866.

A friend has called my attention to Mr. R. Martineau's letter, in your columns of to-day, about "the looseness and carelessness of Bishop Percy's literary character," because the Bishop, in "a book, published originally a hundred years ago," remarked, in the preface to the "ballad of 'The Jew's Daughter,' that the Adige, not the Po, runs through Milan." Now, your own experience as writer and reviewer of so many years will, I feel sure, bear out a remark I lately made, in a preface to an early English text, that "mistakes are natural to man, and especially to editors." We are always on the verge of awful blunders through our natural presumption and carelessness. We are saved sometimes by the veriest flukes, and sometimes go slap into the pit. How many souses have I had myself! How many have my predecessors and contemporaries had, too! What awful lists can a critic like the terrible Henry Bradshaw, of the Cambridge Library, produce against us all, and each of us against the others, and himself! I ask, then, is Mr. Russell Martineau safe in his saddle when he thus rides a tilt against the good Bishop who polished the 'Reliques,'—rightly earning for them the title of 'Percy's Reliques,'—or will the old Bishop smite him on the pate, and lay him flat upon the plain? Judge.

Mr. Martineau's charge against the Bishop is, that he, the Bishop, in a book, published originally a hundred years ago, stated that the *Adige*, not the *Po*, ran through Milan. Did he? That is the question. In his first edition, of 1765, the Bishop says only, "As for Mirryland Town, it is probably a corruption of Milan (called by the Dutch Meylandt) Toun; since the *Pa* is evidently the river *Po*." Not a word of the *Adige* "in the book published originally a hundred years ago." In the second edition of the 'Reliques,' in 1767, the passage is exactly the same, save that "town" and "toun" have changed places. Still nothing of the *Adige* in the book published less than a hundred years ago. What, then, becomes of Mr. Martineau's charge as respects the first two editions,—“Here is a book, published originally a hundred years ago, and I know not how often since, and containing a blunder which would disgrace a schoolboy”? Is the Bishop the only man guilty of “looseness and carelessness”? Who

looked at the fourth edition, edited by the Bishop's nephew, or a modern reprint of it, and did not ask himself, "Is the blunder of which I complain the Bishop's, or his editor's?" Who did not go to the old Catalogue and see what Percy said in his first edition, and then to the King's Catalogue to see what he said in his third? Well, in the third, (published in 1775, not above a hundred years ago) which the Bishop enlarged, and into which he added notes sent him by other persons, the passage of which Mr. Martineau complains does appear, unluckily for the Bishop's reputation; and, I suppose, all the reprints since have reproduced it, not having a description of Milan at hand to tell them that the city was on no river at all, but on two canals that connect it with two affluents of the *Po*, and thus with two of the Italian lakes (*Penny Cyclopædia*).

I am not concerned to defend the Bishop's geography; only to show that critics are not always without the faults they complain of in others. From the experience I have had of English education, I doubt whether any Englishman ought to be blamed much for a mistake in Geography, History, Natural Science, or any other subject which it is important to know, and which has therefore hitherto been excluded, with greater or less care, from the education of all of us. I would also suggest that there was some publisher in the background whose insufficient pay and "Oh, the public don't care for accuracy, and I want a book that'll sell," was at the bottom of the scamping of subsequent editions of the 'Reliques.' As women are at the bottom of all mischief, so publishers are at the bottom of most literary scamping and mischief. If two distinguished ones could be burnt, together with one editor, our future literature would be greatly advantaged.

Lastly, I call Mr. Martineau's attention to the fact that 'The Jew's Daughter' is not in Bishop Percy's folio MS., but was sent him, he says, in a MS. copy, from Scotland. I thank Mr. Martineau for calling our attention to the mistake of Percy, and shall be very glad to receive any corrections or suggestions of like kind. I hope Mr. Martineau will not think me ungrateful for answering him thus. Editors—of ballads especially—are, in the main, a cursed, meddling crew; can't keep their fingers off texts; but they are nothing like so bad as the Rolls Master and Editors, who alter the spelling of mediæval *autograph* manuscripts throughout, because it's not like that of their Eton Latin Grammars. Who will gibbet the chief culprit?

F. J. FURNIVALL.

"THE SHAME OF ART."

Paris, December, 1866.

THE quarrels of sculptor Clésinger and his employer and reproducer in bronze, the famous Barbédienne,—whose artistic bronzes are known in every part of the civilized world,—have just culminated in a trial. The details are both piquant and instructive. They are a flat contradiction to the estimate made of the worldly affairs of artists by the romancer and the dramatist. Let an artist once hit the public taste, and his way, not to competence, but to fortune, becomes a broad and easy road. If he be a sculptor, the Art-manufacturers in bronze take him up, and "vulgarize" his works, to his great profit. Indeed, so weighty may the sculptor's pecuniary interests in a bronze-manufacture become, that he shall be able to dictate to the manufacturer with a high hand, and bind him down under the severest conditions.

The transactions of M. Clésinger and Barbédienne afford so remarkable an insight into the actual Paris world of Art, that I am sure the readers of the *Athenæum* will thank me for setting them forth plainly and briefly. The sculptor Clésinger was the aggressor. He brought an action against M. Barbédienne, disputing in the first place the defendant's accounts; charging him with having "forged in letters bronze," and asserting that divers disadvantageous agreements had been imposed upon the plaintiff unfairly—unhandsome advantage having been taken of his necessitous predicament. The sculptor alleged that in selling certain of his works to M. Barbédienne he did not also sell the right of reproducing them by the well-known Colas

process of reduction—a process which was said by the plaintiff to be stigmatized as "the shame of Art." With these knotty questions in hand, the lawyers soon stirred a storm in the realms of Art. M. Léon Duval began it. He argued that Barbédienne owed a great part of his fortune to Clésinger. He read some of the defendant's letters written in happier moments of artistic triumph, encouraging the sculptor to new labours and new distinctions. Surely the following passage was delightful to the sight of the sculptor!—"If you should happen to conceive for me some draped subject that would succeed like the Sappho, or the Penelope, I could make *rentes* for you with your copyright for the reductions." The reductions in question were those made by the Colas process—"the shame of Art." Here is another puff of the liberal bronze-publisher's incense that must have been grateful to the nostrils of the sculptor!—"The little Sappho has the grand and sweet simplicity of the statuary of old. We will try to make money for you with this morsel, perfumed as it is with antique poetry." These were the honied words distilled for the sculptor in that bronze-worker's manufactory in 1856-7. Two years before, the sculptor had fallen on evil days, it would seem. In deep sorrow, over a domestic bereavement, he had brought forth a work of unequal merit—his statue of Francis the First. I remember very well its brief appearance in the quadrangle of the Louvre. It was condemned. The sculptor was deeply in debt, and sought relief from his creditors in a temporary exile. The artist naturally went to Rome. In those dark days of his career, Barbédienne advanced him large sums of money, and seems to have made him a regular monthly allowance of three thousand francs. "Aye," cries the sculptor, "but he profited by my unfortunate position at his feet, in order to make me sign ruinous agreements." The sculptor is now delivered from his creditors, and takes the earliest convenient opportunity of having his revenge. He calls Barbédienne *parvenu*, and accuses him of fraud. He pretends that the agreements by which he sold certain works to the bronze-worker were only sham bargains, made in order to protect his works from the clutches of his creditors. There is not much "grand and sweet simplicity" about this, at any rate. There is genius that can keep a solid foot on *terra firma*, and has a keen eye for a ledger as well as for the line of beauty. The evidence about the sale of a superb bull in marble is conflicting enough. But the balance is decidedly in M. Barbédienne's favour. His object throughout appeared to be to protect Clésinger's interests, as well as his own. We now light upon some interesting facts and figures. Clésinger was at work upon his *Cornelia*, for which M. Barbédienne was to pay fourteen hundred pounds; two busts—Paris and Helen—priced at 360*l.*; and another bust, for which a rich connoisseur was to pay a high price. And now the sculptor intimated that he would not part with his right of reproduction—of reproduction by the Colas process—"the shame of Art." M. Barbédienne replied that in this case he would give up the *Cornelia*, on which he had made already large advances, together with the busts; and he now stopped the monthly payment of 8,000 francs to the sculptor. The sculptor's lawyer exclaims, "Here is the tradesman's greed triumphant over the artist's necessity. Observe that the moment is come when the poor sculptor must sell his right for a dish of lentils!" The sculptor struck his flag to the bronze-manufacturer; and in his terror, according to M. Duval, offered to the greedy Barbédienne the right to reproduce any works he might create in the future.

And now we turn upon another phase of Art-life. M. Barbédienne had obtained the opportunity of submitting some of the sculptor's marbles to the Emperor, and his Majesty had bought two of them. "You must thank the Emperor," wrote the manufacturer to the sculptor. "If you like, just sign your name at the bottom of a sheet of paper." The sculptor was content to do this, and to leave M. Barbédienne to speak for him after his own fashion. Then M. Barbédienne writes to Clésinger: "I have given your letter to the Emperor, to M. Moquard. You have heartily thanked the Emperor. You have said that your French heart and your chisel will

always be inspired for the glory of our dear country, which the Emperor has made so great and so respected. Finally, on the subject of the recent *attentat*, you say that you thought you had stifled, in your group, the last monsters who threatened the Imperial family." M. Duval was too skilful an advocate not to make plentiful capital out of this; observing, that a man who would allow another to put words into his mouth in this reckless manner, would not be very particular about his stamped or other agreements. Afterwards, the great charge was gone into. M. Barbédienne was accused of having forged in bronze; because, in reducing Clésinger's statues by the Colas process, he had also reduced the signatures which were on them. I need not say that this charge fell at once to the ground. By way of peroration, the sculptor's lawyer fell savagely upon the Colas machine. It has been said—

Mad not the fountain that gave drink to thee.

But M. Clésinger does not respect this injunction. He says through his lawyer, in order to damage M. Barbédienne,—"This machine, which is the shame of Art, can reproduce the large masses of a statue very well, but cannot finish the extremities, or the flowing folds of drapery. Hence, in our days, there are sculptors of nails, of hair, &c. The machine is so unsteady, so untrustworthy, that two reproductions made by it, and intended to be exactly similar, are seen, at a glance, to be unlike. Imagine the Venus of Milo with something more or less than the proportions of the Greek marble, and say, is not this a profanation? It is an outrage on 'sovereign beauty.' The finishing touches of the sculptor must vivify and give a soul to the marble. The product of the machine is hardly more a work of Art than are common figures in gingerbread."

In his fiery denunciation of poor Colas's machine, M. Duval declared that there were sensitive connoisseurs who kept away from M. Barbédienne's side of the Boulevards, lest they should see some of its work in his windows. He was very severe on the sculpture of the Boulevards; and, truth to say, much of it is meretricious, and some of it indecent. But if there be an establishment on the Boulevards to which this condemnation does not fairly apply, it is surely that of Barbédienne.

M. Barbédienne's defence was simple. M. Sénard, who spoke it, presented what he called a "correspondence written kneeling," by M. Clésinger. In it the sculptor declared that he owed his bread, and his deliverance from misery, to M. Barbédienne. It must be admitted that the logic of facts turned up strongly in M. Barbédienne's favour. It was proved that between 1856 and 1866 the defendant had paid to the plaintiff close upon 14,000*l*. At the present time, the defendant has marbles by the plaintiff in his shop to the value of 6,800*l*. According to M. Sénard, there is no ready sale for this Art-property. The biting part of the manufacturer's reply followed. M. Barbédienne had reduced seventeen works by Clésinger, and one only had returned a profit, while five had about cleared their expenses; the rest had not covered half the cost of producing them. Of some not a copy had been sold. As far back as 1860, M. Barbédienne wrote to M. Clésinger: "The public is indifferent to your statues; and as for those which I have reduced, they are so much lost capital." The correspondence presented to the tribunal by M. Barbédienne's counsel showed that this gentleman had been in the habit of accepting bills for the plaintiff, and had even been security to the plaintiff's tailor. The correspondence proved throughout tender consideration for the exigencies of the artist. While M. Barbédienne was paying money out of his pocket, he was advising the plaintiff to work with courage, and regain "that esteem among men with which no one can dispense." M. Sénard's final stroke was decisive. He declared that the object of the trial was to bring M. Barbédienne's Art-manufactures into disrepute, in order to prop up a rival establishment about to be started, with the support of M. Clésinger! The Imperial Advocate, Aubepin, summed up against M. Clésinger with cutting severity. There was no ground whatever for the charge of fraud or sham bargains. The manufacturer openly bought Clésinger's marbles in order to reduce them by the Colas

machine. Clésinger had lived on the moneys paid by Barbédienne in anticipation of the profits to be realized by the process which the sculptor now stigmatized as "the shame of Art."

The trial ended in the complete triumph of M. Barbédienne, and the condemnation of the sculptor to the payment of all costs in the suit.

You may readily imagine the commotion these revelations, of which I have given you only a faint outline, have made in French *ateliers*. B. J.

GOSSIP FROM SOUTHERN ITALY.

Naples, Dec. 15, 1866.

WHATEVER may be done by other parts of Italy, Naples will not contribute largely to the Paris Exhibition, as far as we can judge from present appearances. Paintings are, I believe, an exception, for more have been offered than can by any possibility be accepted; and indeed no selection can be made until it is known how much space will be allotted to Naples. Of manufactures, however, and all such objects as have required some outlay of money, very little has been offered or promised; and the prospect is so bad, that Signor de Vincenzis, who is at the head of the Italian Department, has recently sent round a circular, in which he tries to stir up the energies by appealing to the patriotism of the Southerners. I have heard various reasons assigned for this indifference; and one undoubtedly is, that most of those who would be contributors are very small capitalists, who cannot afford the delay in disposing of their articles, or the risk of not selling them at all. Of course the great injury inflicted on trade by two successive visitations of cholera and the war has made their position all the worse, so that whatever they have expended on their various works must be realized as soon as possible. Another reason assigned for the backwardness of our Neapolitan contributors is, that at the London and Dublin Exhibitions many of their works were either lost or seriously damaged. Those with whom I have spoken, however, impute the blame not to the English *employés* so much as to those who were charged by the Italian Government to look after the interests of their countrymen; and as two millions of *lire*, it is asserted, were spent by their Government for the London Exhibition, the impression is that greater care and attention might have been shown by the Italian Commissioners. So far all is very vague; but the following statements have been made to me as facts. Pasquale Ricca, a sculptor of much merit, sent a statue of San Girolamo,—whether to London or Dublin I am uncertain,—which was returned to him bearing evident signs of having been copied. The head had been cut off, and on all the finer parts of the figure there were positive traces of injuries inflicted by the moulder. Unwilling to trust to his own convictions, he called in one of the most eminent sculptors of our city and some of the best experts to examine his statue, and they confirmed his opinion. An offer had been made, by Messrs. Lloyd & Co., of London, to purchase the work, which was regarded as a *capo lavoro*, for 500 dollars; but it was not received or completed in consequence of what had happened. Application was then made to the Italian Commission for redress and compensation; but, so far from being listened to, a brusque answer was returned, denying the statements. Since then Ricca has presented his San Girolamo to the school of design in the monastery of San Giovannela, where I saw it a few days since; and, viewing it even with an unartistic eye, its appearance seemed to justify the complaint of the artist. A beautiful *bozzetto*, of 'Amore and Follia,' in terra-cotta, by the same artist, was lost, as were several other figures; and though he states that they were inserted in the Dublin Catalogue, on his demanding compensation it was maintained that they had never been received. Amongst other works of Art reported lost was a 'Giuditta holding the Head of Holofernes in her Hand.' It was wrought in copper, and was a copy of the celebrated work by Benvenuto Cellini. Last of all, it is asserted that the exquisite models in cork of the Temples of Paestum, the house of the Faun at Pompeii, and three other statuettes, were returned after the

London Exhibition completely crushed. Misfortunes such as these entail considerable loss on our poor artists, who do not receive much encouragement in this laughter-loving city; and as the sad tale has been circulated extensively, their brethren of the craft are unwilling to run similar risks. One of the most obvious proofs of the paucity of contributors from the South is, that whereas a list of contributions was to have been sent in on the 20th of November, an extension of time was demanded and accorded till the 10th of December.

In addition to my other artistic gossip, I may say, that signs of the completion of the column in the Largo della Pace are becoming apparent. It was originally designed, I believe, by the "adoring" sycophants of Ferdinand the Second, and was meant to commemorate the desolation—then called peace—which followed the events of 1848. A Madonna was, of course, to have been placed on the summit of the column. It is now to be devoted to far different objects—to the commemoration of the triumphs of freedmen. A figure of Victory is to surmount it, and at the base will be placed four colossal lions, which have been executed by four Neapolitan sculptors. That of Busalano represents the revolution of 1799, that of Lista represents the revolution of 1820, Ricca commemorates the revolution of 1848, and Solari that of 1860. The two latter, which I saw in the studios of the respective artists the other day, are to be placed at the end of this month, and do infinite credit to Neapolitan Art. Ricca's lion has been wounded, and the blood is oozing out; though lying in weakness, it has by no means lost its spirit: one paw is on the violated Constitution, and the royal beast is dangerously savage. Solari's lion is standing erect, as having come triumphant out of the struggle. Broken chains are around it, and a broken column ingeniously supports the figure, whilst one foot advanced indicates Progress. While noting these highly creditable works, it is to be regretted that a statue lately erected in the Villa to Colletta, the great Neapolitan general and historian, cannot be spoken of in similar terms of praise. Almost in the words of Dante, we may say, "Pass, and be silent!" for it is a wretched production; yet Gennaro Cali succeeded admirably in his statue of Carlo the Third, which was one of four statues of the Bourbons erected in Palermo "a long time ago." A rising young artist here is Signor Capocci, the son of the late Astronomer Royal. His beautiful model of a monument to the Heroes of Palestro is now being exhibited in the municipal palace. It represents a gigantic column, supported on a double basement, at each corner of which is a mortar turned over. This is all; but the simplicity and grandeur of the design are very striking. The Commission offered 20,000 *lire* for the work; but it appears that the artist cannot complete it under 26,000 *lire*, and hence some difficulty.

Let me conclude this fragmentary letter with the important intelligence of the discovery of a picture by Andrea del Sarto. On the museum being confided to the direction of the Senator Fiorelli, what may be properly called a work of excavation began; for precious objects of Art lay buried in all directions, whether from that indifference to Art which marked the age of the Bourbons, or from the ignorance which failed to discover their merit. Amongst other neglected relics was a portrait, sometimes described as of a cardinal, or some other imaginary person; but as being a painting by Andrea del Sarto, and showing that exquisiteness of finish which distinguished the great artist, Signor Salazarro resolved on unravelling the mystery of the subject. The dress was evidently that of a Pope and not of a Cardinal; and if of a Pope, probably of one contemporary with the artist—either of Leo the Tenth, or Adrian the Sixth, or Clement the Seventh. In short, by examining the celebrated portrait of Leo the Tenth, in which the likeness of Giulio de' Medici is also given, the resemblance of the so-called Cardinal to Giulio is evidently most striking; and so this neglected and uncertain work of Andrea del Sarto now appears on the walls of the museum as the portrait of Clement the Seventh (Giulio de' Medici). H.W.

OUR WEEKLY GOSSIP.

FIVE hitherto unpublished letters from Lord Chesterfield's pen have just come into our hands; and as they are so far characteristic of the writer and his times that readers will like to glance at them, we shall take an early opportunity to place them in our columns.

The President and Committee of the Quekett Microscopical Club have issued cards for an evening reception at University College on Friday, the 4th of January, 1867.

We are sorry to announce the death, in childhood, of Mrs. Holman Hunt. She died at Florence, where Mr. Hunt had taken a studio.

Among Messrs. Hurst & Blackett's announcements for the new year are the following works: 'New America,' by W. Hepworth Dixon, 2 vols., with illustrations from photographs; 'Two Marriages,' by the author of 'John Halifax'; 'A Trip to the Tropics,' by the Marquis of Lorne; 'A Lady's Ramble in Bohemia in 1866,' by Miss Eden; 'Life in a French Château,' by Hubert E. H. Jerminham, Esq.; 'Sybil's Second Love,' by Julia Kavanagh; 'Nooks and Corners of Old France,' by the Rev. G. M. Musgrave; 'Our Peculiarities,' by Mary Viscountess Combermere; and 'Wild Life among the Pacific Islanders,' by E. H. Lamont, Esq.

To the rich list of year-books already announced, we have to add the following:—Messrs. Dietrichsen & Hannay's 'Royal Almanack';—Mr. Unwin's 'Patent Indicator for 1867';—'The Handy Calculator of Profit, Discount, and Commission' (Wesley);—Messrs. James Blackwood & Co.'s 'Diary No. 4, 1867';—and the same publishers' 'Shilling Scribbling Diary, 1867.'

Mr. Joseph Robertson, journalist and antiquary, died at Edinburgh on the 13th of December. He was a son of a clan ridiculed by Macaulay for losing much land and many lives for the Stuarts, and for having a chieftain who wrote bad verses. Joseph Robertson was the only son of an Aberdeen merchant. He was educated in Dr. Bisset's school at Udnay, in which a boy since heard of as Sir James Outram had been a pupil, and where such Latinists as the Melvin brothers were teachers. Mr. Joseph Robertson passed through the regular curriculum of Marischal College, and the usual term of years in an advocate's office. But the practice of the legal profession was not to his taste, for he had a passion for the study of Scottish history and antiquities. A Scottish Episcopalian and a Tory, from a love of old times and things, he became a political writer; and successively editor of the *Aberdeen Constitutional*, the *Glasgow Constitutional* and the *Edinburgh Evening Courant*. Never having studied constitutional law, or political or economical science, he was seldom a cogent, but often a pungent, antagonist. There is, however, a general testimony printed in the columns of the Liberal Scotch journals published since his death—that he was incapable of anything unkind, unfair or untruthful in his controversies and contentings for his opinions; indeed, his political foes were often his personal friends. Of the many learned papers which he contributed to periodical literature during the last five-and-thirty years, the most noted are an essay on Scottish Ecclesiastical, and another on Scottish Secular, Architecture, the former published in the *Quarterly Review* and the latter in the *Archæological Journal*. He edited many volumes for the Spalding, Maitland and Bannatyne Clubs, the best known of which are the 'Inventory of the Jewels of Queen Mary' and the 'Diary of General Patrick Gordon.' In 1853 the Earl of Aberdeen appointed him to the Curatorship of the Historical Department of the Register House. In cordial co-operation with Sir William Gibson Craig, he was engaged in preparing several volumes of Historical Records when he died, at the age of fifty-six. The editing of the 'Book of Deir' is to be continued by Dr. Stuart. If the life of Joseph Robertson had been extended to the allotted threescore and ten years, his services to Scottish history and antiquities would have had a far more complete character; but even unfinished, it may be said of them that no one has ever

done so much for the illustration of the north-east coast of Scotland. Two years ago the University of Edinburgh conferred upon him the degree of LL.D.

A return of the number of deaths from explosions of fire-damp in our mines has been recently published by Government, and possesses at this time, in consequence of the recent fearful casualties of this nation, more than ordinary interest. The explosions from fire-damp in Great Britain during the ten years 1856-65 were 2,019. Of these 412 occurred in South Wales, 340 in Yorkshire, 238 in North and East Lancashire, and 126 in South Staffordshire and Worcestershire. The deaths from falls of coal and earth from the roofs of the mines during the same period amounted to 3,953; and the mortality from accidents in shafts, to 1,710; and from other miscellaneous causes, to 2,234, making the total number of deaths from violent causes during the ten years 9,916. Of these, 20 per cent. were from fire-damp explosions, 40 per cent. from falls of the roof, 17 per cent. from shaft accidents, and 23 from miscellaneous causes. In the last two years 1864-65 the returns show a reduction of 991 deaths in proportion to the increased quantity of coal raised in Great Britain.

A Report of the Manchester Free Libraries states that these institutions now contain 116,170 volumes, of which 38,426 are books of reference, and that the average number of volumes daily lent is 1,063.

Sir Robert Kane, Director of the Museum of Irish Industry, stated, on the 21st inst., in reference to his charge, that there had been a considerable increase in the number of students in the last as compared with the preceding session, and that the examinations of these gentlemen showed highly-satisfactory results.

There is in Dublin a Queen's Institute for the Training and Employment of Educated Women, supported, for the most part, by voluntary contributions. As appears from the Report read at the Annual Meeting, held last week, the results achieved by the Institute during the past year show a total of 175 ladies trained in various employments, viz., telegraphy, lithography, photograph painting in oil and water colours, ornamental writing, designing for manufactures, book-keeping, scribbling, and sewing-machine work. The entire number trained since the society has been in existence is 782, of whom 438 are permanently employed, and able to maintain themselves. When compared with the bitter struggles of a life of genteel poverty in haughty idleness, this result must be regarded as encouraging; and the 438 ladies would, doubtless, be ready to testify that the sum of human happiness is materially increased.

Among the results of the decrease in the number of the population in France, about which statisticians have been talking for the past few years, one of the most noticeable is a growing deficiency of hands available for tillage. In some districts the deficiency is serious; so much so, that the Agricultural Society of Compiègne is about to offer 100,000 francs as a prize for the best machines applicable to the cultivation of land. It will be interesting to observe the manner in which this offer will be responded to. One difficulty in the way is the system of farming that prevails in France—a large number of very small holdings, which is commonly regarded as fatal to the application of mechanical cultivation on a profitable scale. It may be, however, that the ingenuity of our neighbours, combined with knowledge of local circumstances, will enable them to overcome the difficulty, and produce machines which small farmers may use with advantage. The question is one which may well engage the attention of the social and political economist; while to the moral philosopher it will, perhaps, suggest a more impressive significance than heretofore in the precept, "Be fruitful and multiply."

Dr. Ori, a native of Tuscany, well known in Italy for his scientific acquirements, especially in relation to natural history, has lately returned to Cairo from a very adventurous expedition into the interior of Africa. Availing himself of his offi-

cial position as Physician-in-Chief of the Soudan country, conferred on him by the Viceroy of Egypt, and under the especial patronage of Victor Emmanuel, who defrayed the expenses of the expedition, Dr. Ori, accompanied by his wife, an Italian lady of great endurance and courage, made a journey which has occupied nearly seven years. His principal researches have been carried on in the little-known territories of Darazaleh and Darfur, the latter bordering on the Egyptian Pashalik, and in the country adjoining the Blue and White Nile. Dr. Ori's explorations, which have extended over five thousand miles, have led him into districts never before visited by a European, in which he has collected a vast number of scientific treasures, including many specimens of rare animals and plants. Dr. Ori is now engaged in preparing his journals for publication, which, we have reason to believe, contain matter which will add largely to our knowledge of Central Africa. When his literary undertaking is completed, we understand that it is Dr. Ori's intention to renew his researches in Africa, his experience derived from his late exploration rendering him very sanguine of success. We may add that Dr. Ori's medical knowledge, acquired during a long course of study at the University of Pisa, and his acquaintance with various African dialects, were of great advantage to him in his intercourse with the natives, whom he appears to have had the good fortune to have conciliated in a very remarkable manner.

Prof. Zollner, of Leipzig, who has been working at some of the most important questions which have of late occupied the attention of astronomers, finds from his photometric investigations that the star α Centauri seems to be equal to our sun. If the sun were at such a distance that 3½ years would be required for its light to travel to the earth, it would then appear similar to Capella, and have a parallax of 0.874 seconds. Consequently, if light undergoes no absorption in its passage through space, the light of Capella must be much more abundant and intense than that of the sun. Data are given for a comparison of intensities, and of the reflexion from different terrestrial and artificial surfaces; and the Professor throws out certain theoretical views which will, perhaps, be put to the test by those who have watched the recent progress of cosmical science. Every star-sun, to use his own term, has a history divisible into five periods: the glowing gaseous, the glowing liquid, the slag, the eruption, and the complete refrigeration period. Then applying this theory to actual phenomena, he finds the first period represented by planetary nebulae; the second, by the invariable stars; the third, by our sun; the fourth, by new stars; and the fifth, by Bessel's dark stars. All the periods may be traced in the cosmical history of the earth. The non-planetary nebulae occupy a place between the first and second periods. The third, or slag period, is that in which a cool non-luminous surface was developed; and in the fourth, or eruption period, the surface was vehemently disturbed and broken up by frequent outbursts of heated matter from the interior.

The Russian Publishers' Circular, the *Knizhniy Vjestnik*, or *Book Intelligencer*, has, in one of its numbers for 1866, a curious table of the number of volumes published at different places in Russia in the years 1863 and 1864. The grand total is 1,852 volumes in 1863, and 1,836 volumes in the following year. The number of places of publication was forty-one in the first year, beginning with St. Petersburg, and ending with Kiakhta, the trading town on the Chinese frontier; and forty-six in the second; and in that year we regret to say Kiakhta, which only published one volume in 1863, appears to have emitted nothing. St. Petersburg is the great literary centre, furnishing 951 and 1,097 volumes in the successive years; Moscow follows, with 459 in the first year, and 432—a decrease—in the second; Odessa, Kiev, Kharkov, Tiflis, &c. follow at very respectful distances; and the remaining towns—Irkutsk, Astrakhan, Archangel, &c.—figure in general for two or three works respectively; but, as the table is founded on the lists published in the *Knizhniy Vjestnik* itself, it may probably be the case that its own omis-

in recording their appearance may be the origin of the apparent paucity of provincial publications. St. Petersburg is, as we learn from another article, the place of publication of no less than 143 periodicals; Moscow, of 81; while the rest of the Empire furnishes 158, many of which are, however, vehicles of local intelligence described by the *Knizhnyy Vestnik* as mere waste paper. The St. Petersburg periodicals are of a very different character, many of them surpassing any English periodical in extent and furnishing more matter in a monthly number than any English review in its quarterly issue. It is in these gigantic periodicals that nearly everything of importance in Russian literature makes its first appearance, and a translated selection from their principal articles would form the best means of introducing the mind of modern Russia to the English public. To pay it every attention would be only to return the compliment it pays to us. We observe that in the essays of the Russian critic Druzhenin, which are now being reprinted in a collected form, like those of Jeffrey and Macaulay, the fifth volume contains articles on Currer Bell's 'Villette,' on Thackeray's 'Newcomes,' on Wilkie Collins's 'No Name,' on Lawrence's 'Barren Honour,' on Trollope's 'Orley Farm,' on George Eliot's 'Romola,' on Dr. Russell, the *Times* Correspondent, and a host of other subjects of English interest. It would surely be of some interest to know what "the lion thinks of us."

INSTITUTE OF PAINTERS IN WATER COLOURS.—EXHIBITION OF SKETCHES AND STUDIES.—OPEN from Ten to Six, at their Gallery, 53, Pall Mall opposite Marlborough House.—Admission, 1s.; Catalogue, 6d. Gaslight at dusk. JAMES FAHEY, Secretary.

WINTER EXHIBITION.—THE FOURTEENTH ANNUAL WINTER EXHIBITION OF PICTURES, the Contributions of British Artists, is NOW OPEN, at the French Gallery, 120, Pall Mall.—Admission, 1s.; Catalogue, 6d.

LEON LEFÈVRE, Secretary.

SOCIETY OF PAINTERS IN WATER COLOURS.—THE WINTER EXHIBITION OF SKETCHES AND STUDIES by the MEMBERS is NOW OPEN, 5, Pall Mall East.—Admission, 1s. Ten till Five. Lighted by gas on dark days.

WILLIAM CALLOW, Secretary.

THE SECOND ANNUAL EXHIBITION OF WATER-COLOUR DRAWINGS is NOW OPEN to the Public, at T. McLean's New Gallery, 7, Haymarket, next the Theatre.—Admission, 1s. R. CLOTHIER, Hon. Sec.

MR. MORBY'S COLLECTION OF MODERN HIGH-CLASS PICTURES is ON VIEW at the Royal Exchange Fine Arts Gallery, 34, Cornhill. This Collection contains examples of Leslie, R.A.—D. Roberts, R.A.—E. M. Ward, R.A.—Holman Hunt—J. Phillip, R.A.—T. Faed, R.A.—Egg, R.A.—Frith, R.A.—Ross Bonheur—Henriette Browne—Goodall, R.A.—Cooke, R.A.—Creswick, R.A.—Pickersgill, R.A.—Caldron, R.A.—Sant, A.R.A.—Le Jeune, A.R.A.—Andell, A.R.A.—Frost, A.R.A.—Pettie, A.R.A.—Yeames, A.R.A.—P. Nasmyth—Innell, sen.—Dobson, A.R.A.—Cooper, A.R.A.—Gale—Marks—F. Hardy—John Faed—Frère—Ruiperes—Lidderdale—George Smith—Duvrger—Peter Graham, &c.—Admission on presentation of address card.

STODARE'S (Madame) THEATRE OF MYSTERY, Egyptian Hall, Piccadilly.—"WHERE IS SHE?" a new illusion, will shortly be produced.

STODARE (Madame), Widow of the late Colonel Stodare.—Great success of "WHO'S HE?" and Madame Stodare's Christmas distribution of Presents—Magic, by Mr. Firbank Burman (Pupil of Colonel Stodare—Sphinx, Marvel of Mecca, and Basket-Trick as usual, every Evening at Eight, Wednesday and Saturday Mornings at Three.—Admission, 1s. and 2s.; Stalls, 6s.; School and Children half-price. Seats secured at the Box-office from 11 till 6; and at Mitchell's, 33, Old Bond Street.

MR. JAMES WEAVER, Manager.

SCIENCE

A Dictionary of British Birds. Reprinted from Montagu's Ornithological Dictionary, and incorporating the Additional Species described by Selby; Yarrell, in all three editions; and in Natural History Journals. Compiled and edited by Edward Newman. (Van Voorst.)

THIS satisfactory fulfilment of the indications given in the title-page may be considered as a useful contribution to our knowledge of the ornithology of the British Islands. The original work by Colonel Montagu long and deservedly occupied the first place in this department of our native zoology; and although the more recent works of Selby, Yarrell, Gould, Jenyns, and others, have rendered the former editions of this work somewhat obsolete, there was so much original matter of the most useful kind, and so felicitously and clearly expressed, that in fact, of

a devoted love of Nature, that no subsequent works, however complete, have deposed it from a prominent place in the library of the ornithologist. Its appearance under its present form, kept as it is *au niveau* with the most recent discoveries, will, we are confident, be welcomed with satisfaction by all who desire to study pleasantly and efficiently the birds of our own country. Every one will acknowledge that the task of editing such a book could not have fallen into better hands than those of the gentleman under whose management the *Zoologist* has added so much to our knowledge in every department of our national zoology, and more especially in that which is now under our notice. In a modest preface, Mr. Newman states the share which he has taken in the present edition. He says: "To Colonel Montagu's admirable Introduction I have not a sentence to add, as regards the history of British birds; nevertheless, it seems desirable to give some account, however brief, of my editorial stewardship. In the first place, I desire explicitly to state that I have taken nothing from the text of the original work; and in the second place, I have added scarcely anything of my own: in no instance have I overlaid the original with my own observations, altered the author's obvious meaning to suit my own views, or attempted to controvert his assertions because at variance with my own more limited experience; nevertheless, important additions have been made," &c. As regards the number of species,—no fewer than one hundred and six having been added since the time of Montagu,—the contributions, with few exceptions, have been derived from Selby, Yarrell, and the pages of the *Zoologist*. Immediately following the English name of each bird is a reference to a figure in the third edition of Yarrell's 'History.' Then follows a reference to the figure of the egg in Hewitson's 'Oology.' Descriptions of new or rare species are given from the *Zoologist*, and other sources; but "all these additions are distinguished from Colonel Montagu's text by editorial brackets, and in every instance the source whence they are derived is carefully indicated." We cordially indorse the following remarks of Mr. Newman, with regard to the absurd custom of including in a British Fauna those species which have arrived by mere accident within the limits of our shores: "Like my great predecessor, I have collected and arranged these records; and, like him, I express the opinion that, in a purely scientific point of view, they are utterly worthless. The time seems to have arrived when the conscientious compiler must eliminate all these interlopers." That the occasional visits of birds not indigenous to our islands may, from circumstances, throw light upon their geographical distribution, or upon the direction of storms, or other phenomena connected with the native country or the migration of birds, is indeed possible; but there can be no doubt that the insertion in the British list of every species which has accidentally strayed hither is, to say the least, a glaring absurdity.

One interesting point in the composition of Colonel Montagu's work is, that by far the greater portion of the biography of his subjects is the result of his own observations. He has, it is true, availed himself fully of those of others, but he has not blindly admitted them, especially on disputed points, without testing them by his own experiment or experience. This originality constitutes, in a great degree, the charm and value of his book. Amongst numerous instances, we would particularize his remarks on the Cuckoo in the Introduction, as a fair illustration of this united care and acumen. We may refer also to the satisfactory treatment of the question,

whether the song of birds is innate, or learnt from the male parent, as asserted by Daines Barrington. In fact, the whole of the Introduction constitutes a most interesting proof of those essential qualities of a true naturalist, to which we have alluded as exemplified in our author.

One hint to Mr. Newman for his next edition. It appears to us that he does not sufficiently notice those changes which are frequently occurring in the local distribution of many species of birds. Some which were common in a particular locality at one period are perhaps at another very rare or scarcely found there. The disappearance, or possible extinction, of the Great Auk is not even alluded to. The remarkable frequency of the appearance and the extensive distribution of the Little Auk about five years since, and many other similar facts, with which the pages of his own periodical would furnish him, should have been not only mentioned but dwelt upon, with reference to their causes. These, however, are but slight shortcomings in a work which will, very deservedly, constitute an essential occupant of every zoological library.

SOCIETIES.

ROYAL.—Dec. 20.—Dr. W. A. Miller, Treas. and V.P., in the chair.—The following papers were read: 'Preliminary Notice of Results of Pendulum Experiments made in India,' by Lieut.-Col. Walker, —'On the Formation of "Cells" in Animal Bodies,' by Dr. E. Montgomery.

PHILOLOGICAL.—Dec. 21.—D. P. Fry, Esq., in the chair.—Messrs. J. Peile and J. Beames were elected Members.—*Goidilica* (notes on Gaelic manuscripts), by Mr. W. Stokes, was presented by the author.—The papers read were, 'On the Aspiration of Letters in Keltic, and some other Languages,' by Mr. MacGowan Crume, —'On the Phonetic Relations of Gaelic to the Slavonic Languages,' by Mr. J. D. Campbell.

SOCIETY OF ARTS.—Dec. 19.—Sir J. Ferguson, Bart., M.P., in the chair.—The paper read was, 'On the Study of Indian Architecture,' by Mr. J. Ferguson.

MEETINGS FOR THE ENSUING WEEK.

Tues. Royal Institution, 8.—'Chemistry of Gases' (adapted to a Juvenile Auditory), Prof. Frankland.

Thurs. and Sat.—Prof. Frankland's Lecture continued.

FINE ARTS

ILLUSTRATED BOOKS.

THE following are late arrivals of this glittering class; they have merits as different as their sizes and prices. By far the most important among them is a handsome volume that is published by Messrs. Day & Son (Limited), containing a series of large and generally well executed chromo-lithographs, by Mr. J. H. Lowes, from drawings by Mr. Elijah Walton, and is styled *Peaks and Valleys of the Alps*, with a text by the Rev. T. G. Bonney. These are very beautiful copies of the attractive and highly effective pictures of this well-known artist. In some the colour is a little too positive, which is the more to be regretted because the originals were by no means wealthy in atmospheric gradations. Among those before us may be noted for special praise, 'The Opening of the Val de Tignes,' a fine picture, where the higher parts of the hill-sides rise, through tender mists, and are ringed about by clouds of aerial tissue before the spectator, who is supposed to look down from an intermediate spot, upon the winding river: the water-smoothed space traverses, having been the bed of an ancient lake, is now marked by trees and hedges to the very border of the water and feet of the mountains. Further off, the denser mists render the

rosy sunlight cooler on the peaks, but in the remotest distance they are flushed with crimson: now this tint is, with too little allowance for atmospheric differences, repeated on a near point of land in the immediate foreground of the picture. Another fine thing in its way is that which shows the icy peaks of Monte Viso, and an intensely blue sky, as seen from the Col de La Croix. A snow piece, 'Winter,' which has a capital mid-distance and further landscape, is, in its foreground, a little in need of solidity of painting. As we are criticizing these works as pictures proper, the standard we apply to them is a high one; otherwise such objections as these would be hypercritical and unfair. 'The Grand Paradis from near Cogni' shows a wilderness of snowy mountain-sides looking over a rich narrow valley and its stream. Here again the pines in front are of too crude a green, and lack solidity, but the remoter parts are excellent. In this respect the Grivola, from near the Col d'Arcoli surpasses the last,—a fractured solitary peak, to which vast terraces of ice, like a giant's staircase, lead upwards. A little tints is 'Near Courmayeur, Cloud Streamers,' the middle of the picture seen through vapours, is admirable. One of the better pictures, if not the best, is 'Mont Velen, from near Aosta,' a snow-capped cupola over rocky buttresses of enormous height, a barren rock in front. Very tender in colour is the vision-like and apparently insurmountable peak. 'In the Valley of Aosta' is a capital piece of reproduction, although the foreground is thin and rather crude. Almost superior to this is the picture which shows twin peaks,— 'Mont Blanc as seen from the Col d'Anterre,' where they seem to raise themselves, stand forth in the shadowy valley of mists, and are faintly touched with yellow light on their summits; something as splendid as a fountain of iridescent tints is in the air,—a gorgeous mystery of scarlet, pale crimson and yellow, through which one sees the snow-whited mountain beyond. Red rosy is the 'Dent du Midi from the Valley of the Rhone,' dazzling white the Matterhorn's great pyramid. In this text the Rev. Mr. Bonney shows himself to be perfectly competent to treat his subject, to be enthusiastic without affectation, clear and well-informed.

There is a world of difference between the last and Messrs. Lovell Reeve's publication of *Live Coals; or, Faces from the Fire*, by L. M. Bugden (Acheta). The whimsical title of this book professes to express the character and position of the author by the side of the domestic hearth. She is the "Cricket on the Hearth" of her own imagination, and elsewhere represented as the author of these "highly imaginative and humorous sketches, suggested by burning coal and wood." We do not find the text to be very humorous, in the ordinary sense of that term, which supposes something of keen observation and crafty thought allied to wit; on the contrary, while there is an abundance of whim, which the writer probably mistakes for humour, and a rich vein of individual fancy, there is very little of the rarer quality. Here are, too, frequent plays upon words,—the antitheses of humour, and mere turns of expression,—the marsh lights of wit; these betray the reader and the writer into great confusion of ideas; nevertheless, as Miss Bugden uses her pen deftly, she delivers both at last, and they emerge from the maze, and haply in sight of a meaning which was unsuspected by one party at least, if not by both. The first essay, 'On the Imagery of Accident,' includes a definition of "accident," according to the writer's ideas, and is an example of what we have noted here. Miss Bugden's ingenuity verges on the fantastic and the trivial. We fear few will accept in its

entirety the deduction that is drawn from an "example" of Miss Bugden's to show her notion of what may be the service of "accident" in nature by that resemblance to a vast church which is presented by the Cathedral Mount in the Andes: "The latter may be designed to put a stamp of verity on some of the noblest of our works as devoted to the noblest of our purposes. To show that in the erection of her sacred buildings, the hand of Art has hit upon the true. * * She has produced without knowing it resemblances of a type-temple reared by Nature to her God." As for the illustration which accompanies this, and is to this effect, as we read it, that in Nature are many types of Art, the fact is undeniable; but the resemblance between them we have always believed due to the fact that man, in dealing with materials like those used by Nature, obeyed natural laws, and produced works with some likeness to those of his great mistress; hence the buttresses of sea-worn granite rocks may be said to pre-figure those of Gothic cathedrals; their splintery pinnacles those of mediæval churches. Man may be said to place his works as Nature leaves their alleged prototypes, to defy for a time her own destructive agencies. Neither of these, we suppose, can be called results of accident, in the common sense of that word. This book, notwithstanding all the defects which we observe, contains many weird and quaint fancies in the delineation of faces from the fire and objects as presented between the bars: see 'Fragment of the Feline,' and, better, 'The Boy and Mask'; others are very poor indeed. 'Fire a Sculptor' is the most ingenious of these essays by an author who deals rather with appearances than things, and has wealthy dreams.

Snow-Bound; a Winter Idyl, by John Greenleaf Whittier (Bennett), has photographs of snow-scenes to suit its text; a beautiful subject that is prettily illustrated; a theme of farm-life, with descriptions which are, for the greater part, of landscapes; a genial, tender piece of fancy.—*The Golden Ripple; or, Leaflets of Life: an Allegorical Poem*, by Robert St. John Corbet (Bennett), is, like the last, photographically illustrated,—a pleasant, allegorical poem, written with much swing of versifying and completeness of structure and invention. The pictures are capital.—*Fairy Tales and Sketches*, by E. S. A., and other good authorities (Low & Co.), is a collection of fanciful, but rather slight, specimens of "amateurish" Art.—*Our Artist in Peru*, illustrated by G. W. Carleton (New York, Carleton), contains a series of very slight sketches of South American character and incidents of travel, some of which are extremely comical; others inconceivably trivial. For the former, see 'A Street Scene in Panama'; for the latter, a considerable portion of the contents of this little book. Some of the heads, as 'Hairdressing in Lima,' are good. On the whole, this work surpasses in merit most of its fellows of English production.—We may as well note here the receipt of a series of *Illuminated Texts* (Routledge & Sons), some of which bear in their centres photographs of popular works of Art. The drawings are satisfactory, although their colouring tends slightly to blackness. We have from the same sources Outlines to be filled up in colour; these are as good as such things generally are.

FINE-ART GOSSIP.

ONE of the greatest attractions of the English share in the forthcoming Paris Exhibition is expected to be supplied by means of engravings from the Print Room, British Museum, which will be chosen by the Keeper of Prints and Drawings.

Thus an excellent opportunity offers of showing to the world the high position of this country in line and mezzotint engraving during the latter half of the last century; thus we may look for a noble gathering of the works of V. Green, M. Ardell, J. Dean, J. R. Smith, J. Grozier, R. Earlow, C. Turner, J. Heath, A. Raimbach, Strange, Woollett, &c. Our hopes of success in this matter depend upon the manner in which the by no means too large space disposable for the exhibition of such works is apportioned. A grand display of recent architectural drawings is talked of; this must fill much space. Will it honour the country so well as the prints?

A Correspondent, "R. J. L.," objects to the proposed alteration of the Academy Catalogues, and evidently forgets that those of the National Galleries in Trafalgar Square, South Kensington, and Edinburgh, the Sheepshanks Gallery, and its neighbours, are already catalogued in the continental mode, and that the Art-Treasures at Manchester and the International Exhibition were so treated in a degree which was unfortunate in being the result of a compromise between two systems. R. J. L. writes, "Supposing a picture to be numbered non-consecutively, in which room are you to look for a special number? You may find No. 400 next to No. 7, and so have to turn over the pages of the catalogue many minutes for the picture you desire to examine." He forgets, however, that we cannot examine a picture by means of the catalogues only, and that when a work is before us, its number indicates the alphabetically-placed artist's name in the list. We do not see that there is a greater difficulty in finding a work by this than any other method. By the continental system, the alphabetically-placed names form lists of each contributor's works; each man's productions are discoverable at a glance to the catalogue. Many visitors, like ourselves, go through an exhibition, examine every picture, and, whenever worthy works are unrecognized, or their subjects provoke inquiry, refer to the catalogue. To these even the sequential placing of names suffices, although, as nobody refers about every picture, and takes their names serially from the pages, this mode of ordering the contents has no advantage over that which is otherwise more useful. Practically, few persons who have not critical duties thus thoroughly examine a gallery. Except to those who make the most of their admission shilling, this is not a pleasant mode of proceeding; neither is it profitable, because of, say, a thousand works thus inspected, not twenty make impressions powerful enough to remain as many minutes. Attention and time would be better given to the few noteworthy pictures which, even if not sought by reference to the artist's name in the catalogue, are soon discovered on the walls. Something like a valid objection to the classification of pictures is made by those who say, "Given a noteworthy painting by an unknown man, or presume a visitor to be ill informed about the Art of his day, how is a particular picture to be found in the catalogue?" The answer is obvious. Its number stands in sequential order in the catalogues, whether they are disposed according to the old-fashioned English mode, or in that which obtains abroad with far larger and more complicated exhibitions than ours: e.g. the Paris "Salon de 1853" Catalogue, which was sold for a franc, records the titles of about 1,800 works, with their producers' names and addresses. This is a much more handy volume than our square, flapping, R. A. Catalogue, which costs a shilling. In 1861 the French catalogue sold for 1*fr.* 50*cs.*, and, in the same manner, described more than 4,000 examples.

The purchase in Hungary, and for the British Museum, of a large collection of interesting objects and works of Art is spoken of as more than probable.

The practice of improving or finishing the interiors of churches by means of polychromatic decorations is on the increase. It is desirable that it should be so. Accordingly, we state with satisfaction that, among other works of the kind now in hand, or recently done, are St. John's, Waterloo Road, built in 1823-4, where Elliston is buried, by Mr. Blomfield, and St. Mary the Virgin, Vincent Square,

Westminster, by Mr. Knowles. Mr. Blomfield is also engaged in the decoration of the reredos of Chester Cathedral, in glass mosaic. To Mr. Seddon's most successful works in Holy Trinity Church, Victoria Street, Westminster, we have already alluded.

With reference to the proposed competition for designing the new Town Hall at Manchester, it has been decided to obtain sketches for designs, "each not exceeding four drawings, and that from the sketches of designs thus submitted not fewer than six or more than twelve shall be selected, the architects of which will be invited to send in for competition plans and drawings for the Town Hall. Each architect so competing (except the one whose plans may be adopted) shall be paid 200*l.*, and in case it shall be desirable to retain as the property of the Corporation the plans of any architect, in addition to those adopted for the building, a further sum of 200*l.* shall be paid to the designer." It is understood that, before advertisements for designs in this matter are issued, the Committee will take the very sensible course of deciding upon the style of architecture to be adopted for the new building. We venture to recommend that in this, no less than in the matter of choosing between competing works, professional advice may be sought. The Institute of British Architects might probably be induced to appoint a selecting committee, or, if not so, to afford invaluable counsel on the practicable as well as the architectural merits of each competing design. It is hard for us to divorce the practical part of architecture from its decorative or "fine-art" aspect.

The Annual Report of the Dublin Society's School of Art has been made, and states as follows with regard to the progress of the school during the past year. There are 481 students, of whom 226 are ladies. The class of artisan-students to which we must look for appreciable results of the society's efforts comprises twenty-four clerks, fifteen teachers, nine lithographers, eight house-painters, seven carpenters, six builders, nine salesmen, five artists, five upholsterers, three stucco-plasterers, three engine-fitters, four architect's apprentices, three draughtsmen, three engineers, two printers, two cabinet-makers, two coach-painters, two leather-dressers, two shipwrights, three stone-carvers, and two bricklayers. The payments made by these persons for tuition amounted to more than 418*l.*

M. Legros, a painter whose works have attracted much attention and admiration at the Academy and French Gallery, has nearly completed a picture representing monks at dinner,—a very careful and scientific study in chiaroscuro and colour in a low key. The centre-point is supplied by a white table-cloth, as so frequent in Spanish and Italian compositions. So far as the eye of the spectator is concerned, chiaroscuro as well as colour radiate, so to say, from this. Browns and sober greys, which harmonize subtly with the middle tones of the flesh, and the silvery hue of some fish that lie on the dishes for the ghostly men's meal, unite in a graded whole about the brilliant mass; otherwise light and colour are diffused to the exterior of the design. Light falls sadly upon a monk, a penitent, who, according to the law of his order, stands and reads aloud during the repast of his brethren, who devoutly sit and feed in silence. In any fitting manner to describe this picture, which is but of moderate dimensions, is, to a certain extent, to criticize it. Our account must, however, not be taken as a criticism proper. We note the work itself, and others before produced by the same painter, not only for the sake of what is due to their undeniable value in Art, but especially on account of their significance in regard to the revival of the practice of chiaroscuro amongst us. While we are about it, it will do no harm, and may amuse the reader who is informed about chiaroscuro, and knows its position in England of late, also enlighten others on the subject, if we tell how a certain great painter, who was, we suppose, really an artist, in the good old sense of that term, once expressed his hopes that this development of Art might receive the attention of Royal Academies, and that instruction or other facilities would be afforded to the student. The reply

"Who is to teach it?" was also a question and an incisive epigram. Mr. Legros has also completed a small, roughly-executed, but very effective landscape—a French village on a hill, at twilight.

MUSIC AND THE DRAMA

ST. JAMES'S HALL.—MR. HENRY LESLIE'S CONCERT FOR CHARITABLE PURPOSES, on SATURDAY EVENING, JANUARY 8. Madame Lemmens-Sherrington, Madame McIntosh-Jolly; Mr. W. H. Cummings, Mr. Chaplin Henry, Mr. Santley, M. Nainton, M. Lemmens, and Mr. Henry Leslie's Choir. For this Performance the gratuitous services of the distinguished Artists who appear have been most kindly given.—Tickets, 6*s.*, 3*s.*, 2*s.*, 1*2d.*; at L. Cook, Addison & Co.'s, 43, New Bond Street; Keith, Frowd, & Co., 49, Cheapside; Austin's, 28, Piccadilly; and all Music-sellers.

NEW VOCAL MUSIC.

SACRED.

Mr. Hullah's *Sacred Music for Family Use: a Selection of Pieces, for One, Two, or more Voices, of the best Composers, Foreign and English* (Longmans & Co.), hardly fulfils the promise of its title; opening as it does with Handel's *Carillon* Chorus from 'Saul,' a scrap of stage-music (if there was ever such a thing) wrought into Oratorio for effect's sake, and which, when detached from the practicable chime, is at best poor. While we appreciate the amazing beauty and peculiarity of 'Saul' among Handel's oratorios, we feel that the very dramatic vivacity to be so cordially admired amounts to a difficulty in the way of "family use." The excerpt "How long?" from an anthem by Battishill, is better. We cannot admire the extracts from Weber's two tawdry Masses, nor have we any warm admiration for Méhul's 'Joseph,' a work which has always seemed to us to fall midway betwixt sacred opera and secular oratorio. In the psalm-tune from the Christmas *Cantata*, by Sebastian Bach, which follows, what can be made of such a translated line as this?—

Behold he lies in squalid stall!

Following the above comes Handel's "O had I Jubal's lyre," which wants more of vocal agility than, so far as we have found, is the habit of English families. We hardly recognize the music of Mr. Ellerton's 'Paradise Lost,' as meriting a place in a classical collection. The Quartett, p. 64, &c., has many false accents, which an educated gentleman, such as is Mr. Ellerton, should have spared his music. The Duett from Marcella's Thirty-third Psalm is better in keeping with the promise of the book's title; and so is the "Gratias" from Cherubini's second Mass—music requiring and repaying study and careful thought, but not (a competent accompanist granted) beyond the reach of "family" singers, such as happily are ours now-a-days. We are especially obliged to Mr. Hullah for his remembrance (pp. 112, &c.) of Mr. E. Fitzwilliam's music, and may also here recall, that to his care and research were due (during the series of concerts at St. Martin's Hall) the one only opportunity of serious work by a genuine English composer (too early called away) being carefully presented. *Susanna's bravura*, "If guiltless blood," (one of Handel's most daring and contrasted songs) cannot be accredited for "family" use. To the final movement the organ is indispensable. Neither can we think Cherubini's 'Ave Maria,' to which a family clarionet *obligato* is indispensable, more wisely chosen; less still the judgment-scene from 'Solomon.' In brief, specious, and written with experience, as is Mr. Hullah's Preface, we fail to find either his title or its professions borne out by the music assembled in this very handsome volume.

Music for the Church Service and Home Circle. Composed, collected and arranged by Edmund J. Chipp (Ewer & Co.).—This is a collection not unlike other collections. Dr. Chipp, however, commands more power as a real composer than do many who, on the strength of a bundle of chants, present themselves to the public as creators or regenerators.

The Soul's Aspiration. The English Version, by John Oxenford; composed for Solo and Chorus, with Orchestra or Pianoforte, by Julius O. Grimm, Op. 12 (Ewer & Co.).—This seems to us a copy of Mendelssohn's *Cantata*, 'Sons of Art,' executed not so much with dilution as with extension.

We have Boosey & Co.'s *Original Anthems*. Nos. 1, 2, by Mr. Henry Smart; No. 3, by Mr. J. L. Hutton; No. 5, by Mr. J. Barnby. The best of our contemporaries have been clearly here set to work, and the sacred text has not been ill set, though variety and enterprise are, in a great measure, impossible under the circumstances.—With these we may announce the *Canticles of the Church of England, pointed for Chanting, and Set to Appropriate Chants, written by the most Eminent Composers*. Edited, compiled and arranged by W. H. Birch (same Publishers). There is no end of collections like to these, and they rely for acceptance on clergymen or churchwardens.—Mr. William Frederick Taylor contributes an anthem, "Hear my Prayer" (Sinclair & Co.), and a *Christmas Hymn*, "Hark the Herald Angels" (Boosey & Co.). In any event the ritual of our Church of English worship is substantially provided with music, "to fit every congregation," whether the same be Protestant or Puseyite. So it should be.

To those who love Roman Catholic music we cannot do better than recommend Noël: *Chant des Religieuses*. Poésie de Jules Barbier, Musique de Charles Gounod (Paris, Choudens). There is here the true smoke of the incense,—the true genuflection at the altar's foot,—in brief, the true Roman Catholic humour. The same may be said of M. Gounod's vocal *O Salutaris* (Schott & Co.), and of his *Hymne à Sainte-Cécile* (Paris, Le Beau),—an offertory for violin alone, with orchestra.

SECULAR.

Chappell's *Vocal Library of Part-Songs, &c.*, No. 13, contains *Sylvan Hours: a Pastoral Scene for Six Female Voices*, written by J. F. Waller, LL.D., and composed by Joseph Robinson. Half-a-dozen "white voices" (to use the French designation) are not the easiest squadron in the world to manoeuvre. Mr. Robinson, however, has grouped them very fairly. His *Cantata* is throughout elegant, as, unless memory deceives us, is other vocal music from his hand that we have seen.—*Cri-puscule, Mélodie*,—*Stances*, Poésie par Mlle. Louise Bertin,—*Tombez, mes ailes, Romance* (Paris, Choudens), are three of M. Gounod's latest melodies. The first we like the best. In the other two the writer may be said to have "noddled" into that monotony to which his notorious facility every now and then tempts him. But few writers who have produced so rapidly as M. Gounod have been so even in the quality of their music.—The titles of one or two English songs may next be transcribed—*Faithless Robin and Something Telling*, by Louisa Gray (Metzler & Co.).—*The Wind Goes By* (Duncan, Davison & Co.), by Henry Charles Banister,—*Stars of the Summer Night* (Longfellow's often-set serenade), by D'Oyly Carte (Rudall & Co.).—*Lovely Spring*, by William Coenen (Ewer & Co.), is more substantial as music in the German style.—*Six Songs*, the words by Burns, Moore, and Barry Cornwall, by John Gledhill (Augener & Co.), are carefully made, though the individuality they reveal is not great.—*Will he come?* (the charming words by Adelaide Anne Procter), *If doughty deeds my Lady please—Sweet day, so cool—A weary lot is thine—Thou art lost to me—* are five new songs by Mr. Sullivan (Boosey & Co.). The settings of Herbert's and Scott's words are the best. The fifth song is poor, but then the words are so; and among the characteristics and qualities from which every one is justified in drawing the most hopeful auguries as to the future of the composer, none is more marked than the certainty with which, as a writer for the voice, he rises in proportion to his responsibilities. No one has set Shakespeare's lyrics so well as he. These five songs are welcome, as cheerfully closing another year's weary record of paper wasted by musicians, and patience strained to its utmost by those who have to give an account of the same.

DRURY LANE.—Mr. Walter Montgomery has appeared in the character of *Hamlet*, and, by the importance which he has himself claimed for the effort, has challenged criticism. That the young artist had intended a demonstration was evident by the manner in which he had resolved on giving more than usual prominence to the part. One of

the first means employed was the invention of new business, and the consequent production of new effects. Here Mr. Montgomery seems to be emulous of the reputation of Mr. Barry Sullivan, who is constantly on the look-out for a new reading or a new attitude, and sometimes happily hits on a novelty that will stand the test of after-reflection. In this manner, Mr. Montgomery evidently thinks that he may assert his originality, and certainly shows that he desires to think out the character for himself. But it is not enough that tradition should be thrust aside, and arbitrary renderings substituted; it is also requisite that what is new should be judicious, otherwise what have been put forth as the claims of genius are disproved as not in accordance with judgment, which always accompanies true genius, whence the highest works of the latter are uniformly found to contain the laws by which subsequent efforts are guided. Tradition is for the most part the result of the action of genius from time to time on the performance of dramatic character, and is composed of the prompter's successive jottings, duly entered in his book, of the different interpretations given by the greatest artists of the same parts. Some of these, after trial, are dismissed; others are retained. Tradition accepts the eclectic determination ultimately arrived at as the well-sifted product of a long and artistic process, which has received the acquiescence of a multitude of minds, and stood the test of painful experience. A character performed in accordance with the directions thus given has already undergone an immense amount of elaboration, to which, in many instances, it would be dangerous to add. In the first act Mr. Montgomery introduced business, in his interview with the Ghost, which indicated intelligence and feeling, and was so far commendable; but it may be questioned whether it was not in that minute style which is rather avoided in great works of art, as out of harmony with their character. A similar objection might be taken to his tearing out the leaf in the book he is reading, which treats irreverently the infirmities of age. But when, in telling Claudius the plot of "the mouse-trap" play, he rises and rudely seizes on the king, there can be no doubt that the actor's ingenuity has run riot and violated taste, without anything in the text to suggest, or in the remotest degree to justify, the innovation. Besides, it anticipates the real effect of the scene, when the conscience of the king is awakened, and reveals of itself his "occulted guilt." It is, moreover, in contravention of Hamlet's own declared mode of action in his directions to Horatio, which, with the over-caution that is the chief characteristic of his conduct, it is not likely that he would have voluntarily overstepped. Sure we are that such an incident in the scene was never contemplated by Shakespeare himself. We are therefore more inclined to judge of Mr. Montgomery by the manner in which he managed the traditional business, than by the novelties which he ventured to introduce. If an artist does the former better than his predecessors, we can readily appreciate the degree of his merit. Happily for Mr. Montgomery, we can praise his general excellence, and accredit him with the possession of elocutionary powers which he knows well how to display to the best advantage. His *Hamlet* is a thoughtful, elegant piece of acting in the main, and requires no such eccentric means of securing attention as in some passages Mr. Montgomery had persuaded himself to employ, and which speak more for an actor's vanity than for his judgment.

HOLBORN.—A new farce has been produced here. It is entitled 'My Turn Next,' and taken from a French piece called 'Un Tisau d'Horreurs,' by Mr. T. J. Williams, the author of 'Ici on parle Français,' who has adapted it with skill. The little drama is mainly valuable on account of its principal character, which is sustained in Paris by the celebrated Bernard Léon, and here by Mr. Belmore. The part is one essentially of low comedy; but Mr. Belmore condescends with grace and is effective with ease. He represents a village apothecary, plagued with a vixen of a wife, who he believes had many times been previously married, and who consequently fears for his own life under the harsh

treatment which he suffers. *Taraxicum Twitters* (such is the name of the poor wight) trembles with the apprehension that the lady is a systematic poisoner. Anonymous correspondents suggest, also, that there are substantial reasons for his worst fears. The principal scene is a dinner in the shop parlour, Mrs. Twitters (Miss Bessie Foote) at the head of the table. Twitters is excessively cautious. Everything that his wife cuts for him he hands over to Tim Bolus, his assistant (Mr. Willmott). Twitters is a man whose imagination is greatly excitable, having been a constant reader of romances, and who communicates his terrors to Tim. The changes in both are admirably assumed, and the scene between them is excessively ludicrous. The principal agent in producing these terrors is Peggy, the housemaid, whose peculiarities are effectively brought out by Mrs. Raymond. An explanation at the end sets all things to rights. Mrs. Twitters had indeed been previously married, but once only. Her husband, who was a scamp, had borne many names, which had led to Peggy's persuasion that her mistress had had many husbands. The piece, well acted as it is, was decidedly successful.

MUSICAL AND DRAMATIC GOSSIP.

At Saturday's *Crystal Palace Concert* was given M. Gounod's 'Noël,' a canticle for two female solo voices, with chorus of women, in no respect, as a composition, equalling its writer's bass solo 'Nazareth,' written for the same situation,—though stately and tuneable in melody, and, like all its writer's Roman Catholic music, having a certain pomp of style which gives it colour and character. As the other offering for the time, Herr Manns produced the 'Christmas Cantata,' by Mr. G. Macfarren,—one of his least cheerful works, the dreariness of which can hardly be better appreciated than by comparing it with his 'May Day,' including its elegant "roundel." It is curious that one so skilled as he is should be so carelessly unequal in the quality of the ware he produces. There is little music more ingenious, there is little drier, than some of his; self-control being apparently denied to him, without let or hindrance.—The amateur societies (among which that at Brixton takes a high place) are beginning their winter season. The "Civil Servants" are about to give a charity concert.—The *Schubert Society* is on its feet again.—There is news from every corner of England of life and effort; and not the least noticeable fact is that our public schools, where a quarter of a century ago the idea of the art would have been scouted with hissing and reproach, as so much effeminate nonsense, seem now unable to break up without a concert, which, to judge from reports, is mostly made up of good music, not ill performed.

The *Orchestra* states that Signor Bottesini has been engaged by Mr. Gye to conduct the orchestra of the Royal Italian Opera on the "off-nights," the manager intending to give nightly performances. If so, it is to be hoped that he will have a double chorus, or else double the pay of the over-taxed functionaries, who will be called on to appear six times in the week.

The *Observer* announces the engagement of Mdlle. Nilsson at Her Majesty's Theatre.

In reply to a Correspondent, regarding the subscription set on foot in behalf of Mr. H. Phillips, it may be stated that communications are to be addressed to Addison & Co., 210, Regent Street. The Phillips Committee would best serve its purpose by making known its existence more widely than it has done.

It appears that the *Musical Society* will recommence operations, as usual, next year, under the able conductorship of Mr. Mellon.

A version of 'Les Dragons de Villars' is advertised at the Oxford.

'The Damnation of Faust,' by M. Berlioz, has, according to the *Gazette Musicale*, had a great success at Vienna. It contains some of its writer's best and worst music.—'Don Bucefalo' has been revived at the Italian Opera House in Paris.—Miss Laura Harris, one of Mr. Mapleson's company, has been singing at the Athénée, and also in Herr Joachim's company, at Bordeaux.—The

Conservatoire Concerts, under the inefficient presidency of M. Georges Hainl, have recommenced.—Mdlle. Bloch, one of the clever young ladies from the Conservatoire, to whose preparation and accomplishments nothing analogous exists in this country, has adventured the tremendous part of *Fides* (only once, and once for all, represented by Madame Viardot) at the Grand Opéra.—Signor Verdi's 'Don Carlos' is to be ready in January.—That ridiculous opera by M. Monpou, 'La Chaste Suzanne' (which brought pretty Madame Thillon forward at the Théâtre Ventadour, years ago), is to be revived, we see, at the Fantaies Parisiennes. Another three-act work, announced as coming there, will bear the odd title of 'Les Legendes de Gavarni.'—M. Carvalho is to give more new operas by unknown men than can be enumerated (and not without a stronghold of hope in the 'Romeo and Juliet' of the composer, whose European acceptance is due to his theatre).

Franz Schubert has been served up as the subject of an opera at the Friedrich-Wilhelmstadt Theatre at Berlin.

The European musical events of the year may be described as under:—At home, the revivals of 'Iphigenia in Tauris' and 'Le Nozze,' the success of Mr. Benedict's 'Legend of St. Cecilia,' of Mr. Sullivan's Symphony and serious Overture, and the real impression made by Herr Wilhelmj. The Crystal Palace has kept up its reputation as giving the most interesting and best-executed orchestral concerts within reach, to the great discredit of our London societies. The attempt to popularize Schumann's music has been earnestly continued. We can but attribute such success as has attended this to the wretched dearth of modern music in Germany. No new singer who deserves to bear the name of an artist has appeared, save Mdlle. Orgeni. The stir made in our Royal Academy of Music has been sufficiently commemorated. On the whole, the year just over, though busy enough, cannot be called a rich one.

Attention has been properly drawn by a contemporary to the objectionable practice adopted at some theatres of receiving ladies as actresses who voluntarily offer themselves to fill specific situations without requiring any salary, and others who even pay for permission to perform. It is stated that the practice has been borrowed from the French stage; but the fact, if one, is not sufficient to justify a practice which all must see is fraught with serious mischief, both to individuals and the national theatre in general. It is obvious that the remedy lies in the hands of managers; but, unfortunately, they appear to believe that their interest is identified with the evil system. Ultimately, however, they will discover that in this, as in other cases, real and fancied interests are not identical. The stage cannot but be degraded by such a practice, and it will be soon found that its profitable working is dependent on its moral conduct. At the back of this irregular practice are, of course, those who can afford to subsidize the deficiencies of voluntary candidates, and whose connexion with the stage, though it may be deemed by some candidates an honour, is indeed the very reverse. For every such indirect contribution to the treasury, the theatre that is open to such corruption suffers a corresponding loss, in the disgrace and shame that necessarily supervene on its private and public character.

The proposed transfer of Mr. Belmore's services to the Adelphi, and that of Mr. Toole's to the Holborn Theatre is, we find, no longer entertained; but Mr. John Clarke's engagement at the former house will, it is said, commence at Easter.

MISCELLANEA

Exhibition of Portraits.—Referring to the notice of the National Portrait Exhibition in the last *Athenæum* (page 846), and agreeing with the suggestions therein contained, I wish further to direct attention to the advisability of publishing, in connexion with the official catalogue, some remarks respecting the history, authenticity, and state of the pictures exhibited. This would be an ungracious office for the Committee to undertake; but the services of some gentleman specially qua-

lified for the task might perhaps be secured to furnish a few pages of supplementary notes, which would be very welcome to the public, though such notes should expressly be declared to carry with them only the authority or individual reputation of the writer. Mr. Scharf was kind enough to draw up an excellent sort of short-hand Guide to the last Exhibition for his friends and the members of the Archaeological Institute, and there is no one who could be better trusted to perform such a service for the next Exhibition, or whose opinions would be received with greater respect. I wish also to suggest, that where an original picture of a distinguished person cannot be procured, an engraved portrait, if there is one, should be exhibited. Engravings exist of many pictures that, having gradually mounted from the drawing-room to the garret, have at last disappeared altogether, or of pictures the present locality of which cannot be ascertained. For instance, to name only two from many, in the late Exhibition there were no portraits of Sir Robert Naunton or of Donne the poet. There are good contemporary engravings of both, which might have been obtained from the British Museum. Such engravings might be arranged on a screen, or in a separate compartment.

WALTER F. TIFFIN.

The Lunar Crater "Linné."—The following measures of the apparent "cloud" (?) over Linné may be interesting as showing that it exceeds the crater in size. The numbers in column four, headed Mag., are obtained by dividing the measures of the "cloud" by the measures of the standard spot Dionysius. The normal magnitude of Linné is 0.40 (Dionysius being unity), as determined by two independent methods. That the numbers in column five, headed Miles, are really greater than the extent of Linné, is evident when we consider that the true size of a lunar crater exceeds its apparent size in the proportion of the secant of its angular distance from the moon's centre. These numbers are not absolute, but only relative as compared with Dionysius by means of the numbers in column four. During the present lunation not the slightest trace of the crater has been seen. Dionysius, Lohrmann, 13.8 English miles; Linné, Schmidt, 5.6 English miles.

W. R. BIRT.

The Sensitive Plant.—In a letter of Dr. Sigerson's to the *Athenæum*, he states that the folioles of the Sensitive Plant were touched by him with a non-conductor, and exhibited no movement. The Sensitive Plant is a common weed here, and is at present, as in his experiments, in flower. I touched it with glass, sealing-wax, iron, and the hand, and in all cases found the usual movement, which also took place when the plant was gently blown on with the breath. No such difference as, on any electrical hypothesis, we should expect, existed between the sensitiveness of the ends and middles of the folioles. Another fact about the Sensitive Plant, which the electrical theory does not explain, is the closing of the leaves at night. Perhaps the more hopeful question would be, not "why do they shut?" but "why do they open?" And I may be permitted to guess that the solar rays in the morning, or the solar diffused light, throws the molecules of the folioles into some new condition, the result of which is their opening, and that such a molecular condition is destroyed by the vibration caused by touch. What this molecular condition is, perhaps we shall never know, or, if ever, through microscopic analysis. Dr. Sigerson's observation, that children affect the Sensitive Plant more than adults, I confirmed by comparing the effects of my own touch with that of a child of seven years' old, who affected the plant more powerfully than I could do.

W. E. HAMILTON.

Greytown, Nicaragua, Nov. 15, 1866.

TO CORRESPONDENTS.—J. R. T.—W. H.—C. H. R.—S. W. Y.—O. G. R.—M. B.—received.

Erratum.—P. 830, col. 3, B. "ones" read expression.

GIFT BOOKS, FOR NEW YEAR'S DAY.

TWO CENTURIES of SONG, comprising
Lyrics, Madrigals, Sonnets, and other Occasional Verse of the English Poets of the last 200 years, including those of Thirty Living Poets. By WALTER THORNBURY. With Critical and Biographical Notes. Illustrated by Original Pictures of Eminent Artists, drawn and engraved especially for this work. Price One Guinea, very handsomely bound, with a clasp.

An ILLUSTRATED EDITION of BISHOP
HEBER'S HYMNS. With upwards of One Hundred Designs, engraved in the first style of art, under the superintendence of J. D. Cooper. Price Half-a-Guinea, handsomely bound.

VARIA: Readings from Rare Books.
By the Author of 'The Gentle Life.' Reprinted by permission from the *Saturday Review*, *Spectator*, &c. Cloth extra, price 6s.

The ROB ROY on the BALTIC; a
Narrative of the Rob Roy Canoe on the Lakes and Rivers of Denmark, Sweden, Norway, and the Baltic and Black Seas. By JOHN MACGREGOR, Trin. Coll. Cambridge; Author of 'A Thousand Miles in the Rob Roy Canoe.' With numerous Illustrations, post 8vo. price 5s.

A LIST of BEAUTIFUL BOOKS,
Illustrated by Eminent Artists, and handsomely bound.

Milton's Paradise Lost. With Martin's Engravings. Large paper, 4to. 7s. 6d.; or morocco, 11s. 6d.

Early English Poems—Chaucer to Dyer. 100 Illustrations. 21s.

Pictures of Society, Grave and Gay. 100 Engravings. 21s.

Varia; or, Readings from Rare Books. 6s.

Poems of the Inner Life; chiefly from Living
Authors. Cloth gilt, 6s. 6d.

Sunday Chimes. By Henry Godwin, F.S.A. 6s.

English and Scotch Ballads. An extensive Collection. By Professor F. J. Child. 8 vols. 28s.

London: SAMPHSON LOW, SON & MARSTON,
Milton House, Ludgate-hill.

NEW YEAR'S GIFTS.

ENGLISH CHILDREN as PAINTED
by Sir JOSHUA REYNOLDS: an Essay. By F. G. STEPHENS, Author of 'Flemish Relics.'

With Fifteen Photographs, viz. :—

Simplicity. Boy with Cabbage-Node.
Lady Cockburn and her Children. A Gipsy Boy.
The Age of Innocence. Master Bunbury.
The Infant Johnson. The Strawberry Girl.
Lord Morpeth. Miss Frances Gordon.
The Children in the Wood. Moses in the Bulrushes.
Master Crews. The Sleeping Child.
Pick-a-back.

In 4to. price 21s. cloth, gilt edges.

"We are not sure that we do not like the photographs better than the original mezzotints. Mr. Stephens's Essay is the truest estimate both of Sir Joshua's merits and faults that we are acquainted with, and it is, moreover, thoroughly readable." *Fell's Mail Gazette.*

APOSTLES and MARTYRS: Brief

Meditations, in Prose and Verse, on the Acts of the Apostles. Selected from Chrysostom, Augustine, Calvin, Bishop Newton, Archbishop Sumner, and others.

With Twelve Photographs, viz. :—

St. Peter and St. Paul. Guido. Raising of Tabitha. Guercino.
The Beautiful Gate. Raffaele. St. Peter and the Angel. Hilton.
Death of Ananias. Raffaele. Elymas struck with Blindness.
Stoning of Stephen. Juanes. Raffaele.
Philip and the Eunuch. Rembrandt. Sacrifice at Lystra. Raffaele.
Conversion of St. Paul. Rubens. St. Paul at Athens. Raffaele.
St. Paul at Melita. Ant. Dier.

Being a Companion Volume to 'Salvator Mundi.' In small 4to. price 12s. 6d. cloth, gilt edges.

COPSEY ANNALS, preserved in
PROVERBS. By the Author of 'Village Missionaries,' &c. With Six Illustrations, price 5s. cloth.

"The five family histories here described are commendable in no common degree; full of a sweet and gentle spirit, without sickliness; religious in tone, and the high morals inculcated without a trace of such sectarianism as would exclude them from the fireside of church or chapel goer; not without nice touches of humour, clear of exaggeration. It must be a healthy pleasure to write—it is to read—such books for the young as 'Copsey Annals.'"
—*Athenæum*.

"A collection of tales strung together by a local thread of connexion. Some of these are excellent. It is a book much above the average of its class. The picture of the cottage home is given with a charming mixture of tenderness and humour."—*Guardian*.

A SEQUEL to 'MINISTERING
CHILDREN.' By MARIA LOUISA CHARLESWORTH. Crown 8vo. Two Steel Engravings, 5s. each.

"This volume is worthy to take its place side by side with the first series of 'Ministering Children,' of whose well-deserved popularity there is no need to speak."—*Record*.

Also, crown 8vo. Six Illustrations, 5s. cloth.

THE NINETY-FOUR THOUSAND
of MINISTERING CHILDREN: a Tale. By MARIA LOUISA CHARLESWORTH.

THE CHURCH'S YEAR: Hymns on

THE PALL MALL GAZETTE.—Setting aside
the Penny Papers, the circulation of the PALL MALL GAZETTE already
greatly exceeds that of any other Daily Journal (Morning or Evening), the
TIMES alone excepted.

OFFICE, 14, Salisbury-street, Strand.

THE PALL MALL GAZETTE.—NOTICE
to NEWSVENDERS.—The PALL MALL GAZETTE is Now Printed at
the New Premises in NORTHUMBERLAND STREET, STRAND, where
additional Machinery, capable of printing copies with great rapidity, has been
erected by Messrs. HOE & Co. The Publisher regrets the inconvenience to
which Newsvendors have too often been subject in consequence of his inability
to meet their demands promptly. It is hoped, however, that the resources of
the New Establishment will obviate all such difficulty in future.

OFFICE, 14, Salisbury-street, Strand.

THE PALL MALL GAZETTE.—Apart from
its sale as a London Evening Newspaper, the PALL MALL GAZETTE has a
Large Circulation in the Country. It is found peculiarly acceptable to Residents
in the Provinces who are desirous of receiving early every morning a Journal
which contains the Latest News of the previous day, and which comprises, in
addition to the ordinary contents of a Daily Newspaper, a large number of
Original Articles of various character.

The First Edition of the PALL MALL GAZETTE is published at 3 P.M., and a Second Edition is published
in time for despatch to the Country by post.

For the convenience of persons residing in the country subscriptions will be received by the Publisher; and a
single copy will be sent to any place out of London on receipt of three postage-stamps.

Terms (Inclusive of Postage).

CASSELL'S CHRISTMAS VOLUMES.

Illustrated by GUSTAVE DORÉ.

DORÉ'S MILTON. ("The book of the year."—Saturday Review.) ... £5. 0. 0

| | |
|---------------------------------|---------------------------------|
| DORÉ'S DANTE £2 10 0 | DORÉ'S CROQUEMITAINE ... £1 1 0 |
| DORÉ'S DON QUIXOTE ... 1 10 0 | DORÉ'S BARON MUNCHHAUSEN 1 1 0 |
| DORÉ'S BIBLE, Vol. I. ... 1 0 0 | DORÉ'S WANDERING JEW ... 0 15 0 |

The Saturday Review says, "Messrs. Cassell have devoted themselves to the work of giving the English book-buyer Gustave Doré in all the profusion of his prodigious pencil. This year, at any rate, may be pronounced to be the Doré year. We resist the too obvious solicitations of a sorry joke, but we hope it will be a golden year to those enterprising publishers, who send us the 'Bible,' with Doré illustrations, 'Dante,' with Doré illustrations, 'Paradise Lost,' 'Don Quixote,' 'Munchausen,' 'The Wandering Jew'—all in the same dashing and vigorous artist. Here are seven most sumptuous volumes, all handsomely printed, and with paper and type 'de luxe,' and all from the same artist and entrepreneur. They may be proud of each other."

CASSELL, PETER & GALPIN, London, E.C.; and Broadway, New York.

One Halfpenny per Page, Large Size.

CASSELL'S CHORAL MUSIC.

Edited and Marked by HENRY LESLIE.

In Weekly Numbers at Twopence, and in Monthly Parts at One Shilling.

No. I. ready January 9th, 1867; Part I. ready January 30th.

It is proposed to issue regularly, every week, a serial of carefully selected and marked Part Music, with occasional New Part Songs by the most eminent Composers of the day, and to publish it at such a price as will place it within the reach of every individual member of every Choral Society throughout the kingdom.

CASSELL'S CHORAL MUSIC will be printed in the clearest characters and on good paper, so that it may be read in choir with perfect ease; and this advantage of full-sized music will be secured to chorallists at the very low price of One Halfpenny per Page.

The Work will include the most celebrated compositions of the English Glee and Madrigal Schools, Motetts by the great Italian and German masters; and in addition to this, the Publishers have the satisfaction of announcing that they have secured the co-operation of Messrs. Benedict, Hutton, Henry Leslie, G. A. Macfarren, Pinsuti, and Henry Smart, who have undertaken to contribute original Part Songs, composed expressly for this Work.

The special distinguishing feature of CASSELL'S CHORAL MUSIC is, that the publication will be edited by a contain the Copyright Marks of Expression of Mr. HENRY LESLIE. The reputation—not only English, but European—of the famous Choir of which this gentleman is the leader, sufficiently attests the value of those expressional marks which such marvellous choral results have been obtained.

. Prospectuses for distribution will be supplied by the Publishers on application.

CASSELL, PETER & GALPIN, Ludgate-hill, London, E.C.

BENEDICITE.

This day, 2 vols. fcap. 8vo. 12s.

THE SONG OF THE THREE CHILDREN.Being ILLUSTRATIONS of the POWER, WISDOM, and GOODNESS
of the CREATOR.

By G. CHAPLIN CHILD, M.D.

The object of this book is to offer a Series of Illustrations of the Greatness and Beneficence of the Creator; and to show the special fitness of the Hymn "Benedicite" to arouse and express the devotional feelings which such contemplations suggest.

The commencement of a New Year is a favourable opportunity for subscribing.

BARTHES & LOWELL, Foreign Booksellers, 14, Great Marlborough-street, W.C.

Now ready, the New Edition, corrected throughout, in One Volume, cloth gilt, royal 8vo. price 38s.

SIR BERNARD BURKE'S (Ulster King-of-Arms)**PEERAGE AND BARONETAGE.**

Twenty-ninth Edition for 1867.

This Peerage and Baronetage is the only complete book of the kind extant. It gives the historical and genealogical account and present state of all the Peers and Baronets, with their armorial bearings engraved and described; it furnishes full details respecting all the Archbishops and Bishops and their families; it enters fully into the subject of precedence, and sets forth all the Rolls, Authorizations, and Usages, which regulate it; Foreign Titles borne by British Subjects; Peerages recently Extinct and Dormant; the Orders of Knighthood, with their Insignia depicted and explained; the List of Knights and Knights Bachelors; the Mottoes of all the Peers and Baronets, with Translations and Illustrations; and an Alphabetical List of the Seats and Mansions. The above are the main features of the work, and such a combined and immense amount of information as this book contains would be vainly sought for in any other Peerage or Baronetage past or present.

Just published, in One Volume, royal 8vo. price 2l. 2s., a New and Enlarged Edition of

SIR BERNARD BURKE'S (Ulster King-of-Arms)**EXTINCT, DORMANT, AND SUSPENDED
PEERAGES.**

Illustrated by Steel Engravings of the principal Arms.

In this New Edition the history of each title is continued to the present time; and the various dignities are traced down to their existing representatives.

Fourth Edition, complete in One Volume, royal 8vo. price 2l. 16s.

SIR BERNARD BURKE'S (Ulster King-of-Arms)**LANDED GENTRY OF GREAT BRITAIN
AND IRELAND.**

THOMAS PRICE, Secretary.

SCOTTISH UNION FIRE and LIFE INSURANCE COMPANY.

37, CORNHILL, LONDON.

NOTICE IS HEREBY GIVEN, that at the Forty-second Annual General Meeting of the Company, held at Edinburgh, on the 4th day of December, 1866, a DIVIDEND was declared out of the General Profits of the Company, at the rate of 12½ per cent. per annum. The Half-yearly Payment to account in July last having been at 5 per cent. only, the balance of 7½ per cent. will be paid on 2nd January, 1867, free of income-tax; and Proprietors resident in and near London can receive the same at the Office, No. 37, Cornhill, on that or any subsequent day, between the hours of 10 and 4 o'clock.

By order of the Board,
No. 37, Cornhill, Dec. 1866. F. G. SMITH, Secretary.

SUN FIRE OFFICE, LONDON.

Established 1710.

Managers.

CHARLES RICHARD POLLEY, Esq., Chairman and Treasurer.
The Right Hon. W. Beresford, Esq., Police Adjutant-General.
Walter Wyndham Burrell, Esq., Harry Chester, Esq., Samuel Pepys Cockerell, Esq., G. Wodehouse Currie, Esq., Russell Elliot, Esq., Harvie Morton Farquhar, Esq., Capt. H. G. Hamilton, R.N., William John Hamilton, Esq., Joseph Hoare, Esq., Henry R. Tomkinson, Esq., Sir James Weir Hogg, Bart., Police Adjuant-General, Henry E. Shaw Lefevre, Esq., Charles K. Littledale, Esq., Alfred Montgomery, Esq., Frederick Henry Norman, Esq., Edward Howley Palmer, Esq., Brice Hugh Pearce, Esq., Lambert Pole, Esq., Sir Henry Rich, Bart., Oswald A. Smith, Esq.

All persons insured in this Office, the Premiums on whose Policies fall due at the Christmas Quarter, are hereby reminded to pay the said Premiums, either at the Offices in Threadneedle-street, or Craig-court, Charing Cross, or at Oxford-street, corner of Vere-street; or to the Agents in the Country, on or before the 9th day of JANUARY, 1867, when the fifteen days allowed by this Office, over and above the time for which they are insured, will expire.

Insurances may be made for more years than one by a single payment, and in such cases there will be a discount allowed on the premium and duty for every year, except the first.

This Office insures Property in Foreign Countries, and the Rates are regulated by the nature of the risks.
The Duty paid to Government by the Sun Fire Office in 1865 amounted to 154,109l.

Special Announcement.

Great Reduction in the Terms for Policies of small amounts. No charge for Policy or Stamp.
Insurances now effected at the Reduced Rate of Duty, viz. 1s. 6d. per cent.

The Policies of this Company now extend to cover Losses occasioned by Explosion of Gas.

UNION ASSURANCE SOCIETY, FIRE AND LIFE.

51, CORNHILL (Corner of Finch-lane).

And 70, BAKER-STREET, Portman-square, London.
And in Bristol, Liverpool, Edinburgh, Dublin, Hamburg, Berlin, and Berne.

Instituted in the Reign of Queen Anne, A.D. 1714.

Directors, Trustees, &c.

James Bentley, Esq., Daniel Britten, Esq., Chas. Charrington, Esq., S. Preston Child, Esq., Beniah Drew, Esq., William Gilpin, Esq., John Hibbert, Esq., Edmund Holland, Esq., W. Burrows Lewis, Esq., J. Remington Mills, Esq., M.P., John Morley, Esq., John Rogers, Esq., Henry Rutt, Esq., George Spencer Smith, Esq., W. Foster White, Esq., Col. Wilson, A.J.D.

FIRE DEPARTMENT.

FIRE INSURANCES due Christmas-day should be paid within fifteen days from the 25th inst.

The Directors are ready to receive proposals for insuring property generally at equitable rates. All losses promptly and liberally settled.

LIFE DEPARTMENT.

This Office combines every advantage offered by any Assurance Company. Its great age and large capital afford perfect security; the Premiums are very moderate, and the Bonuses distributed have been unusually large. At the last Septennial distribution, the profits divided gave a Bonus of Two pounds per cent. per annum on the sum assured during that period; a result seldom equalled by any Company.

The Calculations for the next Division of Profits will be made up to June, 1867; and Insurances effected before the 31st inst. will participate in the ensuing Bonus.

CLEMENT J. OLDHAM, Secretary.

December, 1866.

FASHIONS FOR GENTLEMEN.
H. J. & D. NICOLL, Tailors to the Queen,
Royal Family, and the Courts of Europe.
Messrs. NICOLL have for inspection the following specialities for the season:
HUNTING COATS of Scarlet Milled Cloth; also of Milled and Treble Waterproof Devon and Melton Cloth.
OVERCOATS for DRIVING of Milled and Treble Devon and Melton Waterproof Cloth. These Coats are made with double-stitched edges and seams, in a new form with great style and neatness.
WATERPROOF DRIVING APRONS of Milled and Treble Devon Cloth, very handsomely finished, and lined either with Cloth or Fur.
OVERCOATS for the PROMENADE or Demi-Dress of light, warm, fine, soft Cloth, lined throughout with Silk quilted in Swans-down.
OVERCOATS, WRAPPERS for Evening or Travelling, of Waterproof-milled Pilot and Cheviot Cloth.
KEEPING JACKETS of their CELEBRATED Water-proof PORTSMOUTH PILOTS.
HUNTING BREECHES, Riding and Walking Trousers of Buckskin, and Angoras in great variety.
MORNING and EVENING SUITS for Dress or other special purposes.
OVERCOATS of WATERPROOF TWEED ONE GUINEA. Overcoats of Milled Melton, or Pilot Cloth, two, three, or four Guineas. For every article one fixed and moderate price is uniformly charged for cash payments. In each department garments are kept ready for immediate use, or made to order at a few hours' notice.
H. J. & D. NICOLL, 114 to 120, Regent-street; 22, Cornhill, London; 10, Mosley-street, Manchester; and 50, Bold-street, Liverpool.

with a delightful and lasting fragrance, by using
THE CELEBRATED UNITED SERVICE SOAP TABLETS,
4d. and 6d. each. Manufactured by

J. C. & J. FIELD, UPPER MARSH, LAMBETH.

Order of your Chemist, Grocer, or Chandler.

BREAKFAST.—EPP'S COCOA

(more commonly called Epp's) Homoeopathic Cocoa, as being
prepared and introduced by James Epp, the Homoeopathic Chemist
first established in England). The very agreeable character
of this preparation has rendered it a general favourite. For
breakfast no other beverage is equally invigorating and sustaining.
This Cocoa is used by thousands who never used Cocoa
before. "Cocoa stands far higher than tea or coffee," Dr. Haesall
says.—Sold in 1 lb., 4 lb., and 1 lb. packets.

WILLIAM SMEE & SONS respectfully

caution intending Purchasers of the "SMEE'S SPRING
MATTRESS, TUCKER'S PATENT," or "SOMMER TUCKER,"
against various imitations and infringements, preserving
somewhat the appearance of the Original, but wanting all its
essential advantages.

Each Genuine Mattress bears the Label "TUCKER'S PATENT,"
and a Number.

The "Smee's Spring Mattress, Tucker's Patent," received the
only Prize Medal of Honourable Mention, given to Bedding of
any description, at the International Exhibition, 1862, and
may be obtained (price from 25s.) of most respectable Bedding
Warehousemen and Upholsterers, and Wholesale of the Manu-
facturers, **WILLIAM SMEE & SONS, Finsbury, Moorgate
Railway Terminus, London, E.C.**

SAUCE.—LEA & PERRINS'

WORCESTERSHIRE SAUCE.

This delicious condiment, pronounced by Connoisseurs

"THE ONLY GOOD SAUCE."

Is prepared solely by **LEA & PERRINS.**

The Public are respectfully cautioned against worthless imita-
tions, and should see that **Lea & Perrins' Names** are on Wrapper,
Label, Bottle and Stopper.

ASK FOR "LEA & PERRINS" SAUCE.

*** Sold Wholesale and for Export, by the Proprietors, Wor-
cester: Messrs. CRONSE & BLACKWELL, Messrs. BARLAY
& SONS, London, &c.; and by Grocers and Oilmen universally.

tern TOOTH BRUSHES, and Penetrating unbleached Hair
Brushes, Improved Flesh and Cloth Brushes, and genuine Smyrna
Sponges, and every description of Brush, Comb and Perfumery.
The Tooth Brushes search between the divisions of the Teeth—the
hairs never come loose. Metcalfe's celebrated Alkaline Tooth
Powder, 8s. per box.—Address 120s and 131, OXFORD-STREET.

THE PERFECT SUBSTITUTE FOR SILVER.

The **REAL NICKEL SILVER**, introduced more than 30
years ago by **WILLIAM S. BURTON**, when PLATED by the
patent process of Messrs. Elkington & Co., is beyond all com-
parison the very best article next to sterling silver, that can be
employed as such, either usefully or ornamentally, as by no
possible test can it be distinguished from real silver.

A small useful set, guaranteed of first quality for finish and
durability, as follows:—

| | Fiddle Old Silver Pattern | Read Pattern | King's or Shell Thrad. |
|---------------------------------|------------------------------------|-----------------|---------------------------------|
| 12 Table Forks..... | £ 3. 0. 0 | £ 2. 0. 0 | £ 2. 0. 0 |
| 12 Table Spoons..... | 13 0 0 | 2 0 0 | 2 0 0 |
| 12 Dessert Forks..... | 1 4 0 | 1 10 0 | 1 12 0 |
| 12 Dessert Spoons..... | 1 4 0 | 1 10 0 | 1 12 0 |
| 12 Tea Spoons..... | 10 0 0 | 10 0 0 | 10 0 0 |

| 5 Sauce Ladles..... | 6 0 0 | 6 0 0 | 6 0 0 |
| 1 Gravy Spoon..... | 6 0 0 | 6 0 0 | 6 0 0 |
| 5 Salt Spoons, gilt bowls..... | 3 4 0 | 3 4 0 | 3 4 0 |
| 1 Mustard Spoon, gilt bowl..... | 1 8 0 | 1 8 0 | 1 8 0 |
| 1 Pair of Sugar Tongs..... | 3 8 0 | 3 8 0 | 3 8 0 |
| 1 Pair of Fish Carvers..... | 1 4 0 | 1 10 0 | 1 10 0 |
| 1 Butter Knife..... | 2 8 0 | 2 8 0 | 2 8 0 |
| 1 Soup Ladle..... | 10 0 0 | 10 0 0 | 10 0 0 |
| 1 Sugar Sifter..... | 3 8 0 | 3 8 0 | 3 8 0 |
| Total..... | 9 19 0 | 9 19 0 | 9 19 0 |

Any article to be had singly at the same prices. An oak chest,
to contain the above, and a relative number of Knives, &c. 2s. 15s.
Tea and Coffee Sets, Dish Covers and Corner Dishes, Cruet
and Liqueur Frames, &c. at proportionate prices. All kinds of re-
plating done by the patent process.

CUTLERY, WARRANTED.—The most

varied assortment of **TABLE CUTLERY** in the world, all
warranted, is on SALE at **WILLIAM S. BURTON'S**, at prices
that are remunerative only because of the largeness of the sales.

HEALTH RESTORED BY DU BARRY'S

FOOD to the stomach, nerves, lungs, and liver, curing
dyspepsia (indigestion), constipation, diarrhoea, acidity, palpi-
tation, sleeplessness, debility, wasting, cough, asthma, fever, con-
sumption, low spirits, 6,000 annual cures which had resisted all
medicine, including that of his Holiness the Pope. Cure No. 1,771.
—Lord Stuart de Decles, of many years of dyspepsia. No. 62,116.—
The Marchioness de Brabant, of seven years' indescribable agony
from dyspepsia, nervousness, low spirits, liver disorder and wasting
away.—Tins at 1s. 1d.; 1 lb., 2s. 9d.; 12 lb., 22s.; 24 lb., 40s. Du
Barry & Co., 77, Regent-street, London; also at Fortnum &
Mason's; and at 61, Gracechurch-street; 4, Cheap-side; 63 and 130,
Oxford-street.

IMPORTANT CAUTION.—Beware of the many unscrupulous

and more than shabby imitations to which, without authority,
Baron Liebig's name is most audaciously attached.

ALL THE YEAR ROUND,

and YEAR AFTER YEAR,

PARR'S LIFE PILLS

are used by thousands, who thus insure good health without pain,
trouble, or expense, and speedily any expense. This medicine may be
resorted to at any time. Good effects will result.

PEPSINE.—MORSON'S PEPSINE WINE.

—MORSON'S PEPSINE LOZENGES are perfectly
palatable forms for administering this popular remedy for weak
digestion.—Manufactured by T. MORSON & SON, 21, 23, 24,
